

Tariffs for 'public service obligations' and 'taxes and levies'

Period 2020-2023

The tariff terms and conditions established by the CREG decision dated 7 November 2019 shall apply from 1 January 2020 to 31 December 2023 inclusive.

The following tariffs for public service obligations and taxes and levies shall apply from 1 January 2020 onwards and may be updated during the regulatory period in line with the underlying regulations or pursuant to the agreement of 6 February 2018 regarding the procedures for approving:

- a tariff methodology for the electricity transmission system and networks performing a transmission function;
- tariff proposals and changes to tariffs and tariff levies.

1 TARIFFS FOR PUBLIC SERVICE OBLIGATIONS

1.1 Tariff for public service obligations concerning the financing of connections of offshore wind farms

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	0.1188
On 70/36/30 kV networks	0.1188
At transformer output to medium voltage	0.1188

Table 1: Tariff for public service obligations concerning the financing of connections of offshore wind farms

1.2 Tariff for public service obligations concerning the financing of green certificates (at federal level)

Tariff for public service obligations pursuant to the Royal Decree of 17 August 2013 amending the Royal Decree of 16 July 2002 on the establishment of mechanisms to promote electricity generated from renewable energy sources

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	9,0141
On 70/36/30 kV networks	9,0141
At transformer output to medium voltage	9,0141

Table 2: Tariff for public service obligations concerning the financing of green certificates (at federal level)

If the tariff is charged to a non-final customer, there is:

- no sliding scale discount;
- no maximum amount.

If the tariff is charged to a final customer:

- a sliding scale discount based on offtake range is applied, though only if a sectoral agreement or covenant (Kyoto) is in force:
 - 0-20 MWh/year: 0%
 - 20-50 MWh/year: -15%
 - 50-1,000 MWh/year: -20%
 - 1,000-25,000 MWh/year: -25%
 - >25,000 MWh/year: -45%
- the amount is capped at 250,000 € per consumption site and per year, though only if a sectoral agreement or covenant (Kyoto) is in force.

1.3 Tariff for public service obligations concerning the financing of the strategic reserve

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	0.0000
On 70/36/30 kV networks	0.0000
At transformer output to medium voltage	0.0000

Table 3: Tariff for public service obligations concerning the financing of the strategic reserve

1.4 Tariff for public service obligations concerning the financing of measures supporting renewable energy and cogeneration in Flanders

This tariff for public service obligations only applies to offtake in the **Flemish Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	-
On 70/36/30 kV networks	0.1609
At transformer output to medium voltage	0.1609

Table 4: Tariff for public service obligations concerning the financing of measures supporting renewable energy and cogeneration in Flanders

A sliding scale discount applies (but not to distribution system operators):

- 0-1,000 MWh/year: 0%
- 1,000-20,000 MWh/year: -47%
- 20,000-100,000 MWh/year: -80%
- 100,000-250,000 MWh/year: -80%
- >250,000 MWh/year: -98%

The discount percentage is a function of the range within which the total offtake for year Y-1 falls and is applied to the total offtake for year Y.

1.5 Tariff for public service obligations concerning the financing of measures promoting rational energy use in Flanders

This tariff for public service obligations only applies to offtake in the **Flemish Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	0.0000
On 70/36/30 kV networks	0.0000
At transformer output to medium voltage	0.0000

Table 5: Tariff for public service obligations concerning the financing of measures promoting rational energy use in Flanders

1.6 Tariff for public service obligations concerning the financing of measures supporting renewable energy in Wallonia

The first component of this tariff only applies to offtake in the **Walloon Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	-
On 70/36/30 kV networks	13,8159
At transformer output to medium voltage	13,8159

Table 6: Tariff for public service obligations concerning the financing of measures supporting renewable energy in Wallonia (first component)

A partial exemption may be granted from this first component under the provisions of Article 42bis of the Electricity Decree.

For more information about this exemption, please see <https://www.elia.be/en/customers/green-certificates-and-levies-tariffs/wallonia-partial-exemptions>.

The second component of this tariff for public service obligations applies to final customers who draw energy from the grid in the **Walloon Region** and who are entitled to the aforementioned exemption. The second component applies to the share of the exempt energy.

	Tariff (€/MWh exempted energy)
On 380/220/150/110 kV networks	-
On 70/36/30 kV networks	0.0000
At transformer output to medium voltage	0.0000

Table 7: Tariff for public service obligations concerning the financing of measures supporting renewable energy in Wallonia (second component)

2 TAXES AND LEVIES

2.1 Federal contribution

Elia levies the federal contribution pursuant to the Royal Decree of 27 March 2009 amending the Royal Decree of 24 March 2003.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	3,1428
On 70/36/30 kV networks	3,1428
At transformer output to medium voltage	3,1428

Table 8: Federal contribution

If the contribution is charged to non-final customers:

- Federal contribution + 0.1%;
- No exemption;
- No sliding scale discount;
- Contribution capped at €250,000 + 0.1% per offtake point and per year (not applicable to Distribution System Operators).

If the contribution is charged to final customers:

- Federal contribution + 1.1%;
- No exemption;
- A sliding scale discount based on offtake range is applied, though only if a sectoral agreement or covenant (Kyoto) is in force:
 - 0-20 MWh/year: 0%
 - 20-50 MWh/year: -15%
 - 50-1,000 MWh/year: -20%
 - 1,000-25,000 MWh/year: -25%
 - >25,000 MWh/year: -45%
- Contribution capped at €250,000 + 1.1% per consumption site and per year, though only if a sectoral agreement or covenant (Kyoto) is in force.

2.2 Levy for use of the public domain in Wallonia

This levy only applies to offtake in the **Walloon Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	-
On 70/36/30 kV networks	0.3378
At transformer output to medium voltage	0.3378

Table 9: Levy for use of the public domain in Wallonia

2.3 Levy compensating for use of public highways in the Brussels-Capital Region

This levy only applies to offtake in the **Brussels-Capital Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	3,5084
On 70/36/30 kV networks	3,5084
At transformer output to medium voltage	-

Table 10: Levy compensating for use of the public road network in the Brussels-Capital Region

2.4 Levy for taxes on pylons and trenches in Flanders

This levy only applies to offtake in the **Flemish Region**.

	Tariff (€/MWh net offtaken)
On 380/220/150/110 kV networks	0.1441
On 70/36/30 kV networks	0.1441
At transformer output to medium voltage	0.1441

Table 11: Levy for taxes on pylons and trenches in Flanders
