

CAPACITY REMUNERATION MECHANISM (CRM)

FUNCTIONING RULES (Version 6)

Proposal from ELIA for the public consultation

21 November 2026

1	INTRODUCTION	13
2	GENERAL PROVISIONS	16
2.1	ADOPTION, APPROVAL AND AMENDMENT	16
2.2	INTERPRETATION	16
2.3	COSTS RELATED TO THE CRM ACTOR'S PARTICIPATION IN THE CRM	17
2.4	CONTRACTUAL RELATIONSHIP WITH OTHER MARKET PARTIES	17
2.5	COMMUNICATION	18
2.5.1	NOTIFICATIONS	18
2.6	CRM IT INTERFACE AND IT REQUIREMENTS	18
2.6.1	Preliminary access to the CRM IT Interface	19
2.6.2	Prequalification module of the CRM IT Interface	19
2.6.3	Financial security module of the CRM IT Interface	20
2.6.4	Auction module of the CRM IT Interface	20
2.6.5	Secondary market module of the CRM IT Interface	21
2.6.6	Unavailability of the CRM IT Interface	21
2.7	DATA ACCURACY	21
2.8	CONFIDENTIALITY	22
2.9	DATA PROTECTION	23
3	DEFINITIONS	25
3.1	GENERAL DEFINITIONS	25
3.2	ABBREVIATIONS	44
4	SERVICE TIME SCHEDULE	47
4.1	INTRODUCTION	47
4.2	KEY MILESTONES	48
4.3	TIMINGS PER OPERATIONAL PROCESS	52
4.3.1	Prequalification Processes	53
4.3.2	Financial Security	59
4.3.3	Auction & Pre-delivery Control	60
4.3.4	Availability Obligation	60
4.3.5	Secondary Market	62
4.4	TIMINGS OF THE OPERATIONAL PROCESSES SPECIFIC FOR CROSS BORDER PARTICIPATION	64
4.4.1	Admission Process	64

4.4.2	Pre-Auction	64
4.4.3	Financial Security	65
5	PREQUALIFICATION PROCESSES	66
5.1	INTRODUCTION	66
5.2	PREQUALIFICATION PROCESS REQUIREMENTS	66
5.2.1	Preparation phase	66
5.2.2	Requirements prior to the submission of a Prequalification File	66
5.2.3	Requirements for the submission of the Prequalification File	68
5.2.4	Requirements for the renewal of a Prequalification File	84
5.3	REVIEW OF THE SUBMITTED INFORMATION	84
5.3.1	Application form	85
5.3.2	Prequalification File	85
5.3.3	Audits	87
5.4	VOLUMES DETERMINATION	88
5.4.1	Nominal Reference Power	88
5.4.2	Opt-out Volume	95
5.4.3	Reference Power	100
5.4.4	Eligible Volumes	100
5.4.5	Remaining Eligible Volumes	101
5.4.6	Secondary Market (Remaining) Eligible Volume	102
5.4.7	Fast Track Volume	102
5.5	PREQUALIFICATION RESULTS NOTIFICATION	102
5.6	EVOLUTION IN TIME OF THE SUBMITTED INFORMATION	103
5.6.1	Data Management linked to Prequalification Process	103
5.7	NOTIFICATION TO THE CREG AND THE FEDERAL PUBLIC SERVICE ECONOMY	107
6	AUCTION PROCESS	111
6.1	INTRODUCTION	111
6.2	BID SUBMISSION	111
6.2.1	Bid compliance conditions	111
6.2.2	Bid submission via CRM IT Interface	114
6.3	AUCTION CLEARING	116
6.3.1	Adaptations and corrections of the Demand Curve	116
6.3.2	Grid constraints	120

6.3.3	Auction clearing methodology	124
6.3.4	Bid remuneration methodology	126
6.4	AUCTION RESULTS	126
7	CAPACITY CONTRACT SIGNATURE	129
8	PRE-DELIVERY CONTROL	131
8.1	INTRODUCTION	131
8.2	PRE-DELIVERY PERIOD DEFINITION	131
8.3	PRE-DELIVERY CONTROL MODALITIES	131
8.3.1	Moments of control	131
8.3.2	Total Contracted Capacity	132
8.3.3	Permit reports	132
8.3.4	Quarterly reports	133
8.4	PRE-DELIVERY CONTROL PROCESS	135
8.4.1	Step 1 - Pre-delivery Obligation	135
8.4.2	Step 2 - Missing Volume	136
8.4.3	Step 3 - Pre-delivery control penalties	139
8.4.4	Step 4 - Pre-delivery activity reports issuance and contestation	141
8.5	DELAYS ON INFRASTRUCTURE WORK	143
8.5.1	Trigger	143
8.5.2	Applicable operational procedure	143
8.5.3	Participation to Secondary Market	144
8.5.4	Penalties	144
8.6	PROCESS TO CHANGE FROM ADDITIONAL CMU OR VIRTUAL CMU TO EXISTING CMU	144
8.6.1	From Additional CMU to Existing CMU	144
8.6.2	From Virtual CMU to Existing CMU(s)	146
8.7	PROCESSES TO FOLLOW PRIOR THE START OF ANY TRANSACTION PERIOD	148
8.7.1	Declared Day-ahead Price	149
8.7.2	NEMO	149
9	AVAILABILITY OBLIGATION	150
9.1	INTRODUCTION	150
9.2	GENERAL PROVISIONS	150

9.3	DECLARATION OF UNAVAILABILITY AND SCHEDULED MAINTENANCE	150
9.3.1	Declaration of unavailability	150
9.3.2	Declaration of Scheduled Maintenance	153
9.4	AVAILABILITY MONITORING	155
9.4.1	Selection of moments of control	155
9.4.2	Declared Prices and Required Volume for CMUs without Daily Schedule	157
9.4.3	Obligated Capacity and Available Capacity determination	160
9.5	AVAILABILITY TESTS	166
9.5.1	Modalities	166
9.5.2	Determination of the Obligated Capacity and the Available Capacity	168
9.6	MISSING CAPACITY AND UNAVAILABILITY PENALTY	170
9.6.1	Determination of Missing Capacity	171
9.6.2	Unavailability Penalty calculation	172
9.6.3	Penalty escalation procedure	174
9.7	OVERCAPACITY AND OVERCAPACITY PENALTY	175
9.7.1	Overcapacity determination	176
9.7.2	Overcapacity penalty calculation	176
9.8	NOTIFICATION AND CONTESTATION	177
9.8.1	Monthly delivery activity report	177
9.8.2	Settlement of the Availability Obligation	178
9.8.3	Contestation	179
10	SECONDARY MARKET	180
10.1	INTRODUCTION	180
10.2	GENERAL PROVISIONS	180
10.3	CONDITIONS FOR SECONDARY MARKET PARTICIPATION	182
10.3.1	Conditions for Parties on the Secondary Market	182
10.3.2	Conditions for Exchanges	182
10.3.3	Conditions for CMUs	183
10.4	SECONDARY MARKET TRANSACTIONS REQUIREMENTS	183
10.4.1	Secondary Market transaction ID	185
10.4.2	Seller of an Obligation	185

10.4.3	CMU of the Seller of an Obligation	185
10.4.4	Transaction of the Seller of an Obligation's CMU	185
10.4.5	Buyer of an Obligation ID	185
10.4.6	CMU of the Buyer of an Obligation	186
10.4.7	Transaction Period	186
10.4.8	Secondary Market Capacity	187
10.4.9	Capacity Remuneration	190
10.4.10	Strike Price	190
10.4.11	Requirement of Financial Security	190
10.4.12	Version of the Functioning Rules applicable to a Transaction	190
10.5	SECONDARY MARKET TRANSACTION APPROVAL PROCESS	191
10.5.1	Notification of a Secondary Market transaction	191
10.5.2	Acknowledgement of receipt by ELIA	192
10.5.3	Determination of the Ex-ante or Ex-post status of the Secondary Market transaction	192
10.5.4	Processing of the Secondary Market transaction by ELIA	192
10.6	CONTRACTUAL IMPACT OF A TRANSACTION ON THE SECONDARY MARKET	196
10.6.1	General provisions	196
10.6.2	Contractual implementation of the transaction	196
10.6.3	Transaction impact for the Buyer of an Obligation	197
10.6.4	Transaction impact for the Seller of an Obligation	198
10.7	PENALTY ESCALATION FOR THE SECONDARY MARKET	198
10.8	TIMING AND DURATION	199
10.8.1	Secondary Market implementation	199
10.8.2	Access to the Secondary Market platform	199
10.8.3	Termination of the Secondary Market	199
10.9	HIGH-LEVEL IT REQUIREMENTS	199
11	FINANCIAL SECURITIES	201
11.1	INTRODUCTION	201
11.2	GENERAL PROVISIONS REGARDING THE FINANCIAL SECURITY OBLIGATION	201
11.2.1	Transactions for which a Financial Security obligation applies	203
11.2.2	Validity Period	204

11.2.3	Transfer of Capacity Contract	205
11.3	TYPES OF FINANCIAL SECURITIES	205
11.3.1	Common requirements for a bank guarantee and an Affiliate guarantee	205
11.3.2	Additional requirements for an Affiliate guarantee	206
11.3.3	Requirements concerning cash payment	206
11.4	SECURED AMOUNT	207
11.4.1	Required Level	207
11.4.2	Volume to be Guaranteed	208
11.5	CALL UPON THE FINANCIAL SECURITY	209
11.6	RELEASE OF THE FINANCIAL SECURITY	210
11.6.1	Release moments	210
11.6.2	Procedure for the release	211
12	PAYBACK OBLIGATION	212
12.1	INTRODUCTION	212
12.2	GENERAL PROVISIONS	212
12.3	MODALITIES OF THE PAYBACK OBLIGATION	213
12.3.1	Parameters of the calculation formula of the Payback Obligation	213
12.3.2	Payback Obligation formula	218
12.3.3	Stop-Loss Amount of a Transaction	219
12.4	PAYBACK OBLIGATION PROCESS	220
12.4.1	Stop-Loss Amount initial calculation	220
12.4.2	Calculation of the Actualized Strike Price applicable for the Payback Obligation calculation	221
12.4.3	Effective Payback Obligation calculation	221
12.5	NOTIFICATION AND CONTESTATION	223
12.5.1	Monthly delivery activity report	223
12.5.2	Settlement and invoicing of the Effective Payback Obligation	223
12.5.3	Contestation	223
13	LIABILITY AND FORCE MAJEURE	225
13.1	LIABILITY	225
13.1.1	Notification of the breach	225
13.1.2	Liability of CRM Actors and ELIA	225
13.1.3	Warranty clause	226

13.1.4	Interaction with other regulated contracts	226
13.1.5	Limitation of liability clauses in other contracts and third party rights	226
13.2	FORCE MAJEURE	226
13.3	DAMAGE OR ELIA WARRANTY EXCEEDING THE LIMITATIONS	228
14	DISPUTE RESOLUTION	229
14.1	INTRODUCTION	229
14.2	CONSULTATION PHASE	229
14.2.1	Specific or general consultation mechanism	229
14.2.2	Consultation procedure	229
14.3	CRM DISPUTES COMMITTEE	230
14.3.1	Objective and Rules of Procedure	230
14.3.2	Organisation	230
14.3.3	Procedures	230
14.3.4	Main characteristics of the procedure before the CRM Disputes Committee	232
15	FALLBACK PROCEDURES	233
15.1	INTRODUCTION	233
15.2	GENERAL PRINCIPLES	233
15.3	ADMISSION PROCESS	233
15.3.1	Submission of the application form by Indirect Foreign Capacity holders	233
15.3.2	Acknowledgment and compliance checks for Indirect Foreign Capacity Holders	234
15.3.3	Admission File	234
15.4	PRE-AUCTION PROCESS	235
15.4.1	Bid submission issue	235
15.4.2	Grid constraints issues	236
15.5	PREQUALIFICATION PROCESS	236
15.5.1	Application form submission	236
15.5.2	Acknowledgment and compliance checks	236
15.5.3	Prequalification File	237
15.5.4	Change of the Prequalification File submission	237
15.5.5	Notification from ELIA	238

15.6	AUCTION PROCESS	239
15.6.1	Bid submission issue	239
15.6.2	Grid constraints issues	239
15.6.3	Auction results issues	240
15.7	PRE-DELIVERY CONTROL	241
15.7.1	Pre-delivery test date notification for Existing CMUs	241
15.7.2	Quarterly reports submission to ELIA for Additional and Virtual CMUs	242
15.7.3	Pre-delivery control results	242
15.7.4	Contestation for Existing CMU	242
15.8	AVAILABILITY MONITORING AND TESTING	243
15.8.1	Notification of limitation on Available Capacity	243
15.8.2	AMT Moment identification	244
15.8.3	Declared Price and Associated Volume declaration	244
15.8.4	Notification of the Availability Test	246
15.8.5	Submission of the delivery activity report	246
15.8.6	Notification of downwards revision	246
15.8.7	Notification of three successful deliveries	247
15.9	SECONDARY MARKET	247
15.9.1	Notification issuance of a Secondary Market transaction	247
15.9.2	Acknowledgement of reception by ELIA	248
15.9.3	Approval or rejection of a Secondary Market transaction by ELIA	249
15.10	FINANCIAL SECURITIES	249
15.10.1	Submission of Financial Security	249
15.10.2	Release of Financial Security	250
16	TRANSPARENCY AND MOTIVATION	251
16.1	INTRODUCTION	251
16.2	GENERAL PRINCIPLES	251
16.3	PREQUALIFICATION RESULTS REPORT	251
16.4	AUCTION REPORT	252
16.4.1	Opt-out Volumes	252

18.1.7	ANNEX A.7: WAIVER DECLARATION CAPACITY RESERVATION AND ALLOCATION LINKED TO THE CMU (ADD REFERENCE)	302
18.1.8	ANNEX A.8: EXAMPLE MODELS OF PREQUALIFICATION FILES	304
18.2	ANNEX B: PRE-DELIVERY CONTROL	305
18.2.1	ANNEX B.1: PRE-DELIVERY PERIOD DEFINITION AND TOTAL CONTRACTED CAPACITY DETERMINATION	305
18.2.2	ANNEX B.2: IMPACT OF ADDITIONAL PRE-DELIVERY CONTROL ON CONTRACTED CAPACITIES ON ADDITIONAL CMUS	309

18.2.3 ANNEX B.3: CONTENT OF A QUARTERLY REPORT	310
18.2.4 ANNEX B.4: TEMPLATE FOR THE PERMIT REPORT	313
18.3 ANNEX C: AVAILABILITY OBLIGATION	315
18.3.1 ANNEX C.1: MAPPING OF INFORMATION IN AVAILABILITY PLAN TO UNAVAILABLE CAPACITY NOTIFICATION	315
18.3.2 ANNEX C.2: BASELINE METHODOLOGY: HIGH X OF Y	316
18.3.3 ANNEX C.3: BASELINE METHODOLOGY: DECLARATION	319
18.3.4 ANNEX C.4: SLA MTU DETERMINATION METHODOLOGY	322
18.3.5 ANNEX C.5: CORRECTIONS FOR PARTICIPATION IN FREQUENCY-RELATED ANCILLARY SERVICES AND REDISPATCHING SERVICES	324
18.3.6 ANNEX C.6: DECLARATION MODALITIES FOR (PARTIAL) DECLARED PRICES AND ASSOCIATED VOLUMES	327
18.3.7 ANNEX C.7: COMMUNICATION BETWEEN ELIA AND OTHER SYSTEM OPERATORS	330
18.4 ANNEX D: SECONDARY MARKET PROCESS	331
18.4.1 ANNEX D.1: SECONDARY MARKET EXCHANGE MANDATE FORM	331
18.5 ANNEX E: FINANCIAL SECURITIES	334
18.5.1 ANNEX E.1: STANDARD BANK GUARANTEE FORM ASSOCIATED WITH THE FUNCTIONING RULES [•]	334
18.5.2 ANNEX E.2: STANDARD AFFILIATE GUARANTEE FORM ASSOCIATED WITH THE FUNCTIONING RULES [•]	336
18.5.3 ANNEX E.3: STANDARD BANK GUARANTEE AMENDMENT FORM ASSOCIATED WITH THE FUNCTIONING RULES [•]	338
18.5.4 ANNEX E.4: STANDARD AFFILIATE GUARANTEE AMENDMENT FORM ASSOCIATED WITH THE FUNCTIONING RULES [•]	340
18.6 ANNEX F: TRANSPARENCY	342
18.6.1 ANNEX F.1: OVERVIEW OF THE OPT-OUT VOLUMES IN THE AUCTION REPORT	342
18.6.2 ANNEX F.2: OVERVIEW OF THE INFORMATION ON THE SUBMITTED BIDS IN THE AUCTION REPORT	343
18.6.3 ANNEX F.3: OVERVIEW OF THE INFORMATION ON THE SELECTED BIDS IN THE AUCTION REPORT	345

18.6.4 ANNEX F.4: OVERVIEW OF THE INFORMATION IN THE PRE- DELIVERY ACTIVITY REPORT	347
18.6.5 ANNEX F.5: OVERVIEW OF THE INFORMATION IN THE REPORT BEFORE THE START OF THE DELIVERY PERIOD	348
18.7 ANNEX G: DISPUTES	349
18.8 ANNEX H: APPLICATION OF PROVISIONS OF FUNCTIONING RULES TO CAPACITY CONTRACTS ALREADY CONCLUDED	361
18.8.1 Primary market Transactions concluded following the 2021 Auction	361
18.8.2 Primary market Transactions concluded following the 2023 Auction	362
18.8.3 Primary market Transactions concluded following the 2024 Auctions	362
18.8.4 Primary market Transactions concluded following the 2025 Auctions	363

1 INTRODUCTION

1. The current document constitutes the Functioning Rules of the Belgian Capacity Remuneration Mechanism (hereafter referred to as 'CRM') established by the Belgian Federal Commission for Electricity and Gas Regulation (hereafter referred to as 'CREG') in accordance with article 7undecies § 12 of the Law of 29 April 1999 on the organization of the Electricity Market hereafter referred to as 'Electricity Act'.
2. Every year, as per article 7undecies paragraph 12 of the Electricity Act, ELIA submits to CREG and to the Directorate-General for Energy proposed Functioning Rules by February 1 at the latest. ELIA and CREG publish the Functioning Rules established by CREG by May 15. The Functioning Rules only take effect after they have been approved by the King and have been published in the Belgian Official Gazette (Moniteur belge).
3. The Functioning Rules are to be considered in relation to other relevant documents in their version in force at the time of adoption of these Functioning Rules, including:
 - Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity;
 - The Electricity Act;
 - The following Royal Decrees:
 - Royal Decree of 28 April 2021 establishing the parameters used to determine the capacity volume to be provided, including calculation methods, and the other parameters necessary for organising auctions, as well as the method and conditions for granting an individual exemption to the application of the intermediate price cap(s) in connection with the Capacity Remuneration Mechanism;
 - Royal Decree of 21 May 2021 on the establishment of the eligibility criteria set out in article 7undecies, § 8, al. 1, 1° and 2°, of the law of 29 April 1999 on the organisation of the electricity market, with regard to the conditions under which capacity holders benefitting or having benefitted from support measures are entitled or obliged to take part in the prequalification process, and on the minimum threshold, in MW;
 - Royal Decree of 4 June 2021 setting out the investment thresholds, eligibility criteria for investment costs and the classification procedure; and
 - Royal Decree of 30 May 2021 determining the conditions and methods for overseeing the correct functioning of the capacity remuneration mechanism by the Commission for Electricity and Gas Regulation (CREG);
 - Royal Decree of 9 April 2024 determining the conditions and the modalities under which Indirect Foreign Capacities holders can participate to the pre-auction and prequalification procedures in connection to the Capacity Remuneration Mechanism.
 - The "Volume and Parameters" Ministerial Decrees;
 - The standard capacity contract, as approved by the CREG in accordance with article 7undecies, § 11 of the Electricity Act.
4. The Functioning Rules describe in detail the methodologies, rules and principles of the CRM. Most justifications are included in the design notes, consultation reports and the material

provided in the context of the WG Adequacy that are all published on the ELIA website¹. These documents can be considered as non-binding background information.

5. In accordance with article 7undecies paragraph 12 of the Electricity Act, the Functioning Rules are established in order to:
 - foster competition as much as possible in the Auctions;
 - avoid any market abuse or market manipulation, anti-competitive behaviour or unfair trade practice;
 - ensure the economic efficiency of the CRM in order to guarantee that the Capacity Remunerations provided are adequate and proportionate and that the potential negative effects on the good functioning of the market remain as limited as possible;
 - respect the technical constraints of the grid and take into account the disposals of the Code of Conduct regarding the submission and the treatment of the connection requests to the transmission system and the conclusion of Connection Contracts without prejudice to the technical limitations and obligations applicable to capacities connected to other networks.
6. Furthermore, article 7undecies paragraph 12 of the Electricity Act states that the Functioning Rules must, in particular, contain:
 - the eligibility criteria with respect to the right to participate in the Prequalification Process;
 - the Prequalification criteria and modalities;
 - the modalities for notifying the Opt-out Volume;
 - the Auction modalities;
 - the Availability Obligations and the obligations prior the Delivery Period for Capacity Providers and the related Penalties in case of failure to fulfil these Obligations;
 - the Financial Securities to be provided by the Capacity Providers;
 - the organization of the Secondary Market, at the latest 1 year before the 1st Delivery Period;
 - the modalities related to the exchange of information and the rules providing transparency on the CRM;
 - the latest date by which each Capacity Holder of Unproven Capacity must complete his Prequalification File with the concerned Delivery Points.
7. All indications of time in this document are expressed in Central European (Summer) Time (CE(S)T).
8. This document covers the following sections:

¹ [Capacity Remuneration Mechanism](#)

- Introduction (chapter 1)
- General Provisions (Chapter 2)
- Definitions (Chapter 3)
- Service Time Schedule (Chapter 4)
- Prequalification Process (Chapter 5)
- Auction process (Chapter 6)
- Capacity Contract signature (Chapter 7)
- Pre-delivery control (Chapter 8)
- Availability Obligation (Chapter 9)
- Secondary Market (Chapter 10)
- Financial Securities (Chapter 11)
- Payback Obligation (Chapter 12)
- Liability and Force Majeure (Chapter 13)
- Dispute Resolution (Chapter 14)
- Fallback procedures (Chapter 15)
- Transparency and Motivation (Chapter 16)
- Direct and Indirect Foreign Capacity Participation (Chapter 17)
- Annexes (Chapter 18)

2 GENERAL PROVISIONS

2.1 ADOPTION, APPROVAL AND AMENDMENT

9. The Functioning Rules are established by the CREG on the basis of a proposal by ELIA, which consults the market participants in advance in accordance with article 7*undecies*, paragraph 12 of the Electricity Act. The Functioning Rules shall take effect after they have been approved by Royal Decree and published in the Belgian Official Gazette (*Moniteur belge*).
10. All versions of the Functioning Rules are proposed by ELIA after consultation with market participants, and with a view to being established by CREG, in accordance with article 7*undecies*, paragraph 12 of the Electricity Act. Each new version of the Functioning Rules becomes effective and shall be immediately applicable, after its approval by royal decree and publication in the Belgian Official Gazette (*Moniteur belge*).
11. Unless otherwise mentioned, the provisions contained in the present Functioning Rules shall apply to Capacity Contracts already concluded at the time of their entry into force. Annex 18.8 indicates the provisions of previous versions of the Functioning Rules that remain applicable to Capacity Contracts already concluded.
12. The provisions in the Chapters 9 and 12 shall only apply from the start of the upcoming Delivery Period onwards, being 1/11/2026. Until that time, the provisions from the previous version of the Functioning Rules shall apply.
13. Certain provisions of the Functioning Rules anticipate changes to the legal regulatory framework that are not yet effective at the time of the establishment of the Functioning Rules.

It concerns the following provisions:

- the removal of the possibility for thermal generation facilities without Daily Schedule to submit a Declared Market Price (section 12.3.1.2); and
- the removal of the partial exemption of the Payback Obligation for Non-daily Schedule CMUs in the context of a partial activation (section 12.3.1.4).

These provisions indicate what happens in case the changes to the legal regulatory framework do not enter into force.

14. Any reference to legislation, regulations, directives, orders, instruments, codes – including the Code of conduct - or any other legal provision is to be understood as a reference to legislation, regulations, directives, orders, instruments, codes – including the Code of conduct - or any other legal provision as amended over time and in force at the time of the establishment of the present Functioning Rules.

2.2 INTERPRETATION

15. These Functioning Rules are written in French and Dutch, both are equivalent and to be considered as the original version. No precedence exists between these two versions. In addition, an English version has been drawn up by ELIA on the basis of the original version and is published on its website.

16. The definitions as set out in the Electricity Act and its implementing royal decrees apply to the Functioning Rules. For the purpose of the Functioning Rules, the list of definitions (included in chapter 3) completes the definitions of the Electricity Act and its implementing decrees.
17. References to ELIA in these Functioning Rules include, where relevant, a reference to the Foreign TSO. Where appropriate, and to the extent a reference to ELIA is intended to refer to the legal and regulatory framework applicable in Belgium, such reference shall be deemed to also refer to the legal and regulatory framework applicable to the Foreign TSO.
18. In the event of a contradiction between the provisions in the service time schedule (Chapter 4) or in the annexes (Chapter 18) and the provisions in the other chapters, the provisions in the latter shall prevail. The content of Chapter 1 is not binding.
19. Each Chapter contains an introduction which serves as a user's guide, contributing via an introductory explanation to a good understanding of each process. The introduction sections have no binding force. The introduction sections can only be relied upon to the extent that the Functioning Rules would need further interpretation, which can neither be found in the legislation, implementing royal decrees, nor in the mandatory provisions of these Functioning Rules.
20. As from the publication of the Functioning Rules on the website of ELIA, parties interested in participating in the CRM may contact ELIA by email (customer.crm@elia.be) with questions related to the interpretation of these Functioning Rules. ELIA must only answer to those questions that are within the scope of these Functioning Rules and are relevant. Any interpretation of the Functioning Rules by ELIA shall first be submitted to the CREG for approval. The questions and answers to these questions will be published on ELIA's website, unless confidentiality is invoked by the inquiring party and accepted by ELIA and the CREG. Foreign parties interested in participating in the Belgian CRM must contact their respective TSO with questions related to the interpretation of these Functioning Rules. Elia and the Foreign TSOs will discuss the interpretation of these Functioning Rules where needed.

2.3 COSTS RELATED TO THE CRM ACTOR'S PARTICIPATION IN THE CRM

21. ELIA does not remunerate the cost incurred by the Capacity Holder, the (Prequalified) CRM Candidate or Capacity Provider resulting from his participation in the CRM, whether his CMU has been selected or not in or as a result of the Prequalification and Auction process.

Participation by the Capacity Holder, the (Prequalified) CRM Candidate or Capacity Provider in the CRM does not grant any right or guarantee in respect of ELIA apart from what is set out by these Functioning Rules and, if applicable, the Capacity Contract.

2.4 CONTRACTUAL RELATIONSHIP WITH OTHER MARKET PARTIES

22. The CRM Actor informs the Grid User(s) or CDS User(s) for whom it acts to form a CMU of the scope and purpose of the Functioning Rules. The CRM Actor makes all reasonably necessary in the context of its contractual relations with such Grid User(s) or CDS User(s) so that the intervention of such Grid User(s) or CDS User(s) does not constitute an obstacle or difficulty to the implementation of the Functioning Rules.

23. The CRM Actor and ELIA ensure that their own mutual contractual relations are always based on the existence and proper performance of the requisite contractual agreements with the parties concerned who have concluded one of the other regulated contracts with ELIA or with another system operator within the Belgian Control Area or the Control Area of the Foreign TSO.

2.5 COMMUNICATION

2.5.1 NOTIFICATIONS

24. A notification refers to any written and electronic communication required to be given by a CRM Actor, ELIA or another entity identified under these Functioning Rules or the Capacity Contract.
25. Each notification is dated with the day of actual sending.
26. In case notifications have to take place through the CRM IT Interface as per these Functioning Rules, the fallback procedures described in chapter 15 shall apply if the CRM IT Interface is unavailable.
27. Apart from exceptions provided for under these Functioning Rules, all communications and notifications between a CRM Actor and ELIA shall be affected via the CRM IT interface.
28. Telephone calls are not considered as formal correspondence (whether in the context of the Functioning Rules or the Capacity Contract).

2.6 CRM IT INTERFACE AND IT REQUIREMENTS

29. ELIA sets up a CRM IT Interface in order to enable ELIA and the CRM Actors to perform the necessary actions in the context of the participation and execution of the CRM and in order to handle communication, including notifications, between parties.

The CRM IT Interface is a web based application. It does not require specific development from the CRM Actor's side and does not require any other software than commonly used internet browsers.

The CRM Actor shall, at its own expense, make sure to have the information technology and communication means required for the use of the CRM IT Interface and shall implement the necessary safety measures in its IT environment to prevent unauthorised access to the CRM IT Interface through its IT environment. The CRM Actor shall also take the necessary measures to ensure a back-up of the data and documents that he uploads onto the CRM IT Interface and that are made available by ELIA via the CRM IT Interface.

30. The CRM Actor may only use the CRM IT Interface in the context of and for the purpose of participation in and implementation of the CRM.
31. To facilitate the communication between all the CRM Actors, ELIA generates various IDs and makes them accessible for the CRM Actor via the CRM IT Interface.

32. The CRM Actor shall comply with the requirements and instructions for the correct use of the CRM IT Interface, and shall regularly ascertain any changes to and updates of the requirements and instructions.

ELIA has the right to modify the procedural requirements and/or technical requirements for the use of the CRM IT Interface, upon prior notice via the CRM IT Interface and ELIA's website at least one month before the application of the new requirements. In urgent cases, adjustments can be made without prior notice. In that case, ELIA sends a notification by email to the CRM Actor as soon as possible after the change is made.

33. For the actions required from the CRM Actor in the context of the Capacity Contract (e.g.: Availability Test trigger), ELIA will share the IT specifications no later than two months prior to the expected go live of the related action.
34. ELIA shall ensure that the CRM IT Interface is operational.
35. The CRM IT Interface is intended to be accessible 24/7, unless otherwise indicated. ELIA shall be entitled at any time to suspend or otherwise limit the availability of the CRM IT Interface from time to time, in whole or in part, in order to make any changes that would improve or extend its operation or to provide for its maintenance. Also, it cannot be guaranteed that access to or operation of the CRM IT Interface will be uninterrupted or free from errors, bugs, or technical failures, since the availability of the CRM IT Interface depends, inter alia, on the proper functioning of the Internet.
36. The fallback procedures that apply in case of maintenance, unavailability or other problems related to the CRM IT Interface are detailed in chapter 15.

2.6.1 Preliminary access to the CRM IT Interface

37. Capacity Holders can fill in the application form via a preliminary access to the CRM IT Interface. Once the application form is approved by ELIA (following the rules of section 5.3.1), each person mentioned as a "contact person" in the application form and for who a "role" has been indicated, receives a user ID by e-mail and is invited to create a password in order to access additional CRM IT Interface modules, such as the platform dedicated to the Prequalification File submission or to the Financial Security submission.

2.6.2 Prequalification module of the CRM IT Interface

38. In the event that the CRM Actor identifies a problem when submitting or modifying information to ELIA via the CRM IT Interface during a Prequalification Process, the procedures detailed in section 15.5.3 apply.
39. Three types of ID will be used by ELIA during the Prequalification Procedure to communicate with the CRM Actor: The Delivery Point ID, the CMU ID and the project ID. Those three ID are described in more detail in the 3 sections below.

2.6.2.1 Delivery Point ID

40. Whenever a new Delivery Point is created in the CRM IT Interface, a corresponding ID is generated by the CRM IT Interface. It is not strictly necessary to submit the Prequalification File to ELIA to obtain the ID; it is sufficient to include and save the Delivery Point in the CRM IT Interface. Once included and saved, the Delivery Point's ID is visible in the CRM IT Interface.

41. The ID of the Delivery Point does not change if the status of the Delivery Point switches from "additional" to "existing".
42. It is the responsibility of the CRM Actor to communicate this ID to the Grid User or to the CDS User in order for them to be able to include it in the Grid User Declaration or the CDS User Declaration.
43. To meet the specific requirements that a DSO may have regarding Delivery Points connected to a DSO grid or to a CDS itself connected to a DSO grid, the communications between a DSO and the CRM Actor regarding the Delivery Point are initiated by the CRM Actor before the submission of the Prequalification File which includes the Delivery Point. To initiate those communication, the CRM Actor needs the Delivery Point's ID. To get this ID, the process described in § 40 must be followed.
44. If a Delivery Point is participating for the first time in the Prequalification Procedure and is included in a CMU linked to an Investment File, its ID shall be retained by ELIA and subsequently supplied to any CRM Actor using the concerned CMU within the context of a Prequalification Procedure. When it is not the first time that a Delivery Point is participating in the Prequalification Procedure and that this Delivery Point is linked to an Investment File, the aforementioned ID of the Delivery Point shall be used by the CRM Actor in the concerned Prequalification File, after having been communicated by ELIA.

2.6.2.2 CMU ID

45. Each time a new CMU is created in the CRM IT Interface (as per section 5.2.3), a corresponding ID is generated by the CRM IT Interface.

2.6.2.3 Project ID

46. The project ID is the reference used in the communication between the CRM Actor, ELIA and the CREG regarding the Investment File.
47. Where a CRM Actor has submitted (or intends to submit) an Investment File to the CREG for its CMU and as part of its Prequalification File, it requests the creation of a project ID on the CRM IT Interface. Where, in the event that several CMUs are linked to a same Investment File (Linked Capacities), the CRM Actor has requested a project ID to be created for the first submitted CMU, it provides the Project ID received for the first CMU submitted in the Prequalification File of the other CMU(s).

2.6.3 Financial security module of the CRM IT Interface

48. Each time a new Financial Security is created in the CRM IT Interface, a corresponding ID is automatically generated by the CRM IT Interface.

2.6.4 Auction module of the CRM IT Interface

49. Access rights to the CRM IT Interface for the introduction of Bids are granted to the Prequalified CRM Candidate when the Standard or Specific Prequalification Process is successfully completed.

2.6.5 Secondary market module of the CRM IT Interface

50. The right of access to the CRM IT Interface related to the Secondary Market is granted once the conditions according to section 10.3 are fulfilled. The Prequalified CRM Candidate is authorized to access it according to the Secondary Market timing and duration (as per section 10.8).

2.6.6 Unavailability of the CRM IT Interface

51. If a maintenance of the CRM IT Interface is foreseen and causes an unavailability longer than twenty-four hours, ELIA informs all CRM Actors by e-mail at least five Working Days prior to the start of the foreseen unavailability and indicates the start date/time and the expected end date/time of the maintenance.
52. If ELIA encounters an unforeseen unavailability of the CRM IT Interface which prevents the CRM Actors to access the CRM IT interface for more than twenty-four hours, ELIA informs all CRM Actors concerned by the unavailability by e-mail about it and indicates the expected end date/time of the unavailability.
53. In case an IT issue causes an impact on the good running of a process for a CRM Actor and as a result this CRM Actor cannot respect the deadline related to that process, ELIA extends this deadline for the process in question by a specified number of Working Days. This extension is communicated to and applies for all CRM Actors, upon the condition that the problem blocks the access to functionalities of the CRM Interface or makes it dysfunctional. Otherwise, any CRM Actor remains liable for the delay.
54. In case of issues related to the quarter hourly metering data (missing data, communication problem,...), ELIA applies the standards and best practices applicable to other market processes (e.g.: balancing). This process do not apply in case of absence of quarter hourly metering data.
55. Finally, ELIA reminds that – independent of the communication channel used for the exchange of required information – it remains the CRM Actor's responsibility to respect the deadlines set in the relevant sections of the Functioning Rules. Obviously, in the event of a delay caused by the use of the fallback procedure, ELIA applies the extension of the related deadline as defined in § 53.

2.7 DATA ACCURACY

56. The CRM Actor shall promptly and correctly provide ELIA with all information required within the context of the CRM, in particular the information required under these Functioning Rules and the Capacity Contract.

The CRM Actor is at all times responsible for providing accurate, complete and up-to-date information to ELIA (including any information provided in the Bid(s)), and to ensure that this information remains accurate, complete and up-to-date during the entire CRM process (being the application form, Prequalification, Auction, Pre-delivery and Delivery Period) in accordance with the principles set out in these Functioning Rules, including in section 5.6. The CRM Actor also warrants and guarantees that it lawfully holds the information it transfers to ELIA and is legally entitled to transfer said information to ELIA.

57. ELIA regularly performs checks and has the right to audit (or have audited) all along the process all information provided by a CRM Actor. In the event that inaccurate, incomplete, out-of-date information or other inconsistencies are identified during a check or audit, the processes, penalties and sanctions as set out in these Functioning Rules shall apply, without prejudice to other remedies available to ELIA.
58. The CRM Actor shall verify the data that he introduces on the CRM IT Interface as well as the data that is prefilled on, generated by or communicated via the CRM IT Interface and shall inform ELIA without delay of any (alleged) errors or lack or absence of clarity. When the CRM Actor expects certain actions or information from ELIA and these are not communicated within the expected time, it shall inform ELIA as soon as possible.
59. ELIA performs an automatic verification on the information contained in or generated by the CRM IT Interface, but cannot guarantee that illogical or erroneous data will always be noticed as part of this verification. The CRM Actor may not assume that the lack of a response from ELIA implies that the data entered are correct, and shall carry out the necessary verifications as much as possible.

2.8 CONFIDENTIALITY

60. Information of a commercial, technical, strategic, financial nature, or other sensitive information that is not publicly known and that is commonly regarded as valuable and confidential, will be treated by ELIA, the CRM Actor and where relevant the DSO or Foreign TSO as confidential information. Such information shall not be communicated or disclosed to third parties unless:
 - communication or disclosure is mandatory in the context of the CRM (e.g., in the context of the communication with the CREG) or required under the transparency obligations under these Functioning Rules or by other legal or regulatory obligations; or
 - prior written permission has been obtained from the disclosing party; or
 - such information at the time of disclosure by the disclosing party to the receiving party is within the public domain, or after such disclosure becomes a part of the public domain through no fault of the receiving party; or
 - a party is called upon to testify in court, before the CRM Disputes Committee or in its relations with the competent regulatory, administrative and judicial authorities; or
 - communication of the information is essential for the performance of contracts concluded or to be concluded with suppliers of goods and services, including within the framework of the Capacity Contract or, with regard to ELIA, of its transmission system development, maintenance and operation tasks, if communication of the information is necessary for the proper functioning and integration of the market or in order to guarantee the safety, reliability and efficiency of the transmission system, provided that the recipient of this information undertakes to grant it the same degree of confidentiality as provided for in this clause; or
 - the information is already lawfully known by a party at the time of the communication and has not been communicated previously by the disclosing party, directly or indirectly, or by a third party, in breach of a confidentiality obligation; or

- the information, after being communicated, has been brought to the attention of the receiving party and/or its staff and agents by a third party, without breaching a confidentiality obligation with regard to the disclosing party.

In addition, ELIA is entitled to communicate or disclose the information in consultation with operators of other grids or within the framework of contracts and/or rules with foreign system operators, regional security coordinators/regional coordination centres or ENTSO-E, insofar as necessary and provided that the recipient of the information undertakes to grant it the same degree of confidentiality as ELIA.

61. This section is without prejudice to the specific legal and regulatory provisions relating to the confidentiality obligation applicable to ELIA.
62. ELIA and the CRM Actor shall take all reasonable measures to protect the secrecy of and avoid disclosure or use of confidential information of the other party. ELIA and the CRM Actor shall take the measures necessary to ensure that this confidentiality undertaking is also strictly observed by their employees, as well as by any person who is not an employee but for whom ELIA or the CRM Actor is nevertheless responsible to the other party and has received the confidential information on a strict need-to-know basis.
63. Each party retains full ownership of every information, even if it has been communicated to other parties. ELIA and the CRM Actor agree to notify the other in writing of any actual or suspected misuse, misappropriation or unauthorized disclosure of confidential information of the disclosing party which may come to the receiving party's attention.
64. The confidentiality obligation shall apply for up to ten years after the latest of the next moments, i.e. the end of the process (e.g., prequalification or auction) in which the confidential information has been exchanged or the end of a Transaction Period, in case a Transaction has been concluded.

2.9 DATA PROTECTION

65. In the context of the CRM, ELIA, the CRM Actor and where relevant the DSO or the Foreign TSO shall process personal data in accordance with the Data Protection Legislation. The definitions set out in the Data Protection Legislation are applicable to the corresponding terms in the Functioning Rules.
66. ELIA and the CRM Actor act as separate data controllers for the personal data that they process in the context of the CRM.
67. Information about the processing of the personal data by ELIA in the context of the CRM is set out in its privacy policy available on its website.
68. The CRM Actor, hereby:
 - warrants and guarantees that all personal data it provides to ELIA in the context of the CRM are accurate, complete and kept up to date, and that he shall inform ELIA without undue delay if he becomes aware that the personal data it has transferred are inaccurate, or have become outdated;
 - warrants and guarantees that he lawfully holds and is entitled to transfer these personal data to ELIA;

- warrants and guarantees that he (i) shall duly inform the data subjects concerned in accordance with Data Protection Legislation that their personal data may be transferred to ELIA in the context of the CRM, and that it shall hereby include a reference to ELIA's privacy policy, and (ii) shall provide ELIA, upon request, evidence demonstrating that the data subjects have been duly informed in accordance with this article.

3 DEFINITIONS

3.1 GENERAL DEFINITIONS

69. For reasons of completeness and informational purposes, the list of definitions hereunder also includes the relevant terms already defined in the Electricity Act, the Federal Grid Code or in the European legislation. For these definitions already provided under the Electricity Act, the Code of Conduct and the Federal Grid Code a non-official English translation is provided.

	Term	Definition
1	Access Point	As defined in article 2, § 1, 46° of the Code of Conduct, in accordance with its (Partial) Declared Prices for an access to the transmission grid. For an access to the ELIA Grid other than the transmission grid, or to a Public Distribution Grid: a point, defined by the physical location and voltage level, at which access to the ELIA Grid other than transmission grid, or to a Public Distribution Grid, is granted, with a goal to injecting or taking off power, from an electricity production unit, a consumption facility, a non-synchronous storage facility, connected to this grid.
2	Active Volume	The component of the Available Capacity measured as the part of a CMU without Daily Schedule that reacted to a market price signal in accordance with its (Partial) Declared Prices or that is reserved as balancing capacity, determined according to section 9.4.3.2.3.1.
3	Additional Capacity	The Capacity for which, at the time of Prequalification File submission, no representative Nominal Reference Power can be calculated based on quarter-hourly measurements or that is subject to a technical agreement in accordance with the connection process as defined in the Code of Conduct.
4	Adjacent European Member State	As defined in article 1er, §2,1° of the Royal Decree on "Indirect Foreign Capacity".
5	Adjacent Transmission System Operator (Adjacent TSO)	The Transmission System Operator of the Control Zone in which the Indirect Foreign Capacity is connected.
6	Admissibility Conditions	Conditions to be met by Indirect Foreign Capacities in order to be admitted to the Pre-auction. These conditions are set out in the "Indirect Foreign Capacity" Royal Decree.
7	Admission File	All documents and data that the Foreign CRM Candidate has prepared, updated (when required) and provided to ELIA and which are necessary for the proper and complete execution of the Admission Process.
8	Admission Process	The process taking place prior to the Prequalification Process to be followed by the Foreign Capacity Holder who wish to participate in the Pre-Auction before they can participate in the Auction.
9	Admitted CRM Candidate	A Foreign CRM Candidate that has passed the Admission Process allowing him to participate to the Pre-auction.
10	AMT Moment	A series of consecutive AMT MTUs.

11	AMT MTU	A Day-ahead Market Time Unit identified by the Availability Monitoring Trigger (AMT) during which a Day-ahead Market Price is defined and during which this market price exceeds the AMT Price.
12	AMT Price	The ex-ante defined price level identifying AMT MTUs for a Delivery Period.
13	Ancillary Services	As defined in article 2, § 1, 53° of the Code of Conduct.
	I	
	Manual Frequency Restoration Reserve (mFRR)	Frequency Restoration Reserve (FRR), as defined in Article 3 (7) of Commission Regulation (EU) 2017/1485 of 2 August 2017 establishing a guideline on electricity transmission system operation (SOGL), that can be activated manually.
14	Announced Missing Capacity	The minimum between the Missing Capacity and the Announced Unavailable Capacity.
15	Announced Unavailable Capacity	Limitation of Nominal Reference Power notified to ELIA before the period of unavailability according to § 515.
16	Associated Volume	For a Partial Declared Price, the volume the Capacity Provider is prepared to deliver with his CMU at that price as declared by him or, for the Declared Prices, the Nominal Reference Power.
17	Auction	As defined in article 2, 73° of the Electricity Act.
18	Availability Monitoring	The process to monitor whether the CMU's Available Capacity equals at least its Obligated Capacity during AMT MTUs as referred to in article 7undecies, § 12, al. 3, 5° of the Electricity Act.
19	Availability Monitoring Trigger (AMT)	The trigger identifying moments relevant for adequacy during the Delivery Period, during which Availability Monitoring can apply. It occurs when the AMT Price is achieved by the Day-ahead Market Price during at least one Day-ahead Market Time Unit.
20	Availability Obligations	The obligation of a CMU to have an Available Capacity that equals at least its Obligated Capacity during AMT MTUs or an Availability Test.
21	Availability Plan	As defined in article 3(70) of the SOGL.
22	Availability Ratio	The ratio that expresses the proportion of the CMU's Nominal Reference Power that is available taking into account the declarations(s) of unavailabilities as per section 9.3.1. This ratio is used to reduce the Payback Obligation, calculated according to section 12.3.1.4.
23	Availability Test	The test in which the CMU has to demonstrate its availability by actually delivering energy upon request of ELIA. During an Availability Test ELIA monitors whether the CMU's delivered energy equals at least its Obligated Capacity.
24	Available Capacity	The CMU's capacity that is considered as available as a result of the Availability Monitoring or the Availability Test. The Available Capacity can consist of both Proven Availability and Unproven Availability.

25	Balance Responsible Party (BRP)		As defined in article 2, 7° of Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing (EBGL) and listed in the register of Balance Responsible Parties.
26	Balancing Market		As defined in article 2, 2° of Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing (EBGL).
27	Baseline		The power used as a reference for calculating the volume of flexibility supplied at the Delivery Point. It evaluates the energy volume that the Delivery Point would have taken off is evaluated in case no Demand Side Response is activated.
28	Bid		The offer submitted by a Prequalified CRM Candidate in the Auction.
29	Bid Price		The price (in €/MW/year) at which a Prequalified CRM Candidate is offering a Bid in the Auction.
30	BRP Source		The Balance Responsible Party of the Access Point of the Grid User.
31	Buyer of an Obligation		The Capacity Provider taking over the rights and obligations resulting from the Capacity Contract of a Seller of an Obligation via a transaction on the Secondary Market.
32	Capacity		Power associated to a Delivery Point in accordance with article 1, §2, 4° of the Royal Decree on "Investment Thresholds".
33	Capacity Category		As defined in article 2, 84° of the Electricity Act. As determined in article 7undecies § 11 of the Electricity Act, the maximal duration for which the Capacity Provider receives a remuneration is 1-year or a maximum of 3-years, 8-years or 15-years.
34	Capacity Contract		The contract signed between a Capacity Provider and ELIA as referred to in article 7undecies § 11, al. 1 of the Electricity Act.
	I	Capacity Contract Duration	For Transactions on the Primary Market, the number of consecutive Delivery Period(s) that the Capacity Contract covers as stipulated in the Capacity Contract. For Transactions on the Secondary Market, the Capacity Contract Duration is defined in accordance with 10.4.7.
35	Capacity Holder		As defined in article 2, 74° of the Electricity Act. In these current Functioning Rules, a Capacity Holder is a (future) Grid User or CDS User, another entity a (future) Grid User or CDS User has designated (or will designate) through a Grid User Declaration or a CDS User for a Delivery Point connected to a CDS.
	I	Eligible Direct Foreign Capacity Holder	The Capacity Holder as defined in article 2, 86° of the Electricity Act.

	II	Eligible Indirect Foreign Capacity Holder	As defined in Article 1 §2, 4° of the Royal Decree "Indirect Foreign Capacities"
36		Capacity Market Auditor	The independent auditor appointed, where necessary, by the CREG to monitor the proper functioning of the capacity remuneration mechanism, in accordance with the Royal Decree on "Monitoring".
37		Capacity Market Unit (CMU)	A Capacity (« Individual CMU ») or several associated Capacities (« Aggregated CMU») used in the consecutive phases of CRM to deliver the Service. For Dutch CMUs, the "Generation Forecast" is used. For French CMUs, the program of the "Entités de Capacité" (EDCs) is used. For German CMUs, the program of the "Generation Block Unit" is used.
	I	Additional Capacity Market Unit (Additional CMU)	A Capacity Market Unit which includes at least one Additional Delivery Point.
	II	Aggregated CMU	A CMU composed of at least two Delivery Points, provided that none of these Delivery Points is subject to Daily Schedule. Delivery Points with a Nominal Reference Power below the threshold set in article 7undecies, § 8, 2° of the Electricity Act cannot be considered an individual CMU, but may be part of an Aggregated CMU.
	III	Energy Constrained CMU	A CMU that can deliver energy or reduce its consumption for a limited number of hours per day.
	IV	Existing Capacity Market Unit ("Existing CMU")	A CMU that only includes one or more Existing Delivery Points.
	V	Foreign Capacity Market Unit (Foreign CMU)	An Indirect Foreign Capacity used in the consecutive phases of the Capacity Remuneration Mechanism to deliver the Service.
	VI	New Build Capacity	- An Additional Capacity Market Unit:

		Market Unit (New Build CMU)	· following the Standard Prequalification Process, containing a Delivery Point which consists of an electricity production facility or an electricity storage facility for which the CRM Candidate is (or calls on) an applicant for connection within the meaning of the Code of Conduct, the Federal Grid Code or the applicable Regional Grid Code or, if he has concluded a Connection Contract in application of article 166 of the Federal Grid Code or article 109 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code, whose connection has not yet been commissioned at the time of the Prequalification File submission deadline referred to in article 7undecies, § 8, last alinea of the Electricity Act; or · following the Fast Track Prequalification Process, composed of an electricity production facility or an electricity storage facility that has not yet been awarded, in the last administrative instance, all relevant permits that are required under regional regulations for the construction and/or the operation of the Capacit(y)(ies) included in the CMU in question.
	VI I	Non-energy Constrained CMU	A CMU without any daily limit on the number of hours to provide energy or to reduce consumption.
	VI II	Prequalified Capacity Market Unit (Prequalified CMU)	A CMU which has succeeded the Standard Prequalification Process or a Virtual CMU which has succeeded the specific Prequalification Process.
	IX	Virtual Capacity Market Unit (VCMU)	A CMU associated to Unproven Capacity.
38	Capacity Provider		As defined in article 2, 75° of the Electricity Act.
39	Capacity Remuneration		As defined in article 2, 76° of the Electricity Act.
40	Capacity Remuneration Mechanism (CRM)		As defined in article 2, 71° of the Electricity Act.
41	Closed Distribution System (CDS)		As defined in article 2, § 1, 5° of the Code of Conduct. Depending on the context in which the CDS is referred to in these Functioning Rules, CDS refers to a CDS connected to the ELIA Grid or to a CDS connected to the Public Distribution Grid.
	I	CDS Market Access Point	A market access point, as defined in article 2, §1, 38° of the Code of Conduct.
	II	CDS Operator (CDSO)	A natural or legal person that acts as the operator of the CDS and has signed annex 6 of to the Access Contract with ELIA.

	III	CDS User	Any natural or legal person that injects electricity to or takes electricity off from a CDS.
	IV	CDS User Declaration	The official declaration of a CDS User provided to ELIA during the Prequalification Process, containing proof of the agreement between the CRM Candidate and a CDS User to provide the Service at one (or more) specific Delivery Point(s).
	V	CDSO Declaration	The official declaration of the concerned CDSO provided to ELIA during the Prequalification Process for (a) specific Delivery Point(s) connected to the CDS in the form set out in annexes 18.1.3.1 and 18.1.3.2.
42	Code of Conduct		The code of conduct established by the CREG by decision (B)2409 of 20 October 2022 establishing the conditions for connection and access to the transmission system and the methods for calculating or establishing the conditions for the provision of frequency-related Ancillary Services and access to cross-border infrastructure, including the procedures for capacity allocation and congestion management.
43	CO2 Emissions Cap		The cap on CO2 emissions from fossil fuels per kWh of electricity, applicable to generation capacities.
44	Connection Contract		As defined in article 2, § 1, 22° of the Code of Conduct or in the relevant Regional Grid Code or in the national regulations of the Foreign TSOs
45	Contracted Capacity		The Capacity of a CMU associated to a Transaction on the Primary Market or on the Secondary Market.
	I	Expected Contracted Capacity	The Contracted Capacity expected to be contracted at a later date at the moment τ , in accordance with section 11.4.2.
	II	Maximum Expected Contracted Capacity	The sum of the expected Contracted Capacities during a Delivery Period, used to determine the financial guarantee.
	III	Total Contracted Capacity	The sum of all Contracted Capacities for a CMU at a specific moment of a Delivery Period.
46	Control Zone		Geographical area in which a Transmission System Operator operates. For countries with a single Transmission System Operator, the Control Area corresponds to the country.
47	CRM Actor		All (potential) participants to the CRM, including a Capacity Holder, an Indirect Foreign Capacity Holder, a CRM Candidate, Prequalified CRM Candidate, Capacity Provider, Buyer of an Obligation and Seller of an Obligation.
48	CRM Candidate		The Capacity Holder whose application form has been accepted by ELIA.
49	CRM IT Interface		The set of information systems within the control of ELIA used to perform its tasks under the Functioning Rules.

50	Daily Schedule		The schedule of injection and offtake forecasts for a CMU in MW per quarter-hour submitted to the grid operator on a day-ahead basis and updated in accordance with the provisions of the standard contract relating to the Scheduling Agent in application of the Code of Conduct referred to in article 11, § 2, of the law of April 29, 1999.
51	Data Protection Legislation		The applicable laws and regulations relating to the collection and processing of personal data, including Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) and, depending on the case, the Act of 30 July 2018 on the protection of natural persons with regard to the processing of personal data and its implementing decrees or equivalent legislation of the Foreign TSO.
52	Day-ahead Market (DAM)		The energy market as referred to in article 2, 26° of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management.
53	Day-ahead Market Price		As published on ELIA's website (Day-ahead reference price) the Belgian reference price as calculated by ELIA as the volume weighted average price of the prices of the active NEMO hubs in the Belgian bidding zone weighted by volumes, as defined in the Belgian MNA ("Multiple NEMO Arrangement for the Belgian bidding zone").
54	Declared Market Price ("DMP")		For a given AMT MTU, the Day-ahead Market Price from which the CMU delivers the Required Volume. It is a result of the (Partial) Declared Prices and Associated Volumes declared by the Capacity Provider, relative to the actual prices on the relevant markets (day-ahead, intraday and balancing) and according to section 9.4.2.2.2
55	Declared Price		The collective name of the Declared Day-ahead Price, the Declared Intraday Price and the Declared Balancing Price.
	I	Declared Balancing Price	The positive imbalance price optionally declared by the Capacity Provider equal to or above which he is prepared to deliver energy with his CMU in the balancing market by dispatching its Obligated Capacity.
	II	Declared Day-ahead Price	The value of the CMU's Reference Price declared by the Capacity Provider equal to or above which he is prepared to deliver energy with his CMU in the energy market by dispatching its Obligated Capacity.
	III	Declared Intraday Price	The Intraday Market price optionally declared by the Capacity Provider equal to or above which he is prepared to deliver energy with his CMU in the energy market by dispatching its Obligated Capacity.
	IV	Partial Declared Balancing Price	The positive imbalance price optionally declared by the Capacity Provider equal to or above which he is prepared to deliver energy in the energy market with his CMU in the energy market by dispatching a part of its Obligated Capacity.
	V	Partial Declared Day-ahead Price	The value of the CMU's Reference Price optionally declared by the Capacity Provider equal to or above which he is prepared to deliver energy in the energy market with his CMU in the energy market by dispatching a part of its Obligated Capacity.

	VI	Partial Declared Intraday Price	The Intraday Market price optionally declared by the Capacity Provider equal to or above which he is prepared to deliver energy in the energy market with his CMU in the energy market by dispatching a part of its Obligated Capacity.
	VI I	(Partial) Declared Price	The collective name of the (Partial) Declared Day-ahead Price, the Partial Declared Balancing Price and the Partial Declared Intraday Price.
56	Delivery Period		The delivery period as defined in article 2, 77° of the Electricity Act.
57	Delivery Point		A delivery point, as defined in article 2, 89° of the Electricity Act.
	I	Additional Delivery Point	A Delivery Point associated to an Additional Capacity.
	II	Existing Delivery Point	A Delivery Point associated to an Existing Capacity.
	III	Low Voltage Delivery Point Group	A set of Delivery Points connected to the same low voltage grid, part of the same CMU.
58	Demand Curve		As defined in article 2, 78° of the Electricity Act and determined in the Ministerial Decree on "Volume and Parameters".
59	Demand Side Response (DSR)		As defined in article 2, 112° of the Electricity Act.
60	Derating Factor		As defined in article 2, 83° of the Electricity Act.
	I	Derating Factor (CMU,t)	At any time, Derating Factor (CMU,t) is equal to: - For an Energy Constrained CMU, the weighted average Derating Factor of the relevant Transactions in annex A of the CMU's Capacity Contract, with the weighing based on the ratio of the Contracted Capacity associated to the Transaction divided by the Derating Factor associated to the Transaction, in accordance with the following formula: $\text{Derating Factor}(\text{CMU}, t) = \frac{\frac{\text{Contracted Capacity}_1}{\text{Derating Factor}_1} \times \text{Derating Factor}_1 + \frac{\text{Contracted Capacity}_2}{\text{Derating Factor}_2} \times \text{Derating Factor}_2 + \dots + \frac{\text{Contracted Capacity}_n}{\text{Derating Factor}_n} \times \text{Derating Factor}_n}{\frac{\text{Contracted Capacity}_1}{\text{Derating Factor}_1} + \frac{\text{Contracted Capacity}_2}{\text{Derating Factor}_2} + \dots + \frac{\text{Contracted Capacity}_n}{\text{Derating Factor}_n}}$ - For a Non-energy Constrained CMU, the Derating Factor contractually associated to the Transaction with statute ex-ante in annex A to the CMU's Capacity Contract with the most recent Transaction Validation Date and a Transaction Period that includes <i>t</i>. In case this concerns multiple Transactions with the same Transaction Validation Date, the Transaction with the shortest Transaction Period is used.

	II	Last Published Derating Factor	For each category of Derating Factor as determined by the Ministerial Decree on "Volume and Parameters", the latest published value at the moment of Prequalification Files submission or notification of the Secondary Market transaction and with application to the Transaction Period in accordance with section 10.4.8.3
61		Detail Study (EDS)	The detail study or the study of the connection request referred to in article 46 of the Code of Conduct, in article 160 of the Federal Grid Code or in the relevant Regional Grid Code.
62		Direct Foreign Capacity	As defined in article 2, 86° of the Electricity Act.
63		DSO-CRM Candidate Agreement	The agreement between the CRM Candidate and the concerned DSO confirming the technical possibility for (a) specific Delivery Point(s) connected to the DSO Grid to offer the Service.
64		Electricity Act	The Act of 29 April 1999 on the organization of the electricity market.
65		ELIA Grid	The transmission and local transmission grids for electricity for which ELIA has been appointed as system operator.
66		Eligible Volume	The Reference Power of an Existing CMU or Additional CMU multiplied by the Derating Factor as determined during the Prequalification Process.
	I	Declared Eligible Volume	The Eligible Volume, as declared by the CRM Candidate, of a Virtual Capacity Market Unit which has been submitted to participate to a Specific Prequalification Process.
	II	Remaining Eligible Volume	The maximum capacity that a Capacity Provider can offer for the purpose of a Transaction of a CMU on the Primary Market.
67		Energisation Operational Notification (EON)	As defined in article 2(63) of the EU Grid Code RfG.
68		European Grid Code RfG	The European Commission Regulation (EU) 2016/631 of April 14 2016 establishing a grid code on requirements for grid connection of electricity generators.
69		Exchange	A market operator in accordance with Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments, transposed by the Law of 21 November 2017 on infrastructure for markets in financial instruments and on the implementation of Directive 2014/65/EU.
70		Existing Capacity	The Capacity for which, at the time of Prequalification File submission, a representative Nominal Reference Power can be calculated based on quarter-hourly measurements.

71	Fast Track Volume	The Fast Track Nominal Reference Power multiplied by the Derating Factor as determined during the Fast Track Prequalification Process.
72	Federal Grid Code	The Royal Decree of 22 April 2019 establishing a technical regulation for the operation of the transmission electricity grid and access to it.
73	Federal Grid Code 2002	The Royal Decree of 19 December 2002 establishing a technical regulation for the operation of the transmission electricity grid and access to it.
74	Final Operational Notification (FON)	As defined in article 2(63) of the EU Grid Code RfG.
75	Financial Security	The security provided to cover a CMU's obligations during one or more Validity Period(s) in the form of a bank guarantee, an Affiliate Company guarantee or a cash payment.
76	Forced Outage	An unplanned removal (full or partial) of a CMU providing the Service for any urgent reason that is not under the operational control of the Capacity Provider, as determined in the Commission Regulation (EU) 2017/1485 of 2 August 2017 establishing a guideline on electricity transmission system operation.
77	Foreign CRM Candidate	The Indirect Foreign Capacity Holder whose prequalification application form has been accepted by ELIA.
78	Foreign TSO	The Transmission System Operator to which the concerned Indirect Foreign Capacity is connected.
79	Functioning Rules	These rules referred to in article 7undecies, § 12 of the Electricity Act.
80	Global Auction Price Cap	The price cap applicable in an Auction or Pre-Auction to all Bids, determined in the Ministerial Decree on "Volume and Parameters".
81	Grid User	As defined in article 2, §1, 16° of the Code of Conduct.
82	Grid User Declaration	The official declaration of the Grid User provided to ELIA during the Prequalification Process, containing proof of the agreement between the CRM Candidate and the Grid User to provide the Service at one (or more) specific Delivery Point(s).
83	Headmeter	A (group of) meter(s), as defined in article 2, §1, 59° of the Code of Conduct or in the applicable Regional Grid Code or in the national regulations of the foreign TSO, associated with the Access Point as determined by ELIA (for the ELIA Grid) or as determined by the DSO (for a Public Distribution Grid) or as determined by the Foreign TSO, or associated with the CDS Market Access Points as determined by the CDSO (for a Closed Distribution System), installed by ELIA for the ELIA Grid, the DSO for the Public Distribution Grid and the CDSO for the Closed Distribution System.
84	Indirect Foreign Capacity	As defined in article 2, 85° of the Electricity Act.
85	Infrastructure Works	The works which cannot be realized by another entity than the respective system operator (Fluxys, DSOs, Foreign TSO and ELIA).

86	Interim Operational Notification (ION)	As defined in article 2(64) of the EU Grid Code RfG.
87	Intermediate Price Cap	The price cap applicable in an Auction to a subset of Bids, determined in the Ministerial Decree on "Volume and Parameters".
88	Intraday Market	The energy market, as referred to in article 2, 27° of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management.
89	Investment File	The file referred to in Article 7 and Article 19/6 of the Royal Decree on "Investment Thresholds", submitted to the CREG by a Capacity Holder with a view to being classified in a capacity category associated with a Capacity Contract covering more than one Period of Capacity Delivery .
90	Investment Threshold	As defined in article 1, § 2, 1° of the Royal Decree on "Investment Thresholds".
92	Linked Bids	The Bids for Linked Capacities that can only be jointly selected in the Auction are selected as well.
93	Linked Capacities	As defined in article 1, § 2, 6° of the Royal Decree on "Investment Thresholds".
94	Limited Operational Notification	As defined in article 2(65) of the EU Grid Code RfG.
95	Market Time Unit (MTU)	As defined in Article 2 (9) in Annex 1 of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management (CACM).
96	Maximum Available Power	The Maximum Available Power as defined in the Outage Planning Agent (OPA) contract.
97	Maximum Entry Capacity	Determined for each Delivery Period and each border, this value determines the maximum volume from Indirect Foreign Capacities that can be contracted for a specific border for a specific Delivery Period. Published in the Ministerial Decree on "Volume and Parameters".
98	Measured Power	The net active power, i.e., the difference between gross offtake and gross injection, measured at a Delivery Point. Net offtake from the grid is considered as a positive value, net injection into the grid is considered as a negative value.
99	Ministerial Decree on "Volume and Parameters"	The ministerial decree referred to in Article 7undecies, § 6 of the Electricity Act, by which the Minister for Energy each year instructs the system operator to organize the Auctions for the periods of capacity delivery concerned, sets the parameters required for their organization, fixes the maximum volume of capacity that can be contracted with all capacity holders of unproven capacity as part of the Auctions concerned and determines the minimum volume to be reserved for the Auction to be organized one year prior to the period of capacity delivery.
100	Missing Capacity	The positive difference between the Obligated Capacity and the Available Capacity.

101	Missing Volume		The share of a CMU's Pre-delivery Obligation considered as non-available as a result of one of the pre-delivery controls.
102	Nominal Reference Power		The maximal nominal power that a capacity can provide to the system at any given moment, as declared by the CRM Candidate or as determined by ELIA or by the DSO the Prequalification Process.
	I	Aggregated Nominal Reference Power	The Nominal Reference Power of an Aggregated CMU corresponding to the sum of the Nominal Reference Power of each of its Delivery Point.
	II	Declared Nominal Reference Power	The Nominal Reference Power, as declared by the CRM Candidate or by a DSO to ELIA, of an Additional Delivery Point which has been submitted to participate to a Standard Prequalification Process.
	III	Expected Nominal Reference Power	The Nominal Reference Power, as estimated by the CRM Candidate and verified by Elia, of an Existing Delivery Point which has been submitted to participate to a Standard Prequalification Process.
	IV	Fast Track Nominal Reference Power	The Nominal Reference Power, as estimated by the CRM Candidate, and, if applicable, verified by ELIA or the DSO, of a Delivery Point which has been submitted to participate to a Fast Track Prequalification Process.
103	Nominated Electricity Market Operator (NEMO)		The nominated electricity market operator (NEMO) referred to in Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management.
104	Obligated Capacity		The capacity of a CMU that a Capacity Provider is obliged to make available in the form of Available Capacity amongst others during Availability Tests and during Availability Monitoring, in line with the availability requirement, as referred to in article 7undecies, § 12, al. 2, 5° of the Electricity Act.
105	Operating Aid		Every aid for which its award is in function of the electricity production of the involved capacity, as specified further in article 1,§1 of the "Eligibility Criteria" Royal Decree.
106	Opt-out Notification		The notification based on which a CRM Candidate notifies ELIA that it has decided not to offer the Opt-out Volume into an Auction for a Delivery Period, in line with article 7undecies, § 9 of the Electricity Act.
107	Opt-out Volume		The (part of) the (Declared) Nominal Reference Power of a CMU for which the CRM Candidate formally indicates prior to the Auction for which it does not want to submit a Bid during an Auction.
108	Outage Planning Process		The process as set out in the Outage Planning Agent (OPA) contract.

109	Overcapacity	The amount of Additional Capacity that a CMU provides beyond the Required Volume.
110	Parties on the Secondary Market	The Seller and Buyer of an Obligation involved in a transaction on the Secondary Market.
111	Pay-as-bid	As defined in article 2, 91° of the Electricity Act.
112	Payback Obligation	The Capacity Provider's obligation to pay back an amount to ELIA in function of the Contracted Capacity as referred to in article 7undecies § 11 of the Electricity Act.
	I	Effective Payback Obligation
		The Payback Obligation amount related to a Transaction as calculated for a given month, in accordance with the Royal Decree on Methodology and if applicable, taking into account the Stop-Loss Amount.
113	Payback Volume	The volume of a Transaction that is used to calculate the Payback Obligation, based on the Contracted Capacity.
114	Peak Hours	The hours starting from 08.00 until 20:00 of every day, excluding weekend and Belgian public holidays.
115	Permitting Milestone	A key milestone, only applicable to an Additional CMU, that is reached when all necessary licenses/permits for the construction of the project have been delivered in the last administrative instance, are definitive, enforceable and cannot be disputed anymore before the State Council or the Council for permitting contestations or any other body competent to hear disputes regarding decisions made in final administrative instance regarding permits.
116	Point of Interface	As defined in article 2, §1, 29° of the Code of Conduct.
117	Pre-Auction	As defined in article 2, 73° of the Electricity Act.
118	Pre-Auction Demand Curve	As defined in article 2 of the Electricity Act and determined in the Ministerial Decree on "Volume and Parameters".
119	Pre-delivery Measured Power	The capacity measured during a pre-delivery control and associated to an Existing Delivery Point or Existing CMU.
120	Pre-delivery Obligation	The capacity of a CMU that a Capacity Provider is obliged to make available during a pre-delivery control.
121	Pre-delivery Period	The period which starts at the moment of publication of the Auction results and end on October 31st of the year before the Delivery Period, during which Elia organises the pre-delivery control(s) for a CMU to ensure the effective availability of the Contracted Capacities.
122	Prequalification File	All documents and data that the CRM Candidate has prepared, updated (when required) and provided to ELIA and which are necessary for the proper and complete execution of the Prequalification Process.
123	Prequalification Process	As defined in article 2, 82° of the Electricity Act, with it being understood that this process also applies to determine the possibility for Capacity Holders to participate in the Secondary Market.

	I	Fast Track Prequalification Process	The process to be followed by a CRM Candidate who does not wish to participate in either the Primary Market or the Secondary Market but has the legal obligation to submit a Prequalification File according to the rules defined in article 7undecies, § 8, paragraph 2, of the Electricity Act and in the Royal Decree on "Eligibility Criteria".
	II	Specific Prequalification Process	The process to be followed by a CRM Candidate to prequalify a VCMU (Unproven Capacity) to participate to the Primary Market with this related VCMU.
	III	Standard Prequalification Process	The process to be followed by a CRM Candidate who wants to prequalify an Existing CMU or an Additional CMU to be able participate to the CRM with this related CMU.
124		Prequalified CRM Candidate	The Capacity Holder that is allowed to participate in the Primary Market or the Secondary Market thanks to the prequalification of one or several Capacity Market Unit(s).
125		Primary Market	The market where the rights and obligations relating to the Service are created as a result of an Auction.
126		Project Works	The works that fall – as a result of a competitive selection process – under a system operator (ELIA, Fluxys or a DSO) or another entity's responsibility.
127		Proven Availability	For a CMU with Daily Schedule, the Available Capacity during AMT MTUs that was included in the Daily Schedule, corrected for participation in frequency-related Ancillary Services or Redispatching Services. For a CMU without Daily Schedule, the Available Capacity during the AMT MTUs that reacted to the price signal based on the Declared Prices, corrected for participation in frequency-related Ancillary Services or Redispatching Services.
128		Public Distribution Grid or "DSO Grid"	As defined in article 2, §1, 10° of the Code of Conduct, except for the local transmission grid. The definition of the local transmission grid is established at the regional level. For a Public Distribution Grid located in Flanders, this is the electricity distribution network, as defined in article 1.1.3, 32° of the Flemish Decree of 8 May 2009 on energy; in Wallonia, this is the distribution network, as defined in article 2, 17° of the Walloon Decree of 12 April 2001 on the organization of the regional electricity market; in Brussels, this is the distribution network, as defined in article 2, 12° of the Brussels Ordinance of 19 July 2001 on the organization of the electricity market in the Brussels Capital Region.
129		Public Distribution System Operator or "DSO"	A natural personal or legal entity appointed by the regional regulator or regional authority, responsible for the exploitation, the maintenance and, if necessary, the development of the Public Distribution Grid in a certain zone and, where applicable, for its interconnectors with other systems and who is responsible of guaranteeing the long-term ability of the Public Distribution Grid to meet reasonable demands for electricity distribution.
130		Redispatching Services	Services for coordination and congestion management as defined in article 2§ 1, 36° of the Code of Conduct and meant in article 130, § 1, 6° of the Code of Conduct.
	I	Activation of Redispatching Services	The use of Redispatching Services as a remedial measure in line with article 22 of Commission Regulation (EU) 2017/1485 of 2 August 2017 establishing a guideline on electricity transmission system operation (SOG) and in accordance with the Coordination and Congestion Rules (as published by ELIA) for the activation of remedial measures in day-ahead and intraday time windows.

131	Reference Power	The Nominal Reference Power of a CMU minus the Opt-out Volume (if applicable).
132	Reference Price	As defined in article 2, 81° of the Electricity Act.
133	Regional Grid Code(s)	One or more of the following regional technical regulations: • the decision of the Flanders electricity and gas regulator (VREG) of 29 May 2020 approving the technical regulation for the local transmission of electricity for the Flanders region; • the decision of the Flanders electricity and gas regulator (VREG) of 25 June 2021 approving the technical regulation for distribution of electricity for the Flanders region; • the decree of the Walloon Government of 26 January 2012 in relation to the revision of the technical regulation for the operation of the local transmission grid in the Walloon Region and the access to it; • the decree of the Walloon Government of 3 March 2011 approving the technical regulation for the operation of the electricity distribution grid in the Walloon Region and the access to it; • the decree of the Government of the Brussels Capital Region of 13 July 2006 approving the technical regulation for the operation of the regional electricity transmission grid and the access to it; • the decree of the Government of the Brussels Capital Region of 23 May 2014 establishing the technical regulation for the operation of the electricity distribution grid and the access to it.
134	Regulation (EU) 2019/943	As defined in article 2, 88° of the Electricity Act.
135	Remaining Maximum Capacity	The part of the CMU's Nominal Reference Power (in MW) that remains available after consideration of the Unavailable Capacity.
136	Remaining Maximum Entry Capacity	The part of the Maximum Entry Capacity for a Delivery Period and a border that is available for CMUs located in the foreign country to take over obligations on the Secondary Market as the Buyer of an Obligation from CMUs located in another country.
137	Requested Volume	The volume (in MW) to be secured by a Financial Security, associated to a CMU and at a moment t that is part of (one or more) Validity Periods.
138	Required Level	The level (in €/MW) to be secured by a valid type of Financial Security, associated to a CMU and at a moment t that is part of (one or more) Validity Periods.

139	Required Volume		For a specific AMT MTU, the volume the CMU is required to deliver in energy, according to the most recent Declared Prices and determined according to section 9.4.2.2.1
140	Reserve Providing Group		As defined in Article 3, 11 of Commission Regulation (EU) 2017/1485 of 2 August 2017, establishing a directive on the management of the electricity transmission network.
141	Revision Plan		The outage plan submitted following the Revision Procedure as set out in the Outage Planning Agent (OPA) contract.
142	Royal Decree on "Eligibility Criteria"		The royal decree of 21 May 2021 on the determination of the eligibility criteria meant in article 7 undecies, § 8, paragraph 1, of the law of 29 April 1999 on the organization of the electricity market, related to the Capacity Remuneration Mechanism.
143	Royal Decree on "Indirect Foreign Capacity"		The royal decree of 9 April 2024 on to the conditions and modalities under which capacity holders of indirect foreign capacity can participate to the pre-auction and prequalification process organised in the framework of the Capacity Remuneration Mechanism.
144	Royal Decree on "Investment Thresholds"		The royal decree of 4 June 2021 on the determination of the investment thresholds and the eligibility criteria for the Investment Costs, and the procedure of classification.
145	Royal Decree on "Methodology"		The Royal Decree of 28 April 2021 establishing the parameters by which the volume of capacity to be procured is determined, including their calculation method, and other parameters required for the organization of the auctions, as well as the method and conditions for obtaining individual derogations on the application of intermediate price cap(s) in the context of the capacity remuneration mechanism.
146	Royal Decree on "Monitoring"		The royal decree on the determination of the detailed monitoring rules for the proper functioning of the Capacity Remuneration Mechanism by the Commission for Electricity and Gas Regulation established in accordance with article 7undecies, § 13 of the Electricity Act and published on May 30th 2021.
147	Scheduled Maintenance		Limitation on the capability of a Delivery Point to either inject or offtake power because of maintenance reasons that was correctly notified to ELIA following the process set out in section 9.3.2.
148	Scheduling Agent		As defined in the Terms and Conditions for Scheduling Agent (T&C SA) pursuant to article 46, 49 and 52 of Commission Regulation (EU) 2017/1485 of 2 Augustus 2017 establishing a guideline on electricity transmission system operation and article 128 of the Code of Conduct.
149	Secondary Market		As defined in article 2, 92° of the Electricity Act.
	I	Secondary Market Capacity	The capacity in MW that is subject to a Transaction on the Secondary Market.
	II	Secondary Market	The capacity that a CRM Candidate can contract for a CMU's Transaction on the Secondary Market, as calculated after the Prequalification Process, not taking into account already Contracted Capacities.

		Eligible Volume	
	III	Secondary Market Exchange Mandate	The mandate given by a Prequalified CRM Candidate or a Capacity Provider to an Exchange for the notification of a Secondary Market transaction involving his CMU to ELIA. The mandate consists in the form in annex 18.4.1 duly completed and signed.
	IV	Secondary Market Remaining Eligible Volume	The maximum capacity that a Capacity Provider can contract on a CMU's Transaction on the Secondary Market.
150	Secured Amount		The amount (in €) to be secured by a Financial Security, associated with a CMU and at a moment t that is part of (one or more) Validity Periods.
151	Seller of an Obligation		The Capacity Provider that transfers the rights and obligations resulting from the Capacity Contract to a Buyer of an Obligation via a transaction on the Secondary Market.
152	Service		The Capacity Provider's rights and obligations related to the delivery of a Capacity, as stipulated in the Functioning Rules and in the Capacity Contract.
153	Service Level Agreement (SLA)		The service level for an Energy Constrained CMU as determined during the Prequalification Process, expressed in SLA-MTU.
154	Service Time Schedule		The time schedule covering the full CRM process as determined in the current Functioning Rules.
155	SLA Market Time Unit (SLA-MTU)		For an Energy-Constrained CMU, the number of AMT MTUs over a single day corresponding to the number of Market Time Units N in the CMU's SLA, during which a non-zero Obligated Capacity applies to ex-ante acquired obligations. The SLA MTUs are established according to annex 18.3.4
	I	Non-SLA Market Time Units (Non-SLA MTUs)	For an Energy Constrained CMU all MTUs that are not SLA MTUs.
156	Stop-Loss		The mechanism that caps the amount of the Payback Obligation that a Capacity Provider has to pay.
	I	Stop-Loss Amount	The maximum amount of the Payback Obligation related to a CMU's Transaction that a Capacity Provider has to pay in the course of a Delivery Period to ELIA following the Functioning Rules and the Capacity Contract.
157	Strike Price		As defined in article 2, 80° of the Electricity Act.

	I	Actualized Strike Price	The monthly updated value of the Strike Price of a Transaction of a CMU.
158	Submeter		Either a meter, as defined in article 2, §1, 59° of the Code of Conduct or in the applicable Regional Grid Code, situated downstream of the Headmeter; or, an equation between one or more meter(s) situated downstream of the Headmeter and/or the Headmeter.
159	Transaction		An agreement about the contractual rights and obligations resulting from the Service, on the Primary Market closed between a Capacity Provider and ELIA, or on the Secondary Market at a Transaction Date, identified by a transaction identification number, for the Contracted Capacity and covering a Transaction Period.
	I	Transaction Date	The date and time a transaction is made, i.e. the date and time that a Bid is submitted in the Auction or the date and time that ELIA acknowledges the reception of the notification of a Secondary Market transaction.
	II	Transaction Period	The period, defined by a start date/start time and an end date/end time, linked to a Transaction and covering a part of or the full of one or more Delivery Period(s).
	III	Transaction Validation Date	On the Primary Market, the date and time at which the results of the related Auction are published (after validation by the CREG). On the Secondary Market, the date and time stamp of the signature by ELIA of the annex A of the Capacity Contract of the Seller of an Obligation.
160	Unannounced Missing Capacity		The positive difference between the Missing Capacity and the Announced Missing Capacity.
161	Unavailability Penalty		The amount to be paid by the Capacity Provider in case of Missing Capacity.
162	Unavailable Capacity		The limitation of the Nominal Reference Power notified by the Capacity Provider to ELIA.
163	Unproven Availability		For a CMU with Daily Schedule, the Available Capacity during AMT MTUs that was not included in the Daily Schedule, corrected for its participation in frequency-related Ancillary Services or Redispatching Services. For a CMU without Daily Schedule, the Available Capacity during the AMT MTUs that did not react to the price signal corresponding to the Declared Prices, corrected for its participation in frequency-related Ancillary Services or Redispatching Services.
164	Unproven Capacity		As defined in article 2, 90° of the Electricity Act.
165	Unsheddable Margin		The minimal amount of net active power offtake (in kW/MW) that cannot be curtailed (inflexible or unsheddable power) at the Delivery Point(s) concerned.

166	Validity Period	The period of time for which a Financial Security is to be provided by a (Prequalified) CRM Candidate or a Capacity Provider, as a condition to make a Transaction on the Primary Market or the Secondary Market.
167	Volume to be guaranteed	The volume to be covered by a Financial Security.
168	Winter Period	As defined in article 2, 51° of the Electricity Act.
169	Working Day	Any calendar day except for Saturdays, Sundays and Belgian public holidays.

3.2 ABBREVIATIONS

aFRR	Automatic Frequency Restoration Reserve
AMC	Announced Missing Capacity
AMT	Availability Monitoring Trigger
BRP	Balance Responsible Party
CC	Contracted Capacity
CDS	Closed Distribution System
CDSO	Closed Distribution System Operator
CEP	Clean Energy Package
CMU	Capacity Market Unit
CRM	Capacity Remuneration Mechanism
DAM	Day-ahead Market
DF	Derating Factor
DMP	Declared Market Price
DP	Delivery Period
DSR	Demand Side Response

DSO	Public Distribution System Operator
EBGL	Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing.
EDS	Detail Study
EON	Energisation Operational Notification
EV	Eligible Volume
FCR	Frequency Containment Reserve
FON	Final Operational Notification
GCT	Gate Closure Time
GOT	Gate Open Time
IDM	Intra Day Market
ION	Interim Operational Notification
LON	Limited Operational Notification
MC	Missing Capacity
MEC	Maximum Entry Capacity
mFRR	Manual Frequency Restoration Reserves
MTU	Market Time Unit
NEMO	Nominated Electricity Market Operator
NRP	Nominal Reference Power
OPA	Outage Planning Agent (responsible for the outage planning)
RES	Renewable Energy Sources
SLA	Service Level Agreement
SOGL	Commission Regulation (EU) 2017/1485 establishing a guideline on electricity transmission system operation.
TCC	Total Contracted Capacity
TP	Transaction Period

TSO²	Transmission System Operator
UMC	Unannounced Missing Capacity
UP	Unavailability Period
VCMU	Virtual Capacity Market Unit
Y-1	One year before the start of the Delivery Period
Y-2	Two years before the start of the Delivery Period
Y-4	Four years before the start of the Delivery Period
WD	Working Day

² ELIA Transmission Belgium SA has been designated as Transmission System Operator by Ministerial Decree of 13 January 2020 for a duration of twenty years, starting from 31 December 2019. Given the political choice behind the financing of the CRM expressed by the resolution DOC 55 1220/007 approved by the Parliament, which constitutes the workbase for the follow up committee, The Transmission System Operator has been put forward as the contractual counterparty designated according to article 7quaterdecies, § 1 of the Electricity Act.

4 SERVICE TIME SCHEDULE

4.1 INTRODUCTION

This section summarizes most relevant milestones and operational deadlines or timings a CRM Actor should keep in mind when considering a participation to the Service.

The chapter is organized around two sections. Section 4.2 focuses on the key milestones specified in the Electricity Act and/or other legal documents related to the Capacity Remuneration Mechanism. Section 4.3 proposes an overview of the most relevant timings for each CRM operational process.

The following dispositions have to be seen as an executive summary. It does not replace the operational details and associated timings specified in each section of the Functioning Rules. The timings summarized in the tables of this chapter are not exhaustive (as some scenarios are not identified in this section). In case there would be inconsistencies on the timings illustrated in this chapter compared to the other chapters of the Functioning Rules (including the annexes), the timings stated in the other chapters would prevail.

4.2 KEY MILESTONES

70. The dates summarized below are extracted from the Electricity Act and other legal documents related to the Capacity Remuneration Mechanism (CRM). All dates are to be considered in the same year as the year in which the Auction takes place, unless stated otherwise.

PERIODS	Gate opening time	Gate closure time	Remarks in respect of the forthcoming Auction
MINISTERIAL DECREE	NA	March 31	Last date where Ministerial Decree on “Volume and Parameters” is officially published.
FUNCTIONING RULES PUBLICATION	NA	May 15	Last official publication date for which the Functioning Rules for an associated Capacity Auction must have been officially published for the next Auction.
PREQUALIFICATION PROCESS ³			
Prequalification File submission		June 15	Last date by which the CRM Candidate may submit his Prequalification File in order to be able to participate to the forthcoming Auction.

³ A Prequalification File can be introduced at any time, but no later than June 15 of the year of the forthcoming Auction. However, and considering the yearly update of the Functioning Rules published every May 15, any Prequalification File initiated before such date, and to be submitted for the forthcoming Auction, is required to be updated for compliancy before June 15

Prequalification results notification		September 15 ⁴	Last date by which the prequalification results are officially notified by ELIA to each CRM Candidate individually.
Opt-out Notification submission/adaptation		September 30 06:00 ⁵	Last day by which a CRM Candidate is allowed to provide (or to adapt) an Opt-out Notification to ELIA.

IPC DEROGATION PROCEDURE			
Submission of the request for derogation	March 31	April 30 at the latest	The form requirement of the request is published on CREG website by March 31
Communication of the draft decision		August 25	
Communication of the final decision		September 25	

⁴ In the event that the CRM Candidate submitted an Investment File to CREG, the prequalification results are notified to the CRM Candidate on September 1.

⁵ In the event that the CRM Candidate submits (i) an Opt-out Notification indicating that the volume is associated with definitive/temporary decommissioning or definitive/temporary structural reduction of capacity notification, in accordance with article 4bis of the Electricity Act or (ii) an Opt-out Notification indicating that the volume is not contributing to adequacy during the Delivery Period, by providing a motivational letter, then, the Opt-out Notification submission/adaptation is notified to ELIA on August 31.

APPLICATION PROCEDURE FOR CLASSIFICATION IN A CAPACITY CATEGORY			
File submission		June 15 at the latest	The form, the procedure for the submission and information on the content are available on the CREG website for new capacities
Communication of classification decision		15 WD before Bid submission deadline	

AUCTION			
Bid submission	1 WD after September 15 9:00	September 30 17:00	Period during which Bids may be introduced by Prequalified CRM Candidates.
Auction clearing	October 1	October 31	Period during which the Auction is cleared and results are validated.
Results notification		October 31	Date by which Auction results are published.

PRE-DELIVERY PERIOD	November 1	October 31 of the year in which the Delivery Period starts	
----------------------------	-------------------	---	--

DELIVERY PERIOD	November 1 of the year in which the Delivery Period starts	October 31 of the year in which the Delivery Period ends	
------------------------	---	---	--

71. The dates summarized below are relevant for all processes related to Cross Border Participation, extracted from the relevant legal documents related to the Capacity Remuneration Mechanism (CRM). All dates are to be considered in the same year as the year in which the Auction takes place, unless stated otherwise.

PERIODS	Gate opening time	Gate closure time	Remarks in respect of the forthcoming Auction
----------------	--------------------------	--------------------------	--

MINISTERIAL DECREE	NA	March 31	Last date where Ministerial Decree on "Volume and Parameters" is officially published, which includes the MEC and instruction to organize the cross border auctions.
---------------------------	-----------	-----------------	--

ADMISSION PROCESS			
Submission of the Application Form for Foreign CRM Candidate	NA	1 WD after April 1	The Foreign CRM Candidate submits the application form through a preliminary access of the ELIA CRM IT interface to get access to the ELIA CRM IT interface

Admission File submission	NA	April 12	Last date by which the Foreign CRM Candidate may submit his Admission File in order to be able to participate to the forthcoming Pre-Auction.
Admission Process results notification	NA	4 WD after May 15	Last date by which the Admission Process results are officially notified by ELIA to each Foreign CRM Candidate individually.

FUNCTIONING RULES PUBLICATION	NA	May 15	Last date where Functioning Rules for a related Auction are officially published.
--------------------------------------	-----------	---------------	---

PRE-AUCTION			
Bid submission	May 24 9:00	May 25 17:00	Period during which Bids may be introduced by Admitted Foreign CRM Candidates.
Pre-Auction clearing	May 26	May 28	Date on which the results of the Pre-Auction are controlled by the CREG.
Results notification		June 12	Date by which Pre-Auction results are notified to the Foreign CRM Candidates.

4.3 TIMINGS PER OPERATIONAL PROCESS

72. This section summarizes the most important milestones per operational process (Prequalification Process, Opt-out Notification, processes for DSO-connected Capacities, processes for CDS-connected Capacities, Financial Security process, Auction process, pre-delivery control, Secondary Market and Availability Monitoring).

The specified timings always refer to a maximum duration expressed in Working Days. For the sake of clarity, ELIA will always make best efforts to reduce the timings foreseen in the tables in order to respect the deadlines defined in section 4.2 above.

In the tables below:

- "A" is the submission date of the Prequalification File by the CRM Candidate to ELIA;
- "B" is the publication of the Auction results by ELIA;
- "C" is Transaction Date related to a Transaction made via the Secondary Market;
- "D" is the Availability Test/delivery date;
- "E" is the Financial Security submission.

4.3.1 Prequalification Processes

73. Some specific aspects of a Prequalification Process may be running in parallel depending on various parameters related to the CRM Candidate (Opt-out Notification, communication with CREG when a multi-year Capacity Contract is requested, discussion with DSO regarding the DSO-connected Delivery Points, discussion with CDSO regarding the CDS-connected Delivery Points, etc.). Some of these parallel processes are illustrated in the tables below (tables of sections 4.3.1.1 and 4.3.1.2).

Action	Due Date				Details
	Standard Prequalification Process & Fast Track Prequalification Process		Standard Prequalification Process for Secondary Market participation only	Specific Prequalification Process	
	CMU with Investment file	CMU without investment file			
Application form submission date	A – 5 WD	A – 5 WD	A – 5 WD	A – 5 WD	The CRM Candidate submits to ELIA his application form in order to be allowed to submit a Prequalification File.
Approval/rejection of application form	A	A	A	A	Once the CRM Candidate has submitted his application form, ELIA has 5 WD to approve or reject it.
Prequalification File submission date ⁶	A	A	A	A	In order to launch the Prequalification Process, the CRM Candidate submits his Prequalification File via the CRM IT Interface.
Results of the Prequalification File compliance check #1	August 1	August 15	A + 45 WD	A + 45 WD	The first Prequalification File submission is followed by a compliance check realized by ELIA either by August 1 or 15 (depending on the presence of an investment file) or within maximum 45 WD starting from the Prequalification File submission date in case the CRM Candidate wants to prequalify for Secondary Market participation only. This may trigger a request for additional information in case the Prequalification File is provisionally “rejected”.
Finalization of the Prequalification File	10 WD before September 1	10 WD before September 15	A + 60 WD	A + 60 WD	In the event that ELIA requests for additional information, the CRM Candidate needs to come back to ELIA with this additional information by 10 WD before either September 1 or 15 (depending on the presence of an investment file) or by

⁶ Either way, a Prequalification File is always submitted to ELIA at the latest on June 15 of a year (as per section 4.2 above) in order to be able to participate to the forthcoming Auction of the same year.

					maximum 15 WD starting from ELIA's request in case the CRM Candidate wants to prequalify for Secondary Market participation only.
Results of the final Prequalification File compliance check	September 1	September 15	A + 70 WD	A + 70 WD	Final results with respect to the compliance check of the Prequalification File are communicated to the CRM Candidate either by September 1 or 15 (depending on the presence of an investment file) or by maximum 70 Working Days starting from the Prequalification File submission date if the CRM Candidate wants to prequalify for Secondary Market participation only.
Notification of the provisional Nominal Reference Power for the Existing Delivery Point(s), if applicable	August 1	August 15	A + 45 WD	NA	ELIA may determine the provisional Nominal Reference Power for some Existing Delivery Point and communicates it via the CRM IT Interface to the CRM Candidate either by August 1 or 15 (depending on the presence of an investment file) or within maximum 45 WD starting from the Prequalification File submission date in case the CRM Candidate wants to prequalify for Secondary Market participation only.
Contestation of the provisional Nominal Reference Power(s), if applicable	10 WD before September 1	10 WD before September 15	A + 60 WD	NA	If needed, the CRM Candidate can contest the provisional Nominal Reference Power(s) communicated by ELIA by 10 WD before either September 1 or 15 (depending on the presence of an investment file) either within maximum 15 WD starting from the date of this communication via the CRM IT Interface in case the CRM Candidate wants to prequalify for Secondary Market participation only.
Notification of the final Nominal Reference Power for the Existing Delivery Point(s), if applicable	September 1	September 15	A + 70 WD	NA	ELIA notifies the final Nominal Reference Power for each Delivery Point included in the CMU to the CRM Candidate either by September 1 or 15 (depending on the presence of an investment file) or within maximum 70 WD starting from the Prequalification File submission date in case the CRM Candidate wants to prequalify for Secondary Market participation only.

Prequalification results notification	September 1	September 15	A + 70 WD	A + 70 WD	ELIA notifies the results and therefore different volumes (Eligible Volumes, Secondary Market Eligible Volume, Fast Track Volume, etc.) to the CRM Candidate either by September 1 or 15 (depending on the presence of an investment file) or within maximum 70 WD starting from the Prequalification File submission date in case the CRM Candidate wants to prequalify for Secondary Market participation only.
---------------------------------------	-------------	--------------	-----------	-----------	---

4.3.1.1 Process linked to a Prequalification File including DSO-connected Delivery Point(s)

74. This process running in parallel is only applicable in the framework of a Standard Prequalification Process or a Fast Track Prequalification Process. All the deadlines presented in this table are complementary to the timing presented above for the Standard Prequalification Process and the Fast Track Prequalification Process.

Action	Due date			Details
	Standard Prequalification Process & Fast Track Prequalification Process		Standard Prequalification Process for Secondary Market participation only	
	CMU with Investment File	CMU without Investment File		
Notification of the Prequalification File submission by ELIA	A	A	A	As soon as a Prequalification File, including DSO-connected Delivery Point(s), has been submitted by the CRM Candidate to ELIA, ELIA notifies it to the DSO.

Signature of the DSO-CRM Candidate agreement	A	A	A	The CRM Candidate contacts the concerned DSO(s) to sign a DSO-CRM Candidate agreement for each DSO-connected-Delivery Point.
Communication by the concerned DSO(s) to ELIA of the final Nominal Reference Power	August 1	August 15	A + 45 WD	As soon as the concerned DSO(s) determines the Nominal Reference Power for each DSO-connected Delivery Point participating to the Service, the DSO(s) communicate(s) the related Nominal Reference Power(s) to ELIA.
Communication by ELIA of the final Nominal Reference Power to the CRM Candidate	September 1	September 15	A + 70 WD	ELIA communicates the final Nominal Reference Power to the CRM Candidate either by September 1 or 15 depending on the presence of an investment file, or within 70 WD starting from the Prequalification File submission date in case the CRM Candidate wants to prequalify for Secondary Market participation only.

4.3.1.2 Process linked to a Prequalification File including CDS-connected Delivery Point(s) (if CDS is connected to ELIA grid)

75. All the deadlines presented in this table are complementary to the timings presented in the tables above and below for the Standard Prequalification Process and the Fast Track Prequalification Process.

Action	Due date			Details
	Standard Prequalification Process		Fast-track Prequalification Process	
	If the CDS point is an Existing Delivery Point	If the CDS point is an Additional Delivery Point		
CDSO Declaration submission by the CRM Candidate	A	A	A	As part of the Prequalification File, the CRM Candidate provides a CDSO Declaration to ELIA for the CDS-connected Delivery Point when the CDS is connected to the ELIA Grid.
CDS User Declaration submission by the CRM Candidate	A	A	NA	In case the CRM Candidate is not the CDS User, a CDS User Declaration is submitted as part of the Prequalification File for the CDS-connected Delivery Point.
Submission of the cooperation agreement by the CDSO	A + 25 WD	NA	NA	A cooperation agreement is to be signed by ELIA and the CDSO before the Nominal Reference Power is determined. This cooperation agreement is provided to ELIA within 25 WD starting from the submission date of the Prequalification File.
Submission of the cooperation agreement by ELIA	A + 35 WD	NA	NA	From the moment, ELIA receives the cooperation agreement from the CDSO, ELIA signs it and provides it back to the CDSO within 10 WD starting from the receipt by ELIA.

4.3.2 Financial Security

Actions	Due Date		Details
	Primary Market	Secondary Market	
Financial Security submission	E (September 1 st)	E (Notification of the transaction on the Secondary Market)	To be able to access the Auction with his CMU or to validate a transaction on the Secondary Market and if relevant (cf. section 11.2.1.2), the CRM Actor must submit a Financial Security to ELIA.
Financial Security approval/rejection	E + 15 WD	E +15 WD	From the moment a Financial Security is received from the CRM Actor, ELIA has 15 WD to come back to the CRM Actor to approve or reject the Financial Security.

4.3.3 Auction & Pre-delivery Control

Actions	Due Date	Details
Results notification of the Auction issued to each CRM Candidate individually	B	ELIA notifies individually to each Prequalified CRM Candidate the results of the Auction.
Signature of the Capacity Contract	B + 40 WD	Within a time window of 40 WD after the notification of the Auction results, the Prequalified CRM Candidate signs his Capacity Contract with ELIA.
Signature of the Capacity Contract in the event of signature of a Connection Contract	Notification of the Connection Contract + 20 WD	In the event of the signature of a Connection Contract: after the notification of the results of the Auction and at the latest 20 WD after the signature of the Connection Contract (according to the timing required in the applicable technical regulation), the Prequalified CRM Candidate signs his Capacity Contract with ELIA.

4.3.4 Availability Obligation

Actions	Due date	Details
Notification of Announced Unavailable Capacity	D – 1 calendar day	A Capacity Provider notifies his unavailability at the latest at 11:00 on the calendar day preceding the delivery/Availability Test, if it is to be counted as Announced Unavailable Capacity.
Notification of Unavailable Capacity	D+10 Working Days	ELIA rejects notifications of Unavailable Capacity submitted later than 10 Working Days after the start date of the unavailability by the Capacity Provider.
Notification of Scheduled Maintenance	F – 90 calendar days	Where 'F' represents the first day of the Scheduled Maintenance, the Capacity Provider notifies his Scheduled Maintenance at the latest 90 calendar days before the start of the Scheduled Maintenance. For CMUs with a Daily Schedule, any Scheduled Maintenance taking place during calendar year Y needs to be notified at the latest on 31/12/Y-1, thereby still respecting the 90 calendar days.

Approval or rejection of the notification of Unavailable Capacity	F + 5 Working Days	Where 'F' represents the moment of reception of the Capacity Provider's notification of Unavailable Capacity, ELIA has up to 5 WD to approve or reject it and notify the Capacity Provider.
Deleting an Unavailable Capacity notification	F + 10 Working Days	Where 'F' represents the start date of the unavailability. Automatically created notifications for CMUs with Daily Scheduled can be deleted until 10 Working Days after the start of the unavailability in the notification.
Availability Test announcement	D – 1 calendar day	An Availability Test is announced by ELIA between 07:00 and 07:30 on the calendar day preceding the Availability Test.
Notification of (Partial) Declared Day-ahead Prices	D – 1 calendar day	Updated or new (Partial) Declared Prices are notified by the Capacity Provider to ELIA at the latest at 9:00 on the calendar day preceding the delivery.
AMT Moment/MTU announcement	D – 1 calendar day	The exact AMT MTUs/Moment is (are) announced at the latest at 15:00 the calendar day preceding the occurrence of the AMT MTU. If no AMT MTUs are identified before that time, the fallback procedure applies according to section 15.8.
Availability Test	D	The MTUs of an Availability Test may coincide with an AMT MTU. In this case, the Availability Test has a priority over the AMT MTU.
Settlement	15 th of M+2 following D	ELIA communicates to each concerned Capacity Provider their respective delivery activity report containing all results of the Availability Monitoring and Availability Tests (over month M, on each CMU separately) along with, if applicable, associated penalty(ies). In this same report, ELIA indicates whether the Capacity Provider is/should be subject to a downwards revision of his Monthly Remuneration (as defined in the Capacity Contract). When the Capacity Provider provides successfully its Obligated Capacity, he notifies it to ELIA. From that moment, ELIA has 5 Working Days to verify the information received by the Capacity Provider. ELIA then reinstates the original Monthly Remuneration as of the next payment.
CMU without Daily Schedule monitored via the Outage Planning Process	G – 15 calendar days	Where 'G' stands for the start date of the Delivery Period. Deadline for Capacity Providers to notify ELIA of the CMUs without Daily Schedule that he would wish to be monitored using the Outage Planning Process, following the process for CMUs with Daily Schedule.

4.3.5 Secondary Market

Actions	Due Date		Details
	Bilateral Secondary Market transaction	Secondary Market transaction via an Exchange	
Notification of a Secondary Market transaction	C – 1 WD	C – 1 WD	The Buyer of Obligation or Seller of Obligation submits a notification of the Secondary Market transaction to ELIA via the CRM IT Interface. This Secondary Market transaction can also be notified by an Exchange which receives a mandate from both the Buyer and the Seller of an Obligation. The Buyer of an Obligation provides a Financial Security as pre-condition for the transaction to take place (if applicable).
Acknowledgement of reception of the notification	C		Maximum 1 WD after ELIA is notified by the Buyer or the Seller of an Obligation, ELIA acknowledges reception of the notification. The acknowledgment timing defines the Transaction Date.
Notification, as a matching confirmation, of the other actor involved in the Secondary Market transaction	C + 3 WD	NA	As soon as either the Buyer or the Seller of an Obligation notifies his intention to realize a transaction on the Secondary Market with the necessary information, the other party must confirm this transaction to ELIA within 3 WD before notification acknowledgement. This is not applicable to an exchange which has received a mandate from both parties prior notification.
Approval/rejection of the Secondary Market transaction by Elia	C + 3 WD		Within a timeframe of 3 WD after notification acknowledgement, ELIA notifies the approval or rejection of the Secondary Market transaction.
Contractual implementation initiation	C + 15 WD		Within 15 WD after the approval of the Secondary Market Transaction(s), Elia initiates the contractual implementation of the transaction(s) and notifies the Buyer of Obligation and the Seller of Obligation.
Transaction Validation Date	Max C + 8 WD or C + 13 WD		In case of a suspicion of irregularity of a Secondary Market Transaction the auditor of the Capacity Market or ELIA sends an ad hoc report to the CREG within 5 WD after approval of the aforementioned Transaction by ELIA. If the

		CREG ascertains an irregularity, it instructs ELIA to declare the Transaction null and void at the latest 10 WD after the approval of the Transaction. In the absence of such ad hoc report within 5 WD, or if, within 10 WD after the approval of the Secondary Market transaction by ELIA, the CREG does not instruct ELIA to declare the transaction on the Secondary Market null and void, ELIA modifies the Contracted Capacity of the Transaction(s) of the Seller of an Obligation accordingly. If, on the contrary, the CREG asks ELIA to cancel the transaction, ELIA changes the status of the transaction on the Secondary Market to 'rejected' (and cancels the transaction).
--	--	---

4.4 TIMINGS OF THE OPERATIONAL PROCESSES SPECIFIC FOR CROSS BORDER PARTICIPATION

76. This section summarizes the most important milestones per operational process that is specific to cross border participation and is only to be followed by Indirect Foreign Capacities (Admission Process, Pre-Auction and Financial Security).

4.4.1 Admission Process

77. The Admission Process starts after the Minister has given the Instruction to organize the (Pre-)Auction(s) in the year that precedes the Delivery Period.

Action	Due Date	Details
Application form submission date	April 1 + 1 WD	Once the Foreign CRM Candidate has submitted his Prequalification application form, ELIA has 5 WD to approve or reject it. The Admission File cannot be submitted without an approved Prequalification application form.
Admission File submission date	April 12	Last date by which the Foreign CRM Candidate may submit his Admission Process File in order to be able to participate to the forthcoming Pre-Auction.
Results of the Admission File first compliance check	May 3	The first Admission Process File submission is followed by a compliance check realized by ELIA by May 3 at the latest. This may trigger a request for additional information or clarification, in such case the Admission Process File is provisionally "rejected".
Finalization of the Admission File	May 15	In the event that ELIA requests for additional information, the Foreign CRM Candidate needs to come back to ELIA with this additional information by May 15.
Results of the final Admission File compliance check	4 WD after May 15	Final results with respect to the compliance check of the Admission file are communicated to the Foreign CRM Candidate 4 WD after May 15.

4.4.2 Pre-Auction

Action	Due Date	Details
Bid submission (gate open)	May 24 9:00	Period during which Bids may be introduced by Admitted Foreign CRM Candidates.

Bid submission (gate close)	May 25 17:00	
Pre-Auction results notification	June 12	Date by which Pre-Auction results are communicated.

4.4.3 Financial Security

Actions	Due Date	Details
Financial Security submission	May 10	To be able to access the Pre-Auction with his CMU, the Foreign CRM Candidate must submit a Financial Security to ELIA.

5 PREQUALIFICATION PROCESSES

5.1 INTRODUCTION

The purpose of a Prequalification Process is to determine whether and with which volumes a Capacity Holder is eligible to participate in the Auction or the Secondary Market.

This chapter details the three different Prequalification Processes (i.e. Standard Prequalification Process, Specific Prequalification Process and Fast Track Prequalification Process) that may be followed by a Capacity Holder. It is structured in six sections.

Sections 5.2 to 5.5 describe the processes a CRM Actor goes through when prequalifying a CMU.

Section 5.6 focuses on the evolution in time of the submitted information.

Section 5.7 details the communication between ELIA and the CREG during a Prequalification Process.

Foreign Capacity Holders can find, in addition to this Chapter, more details and the exact requirements for the Admission Process and Prequalification processes in Chapter 17.

5.2 PREQUALIFICATION PROCESS REQUIREMENTS

5.2.1 Preparation phase

78. A Capacity Holder is invited to prepare its submission of a Prequalification File. In particular, the Capacity Holder is invited to verify upfront the EAN codes and anticipated Nominal Reference Power (cf. section 5.4.1) of the Delivery Points and/or Low Voltage Delivery Point Group(s) it wishes to prequalify. In case its CMU is subject to a Daily Schedule, the Capacity Holder should use the EAN code relating to the Scheduling Agent. Moreover, the Capacity Holder is invited to timely get in touch with its relevant grid operator(s) to prepare to answer the prior requirements related to the submission of a Prequalification File. Furthermore, the Capacity Holder is invited to familiarize themselves with the requisite documentation to be provided.

5.2.2 Requirements prior to the submission of a Prequalification File

79. Prior to submitting a Prequalification File, a Capacity Holder shall first become a CRM Candidate by filling in an application form (according to section 5.2.2.1) and then declare that it undertakes to comply with the checks listed in section 5.2.2.2.
80. An Indirect Foreign Capacity Holder that wishes to participate in the Primary Market, is already a CRM Candidate if his application form has been filled in and approved by ELIA during the Admission Process according to section 17.3.2.2.1.

5.2.2.1 Application form

81. The Capacity Holder is invited to fill in an application form through a preliminary access to the CRM IT Interface.
82. For a legal person, the form includes the company or association details and the contact details of the contact person (in this respect, functional mailboxes are allowed). For a natural person, it contains the personal contact details.
83. The application form is reviewed by ELIA in accordance with section 5.3.1.
84. To be able to submit his application form, the Capacity Holder confirms to ELIA that he complies with the relevant Data Protection Legislation (as detailed in section 2.9) by marking the dedicated box on the CRM IT Interface.
85. When the application form has been approved by ELIA, each contact person mentioned in the application form is considered to be a user of the CRM IT Interface.

5.2.2.2 Compliance check(s)

86. Once the application form is approved by ELIA and prior to the submission of a Prequalification File, the CRM Candidate declares that he undertakes⁷ to comply with the provisions listed below by ticking the corresponding boxes in the CRM IT Interface:
 - for participation in a Standard Prequalification Process or a Specific Prequalification Process:
 - the latest Functioning Rules approved by Royal Decree; and
 - the provisions of the Capacity Contract, that he commits to sign if selected during the Auction and which complies with the standard capacity contract approved by the CREG; and
 - if applicable, the eligibility criteria for the investment costs fixed pursuant to article 7undecies § 9 al. 4 of the Electricity Act; and
 - the admissibility criteria for the Prequalification Process fixed pursuant to article 7undecies § 8 al. 1, 1° and 2° of the Electricity Act; and
 - if applicable, the requirements in terms of prior authorization for the establishment and operation of the facilities referred to in article 4 § 1 of the Electricity Act; and
 - if applicable, the CO₂ Emissions Cap; and
 - Any other applicable legal and regulatory framework.
 - for a participation in a Fast Track Prequalification Process, the CRM Candidate only declares that he undertakes to comply with the provisions related to the Fast Track Prequalification Process detailed in chapter 5 of the Functioning Rules approved by Royal Decree.

It is up to the CRM Actor to remain fully compliant at all times with the abovementioned checks applicable to it.

⁷ This can be done by any user of the CRM IT Interface and once it has been done, it is considered as validated for all other users linked to the same CRM Candidate.

87. After having been Admitted and selected in the Pre-Auction, and before the deadline for submission of the Prequalification File as defined in the Electricity Act, the Admitted Foreign CRM Candidate undertakes to comply with the latest version of the CRM Functioning Rules approved by the CREG and published on ELIA website in order to be able to submit his Prequalification File.

5.2.3 Requirements for the submission of the Prequalification File

88. This section lists all the requirements to be timely respected by a CRM Actor for his Prequalification File to be considered as “approved” by ELIA. The submitted data and documents make up the Prequalification File. Prequalification Files that fail to timely meet the requirements as described in this section will be considered as “rejected” by ELIA. Example models of different Prequalification Files are available in annex 18.1.8.
89. A CRM Actor may submit a Prequalification File in one of the following three types of Prequalification Processes:
- The Standard Prequalification Process, if the CRM Actor intends to participate in the Primary Market or in the Secondary Market; or
 - The Fast Track Prequalification Process, if the CRM Actor has no intention to participate in the forthcoming Auction(s) but has an obligation to submit a Prequalification File in accordance with article 7undecies § 8 al. 2 of the Electricity Act and supplemented by the description in § 93, second alinea; or
 - The Specific Prequalification Process, if the CRM Actor intends to participate in the Primary Market with a Virtual CMU.
90. A CRM Candidate willing to participate to the Auction with low voltage connected Delivery Points is required to do so by creating Low Voltage Delivery Point Groups (according to section 5.2.3.1.2) that can be added to a CMU and by following the Standard Prequalification Process.
91. A CRM Actor can continuously submit a Prequalification File, but must consider the following timings:
- The deadline to submit a Prequalification File, at the latest June 15 in the year of the forthcoming Auctions, as defined in article 7undecies § 8 last alinea of the Electricity Act:
 - when the CRM Actor wants to participate in the forthcoming Auctions in the same year (Primary Market); or
 - when the CRM Actor has no intention to participate in the forthcoming Auctions in the same year but has an obligation to submit a Prequalification File in accordance with article 7undecies § 8 al. 2 of the Electricity Act and supplemented by the description in § 93, second alinea;
 - A maximum lead time of seventy Working Days for ELIA to process a Prequalification File when the CRM Actor wants to participate in the Secondary Market.
92. A Prequalification File is for one CMU only.
93. The Fast Track Prequalification Process is only accessible for electricity production or storage facilities that have an obligation to introduce a Prequalification File in accordance with article 7undecies § 8 al. 2 of the Electricity Act.

The obligation to submit a Prequalification File for the electricity production and storage facilities also applies to Additional Capacities:

- For which an authorization for a production or an energy storage was obtained and for which a technical agreement was signed with ELIA;
 - For which a Connection Contract was signed with ELIA, whose connection has not yet been commissioned and for which the related Capacity Holder has decided not to participate in the Auctions organized during the current year.
94. Admitted CRM Candidates can only follow the Standard Prequalification Process.
95. Admitted CRM Candidates are required to submit a Prequalification File for each CMU that has been selected in the Pre-Auction. The requirements during the Prequalification Process are the same as during the Admission Process, defined per country (according to section 17.3.2.2.3). During the review of the submitted information, only the requirements that differ from the Admission Process are to be checked. For every field where a declaration to provide a certain element was sufficient in the Admission Process, the element itself (e.g. document, data, ...) is to be provided at the latest by June 30 of the year during which they participated to the Pre-Auction.
96. Foreign CRM Candidates that are not going through the Admission Process cannot participate to the Pre-Auction and the Auction that follows. However, they can still prequalify themselves in accordance with § 97 and section 5.3.2 in order to participate to the Secondary Market.
97. Foreign CRM Candidates willing to only participate in the Secondary Market must provide the same requirements and fulfil the same criteria as the ones from the Admission Process (according to sections 17.3.2.2.2 and 17.3.2.2.3). For every field where a declaration to provide a certain element was sufficient during the Admission Process, the element itself (e.g. document, data, ...) must be provided during the Prequalification Process.

5.2.3.1 Requirements applicable to the Standard Prequalification Process

5.2.3.1.1 General requirements for a Delivery Point

98. A Delivery Point can belong to only one CMU and therefore to only one CRM Candidate at a specific point in time of a Delivery Period.
99. More than one Delivery Point (in a single CMU or in different CMUs) can be used to deliver the Service behind an Access Point as long as these Delivery Points do not influence each other.

The use of two Delivery Points (in a single CMU or in different CMUs) delivering a Service via a Submeter and the related Headmeter or via two hierarchically linked Submeters (one Delivery Point upstream of the other one) is tolerated at a specific point in time of a Delivery Period only if the following three conditions are met:

- the two Submeters (or the Headmeter and the Submeter) belong to the same CRM Candidate; and
- the CRM Candidate renounces to invoke any influence of the Service supplied downstream on the Service supplied upstream; and
- one of the two concerned Delivery Points has already prequalified in the FCR service (Frequency Containment Reserve, one of the balancing services).

ELIA applies the 'first come, first served' rule when processing Prequalification Files.

100. The following table includes all the data and documents that shall be provided per Delivery Point (existing or additional) to ELIA by a CRM Candidate as part of his Prequalification File in order to be considered as “approved” (as per § 144) in case he participates in a Standard Prequalification Process.

The crosses in the table indicate for which status (existing and/or additional) the requirement applies. An asterisk in the last two columns means that the information is mandatory for all Existing or Additional Delivery Points, whereas an asterisk in the comments-column describes the subset of Delivery Points for which the information provision is mandatory.

			Delivery Point's status	
Requirements	Type of data	Comments	Existing	Additional
General information				
Delivery Point name	Name	The CRM Candidate chooses and communicates a Delivery Point's name. There is no requirement with respect to the choice of this name. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the Delivery Point's name is included in the CDSO Declaration.	X*	X*
Technology	Name (drop-down list)	The technology of the Delivery Point is supplied according to the list provided by Article 13 §1 of the <i>Royal Decree on Methodology</i>. If the technology selected for the Delivery Point(s) by the CRM Candidate is Demand Side Management, he ensures that the Delivery Point(s) for which he wishes to prequalify and participate to the Auction is (are) not connected to a generation unit and cannot lead to an injection on such grid. The CRM Candidate should confirm this via the CRM IT Interface. This declaration is binding for the CRM Candidate in the event of selection in the Auction.	X*	X*
Type of Delivery Point	Name (drop-down list)	The CRM Candidate needs to inform ELIA about the fact that the Delivery Point is connected to the ELIA grid, a Distribution System Operator (DSO) grid or a Closed Distribution System (CDS). In the event that the Delivery Point is connected to a CDS, the CRM Candidate also needs to inform ELIA if the CDS is connected to the ELIA Grid or the DSO Grid.	X*	X*
Single line diagram	Diagram (PDF)	A single line diagram (as defined in articles 366 and 367 of the Federal Grid Code) is a diagram with the specific identification of the exact location of the Delivery Point. It can include more than one Delivery Point. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the single line diagram is included in the CDSO Declaration. *The CRM Candidate declares to provide a single line diagram in case it is requested by ELIA for Existing ELIA Grid-connected Delivery Points, for Existing CDS-connected Delivery Points when a CDS is connected to the ELIA Grid and for Existing TSO-connected Delivery Points in case of Cross-Border participation. If requested, the diagram must be provided within ten Working Days upon ELIA's request.	X	
Linked Capacities	Number (ID of the Delivery Point(s))	*The CRM Candidate provides ELIA with the list of Delivery Points which are linked together (Linked Capacities). The link between Delivery Points leads to links between CMUs and can be translated into "Linked Bids" for the Auction as specified in § 266.	X	X
Corresponding DSO	Name (drop down list)	*In case the Delivery Point is connected to a DSO Grid or a CDS connected to the DSO Grid, the CRM Candidate indicates which DSO needs to be contacted by ELIA to initiate the Delivery Point's Nominal Reference Power calculation.	X	X
EAN code(s) of the Access Point	Number	The EAN code of the Access Point is the unique identification number used to identify the metering device of the Access Point that is related to the Delivery Point. For a CDS-connected Delivery Point, the EAN code(s) is(are) included in the CDSO Declaration if the CDS is connected to the ELIA Grid. For a Delivery Point that is not CDS-connected, if the Delivery Point is defined on the level of the Headmeter, the provided EAN code of the Access Point will be the same as the provided EAN code of the Delivery Point.	X*	X

<i>EAN code(s) of the Delivery Point/Identification of the Delivery Point (for a CDS-connected Delivery Point)</i>	Number	The EAN code of the Delivery Point is a unique identification number used to identify the metering device of the Delivery Point. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the EAN code(s) correspond(s) to the one(s) that is(are) included in the CDSO Declaration. With the agreement of the CRM Candidate, ELIA may adapt the EAN Code of the Delivery Point to meet the requirement for a specific EAN Code.	X*	X
<i>CO₂ calculation module</i>	Signed document (PDF)	This is a calculation module provided by the Federal Public Service Economy on its CRM webpage and is filled in by the CRM Candidate as part of its Prequalification File. *This requirement is mandatory for Delivery Points that concern an electricity production or a storage facility using fossil fuels.	X	X
<i>CO₂ emission</i>	Number (in g/kWh)	*The CRM Candidate must provide a CO₂ emission of the Delivery Point if it concerns an electricity production or a storage facility using fossil fuels as detailed in annex 18.1.6. Other capacities can provide CO₂ emission whenever relevant. Their value set by default is 0, with this parameter being used for the Auction in case tie-breaking rules are necessary (as per section 6.3.3.2). The CO₂ emissions are the subject of a decision by ELIA based on an advice of Federal Public Service Economy during the Prequalification File review process as detailed in §§ 142, 143 and 144. The CRM Candidate selecting a storage related technology without submitting emission supporting documents, undertakes to ensure that the storage facility for which he wishes to prequalify and participate to the Auction or participate to the Secondary Market is not connected to an electricity production but to the TSO's or DSO's grid. The CRM Candidate should confirm this via the CRM IT Interface. This declaration is binding for the CRM Candidate in the event of selection in the Auction. The FPS Economy reserves itself the right to verify the accuracy of this declaration at any time. Any offender is liable to sanctions.	X	X
<i>CO₂ emission additional documentation</i>	PDF	*Whenever desired by the CRM Candidate, or when explicitly requested by the Federal Public Service Economy, additional specific CO ₂ related documentation is provided via the CRM IT Interface.	X	X
<i>Grid User Declaration</i>	Signed document (PDF)	*The Grid User Declaration is a signed declaration to provide in case the Grid User differs from the CRM Actor. The list of the clauses that must at least be presented into this signed declaration can be found in annex 18.1.2. A Delivery Point can be related to only one Grid User Declaration at a time.	X	
<i>Information related to production or energy storage permit</i>	Signed document (PDF)	*As stated in article 7undecies § 8 al. 4 of the Electricity Law, if required according to article 4 §1 of the Electricity Act, the CRM Candidate provides: - the production or energy storage permit if the CRM Candidate already has it; or - proof that a production or energy storage permit request has been introduced at the latest by April 15 of the year of the forthcoming Auction(s) if the CRM Candidate does not yet have it. One production or energy storage permit can be valid for more than one Prequalification File as it may cover more than one CMU. For the CMU to be prequalified, such production or energy storage permit must be valid at least until the notification of the Auction results (defined in section 6.4) and must be obtained within twenty days before the deadline for submitting Bids in connection with the auctions, in accordance with article 7undecies §12 al. 3, 2 a). In order to have his Prequalification File approved, the CRM Candidate must provide the requested production or energy storage permit to ELIA once it has been obtained according to the timing detailed above.		X
<i>General information – For CDS connected Delivery Points:</i>				
<i>CDSO Declaration</i>	Signed document (PDF)	This declaration can be found in annex 18.1.3. *Providing a CDSO Declaration is mandatory in case of a CDS-connected Delivery Point when the CDS is connected to the ELIA Grid. ** This concept is not applicable to Capacities connected to the low voltage grid.	X	X
<i>EAN code of the CDS Market Access Point</i>	Number	*In case of a CDS-connected Existing Delivery Point, the CRM Candidate is obliged to provide the EAN code of the CDS Market Access Point. The corresponding EAN code(s) is(are) included in the CDSO Declaration if the CDS is connected to the ELIA Grid.	X	X

		** This concept is not applicable to Capacities connected to the low voltage grid.		
CDS User Declaration	Signed document (PDF)	*The CDS User Declaration is a signed declaration to provide in case of a CDS-connected Delivery Point and in case the CDS User differs from the CRM Actor. The list of the clauses that must at least be presented into this signed declaration can be found in annex 18.1.2. A Delivery Point can be related to only one CDS User Declaration at a time. ** This concept is not applicable to Capacities connected to the low voltage grid.	X	
General information – For Direct Foreign Capacity Holders:				
Agreement between Belgium and Adjacent Member State	Signed document (PDF)	*In the event that the CRM Candidate is an Direct Foreign Capacity Holder, he provides to ELIA the agreement as set in Article 7undecies §8 al. 5. This agreement allows the Direct Foreign Capacity Holder to prequalify a CMU including this Delivery Point.	X	X
Declaration by the Direct Foreign Capacity Holder	Signed document (PDF)	*In the event that the CRM Candidate is an Direct Foreign Capacity Holder, he provides to ELIA a declaration stating that he will respect the requirements of the agreement signed between Belgium and the European adjacent Member State.	X	X
Nominal Reference Power related information – for Existing Delivery Points:				
Expected Nominal Reference Power	Number (in MW)	In case of an Existing Delivery Point, the CRM Candidate provides the Expected Nominal Reference Power of the Delivery Point. For a CDS-connected Delivery Point, the Expected Nominal Reference Power is included in the CDSO Declaration.	X*	
NRP based on injection data only	Name (drop-down list)	The CRM Candidate indicates to ELIA whether the NRP of his Delivery Point can be determined based on injection data only. This will have an impact on the methodology used to determine NRP.	X*	
Non-representative days for NRP determination	Signed document	In case the NRP of the Delivery Point cannot be determined based on injection data only, the CRM Candidate may provide a list of non-representative days of the past thirteen months, which will then be discarded from the period used to determine the NRP as described in § 161. Non-representative days can only be exceptional holidays, strike days or closing periods that have an impact on the injection/offtake profile of the Delivery Point. This has to be justified as such by the CRM Candidate.	X	
Unsheddable Margin	Number (In MW)	The Unsheddable Margin cannot be lower than the negative of the Nameplate capacity of production and the negative of the maximal injection. *This requirement is mandatory only for Delivery Points for which NRP cannot be calculated based on injection data only	X	
Nominal Reference Power related information – for Additional Delivery Points:				
Declared Nominal Reference Power	Number (in MW)	In case of Additional Delivery Point, the CRM Candidate provides respectively the Declared Nominal Reference Power of the Delivery Point.		X*
Grid constraint related information – for Additional Delivery Points part of a New Build CMU:				
Existing connection capacity	Number (in MW)	It is the connection capacity (defined as per the Detail Design). Such value is used by ELIA to determine the volume of additional connection capacity which will be subject to the grid constraints applicable to the forthcoming Auction. In this way, the additional connection capacity corresponds to the difference between the capacity agreed upon in the technical agreement and (if any) the sum of the existing connection capacity(ies) associated to this technical agreement. *This requirement is mandatory only for Additional Delivery Points that are part of a New Build CMU.		X
Technical agreement	Name (drop-down list)	*If a signed technical agreement is required according to the connection process (cf. Code of Good Practice applicable Federal or Regional Grid Code), the CRM Candidate indicates to ELIA whether or not this technical agreement has already been obtained (Yes/No). The technical agreement must be obtained no later than the 25 th of August preceding the Auction concerned. For a CDS-connected Delivery Point, the ID if the technical agreement corresponds to that included in the CDSO Declaration.		X

EDS ID	Number (EDS ID)	* If an EDS is required according to the connection process (cf. Code of Conduct or applicable Federal or Regional Grid Code), the CRM Candidate provides the EDS ID. An EDS ID can be valid for more than one Prequalification File as it may cover more than one CMU and Delivery Point.	X
---------------	--------------------	--	---

Table 1: Requirements per Existing Delivery Point and per Additional Delivery Point

5.2.3.1.2 Requirements for low voltage Delivery Point(s) and Low Voltage Delivery Point Group(s)

101. A low voltage connected Delivery Point can only belong to one Low Voltage Delivery Point Group for the same Delivery Period.
102. All low voltage connected Delivery Points which are part of a single Low Voltage Delivery Point Group, must be connected to the same DSO. Of all Low Voltage Delivery Point Groups which have been created by the CRM Candidate, only one Low Voltage Delivery Point Group per DSO may have a Nominal Reference Power lower than 100 kW.
103. The CRM Candidate willing to submit a Prequalification file for Delivery Points connected to the low voltage grid must initiate such process by creating all these Delivery Points in the Flexhub and provide the related required information (including Declared Nominal Reference Power) for these Delivery Points.

The CRM Candidate creates the Low Voltage Delivery Point Group in the CRM IT Interface and sends a request to ELIA to create this Low Voltage Delivery Point Group in the Flexhub at the latest by five Working Days before Prequalification Files submission deadline as defined in the Electricity Act.

Then, ELIA creates the Low Voltage Delivery Point Group in the Flexhub within five Working Days following the request from the CRM Candidate. The CRM Candidate takes care of the aggregation & management of low voltage connected Delivery Points included in the Low Voltage Delivery Point Group created by ELIA.

The CRM Candidate creates the CMU he wants to prequalify via the CRM IT Interface and adds the relevant Low Voltage Delivery Point Group(s) in this CMU.

104. All information to be provided on Delivery Point level for low voltage connected Delivery Points connected to the DSO grid are to be provided by the CRM Candidate to the concerned DSO, who will check them via the Flexhub⁸ where relevant.

The asterisk in one of the last two columns indicates that the information is required for all Existing or Additional Delivery Points, while the asterisk in the 'Comments' column describes the subset of Delivery Points for which the information is required.

Requirements	Type of data	Comments	Delivery Point's status	
			Existing	Additional
Delivery Point Name	Name	The CRM Candidate chooses and communicates a Delivery Point's name. There is no requirement with respect to the choice of this name.	X*	X*

⁸ Link to the Flexhub: <https://flexhub.synerggrid.be/portal>

Technology	Name (drop-down list)	The technology of the Delivery Point is supplied according to the list provided by Article 13 §1 of the <i>Royal Decree on Methodology</i> .	X*	X*
Corresponding DSO	Name (drop-down list)	The CRM Candidate indicates which DSO needs to be contacted by ELIA to initiate the Nominal Reference Power calculation of the Low Voltage Delivery Point Group to which it belongs.	X*	X*
EAN code(s) of the Access Point	Number	The EAN code of the Access Point is the unique identification number used to identify the metering device of the Access Point that is related to the Delivery Point. For a Delivery Point that is not CDS-connected, if the Delivery Point is defined on the level of the Headmeter, the provided EAN code of the Access Point will be the same as the provided EAN code of the Delivery Point.	X*	X
EAN code(s) of the Delivery Point	Number	The EAN code of the Delivery Point is a unique identification number used to identify the metering device of the Delivery Point. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the EAN code(s) correspond(s) to the one(s) that is(are) included in the CDSO Declaration. *In agreement with the CRM Candidate, ELIA may adapt the EAN Code of the Delivery Point to meet the requirement for a specific EAN Code.	X*	X
Opt-out agreement or difference valuation contract (situation without transfer of energy)	Signed document	*In accordance with the rules governing the transfer of energy referred to in Article 19bis, §2 of the Electricity Act, the CRM applicant provides ELIA with an opt-out agreement signed by the flexibility service operator, the supplier and their respective BRPs valid for the Supply Period, or demonstrates that it is in an implicit opt-out situation or provides a contract for difference valuation concluded with its supplier.	X	X
Mandate⁹	Signed document (pdf)	The Grid User's mandate is signed between the Grid User and the CRM Actor, according to the form determined in the FSP-DSO agreement (which can be found on www.synergrid.be). The mandate indicates the CRM as the flexibility product and the Grid User's concerned Delivery Points (SDP-F). A Delivery Point can be related to only one Grid User's mandate at a time.	X*	X*
Expected Nominal Reference Power	Number (in MW)	In case of an Existing Delivery Point, the CRM Candidate provides the Expected Nominal Reference Power of the Delivery Point. For a CDS-connected Delivery Point, the Expected Nominal Reference Power is included in the CDSO Declaration.	X*	
NRP based on injection data only	Name (drop-down list)	The CRM Candidate indicates to ELIA whether the NRP of his Delivery Point can be determined based on injection data only. This will have an impact on the methodology used to determine NRP.	X*	
Unsheddable Margin	Number (In MW)	The Unsheddable Margin cannot be lower than the negative of the nameplate capacity of production and the negative of the maximal injection. *This requirement is mandatory only for Delivery Points for which NRP cannot be calculated based on injection data only	X	
Declared Nominal Reference Power	Number (In MW)	In case of Additional Delivery Point, the CRM Candidate provides the Declared Nominal Reference Power of the Delivery Point.		X*
CO₂ emission	Number (in g/kWh)	A CRM Candidate participating to the CRM with low voltage connected Delivery Points is exempted from providing detailed information on CO ₂ emissions linked to his Delivery Points provided that he declares that the CO ₂ emissions linked to his Delivery Points comply with the CO ₂ requirements foreseen for an electricity production and a storage facility as detailed in annex 18.1.6.	X	X
CO₂ emission additional documentation	PDF	*Whenever desired by the CRM Candidate, or when explicitly requested by the Federal Public Service Economy, additional specific CO ₂ related documentation is provided via the CRM IT Interface.	X	X

Table 2: Requirements per Delivery Point connected to a low voltage grid

105. All information to be provided on the Low Voltage Delivery Point Group level are to be provided by the CRM Candidate to ELIA via the CRM IT Interface.

⁹ The Mandate in question can be found on Synergrid's website- via the following link: [autorisation-par-urd-20200908.docx](#) (live.com)

			Low Voltage Delivery Point Group's status	
Requirements	Type of data	Comments	Existing	Additional
EAN code of the Low Voltage Delivery Points Group	Number	The EAN code of the Low Voltage Delivery Point Group is a unique identification number used to identify the Low Voltage Delivery Point Group.	X*	X*
Low Voltage Delivery Point Group name	Name	The CRM Candidate chooses and communicates a Low Voltage Delivery Point Group's name. There is no requirement with respect to the choice of this name.	X*	X*
Nominal Reference Power of the Low Voltage Delivery Point Group	Number (in MW) on a declarative basis	The CRM Candidate provides the Declared Nominal Reference Power of the Low Voltage Delivery Point Group, which is equal to the sum of the Declared Nominal Reference Power of the low voltage connected Delivery Points part of this Low Voltage Delivery Point Group.	X*	X*
DSO	Name (drop down list)	The CRM Candidate indicates to which DSO his Low Voltage Delivery Point Group is connected.	X*	X*

Table 3: Requirements for a Low Voltage Delivery Point Group

5.2.3.1.3 Requirements for Existing Delivery Points

106. An Existing Delivery Point may be any point or a group of points associated to:

- a Headmeter at an Access Point connected to the ELIA Grid; or
- a meter (or set of meters) used by the CDSO as part of its invoicing obligations in relation to a CDS Market Access Point; or
- a Headmeter at an Access Point connected to the DSO Grid; or
- a Submeter within the electrical facilities of a Grid User downstream of an Access Point connected to the ELIA Grid or to a CDS; or
- a Submeter within the electrical facilities of a Grid User downstream of an Access Point connected to the DSO Grid. This option is not applicable to Low Voltage Delivery Point Groups.

107. In addition to the general requirements, an Existing Delivery Point respects the metering requirements as detailed in Annex 18.1.1.

5.2.3.1.4 Requirements for CDS-connected Existing Delivery Points when the CDS is connected to the ELIA Grid

108. For an Existing Delivery Point connected to a CDS (itself connected to the ELIA Grid), a cooperation agreement (covering the data exchanges between the CDSO and ELIA, see annex 18.1.5), or an amendment to such an agreement, is to be signed by ELIA and the CDSO before the Nominal Reference Power can be determined. The signed cooperation agreement, or the signed amendment, is sent by the CDSO to ELIA by e-mail within twenty-five Working Days starting from the submission date of the Prequalification File.

109. After receipt of the signed cooperation agreement, ELIA signs it in turn and provides it back to the CDSO via email within ten Working Days starting from the receipt by ELIA of this agreement.

110. For a CDS-connected Existing Delivery Point, which is itself connected to the ELIA Grid, the following requirements apply:

- the CDSO grants approval for the Delivery Point to participate in the Service, commits to sign a cooperation agreement with ELIA (annex 18.1.5) and provides a completed CDSO Declaration (annex 18.1.3) to the CRM Candidate – who will, in turn, provide a scan of this declaration and some information included in it to ELIA in accordance with the 18.1.3.1;
- the features of metering at the Delivery Point must be communicated to ELIA in the “CDS Metering Technical Info Checklist” (as referred to in annex 18.1.5).

5.2.3.1.5 Requirements for Delivery Points and/or Low Voltage Delivery Points Group(s) connected to the DSO Grid or to a CDS itself connected to the DSO Grid

111. Prior to the submission of his Prequalification File, the CRM Candidate obtains minimally a proposal for a Connection Contract valid until publication of the results of the Auction for each Additional Delivery Point that he includes.
112. Prior to the submission of his Standard Prequalification File, the CRM Candidate signs with the relevant DSO a DSO-CRM Candidate Agreement using the latest template made available by Synergrid¹⁰ for each Delivery Point connected to a DSO Grid that he included¹¹.
113. In case of a Delivery Point connected to a DSO Grid-connected CDS, no CDSO Declaration is to be provided to ELIA. Bilateral agreements can be made between the DSO and the CDSO, but the DSO remains responsible towards ELIA to provide the required data, which is covered by the DSO-CRM Candidate Agreement.
114. Low voltage Delivery Points connected directly to the DSO Grid provide all information in accordance with § 104.

The CRM Candidate also takes care of the aggregation & management of low voltage connected Delivery Points in the Low Voltage Delivery Point Group via the Flexhub, from the moment the Low Voltage Delivery Point Group has been created by ELIA in the Flexhub.

5.2.3.2 Requirements common to the Standard and the Specific Prequalification Process

5.2.3.2.1 General requirements for a CMU

115. The following table includes all the data and documents that shall be provided per CMU to ELIA by a CRM Candidate as part of his Prequalification File in order to be considered as “approved” (as per § 145). An asterisk in one of the last three columns means that the information is mandatory for the corresponding CMU status, whereas an asterisk in the comments-column describes the subset of CMUs for which the information provision is mandatory.

¹⁰ The latest template of the DSO-CRM Candidate agreement can be found here: Règlements techniques électricité - Synergrid “Contrat-modèle FSP-GRD”

¹¹ ELIA considers that a DSO-CRM Candidate has been signed as soon as a (Declared) Nominal Reference Power is provided by a DSO to ELIA (according to sections 5.4.1.1.1.2.2 5.4.1.1.1.2.2 & 5.4.1.1.2).

			Status of the CMU		
Requirements	Type of data	Comments	Existing	Additional	Virtual
General information:					
CMU name	Name	The CRM Candidate chooses and communicates a CMU name. There is no requirement with respect to the choice of this name.	X*	X*	X*
New Build CMU	Tick box	*For the Standard Prequalification Process, if the CMU in question comprises an electricity production or an electricity storage facility for which the CRM Candidate is (or calls on) an applicant for connection within the meaning of Code of Conduct, the Federal Grid Code or the applicable Regional Grid Code. ELIA – in collaboration with FPS Economy – reserves itself the right to ask for proof if required.		X	
Project ID	Number	*The CRM Candidate provides ¹² or asks for a project ID in the event that his CMU is linked to an Investment File submitted or to be submitted to CREG.	X	X	
Project execution plan	Document	The project execution plan is the document that establishes the method(s) used to execute the project linked to the CMU. More information about this project execution plan can be found in annex 18.1.4.1. A project execution plan can be linked to more than one CMU. *A project execution plan is required for Additional and Virtual CMUs, except in cases where the CMU has already been contracted and has previously provided a project execution plan during its pre-delivery period. In such cases, ELIA shall use the latest version of the project execution plan for the Prequalification File.		X	X
Link with a VCMU	Number (VCMU ID)	*In case the Capacity Provider goes through a Standard Prequalification Process with an Existing CMU that will be used to take over the obligation related to a VCMU, he shall provide the related VCMU's ID. This information shall be included in the Prequalification File from the first Prequalification File submission date and cannot be subsequently modified. The Capacity Provider can only choose from his own VCMUs until the approval of the Prequalification File, ELIA carries out the process described in section 8.6.2.	X		
Renouncing the operating aid	Signed document (PDF)	The CRM Candidate provides to ELIA a declaration (according to the template provided by the General Direction of Energy of the Federal Public Service Economy) renouncing all operating aid during the Delivery Period(s) covered by a Capacity Contract.	X*	X*	
Waiver declaration (capacity reservation and allocation)	Signed document	*If required according § 117. ** This concept is not applicable to low voltage connected Capacities.		X	
Declaration of commitment to the energy transition	Signed document	*If required according § 117.		X	
Permit requirement	Tick box and/or Document (including expiration date)	In accordance with § 118, in order to meet the permit requirements to be able to participate to the Primary or Secondary (as the Buyer of an Obligation) Market, the CRM Candidate provides ELIA proof that it has been awarded, in the last administrative instance, all relevant permits that are required under regional regulations for the construction and/or the operation of the Capacit(y)(ies) included in the CMU in question.	X*	X*	

¹² In the event that more than several Auctions linked to different Delivery Periods taking place during the same year, the CRM Candidate receives a project ID different for each of the Prequalification Files he submits to ELIA if this Prequalification File is linked to a CMU for which the CRM Candidate introduces an assignment request to a Category of Capacity to the CREG.

		If the targeted permits were already submitted during the Prequalification Process linked to the last Auction that took place and were not subject to any change (including on their validity), the CRM Candidate can indicate it via the CRM IT Interface and does not need to resubmit these permits. If the CRM Candidate hasn't indicated it via the CRM IT Interface, he has to follow the regular path described above. *Low voltage connected Capacities willing to prequalify are exempted from providing the required permits.									
Volume related information – for Existing and Additional CMU											
Derating Factor	Number (drop-down list)	The CRM Candidate selects the Last Published Derating Factor that corresponds to the category and, where appropriate, sub-category to which its CMU belongs. The chosen Derating Factor allows ELIA to determine the Eligible Volumes and to define whether or not the CMU is an Energy-constrained CMU: - If the CMU selects a SLA, the CMU is considered as an Energy-constrained CMU; - If the technology of a CMU is declared as falling under Category III with Daily Schedule, in line with article 13 of Royal Decree Methodology] the CMU is categorized as an Energy Constrained CMU with a number of hours in line with its SLA, or in absence thereof categorized as an Energy Constrained CMU with an SLA of 4 hours. In all other cases, the CMU is categorized as a Non-Energy Constrained CMU.	X* X*								
Opt-out Notification	List of information (and signed document in case of motivational letter in accordance with § 214 last bullet)	*As detailed in section 5.4.2, in case the CRM Candidate wants to declare an Opt-out Volume for his CMU, an Opt-out Notification is provided to ELIA per Auction for which he wants to declare an Opt-out Volume.	X X								
Degradation of the Contracted Capacity – Energy retention	Percentage	CRM Candidates, for CMUs with the technology energy storage for which an Investment File is or will be submitted to the CREG, can specify the degradation of their Contracted Capacity over time. To this end, the CRM Candidate specifies the percentages that will be used to degrade the Contracted Capacity over the Capacity Contract Duration, up to 15 years, depending on the Capacity Category (cf. table below). The Energy retention percentage associated to the first Delivery Period must be 100% and the percentage has to be lower or equal year-by-year. <table><tr><td>Delivery Period 1</td><td>100 %</td></tr><tr><td>Delivery Period 2</td><td>?</td></tr><tr><td>...</td><td></td></tr><tr><td>Delivery Period 15</td><td>?</td></tr></table>	Delivery Period 1	100 %	Delivery Period 2	?	...		Delivery Period 15	?	X
Delivery Period 1	100 %										
Delivery Period 2	?										
...											
Delivery Period 15	?										
Volume related information – for Virtual CMU											
Declared Eligible Volume	Number (in MW)	In case of participation in a Specific Prequalification Process, the CRM Candidate declares by himself the Eligible Volume of the CMU.	X*								

Table 4: Requirements per Existing CMU, per Additional CMU and per Virtual CMU

116. In case grid constraints are identified for the ELIA grid, in accordance with § 325, for each Delivery Point that has to be connected to the ELIA Grid or to a CDS connected to the ELIA Grid, except for the Delivery Points already associated to a Capacity Contract, the CRM Candidate, when submitting a Prequalification File in the Standard Prequalification Process, proceeds with the following formal commitments and waivers in relation to the relevant connection capacity (within the meaning of the Connection Contract):

- if the connection applicant disposes of a connection capacity allocated within the meaning of article 57 of the Code of Conduct, of the article 166 of the Federal Grid Code, of the article 109 of the Federal Grid Code 2002 or of the corresponding article of the applicable

Regional Grid Code, and the connection has not yet been commissioned at the Prequalification File submission deadline referred to in article 7undecies, § 8, last alinea, of the Electricity Act:

- an undertaking not to put the connection in service prior to the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;
 - a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the rights conferred on it by the allocation of the relevant connection capacity and/or the conclusion of the Connection Contract;
 - a waiver of the rights conferred on it by the allocation of the relevant connection capacity if the CMU is not selected during one of the Auctions in so far as the results of the Auction render it impossible to implement the initial technical solution set out in the EDS, as specified in the article 46, §3 of the Code of Conduct, the article 105 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code;
- if the connection applicant has for the relevant connection capacity a reservation in accordance with articles 34 and 46 of the Code of Conduct, articles 153 and 160 of the Federal Grid Code 2002 or articles 98 and 99 of the Federal Grid Code or the corresponding article of the applicable Regional Grid Code without having concluded a Connection Contract:
- an undertaking not to sign the Connection Contract before the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;
 - a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the rights conferred on it by the reservation of the relevant connection capacity;
 - a waiver of the rights conferred on it by the reservation of the relevant connection capacity if the CMU is not selected during the Auction in so far as the results of the next Auction render it impossible to implement the technical solution foreseen in the EDS, as specified in article 46 §3 of the Code of Conduct, article 160 of the Federal Grid Code, article 105 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code.
- if the connection applicant does not have allocated connection capacity or reserved connection capacity:
- an undertaking not to sign the Connection Contract before the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;
 - a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the reservation of the relevant connection capacity attached to an EDS, issued where applicable prior to the notification of the prequalification results;
 - a waiver of the rights that would be conferred on it by any reservation of the relevant connection capacity if the CMU is not selected during the Auction and in so far as the results of the Auction render it impossible to implement the technical solution described in the EDS, as specified in the article 46 §3 of the Code of Conduct, article 160 of the Federal Grid Code or in the applicable Regional Grid Code.

The abovementioned commitments and waivers do not become void when the Prequalification File is rejected by ELIA, nor when the CRM Candidate archives the Prequalification File or submits a full Opt-out Notification.

117. The CRM Candidate that wishes to obtain prequalification for a CMU that comprises a fossil fuel-fired electricity production unit having the possibility to sign a Capacity Contract relating

to more than one Delivery Period acknowledges that obtaining such a Capacity Contract does not exempt it either from the legislation or current and future objectives established by the European Union and/or Belgium aiming to reduce greenhouse gas emissions. In addition, it agrees, in the event of obtaining such a Capacity Contract to contribute to the work to prepare policies to achieve said objectives. To that end it appends to its Prequalification File a written declaration in which it undertakes, in the event of one of its Bids being selected in the Auction:

- to study the technical and economic feasibility of reducing greenhouse gas emissions, in accordance with relevant European and Belgian legislation and objectives, for the CMU in question by no later than 31 December 2027;
- to establish, by 31 December 2028, a greenhouse gas emissions reduction plan indicating how the CMU in question will contribute to the transition to carbon neutrality in 2050, with interim objectives for the years 2030, 2035 and 2045. The different CRM Actors concerned by the establishment of an emission reduction plan can decide to create this plan jointly; and
- to reach, for the CMU concerned, zero or negative emissions by 2050 at the latest.

Compliance with the undertakings set out above is verified by the Federal Public Service Economy.

118. The CRM Candidate that participates in the Standard Prequalification Process shall provide proof that it has been awarded in the last administrative instance, all relevant permits that are required under regional regulations for the construction and/or the operation of the Capacit(y)(ies) included in the CMU in question. This proof should be provided preferably by August 31, but at the latest by 06:00 on the day of the Bid submission deadline as referred to in § 306. If the CRM Candidate is participating to the Secondary Market, the proof should be provided at the latest at the time of the notification of a Secondary Market transaction as the Buyer of an Obligation.

The abovementioned requirement does not apply to Capacities connected to the low voltage grid.

119. In accordance with § 323, the connection on the TSO grid of Delivery Points that are included in a New-Build CMU that follows the Standard Prequalification process towards a Y-2 or Y-1 Auction must be expected to be commissioned before the start of the Delivery Period. To evaluate this requirement, the expected commissioning date "T", of the grid connection, must be expected to occur before the start of the Delivery Period for which the Prequalification File of the New-Build CMU is submitted.

- For Delivery Points for which a technical agreement is signed, "T" is calculated starting from the Auction Results publication deadline, as determined by § 1065. The timeline stated in either part A or part B of the technical agreement, whichever is longest, is added to the starting date to obtain "T".
- For Delivery Points for which a Connection Contract is signed, "T" is calculated starting from the Connection Contract signature date. The timeline stated in either part A or part B of the Connection Contract, whichever is longest, is added to the starting date to obtain "T".

120. The Admitted CRM Candidate that intends to participate to an Auction shall submit, via the CRM IT Interface, a permit verification file, preferably before 31 August and at the latest by 06:00, on the Bid submission deadline as referred to in § 306. The permit verification file contains the permits required for the participation to the Belgian CRM and a confirmation from a publicly certified and sworn expert that all necessary licenses and permits for the construction and operation of the project have been obtained. The template for the permit verification file is published on ELIA's website.

The publicly sworn expert confirms that the licenses and permits are definitive, enforceable and cannot be legally challenged on the basis of all known facts at the time of the submission of the permit verification file.

The Foreign TSO performs a marginal review of this permit verification file. This marginal review implies that the Foreign TSO checks that said expert opinion contains all these confirmations and that the permit verification file contains all information required by Elia.

In case of Prequalification for participation in the Secondary Market as the Buyer of an Obligation, the Foreign CRM Candidate submits its permit verification file at the latest 50 Working Days after submission of its Prequalification File.

5.2.3.2.2 Requirements for Existing CMUs and Additional CMUs

121. An Existing CMU or Additional CMU shall:

- contain at least one Delivery Point or Low Voltage Delivery Point Group; and
- respect the minimum threshold to participate in the CRM set pursuant to article 7undecies, § 8, al. 1, 2° of the Electricity Act.

122. A CMU containing a Delivery Point with Daily Schedule cannot contain another Delivery Point.

5.2.3.2.3 Requirements for Virtual CMUs

123. A Virtual CMU (VCMU) has a Declared Eligible Volume that:

- is higher than or equal to the minimum threshold to participate in the CRM set pursuant to article 7undecies, § 8, al. 1, 2° of the Electricity Act; and
- does not exceed the cap set under article 7undecies § 6 al. 1 of the Electricity Act.

124. Only one VCMU can be submitted to ELIA by the same CRM Candidate for each Y-4 Auction.

5.2.3.3 Requirements for Fast Track Prequalification Process

125. A CMU that follows the Fast Track Prequalification Process consists of only one Delivery Point.

126. The Delivery Point of a CMU that follows a Fast Track Prequalification Process respects the following conditions:

- it is part of one CMU only; and
- it is equivalent to or related to an Access Point; and
- it is an electricity production installation or a storage facility that has the obligation to introduce a Prequalification File in accordance with article 7undecies § 8 al. 2 of the Electricity Act.

The obligation to submit a Prequalification File for the electricity production installation and storage facility is also aimed at the following Additional Capacities:

- Additional Capacities for which a valid production or energy storage permit was obtained and for which a technical agreement was signed with ELIA;

- Additional Capacities for which a Connection Contract was signed with ELIA, whose connection has not yet been commissioned and for which the related Capacity Holder has decided not to participate in the Auctions organized during the current year.

127. The following table includes all the data and documents that shall be provided per Delivery Point (existing and/or additional) to ELIA by a CRM Candidate as part of his Prequalification File.

An asterisk in the last two columns means that the information is mandatory for all Existing or Additional Delivery Points, whereas as asterisk in the comments-column describes the subset of Delivery Points for which the information provision is mandatory.

			Delivery Point's status	
Requirements	Type of data	Comments	Existing	Additional
General information:				
Delivery Point name	Name	The CRM Candidate chooses and communicates a Delivery Point's name. There is no requirement with respect to the choice of this name. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the Delivery Point's name is included in the CDSO Declaration.	X*	X*
New Build CMU	Tick box	*If the CMU in question comprises an electricity production installation or an electricity storage facility for which the CRM Candidate has not yet been awarded, in the last administrative instance, all relevant permits that are required under regional regulations for the construction and/or the operation of the Capacit(y)(ies) included in the CMU in question. ELIA – in collaboration with FPS Economy – reserves itself the right to ask for proof if required.		X
Expected 'in service' arrival	Date (declarative basis)	*In case of a New Build CMU, in order to be able to assess the potential contribution of an Additional CMU following the Fast Track Process to Security of Supply, the CRM Candidate prequalifying such CMU must provide his expected date of entering in service on the grid.		X
Technology	Name (drop-down list)	The technology of the Delivery Point is supplied according to the list provided by Article 13 § 1 of the Royal Decree on "Methodology".	X*	X*
Type of Delivery Point	Name (drop-down list)	The CRM Candidate needs to inform ELIA about the fact that the Delivery Point is connected to the ELIA Grid, a DSO Grid or a CDS. In the event that the Delivery Point is connected to a CDS, the CRM Candidate also needs to inform ELIA if the CDSO is connected to the ELIA Grid or the DSO Grid.	X*	X*
Corresponding DSO	Name (drop down list)	*The CRM Candidate indicates – if the Delivery Point is connected to a DSO Grid or a CDS connected to the DSO Grid – which DSO needs to be contacted by ELIA to initiate the Delivery Point's Nominal Reference Power calculation, when relevant.	X	X
EAN code(s) of the Access Point	Number	The EAN code of the Access Point is unique the identification number used to identify the metering device of the Access Point that is related to the Delivery Point. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the EAN code(s) correspond(s) to that (those) included in the CDSO Declaration. If the Delivery Point is defined on the level of a Headmeter, the provided EAN code of the Access Point will be the same as the provided EAN code of the Delivery Point.	X*	X

<i>EAN code(s) of the Delivery Point/Identification of the Delivery Point (for a CDS-connected Delivery Point)</i>	Number	The EAN code of the Delivery Point is a unique identification number used to identify the metering device related of the Delivery Point. For a CDS-connected Delivery Point if the CDS is connected to the ELIA Grid, the EAN code(s) correspond(s) to the one(s) that (are) included in the CDSO Declaration. In agreement with the CRM Candidate, ELIA can adapt the EAN Code of the Delivery Point to satisfy the need to have the required EAN Code.	X*	X
<i>Grid User Declaration</i>	Signed document (PDF)	*The Grid User Declaration is a signed declaration to provide in case the Grid User differs from the CRM Candidate. The list of the clauses that must at least be presented into this signed declaration can be found in annex 18.1.2. A Delivery Point can be related to only one Grid User Declaration at a time.	X	
<i>General information – For CDS connected Delivery Points:</i>				
<i>CDSO declaration</i>	Signed document (PDF)	*In case of a CDS-related Delivery Point, when the CDS is connected to the ELIA Grid, the CRM Candidate provides a CDSO-declaration. This declaration can be found in annex 18.1.3	X	X
<i>CDS User Declaration</i>	Signed document (PDF)	*The CDS User Declaration is a signed declaration to provide in case of a CDS-connected Delivery Point and in case the CDS User differs from the CRM Actor. The list of the clauses that must at least be presented into this signed declaration can be found in annex 18.1.2. A Delivery Point can be related to only one CDS User Declaration at a time.	X	
<i>Volume related information:</i>				
<i>Fast Track Nominal Reference Power</i>	Number (in MW)	It is a declaration by the CRM Candidate about the Nominal Reference Power for the Delivery Point participating to the Fast Track Prequalification Process.	X*	X*
<i>NRP based on injection data only</i>	Name (drop-down list)	The CRM Candidate indicates to ELIA whether the NRP of his Delivery Point can be determined based on injection data only. This will have an impact on the methodology used to determine NRP.	X*	
<i>Non-representative days for NRP determination</i>	Signed document	In case the NRP of the Delivery Point cannot be determined based on injection data only, the CRM Candidate may provide a list of non-representative days of the past thirteen months, which will then be discarded from the period used to determine the NRP as described in § 161. Non-representative days can only be exceptional holidays, strike days or closing periods that have an impact on the injection/offtake profile of the Delivery Point. This has to be justified as such by the CRM Candidate.	X	
<i>Unsheddable Margin</i>	Number (in MW)	The Unsheddable Margin is the minimal amount of net active power offtake withdrawn (in MW) that cannot be curtailed (inflexible or unsheddable power) at the Delivery Point concerned. *This requirement is mandatory only for Delivery Points for which NRP cannot be calculated based on injection data only	X	
<i>Derating Factor</i>	Number (drop-down list)	The CRM Candidate selects the Last Published Derating Factor that corresponds to the category and, where appropriate, sub-category to which its CMU belongs.	X*	X*
<i>Opt-out Notification</i>	List of information (and signed document in case of motivational letter in accordance with § 214 last bullet in PDF)	As detailed in section 5.4.2, an Opt-out Notification is provided to ELIA for each Auction.	X*	X*

Table 5: Requirements for Fast Track Prequalification Process

5.2.4 Requirements for the renewal of a Prequalification File

128. Each year, within five Working Days after the publication of the Functioning Rules (in application of article 7undecies § 12 al. 4 of the Electricity Act), as a reminder to potentially renew the Prequalification File, ELIA sends a notification to each CRM Actor with one or more CMUs:
- for which a Prequalification File has been submitted the previous year via one of the three types of Prequalification Process that was prequalified, approved or rejected; and/or
 - that are related to a Transaction with a Transaction Period that (partially) overlaps with the Delivery Period to which the respective Auction(s) relate(s).
129. CRM Actors are expected to renew a CMU's Prequalification File towards an upcoming Auction by submitting a new or updated Prequalification File with the required data and documents in accordance with section 5.2.3 in the following two cases:
- when the CRM Actor wants to participate to an upcoming Auction with the (Remaining) Eligible Volume for the CMU;
 - when the CRM Actor does not want to participate to an upcoming Auction with the CMU but has the obligation to introduce a Prequalification File in accordance with article 7undecies § 8 al. 2 of the Electricity Act.
 - if the CMU has concluded a Transaction with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates, the CRM Actor is obliged to follow the Standard Prequalification Process. The Prequalification File is either automatically renewed with previously submitted information or the CRM Actor renews its Prequalification File and updates it with relevant volume calculation related information, and if applicable, submits an Opt-out Notification such that the Remaining Eligible Volume is equal to zero MW (no other updates to the Prequalification File are required);
 - in all other cases, the CRM Actor follows the Fast Track Prequalification Process.
130. CRM Actors have to renew a CMU's Prequalification File towards a Secondary Market transaction for a future Delivery Period as the Buyer of an Obligation by submitting a new or updated Prequalification File with the required data and documents in accordance with section 5.2.3 whenever there has been a new publication of the Functioning Rules (in application of article 7undecies § 12 al. 4 of the Electricity Act) since the last notification of the Prequalification results for this CMU in accordance with section 5.5 by ELIA.

The CRM Actors are not expected to renew their Prequalification File of their CMU for a transaction on the Secondary Market for an ongoing Delivery Period as a Buyer of an Obligation.

5.3 REVIEW OF THE SUBMITTED INFORMATION

131. Once an application form or a Prequalification File has been submitted, ELIA verifies its completeness, veracity and accuracy in order to ensure that it is compliant with the requirements listed in section 5.2.

132. The application form submission date and Prequalification File submission date are respectively the dates of notification by ELIA the reception of the application form or the Prequalification File.
133. To verify compliance, by the CRM Actor, with legal and regulatory provisions, all the information submitted by the CRM Actor are stored by ELIA for at least twelve years starting from:
- the Prequalification File rejection date; or
 - the Prequalification File approval date or the date of the notification that the Bid for this CMU was not selected, both dates being subject to the absence of a Secondary Market Transaction; or
 - the date of the end of the Capacity Contract.

5.3.1 Application form

134. Within five Working Days starting from the application form submission date, ELIA approves or rejects the application form and notifies the Capacity Holder. In the event that ELIA, for technical reasons, does not come back to the Capacity Holder within the timeframe mentioned above, the process described in section 15.3 applies.
135. In case of rejection, the notification is provided along with the appropriate motivation. Such rejection does not prevent the Capacity Holder from submitting a new application form.
136. Except in the situation described in section 5.6.1.2.1, the approval of the application form remains valid for an indefinite period of time.
137. If the Capacity Holder wishes to contest the decision taken by ELIA regarding the rejection of an application form, he shall use one of the recourse methods described in chapter 14.

5.3.2 Prequalification File

138. Once a Prequalification File is submitted, the CRM Candidate may only make changes in the following cases:
- when ELIA notifies the CRM Candidate that there is missing and/or erroneous data in the Prequalification File; or
 - if the CMU follows a Fast Track Prequalification Process, after ELIA has approved the Prequalification File; or
 - the CMU follows a Standard or Specific Prequalification Process, after ELIA has prequalified the CMU; or
 - in case of removal of a Delivery Point from an Aggregated CMU, for which an Investment File was submitted to the CREG, at the latest by August 10, provided that this withdrawal is duly justified to the CREG.

The process that applies in these situations is described in § 144.

139. No modification of the Prequalification File can be made by the CRM Candidate between September 1 at 00:00 and September 30 at 06:00 inclusive, with exceptions in the following cases:
- upon request of ELIA (as per § 138);

- for changes linked to an Opt-out Notification (as per section 5.4.2.1.1);
 - in the case of transmission of information related to the obtention of a technical agreement process as applicable following the Code of Conduct or the Regional Grid Code;
 - in the event of transmission, within the timeframe referred to in article 7undecies, § 12, para. 3, 2º, a), of information related to the obtaining of a production or energy storage permit or the period referred to in Article 7undecies, §12, para. 3, 2º, c with regard to permits under regional regulations.
140. The processing of a Prequalification File by ELIA entails the processing of the information provided in the Prequalification file as required in the section 5.2.3.
141. The review of a Prequalification File is additionally carried out in accordance with the process described in §§ 142 to 150.
142. As part of the review of compliance of the CMU with the CO₂ Emissions Cap, ELIA shares CO₂ related information with the Federal Public Service Economy at the moment of the Prequalification File submission. In return, the Federal Public Service Economy notifies ELIA of its advice by email at the latest July 15 for Prequalification Files associated to a Project ID and at the latest August 1 for Prequalification Files not associated to a Project ID. This advice is either positive or negative.

If the Federal Public Service Economy requires additional information in order to be able to give its advice, it will inform the CRM Candidate and ELIA by email within ten Working Days starting from Prequalification File submission for Prequalification Files associated to a Project ID, and, within twenty Working Days starting from Prequalification File submission for Prequalification Files not associated to a Project ID. In this case, the Federal Public Service Economy asks the CRM Candidate to provide the missing information via email within ten Working Days from the notification.

Once the additional information is provided by the CRM Candidate to the Federal Public Service Economy, the Federal Public Service Economy notifies ELIA of its advice by email at the latest within the abovementioned timeframe.

143. In the absence of an advice from the Federal Public Service Economy within the abovementioned timeframes, the information relating to CO₂ is deemed rejected. In consequence, the corresponding Prequalification File is rejected by ELIA.
144. In parallel to the examination of CO₂ related information by Federal Public Service Economy and in parallel with the determination of the Nominal Reference Power (as per section 5.4.1), ELIA analyses the rest of the information submitted in the Prequalification File. The following process applies:

ELIA sends a notification to the CRM Candidate to inform him about the status of his Prequalification File:

- At the latest August 1 when an Investment File was submitted to the CREG;
- At the latest August 15 when no Investment File has been submitted to the CREG;
- Within forty-five Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.

If ELIA does not identify any missing and/or erroneous data in the submitted Prequalification File, the Prequalification File receives the status “approved”.

If ELIA notices missing information and/or wrong data, the Prequalification File receives the status “provisionally rejected”.

145. If during the Prequalification Process, it appears that ELIA is not able to determine a provisional Nominal Reference Power following the method described in section 5.4.1.1.1, the Prequalification File receives the status ‘provisionally rejected’. ELIA informs the CRM Candidate at the soonest and requests him to send the required information:

- At the latest August 1 when an Investment File was submitted to the CREG;
- At the latest August 15 when no Investment File has been submitted to the CREG;
- Within forty-five Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.

In case a Prequalification File received the status ‘provisionally rejected’, ELIA requests the CRM Candidate to provide the missing information and to correct the erroneous ones:

The CRM Candidate has the possibility to make the necessary adaptations – except the addition of a new Delivery Point¹³ – no later than:

- Ten Working Days before September 1 when an Investment File was submitted to the CREG;
- Ten Working Days before September 15 when no Investment File was submitted to the CREG;
- Within fifteen Working Days starting from ELIA’s notification in case the CRM Candidate wants to participate to the Secondary Market only.

If there is no longer any missing and/or wrong data, then the Prequalification File is given an “approved” status.

If data remain missing and/or erroneous, the Prequalification File receives the status “rejected”.

146. When communicating the results of the Prequalification Process with the timing defined in section 5.5, ELIA informs the CRM Candidate as well about the conformity of the Prequalification File.

5.3.3 Audits

147. Without prejudice to the monitoring powers of the CREG in accordance with article 7*undecies*, § 13, of the Electricity Act and the Royal Decree on “Monitoring”, ELIA can perform tests and audits in order to check the veracity and the accuracy of the data that is provided within the context of the Prequalification Process, as well as when a Capacity Contract has been concluded, during the Pre-delivery Period and the Delivery Period.

Without prejudice to the information review (as detailed in section 5.3.2) and the volumes determination (as detailed in section 5.4) which ELIA is required to carry out, these tests and audits are performed randomly during twelve months starting from this submission date of the Prequalification File to ELIA, as well as in the event of the signing of a Capacity Contract

¹³ The addition of a new Delivery Point is only allowed at the first Prequalification File submission

during both the Pre-delivery Period and the Transaction Period. This does not apply to a Prequalification File that has been rejected or archived.

148. Without prejudice to the monitoring powers of the CREG in accordance with article 7*undecies*, § 13, of the Electricity Act and the Royal Decree on "Monitoring", ELIA can, until validation of the Primary Market Transactions, perform audits in order to check the veracity and the accuracy of the data that is provided in the application form. It does not apply to a rejected application form.
149. Any erroneous information identified by ELIA will lead to a request for clarification(s) and/or for an adaptation of the previously submitted information. The CRM Actor shall provide a justification and/or submit his adapted application form and/or Prequalification File within twenty Working Days of the request from ELIA.

In case the error(s) remain(s) at the end of this period, ELIA shall report the situation to the relevant authorities and may in addition, depending on the case and on the severity of the errors observed:

- trigger a rejection of the Prequalification File; and/or
 - delete one (or more) of the Bids related to the concerned CMU and already submitted by the CRM Actor for an Auction; and/or
 - trigger an Availability Test; and/or
 - terminate or suspend the Capacity Contract (as defined in the Capacity Contract).
150. If the CRM Actor wishes to contest the decision taken by ELIA pursuant to a test/audit, he shall use one of the recourse methods described in chapter 14.

5.4 VOLUMES DETERMINATION

151. This section explains how ELIA determines:
- the Eligible Volumes, Remaining Eligible Volumes and the Secondary Market (Remaining) Eligible Volume for CMUs following (or having followed) the Standard Prequalification Process, including for Foreign CMUs that are selected in the Pre-Auction; and
 - the Fast Track Volume for CMUs following (or having followed) the Fast Track Prequalification Process.
152. Timing aspects related to the volume(s) determination for each Prequalification Process are defined in the following sections (from 5.4.1 to 5.4.7).
153. The data used below to determine the volumes can evolve in time as per section 5.6.
154. The volumes determination process is realized in parallel with the review of the Prequalification File following the process described in section 5.3.2.

5.4.1 Nominal Reference Power

5.4.1.1 Standard Prequalification Process and Fast Track Prequalification Process

155. In the context of a Standard Prequalification Process and the Fast Track Prequalification Process, the Nominal Reference Power of a Delivery Point or of a Low Voltage Delivery Point Group:

- forms the basis to determine the Nominal Reference Power of the CMU, the Reference Power, the Eligible Volumes, Remaining Eligible Volumes and the Secondary Market (Remaining) Eligible Volume of the CMU in case the CMU participates to a Standard Prequalification Process;
- serves as basis to determine the Fast Track Volumes of the CMU in case the CMU participates to a Fast Track Prequalification Process;
- is determined in different ways depending on certain characteristics of the Delivery Point and on the type of Prequalification Process, as detailed in the Table 6:

			Standard Prequalification Process	Fast Track Prequalification Process
Existing Delivery Point	ELIA Grid-connected or CDS-connected when the CDS is connected to the ELIA Grid	Delivery Point with Daily Schedule	Determined by ELIA	
		Delivery Point without Daily Schedule	Determined by ELIA	Determined by ELIA if the 1 st method referred to in section 5.4.1.1.1.1.1 is possible, otherwise declared by the CRM Candidate
	DSO-connected or CDS-connected when the CDS is connected to the DSO Grid	Expected NRP $\geq$ 5 MW	Determined and communicated to ELIA by the DSO	
		Expected NRP $<$ 5 MW	Determined and communicated to ELIA by the DSO	Determined by DSO if the 1 st method referred to in section 5.4.1.1.1.1.1 is possible, otherwise declared by the CRM Candidate
	Foreign TSO-connected		Determined by ELIA based on information provided by the Foreign TSO	N/A
Additional Delivery Point	ELIA Grid-connected, Foreign TSO-connected, or CDS-connected when the CDS is connected to the ELIA Grid	Delivery Point with Daily Schedule	Declared to ELIA by the CRM Candidate	
		Delivery Point without Daily Schedule		
	DSO-connected or CDS-connected when the CDS is connected to the DSO Grid	Declared or Fast Track NRP $\geq$ 5 MW	Declared to the DSO by the CRM Candidate and communicated to ELIA by the DSO	
		Declared or Fast Track NRP $<$ 5 MW		

Table 6: Nominal Reference Power determination

5.4.1.1.1 Nominal Reference Power determination for Existing Delivery Points

156. The Nominal Reference Power for ELIA grid-, Adjacent TSO-, DSO grid- or CDS-connected Existing Delivery Points is determined in accordance with this section.

157. As part of determining the Nominal Reference Power, a provisional Nominal Reference Power is initially notified by ELIA or the related DSO to the CRM Candidate. If no contestation is raised or after a contestation procedure, the final Nominal Reference Power is notified to the CRM Candidate by ELIA or by the relevant DSO.

5.4.1.1.1.1 Methodologies used to determine a Nominal Reference Power

158. The Nominal Reference Power of a Delivery Point can be determined following two methodologies:

- 1st method: use of historical data (section 5.4.1.1.1.1.1); or
- 2nd method: prequalification test (section 5.4.1.1.1.1.2).

5.4.1.1.1.1.1 1st method – Use of historical data

159. The 1st method, which consists in the use of historical data, can be used by ELIA or by the DSO if the period as defined in § 161 contains at least fourteen full calendar days of data.

160. The Nominal Reference Power of a Delivery Point does not have to be redefined if it has been determined for this Delivery Point using method 1 during the validity period of the last Functioning Rules published. In this case, the latest Nominal Reference Power result can be reused.

161. To determine the provisional Nominal Reference Power using historical data, ELIA or the concerned DSO uses the quarter-hourly measurements over a period defined as follows:

- The period starts with the first injection or offtake into the grid to which the Delivery Point is connected, but at the earliest twelve months before the end of the period, as specified below;
- The period ends:
 - May 15 if the Prequalification File is submitted between May 15 and the Prequalification File submission deadline as per § 91; or
 - five Working Days before the last day of the month preceding the submission date if the Prequalification File is submitted at any other time.

Non-representative days as indicated and duly justified by the CRM Candidate in accordance with §§ 100 or 127 are discarded.

162. For Delivery Points for which the Nominal Reference Power can be determined based on injection data only, as indicated by the CRM Candidate in accordance with §§ 100 or 127:

- The period defined in § 161 is divided by month;
- For each month maximum net injection is determined as the lowest observed quarter-hourly measurement (net injection has a negative value for the quarter-hourly measurements);
- The provisional Nominal Reference Power of the Delivery Point is determined as the absolute value of the average of the lowest two values (or the maximum number of available values if less than two) determined per month.

163. For Delivery Points for which the Nominal Reference Power cannot be determined based on injection data only, as indicated by the CRM Candidate in accordance with §§ 100 or 127:

- For each quarter hour part of a weekday or weekend, a baseline is established if sufficient historical data is available, as follows:

- For quarter hours part of a weekday, the average of the four highest quarter-hourly measurements out of five comparable preceding quarter hours;
- For quarter hours part of a weekend day, the average of the two highest quarter-hourly measurements out of three comparable preceding quarter hours;

Comparable preceding quarter hours are determined as the most recent identical quarter hours during preceding days that also classify as weekday or weekend respectively. Belgian public holidays are discarded:

- For each of the above quarter hours for which a baseline can be established, the difference is calculated between on the one hand the established baseline and on the other hand the observed quarter-hourly net-offtake or the Unsheddable Margin indicated by the CRM Candidate in accordance with §§ 100 or 127, whichever is highest;
 - The provisional Nominal Reference Power of the Delivery Point is determined as the highest value observed over all calculated values.
164. For Linked Capacities, as indicated by the CRM Candidate in accordance with § 100, the Nominal Reference Power is determined based on aggregated data over all Delivery Points that form Linked Capacities. The resulting Nominal Reference Power is allocated over the related Delivery Points pro rata of the Nominal Reference Powers determined considering the Delivery Points individually. In case historical data is not available for one of the Delivery Points that form Linked Capacities, the Nominal Reference Power that is used to allocate the resulting Nominal Reference Power is considered to be zero for the purpose of this pro-rata application.

5.4.1.1.1.2 2nd method – Organization of a prequalification test

165. The 2nd method, which consists in the organization of a prequalification test, can be used by ELIA or by the DSO if the 1st method cannot be applied or when necessary after a contestation by the CRM Candidate of the provisional Nominal Reference Power.
166. In case of a Delivery Point connected to the ELIA Grid or to a CDS itself connected to the ELIA Grid, the CRM Candidate is required to provide ELIA with the following information at least five Working Days prior to the test start date:
- the identification of the Delivery Point(s) being tested;
 - the preferred test date, which should respect the overall Prequalification Process timings as defined in §§ 142 or 150.
167. In case of a Delivery Point connected to a DSO Grid or to a CDS itself connected to the DSO Grid, the communication of the test date is done through an adequate communication channel defined and communicated in advance by the DSO to the CRM Candidate. The CRM Candidate must agree with the DSO on the timings, which should respect the overall Prequalification Process timings as defined in §§ 142 or 150.
168. The provisional Nominal Reference Power, as determined by the 2nd method, equals:
- For Delivery Points for which the Nominal Reference Power can be determined based on injection data only, as indicated by the CRM Candidate in accordance with §§ 100 or 127 the absolute value of the lowest observed quarter-hourly measurement on the test date (net injection has a negative value for the quarter-hourly measurements);
 - For Delivery Points for which the Nominal Reference Power cannot be determined based on injection data only, as indicated by the CRM Candidate in accordance with §§ 100 or 127, the highest positive difference across all quarter-hours during the test between a baseline established in accordance with the principles defined in § 163 and the observed quarter-

hourly value or the Unsheddable Margin indicated by the CRM Candidate in accordance with §§ 100 or 127 – whichever is highest.

5.4.1.1.1.2 Nominal Reference Power notification and contestation

5.4.1.1.1.2.1 For Delivery Points connected to the ELIA Grid or to a CDS itself connected to the ELIA Grid or to a Foreign TSO Grid

169. The provisional Nominal Reference Power is notified per Delivery Point by ELIA to the CRM Candidate, by:

- August 1 in case an Investment File was submitted to the CREG;
- August 15 in case no Investment File was submitted to the CREG;
- Within forty-five Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.

170. The notified provisional Nominal Reference Power is the final Nominal Reference Power if the CRM Candidate expressly approves the provisional Nominal Reference Power or if no contestation is raised by the CRM Actor to ELIA by:

- Ten Working days before September 1 in case an Investment File was submitted to the CREG;
- Ten Working Days before September 15 in case no Investment File was submitted to the CREG;
- Within fifteen Working Days starting from ELIA's notification of the provisional Nominal Reference Power in case the CRM Candidate wants to participate to the Secondary Market only.

In case of contestation, the CRM Candidate, within the abovementioned timing notifies his contestation to ELIA including explicitly the reason of such contestation. Depending on the reasons given by the CRM Candidate, ELIA may:

- request a (new)¹⁴ prequalification test (following the same rules of section 5.4.1.1.1.2); or
- if the contestation does not require the holding of a (new) prequalification test, adapt the notified provisional Nominal Reference Power accordingly; or
- if the contestation does not require the holding of a (new) prequalification test and if ELIA rejects the reason for the contestation, confirm the provisional Nominal Reference Power as being the final Nominal Reference Power.

The CRM Candidate can contest a provisional Nominal Reference Power only once per Delivery Point and per notification of provisional Nominal Reference Power by ELIA.

171. If a (new) prequalification test is organized, the final Nominal Reference Power is the Nominal Reference Power obtained following the (new) prequalification test.

¹⁴ In case the 1st method has been selected as part of the submission of the Prequalification File (or of its change), the CRM Actor needs to provide a date for the prequalification test for the first time. In case the 2nd method has been selected as part of the submission of the Prequalification File (or of its change), the CRM Actor needs to provide a new date for a prequalification test.

172. The final Nominal Reference Power is notified with the final Prequalification results deadline notification to the CRM Candidate by:
- September 1 if an Investment File was submitted to CREG;
 - September 15 if no Investment File was submitted to CREG;
 - Within seventy Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.
173. In case the CRM Candidate wishes to contest the final Nominal Reference Power, he uses one of the recourse methods described in Chapter 14.

5.4.1.1.1.2.2 For Delivery Points connected to a DSO Grid or to a CDS itself connected to a DSO Grid

174. The communication channel between a DSO and the CRM Actor as well as the timings to be respected to determine a Nominal reference Power are defined by the DSO and communicated to this CRM Candidate.
175. For the Delivery Points connected to a DSO Grid or to a CDS itself connected to a DSO Grid:
- the provisional and the final Nominal Reference Power(s) are determined by the concerned DSO(s);
 - the communication between the DSO(s) and the CRM Candidate includes the possible contestation of the provisional Nominal Reference Power(s);
176. The final Nominal Reference Power(s) is (are) notified by the DSO(s) to ELIA by:
- August 1 in case an Investment File was submitted to the CREG;
 - August 15 in case no Investment File was submitted to the CREG;
 - Within forty-five Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.

Such Prequalification File submission date is automatically communicated per email by ELIA to the relevant DSO as identified by the CRM Candidate in its Prequalification File.

177. At the latest fifteen Working Days prior to the deadline for a DSO to determine and communicate to ELIA the final Nominal Reference Power, ELIA contacts the relevant DSO to get a status of the ongoing calculation.
178. In the event that the DSO does not communicate to ELIA the final Nominal Reference Power within the above-mentioned time period, the concerned CMU will be considered by ELIA as "provisionally rejected".
179. The final Nominal Reference Power is notified by ELIA to the CRM Candidate by:
- September 1, in case an Investment File was submitted to the CREG;
 - September 15, in case no Investment File was submitted to the CREG;
 - Within seventy Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only.

180. If the CRM Actor wishes to contest the final Nominal Reference Power, it must use one of the recourse methods described in chapter 14.

5.4.1.1.2 Declared Nominal Reference Power for Additional Delivery Points in the context of the Standard Prequalification Process

181. For each Additional Delivery Point connected to the ELIA Grid or to a CDS itself connected to the ELIA Grid, the CRM Candidate declares in his Prequalification File a Declared Nominal Reference Power.
182. For each Additional Delivery Point or Low Voltage Delivery Point Group connected to a DSO Grid or to a CDS itself connected to a DSO Grid, the DSO communicates to ELIA, through adequate communication channels, the Declared Nominal Reference Power of this Delivery Point or of the Low Voltage Delivery Point Group within one of the following deadlines:
- by August 1 in case an Investment File was submitted to the CREG for this CMU;
 - by August 15 in case no Investment File was submitted to the CREG for this CMU.

No later than fifteen Working Days before the deadline by which a DSO must communicate to ELIA the Declared Nominal Reference Power, ELIA will remind it of said deadline.

In the event that the DSO does not come back to ELIA with a Declared Nominal Reference Power within the abovementioned time period, the concerned CMU will be considered by ELIA as "provisionally rejected".

183. ELIA notifies the Final Nominal Reference Power, corresponding to the Declared Nominal Reference Power, to the CRM Candidate by:
- September 1 in case an Investment File was submitted to CREG;
 - September 15 in case no Investment File was submitted to CREG.
184. If the CRM Actor wishes to contest the final Nominal Reference Power, it must use one of the recourse methods described in chapter 14.

5.4.1.1.3 Nominal Reference Power in the context of the Fast Track Prequalification Process

185. As detailed in the table of the § 155, the Nominal Reference Power of a Delivery Point participating to a Fast Track Prequalification Process can be either:
- determined by ELIA; or
 - declared by the CRM Actor; or
 - determined by the DSO; or
 - declared by the CRM Actor to the DSO then communicated to ELIA by the DSO
186. When the Nominal Reference Power is to be determined by ELIA or by the DSO, the principles of section 5.4.1.1.1 apply.
187. When the Nominal Reference Power must be declared by the CRM Candidate to ELIA, it is included in the Prequalification File as the Fast Track Nominal Reference Power. If ELIA finds

that the Fast Track Nominal Reference Power is incorrect, it may determine the Fast Track Nominal Reference Power by applying the provisions of section 5.4.1.1.1.1.

188. When the Nominal Reference Power must be declared by the CRM Candidate to the DSO and communicated by the DSO to ELIA, the concerned DSO communicates it to ELIA, via adequate communication channels, by August 15.
189. No later than fifteen Working Days before the deadline by which a DSO must communicate to ELIA the Fast Track Nominal Reference Power, ELIA shall contact the DSO concerned to remind it of this deadline.

If the DSO does not communicate the Fast Track Nominal Reference Power to ELIA within the abovementioned time period, the Prequalification File of the concerned CMU is deemed "provisionally rejected" by ELIA.

190. In any case, ELIA notifies the final Nominal Reference Power to the CRM Candidate as part of the prequalification results notification according to the timing foreseen in section 5.5 at the latest by September 15.
191. If the CRM Actor wishes to contest the notified final Nominal Reference Power, it must use one of the recourse methods described in chapter 14.

5.4.1.1.4 Nominal Reference Power determination for CMUs

192. The Nominal Reference Power of a CMU is determined by ELIA when:
 - the final Nominal Reference Power of each Existing Delivery Point part of this CMU has been notified to the CRM Actor following the rules of section 5.4.1.1.1.2; and/or
 - the Declared Nominal Reference Power of each Additional Delivery Point or Low Voltage Delivery Point Group part of this CMU has been notified to the CRM Actor following the rules of section 5.4.1.1.2.
193. To determine the Nominal Reference Power of a CMU that goes through the Standard Prequalification Process, ELIA sums up:
 - the Nominal Reference Power of each Existing Delivery Point part of the CMU if the CMU is an Existing CMU; or
 - the Nominal Reference Power of each Existing Delivery Point part of the CMU with the Declared Nominal Reference Power for each Additional Delivery Point or Low Voltage Delivery Point Group part of the CMU if the CMU is an Additional CMU.
194. The Nominal Reference Power of a CMU that goes through the Fast Track Prequalification Process is equal to the Nominal Reference Power determined in accordance with section 5.4.1.1.3.

5.4.1.2 Specific Prequalification Process

195. No Nominal Reference Power is calculated by ELIA or the relevant DSO for a VCMU.

5.4.2 Opt-out Volume

196. No Opt-out Notification can be submitted for a Foreign CMU.

197. The submission of an Opt-out Notification is done via the CRM IT Interface, per CMU and per Auction. In an Opt-out Notification, the CRM Actor is required to specify the information related to the Opt-out Volume that is relevant for the classification of the Opt-out Volume as described in section 5.4.2.2.
198. The notification of an Opt-out Volume that is equal to the Nominal Reference Power of the related CMU is considered as a "full opt-out", whereas the notification of an Opt-out Volume that is less than the Nominal Reference Power of the related CMU is considered as "partial opt-out".
199. The Opt-out Volume cannot be lower than zero MW and cannot be higher than the volume that would result in an Eligible Volume or Remaining Eligible Volume of zero MW:
- In case the CMU has not yet concluded a Transaction for a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates, the Opt-out Volume cannot be higher than the Nominal Reference Power;
 - In case there is a Transaction related to the CMU with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates, the Opt-out Volume cannot be higher than the Nominal Reference Power, minus:
 - In case of an Energy Constrained CMU, the maximum Total Contracted Capacity over the Delivery Period to which the Auction relates divided by the Derating Factor(CMU,t) with Derating Factor(CMU,t) equal to the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the maximum Total Contracted Capacity over the Delivery Period, calculated in accordance with the definition in chapter 3; or
 - In case of a Non-Energy Constrained CMU, the maximum Total Contracted Capacity over the Delivery Period to which the Auction relates divided by the Derating Factor in accordance with § 115.
200. ELIA transfers each year all submitted Opt-out Notifications to the CREG as part of the Auction report.
201. Opt-out Volumes are published as described in section 16.4.1.

5.4.2.1 Opt-out Notification

5.4.2.1.1 Standard Prequalification Process

202. To declare an Opt-out Volume for a CMU following the Standard Prequalification Process, the CRM Actor submits an Opt-out Notification (and/or any adaptation thereof) at the latest by 6:00 on the date of the Bid submission deadline defined in Article 7undecies § 10 al.3 of the Electricity Act.

By way of derogation to the abovementioned deadline, in the event that the CRM Actor submits:

- an Opt-out Notification indicating that the volume is associated with definitive/temporary decommissioning or definitive/temporary structural reduction of capacity notification, in accordance with article 4bis of the Electricity Act; or
- an Opt-out Notification indicating that the volume is not contributing to adequacy during the Delivery Period, by providing a motivational letter.

Then, the CRM Actors submits an Opt-out Notification (and/or any adaptation thereof) at the latest by August 31.

203. In case of an Opt-out Notification or an adaptation thereof after the notification of the prequalification results, ELIA notifies to the CRM Actor the prequalification results adapted accordingly with the Opt-out Volume within one Working Day starting from the reception by ELIA of this (adapted) Opt-out Notification and no later than the date of the Bid submission deadline defined in article 7undecies, § 10, para. 3, of the Electricity Act.

5.4.2.1.2 Specific Prequalification Process

204. A CRM Actor cannot declare an Opt-out Volume for a VCMU.

5.4.2.1.3 Fast Track Prequalification Process

205. For a CMU following the Fast Track Prequalification Process, the CRM Actor declares a “full opt-out” and submits an Opt-out Notification when submitting the Prequalification File (or its change) (as detailed in section 5.2.3.3).

An Opt-out Notification is also subject to an annual renewal as part of the Prequalification File renewal defined in section 5.2.4.

5.4.2.2 Classification of Opt-out Volumes

206. The purpose of the classification of Opt-out Volumes is to determine whether these volumes will contribute to adequacy during the Delivery Period to which the Opt-out Notification relates. Opt-out Volumes that are considered to contribute to adequacy are classified as ‘IN’, while Opt-out Volumes that are not considered to contribute to adequacy are classified as ‘OUT’.
207. The consequences of the classification of Opt-out Volumes are described in the relevant chapters. Volume corrections with a view to determining the volume to be auctioned are described in section 6.3.1. Secondary Market implications are described in section 10.4.8.2.

5.4.2.2.1 Y-4 or Y-2 Auction

208. An Opt-out Volume related to a Y-4 or Y-2 Auction is classified as ‘OUT’ in case the Opt-out Notification submitted by the CRM Actor indicates that:
- the volume concerns Additional Capacity consisting of an electricity production unit or energy storage facility as part of a “full opt-out”, for which no Connection Contract was signed with ELIA or with the DSO, as applicable; or
 - the volume concerns Additional Capacity consisting of an electricity production unit or energy storage facility as part of a “full opt-out” and based on the evaluation of the commissioning date of the realized grid connection, following an evaluation in accordance with § 119, it appears that the capacity will not be available by the start of the Delivery Period to which the Opt-out Notification relates. For DSO-connected CMUs, this evaluation is made based on the information stated in the Connection Contract signed with the DSO or, in case no Connection Contract is signed yet, in the offer made by the DSO; or
 - the volume concerns Additional Capacity participating to the Fast Track Prequalification Process that indicates that the expected commissioning date of the Capacity, in accordance with § 127, exceeds the start of the Delivery Period; or
 - the volume concerns a “full opt-out” of a New Build CMU; or

- the volume is associated with a definitive decommissioning or definitive structural reduction of capacity notification, in accordance with article 4bis of the Electricity Act during the Delivery Period to which the Opt-out Notification relates; or
 - the volume is associated with a temporary decommissioning or temporary structural reduction of capacity notification in accordance with article 4bis of the Electricity Act for the Delivery Period to which the Opt-out Notification relates; or
 - the volume relates to capacities with a technology qualified as 'Demand side Response'. For Aggregated CMUs, this volume is determined pro rata of the NRPs of the Delivery Points with a technology qualified as 'Demand Side Response' part of the CMU that do not have the above-mentioned obligation to submit a Prequalification File.
209. Opt-out Volumes related to a Y-4 or Y-2 Auction that are associated to volumes for which it is indicated in an EDS related to another CMU that these need to be decommissioned as a prerequisite for the realization of this other CMU, are classified as 'OUT' conditional upon the selection of a Bid related to this other CMU. As long as the aforementioned condition is not fulfilled, these Opt-out Volumes are classified as 'IN'.
210. Opt-out Volumes related to a Y-4 or Y-2 Auction that are the subject of a "partial opt-out for a New Build CMU are classified as 'IN' on condition that the Bid for this CMU is selected. If this condition is not fulfilled, these Opt-out Volumes are classified as 'OUT'.

If the Opt-Out Volumes for a New Build CMU are classified as 'IN' for a given Delivery Period, then they cannot be classified as 'OUT' for any subsequent Delivery Period.

211. ELIA considers CMUs that cannot participate to the Auction for the following reasons as a "full Opt-out", if no full Opt-out Notification has been submitted by the CRM Candidate, if the related CMUs were not converted into a Prequalification File in another Prequalification Process and if the related CMUs were not archived in the context of a CMU transfer (not applicable to Foreign CMUs):
- Rejection of the Prequalification File by ELIA; or
 - Archiving of the Prequalification File by the CRM Candidate; or
 - As described in § 283, failure by the CRM Candidate to offer in the Auction at least once the entire Eligible Volume or, if a Transaction on the Primary or Secondary Market already took place previously for these CMUs, the Remaining Eligible Volume; or
 - As described in § 806, failure by the CRM Candidate to provide sufficient Financial Security; or
 - As described in § 312, forced rejection of the Bids related to CMUs that were considered as non-eligible during the determination of the Demand Curve but participated to the Auction nevertheless, after not being selected in a previous clearing of the Auction.

These Opt-out Volumes are classified as 'OUT' if they fulfil the conditions described in § 208 for Opt-out Volumes.

212. All other Opt-out Volumes related to a Y-4 or Y-2 Auction are classified as 'IN'.

5.4.2.2.2 Y-2 and Y-1 Auction

213. An Opt-out Volume related to a Y-2 or Y-1 Auction is classified as 'OUT' if the Opt-out Notification submitted by the CRM Actor for this volume is accompanied by a motivational letter and provided that the motivation is duly validated by the CREG after consultation with

ELIA and FPS Economy for each requested Delivery Period. The CREG determines whether the motivation is validated only for Y-1 or also for Y-2.

5.4.2.2.3 Y-1 Auction

214. An Opt-out Volume related to a Y-1 Auction is classified as 'OUT' in case the Opt-out Notification submitted by the CRM Actor indicates that:
- the volume concerns Additional Capacity consisting of an electricity production unit or energy storage facility as part of a "full opt-out", for which no Connection Contract was signed with ELIA or with the DSO, as applicable; or
 - the volume concerns Additional Capacity consisting of an electricity production unit or energy storage facility as part of a "full opt-out" and based on the evaluation of the commissioning date of the grid connection, following an evaluation in accordance with § 119, it appears that the capacity will not be available by the start of the Delivery Period to which the Opt-out Notification relates. For DSO-connected CMUs, this evaluation is made based on the information stated in the Connection Contract signed with the DSO or, in case no Connection Contract is signed yet, the offer made by the DSO; or
 - the volume concerns Additional Capacity participating to the Fast Track Prequalification Process that indicates that the expected commissioning of the capacity, to which § 127 refers, exceeds the start of the Delivery Period; or
 - the volume concerns a "full opt-out" of a New Build CMU; or
 - the volume is associated with a definitive decommissioning or definitive structural reduction of capacity notification in accordance with article 4bis of the Electricity Act during the Delivery Period to which the Opt-out Notification relates; or
 - the volume is associated with a temporary decommissioning or temporary structural reduction of capacity notification in accordance with article 4bis of the Electricity Act for the Delivery Period to which the Opt-out Notification relates; or
 - the volume relates to capacities with a technology qualified as 'Demand side Response'. For Aggregated CMUs, this volume is determined pro rata of the NRPs of the Delivery Points with a technology qualified as 'Demand Side Response' part of the CMU.
 - the volume is indicated as not contributing to adequacy during the Delivery Period to which the Opt-out Notification relates, provided that a motivational letter to support this indication is provided by the CRM Actor as part of its Opt-out Notification.
215. Opt-out Volumes related to a Y-1 Auction that are associated to volumes for which it is indicated in an EDS related to another CMU that these need to be decommissioned as a prerequisite for the realization of this other CMU, are classified as 'OUT' conditional upon the selection of a Bid related to this other CMU. As long as the aforementioned condition is not fulfilled, these Opt-out Volumes are classified as 'IN'.
216. Opt-out Volumes related to a Y-1 Auction that are the subject of a "partial opt-out" for a New Build CMU, are classified as 'IN' on condition that the Bid for this CMU is selected. If this condition is not fulfilled, these Opt-out Volumes are classified as 'OUT'.
217. ELIA considers CMUs that cannot participate to the Auction for the following reasons as a "full Opt-out", if no full Opt-out Notification has been submitted by the CRM Candidate, if the related CMUs were not converted into a Prequalification File in another Prequalification Process and if the related CMUs were not archived in the context of a CMU transfer (not applicable to Foreign CMUs):

- Rejection of the Prequalification File by ELIA; or
- Archiving of the Prequalification File by the CRM Candidate; or
- As described in § 283, failure by the CRM Candidate to offer in the Auction at least once the entire Eligible Volume or, if a Transaction on the Primary or Secondary Market already took place previously for these CMUs, the Remaining Eligible Volume; or
- As described in § 806, failure by the CRM Candidate to provide sufficient Financial Security; or
- As described in § 317, forced rejection of the Bids related to CMUs that were considered as non-eligible during the determination of the Demand Curve but participated to the Auction nevertheless, after not being selected in a previous clearing of the Auction.

These Opt-out Volumes are classified as 'OUT' if they fulfil the conditions described in § 214 for Opt-out Volumes.

218. All other Opt-out Volumes related to a Y-1 Auction are classified as 'IN'.

5.4.3 Reference Power

219. The Reference Power of a CMU is communicated by ELIA to the CRM Actor as part of the prequalification results notification.
220. ELIA may reduce the Reference Power of a CMU that is associated with a definitive decommissioning or definitive structural reduction of capacity notification in accordance with article 4bis of the Electricity Act, if this information was not yet included in an Opt-out Notification related to this CMU.
221. ELIA does not calculate a Reference Power for:
- VCMUs because the CRM Candidate declares an Eligible Volume (as per section 5.4.4.2); and
 - CMUs that go through the Fast Track Prequalification Process, the Opt-out Volume being automatically equal to the Nominal Reference Power ("full opt-out") and the Reference Power being therefore equal to zero; and
 - Foreign CMUs.

5.4.4 Eligible Volumes

5.4.4.1 Standard Prequalification Process

222. The Eligible Volume results from the application of a Derating Factor on the Reference Power of the CMU.

The choice of the Derating Factor is determined by the category (among the derating categories or the SLA categories) selected by the CRM Candidate in his Prequalification File in accordance with § 115 and corresponds to the Derating Factor.

One Eligible Volume per Auction is determined.

223. Three Eligible Volumes may be communicated by ELIA as part of the prequalification results notification (as detailed in section 5.5):

- one Eligible Volume for a participation in the Y-1 Auction, the Y-2 Auction, and the Y-4 Auction. These Eligible Volumes are communicated on the condition that there is no Transaction yet from the CMU with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates takes place.

224. If the Eligible Volume determined for a Foreign CMU is lower than the total volume of the Bids related to this CMU that were selected in the Pre-Auction, the Prequalification File is “rejected”.

5.4.4.2 Specific Prequalification Process

225. A CRM Candidate who is prequalifying a VCMU shall declare an Eligible Volume as part of the Prequalification File submission.

5.4.4.3 Fast Track Prequalification Process

226. There is no Eligible Volume to determine for a CMU that follows a Fast Track Prequalification Process.

5.4.5 Remaining Eligible Volumes

227. The Remaining Eligible Volume is determined by ELIA whenever a Transaction from the CMU with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates takes place.

In this case, the Remaining Eligible Volume defines the maximum volume that can still be contracted in an Auction.

In case no Transaction related to the CMU with a Delivery Period that (partially) overlaps with the Delivery Period to which the Auction relates occurred, the Remaining Eligible Volume is equal to the Eligible Volume.

228. The Remaining Eligible Volume is calculated as follows:

- For Non-energy Constrained CMUs:

$$\begin{aligned} \text{Remaining Eligible Volume} &= \text{Maximum}\{0; \text{Eligible Volume} \\ &\quad - \text{maximum Total Contracted Capacity over the Delivery Period to which the Auction relates}\} \end{aligned}$$

- For Energy Constrained CMUs

$$\begin{aligned} \text{Remaining Eligible Volume} &= \text{Maximum}\left\{0; \text{Eligible Volume} \right. \\ &\quad \left. - \text{maximum Total Contracted Capacity over the Delivery Period to which the Auction relates} \right. \\ &\quad \left. \times \frac{\text{Derating Factor excluding Associated Delivery Points in accordance with § 115}}{\text{Derating Factor}(CMU, t)} \right\} \end{aligned}$$

With $\text{Derating Factor}(CMU, t)$ equal to the weighted average Derating Factor of all Transactions in annex A of the CMU’s Capacity Contract that constitute the maximum Total Contracted Capacity over the Delivery Period to which the Auction relates, calculated in accordance with the definition in chapter 3.

229. Three Remaining Eligible Volumes may be communicated by ELIA as part of the prequalification results notification (as detailed in section 5.5): one for a participation in a Y-1 Auction, one for a participation in a Y-2 Auction and one for a participation in a Y-4 Auction.
230. If the Remaining Eligible Volume determined for a Foreign CMU is lower than the total volume of the Bids related to this CMU that were selected in the Pre-Auction, the Prequalification File is “rejected”.

5.4.6 Secondary Market (Remaining) Eligible Volume

231. The Secondary Market (Remaining) Eligible Volume of a CMU is only determined for Prequalified CMUs which are Existing CMUs.
232. The Secondary Market Remaining Eligible Volume is not notified as part of the prequalification results notification but is made available for the CRM Candidate in the CRM IT Interface.
233. The Secondary Market Eligible Volume for a specific period of time equals the Secondary Market Remaining Eligible Volume for this period of time as long as no Transaction (via the Primary Market or the Secondary Market) has been made for a Transaction Period corresponding to (or overlapping) that same period of time.

More information on the determination of the Secondary Market (Remaining) Eligible Volume can be found in section 10.4.8.

5.4.7 Fast Track Volume

234. The Fast Track Volumes result from the application of a Derating Factor on the Nominal Reference Power of the CMU.

As three values will be associated to the category chosen for a Derating Factor, there are three Fast Track Volumes: one volume related to the Y-1 Auction, one volume related to the Y-2 Auction and one related to the Y-4 Auction.

Such volumes are communicated by ELIA as part of the prequalification result notification (section 5.5).

5.5 PREQUALIFICATION RESULTS NOTIFICATION

235. The results of the Prequalification Process are communicated by ELIA to the CRM Candidate, via the CRM IT Interface, at the latest:
- by September 1 if an Investment File was submitted to the CREG;
 - by September 15 if no Investment File was submitted to the CREG;
 - within seventy Working Days starting from the submission of the Prequalification File in case the CRM Candidate wants to participate to the Secondary Market only;

and in any case by the deadline defined in article 7undecies § 8 last Alinea of the Electricity Act.

236. If the Prequalification File is “approved”, the notification contains at least the following data depending on the CMU’s status Existing or Additional and the type of procedure followed by the CRM Candidate for the CMU:

	Fast Track Prequalification Process	Standard Prequalification Process		Specific Prequalification Process
		Existing CMU	Additional CMU	
The Nominal Reference Power of the CMU	X	X	X	
The Reference Power of the CMU		X	X	
The Opt-out Volumes of the CMU		X	X	
The Eligible Volumes and/or Remaining Eligible Volumes of the CMU		X	X	X
The Fast Track Volumes of the CMU	X			

Table 7: Information communicated during the prequalification results notification.

237. If the Prequalification File or the CMU is still “provisionally rejected” by the Prequalification results notification deadline as defined in § 235, it becomes “rejected”.
238. A “rejected” CMU or a CMU for which the Prequalification File is “rejected” is not given access to the Primary Market or the Secondary Market.
239. From the moment one of a CRM Candidate’s CMUs having participated to a Standard Prequalification Process or to a Specific Prequalification Process is Prequalified and the prequalification results have been communicated to the CRM Candidate, this entity becomes a “Prequalified CRM Candidate” with access to the Primary Market and the Secondary Market with this CMU.
240. A Fast Track prequalification results notification does not mean the prequalification of the CMU nor the CRM Candidate. This notification does not grant access for this CMU to the Primary Market or the Secondary Market.
241. A notification indicating the results of the submission of a Prequalification File for a CMU is sent by ELIA to the CRM Actor whatever the results of such process.
242. If the CRM Actor wishes to contest the prequalification results, he must use one of the recourse methods described in chapter 14.

5.6 EVOLUTION IN TIME OF THE SUBMITTED INFORMATION

5.6.1 Data Management linked to Prequalification Process

5.6.1.1 Update of data performed by ELIA

243. In case of automatic update, ELIA will notify the CRM Actor of said update within five Working Days of the update.

244. The change becomes valid for the or any forthcoming Transaction(s) only if the CRM Actor does not raise any contestation against this change within ten Working Days as of the notification. If the CRM Actor contests the change, he must use one of the recourse methods described in chapter 14.
245. Regardless of the automatic updates that can be performed by ELIA, it remains the CRM Actor's sole responsibility to timely update the required data of his Prequalification File and to maintain the compliance of his Prequalification File with the legislation in force.
246. The automatic updates performed by ELIA do not impact obligations linked to existing Capacity Contracts nor their associated parameters listed in the annex A.

5.6.1.2 Update of data performed by the CRM Actor

5.6.1.2.1 Evolution of CRM Actor's application form

247. A CRM Actor is entitled, at any time to modify data or documents as initially provided in his application form as referred to in section 5.2.2.1. To do so, the CRM Actor cannot do it via the CRM IT Interface but is asked to directly contact ELIA by e-mail (customer.crm@elia.be).

5.6.1.3 Evolution of CRM Actor's Prequalification File

5.6.1.3.1 General principles

248. In case of updates, it is the responsibility of the CRM Actor, for each CMU that is engaged in a Transaction until the end of the Transaction Period:
- to maintain the compliance of this CMU with the legislation in force; and
 - to ensure the accuracy and the relevancy over time of all general information included in the related Prequalification File in accordance with §§ 100, 115 and 127.
249. Any change of the Prequalification File submitted by a CRM Actor is provided with a date of entry into force. If the CRM Actor does not provide a date of entry into force the rule § 259 applies.
250. Any change to an Aggregated CMU with respect to the set of Delivery Points which composes the CMU (as per section 5.6.1.3.2.1), applies as of the moment of the notification, for the current – and, if applicable – for all future Delivery Periods covered by the Transaction.

In case the CRM Actor wants to:

- Change the set of Delivery Points of an Aggregated CMU for a future Delivery Period; or
- Change the Derating Factor category applicable to the CMU for a future Delivery Period; or
- Add an Additional Delivery Point to an Existing CMU; or
- Submit a Prequalification File for a Delivery Period with a specific set of Delivery Points that cannot be considered for all other Delivery Periods,

then the CRM Actor creates another CMU.

251. In the event that a CMU is related to a Capacity Contract, those changes will not affect under any circumstances the obligations (linked to the Contracted Capacity and the associated parameters listed in annex A to the Capacity Contract) and respect the following requirements:

- a Delivery Point can only be added to the CMU if it is an Existing Delivery Point; and
- a Delivery Point can replace another one into an Aggregated CMU as long as it does not change the status of the CMU from "Existing" to "Additional"; and
- a Delivery Point can replace another one in an Aggregated CMU whose duration of the Capacity Contract covers more than one Delivery Period, as long as the CO₂ emissions of the new Aggregated CMU do not exceed the calculated CO₂ Emissions Cap (in accordance with annex 18.1.6) for the related CMU during the Prequalification Process.

252. No change is accepted by ELIA on an ongoing contract related to a VCMU.

5.6.1.3.2 Possible types of changes

5.6.1.3.2.1 Update linked to a Delivery Point

253. A CRM Actor asks for an update of the information in his Prequalification File linked to a Delivery Point, whenever needed as long as he respects the requirements of Table 1 and section 5.6.1.3.1.

254. The possible updates for a Delivery Point are the following:

- **Delivery Point addition:** Without prejudice to the rules set out in section 5.6.1.3.1, the CRM Actor can add one or more Delivery Point(s) into a CMU, regardless of its status (Existing Delivery Point or Additional Delivery Point).
- **Delivery Point deletion:** Without prejudice to the rules set out in section 5.6.1.3.1, the CRM Actor can delete one or more Delivery Point(s) from a CMU, regardless of its status (Existing Delivery Point or Additional Delivery Point). However, in the event that the CMU is related to a Capacity Contract, the deletion of all Delivery Points which are part of this CMU does not lead to a deletion of the related Prequalification File.
 - To participate in one of the forthcoming Auctions, the deletion of one or more Delivery Point(s) that is/are part of the Aggregated CMU for which an Investment File has already been submitted to CREG is only possible if introduced by the CRM Candidate prior to August 20 of the year of Auction.
 - In this situation, the CRM Actor may also submit to ELIA one (or more) new Prequalification File(s), including only the deleted Delivery Point(s)¹⁵, until August 25 of the year of Auction. ELIA will finalize the Prequalification Process of this(those) new file(s) within a maximum of five Working Days, starting from the submission date(s) of the new Prequalification File(s).
- **Delivery Point transfer:** In the event a CRM Actor plans to transfer his Delivery Point to another CRM Actor or to another of his CMUs, the Delivery Point in question is added to the CMU of its new holder or to the CMU in question after having been deleted from the

¹⁵ In case the deleted Delivery Points are legally obliged to prequalify (cf. article 7undecies, § 8, al. 2 of the Electricity Act), ELIA gives the CRM Actor the possibility to submit one (or several) new Prequalification File(s) including this(those) Delivery Point(s).

initial CMU. The transfer is therefore the combination of two actions: first the Delivery Point deletion from a Prequalification File and then his re-creation in a new one¹⁶.

- **Delivery Point data modification:** Without prejudice to the rules set out in section 5.6.1.3.1, the CRM Actor may modify the data related to a Delivery Point. The data that may be edited are those listed in the Table 1 for Standard Prequalification Files and the Table 5 for Fast Track Prequalification Files. In the context of the modification of a Delivery Point, the CRM Actor can also trigger the re-calculation of a Nominal Reference Power¹⁷ in accordance with the 1st or 2nd method.

5.6.1.3.2.2 Update linked to a CMU

255. A CRM Actor may ask for an update of the information in his Prequalification File linked to the CMU, whenever needed, as long as he respects the conditions of the Table 4 and section 5.6.1.3.1.

256. The possible updates for a CMU are the following:

- **CMU archiving:** The CRM Actor has the possibility to archive a CMU by archiving the Prequalification File of the CMU, regardless of its status (Existing CMU, Additional CMU or Virtual CMU). An archiving can be performed even during the review of the Prequalification File by ELIA to interrupt a Prequalification Process. In the event that the CRM Actor archives his CMU because he does not want to participate in the Service anymore, he follows a Fast Track Prequalification Process with the related CMU if necessary to comply with the requirement mentioned in article 7^{undecies}, § 8, al. 2 of the Electricity Act. If a CMU is linked to an ongoing Capacity Contract, its related Prequalification File cannot be archived for the purposes of the pre-delivery control during the Pre-delivery Period and the Availability Monitoring during the Delivery Period. A "rejected" Prequalification File specifically can also be archived by ELIA if no action has been registered by the CRM Candidate during the six months starting from the first Prequalification File submission date.
- **CMU transfer:** In the event that a CRM Actor plans to transfer its Prequalified CMU to another CRM Actor, in accordance with § 249, the latter must notify ELIA at the latest :
 - Ten Working Days before September 1 if an Investment File was submitted to the CREG; or
 - Ten Working Days before September 15 if no Investment File was submitted to the CREG.

The transferee must ensure that the information in its Prequalification File remains compliant with requirements in accordance with §§ 100, 115 and 127.

- **CMU data modification:** The CRM Actor may modify the data related to a CMU in a Prequalification File. The CRM Actor also has the possibility to do a Fast Track Prequalification Process with an (Prequalified) Existing CMU or with an (Prequalified) Existing Delivery Point. As the Fast Track Prequalification Process can only include one Delivery Point, a specific Prequalification File is created for each Delivery Point of the Existing CMU that follows the Fast Track Prequalification Process. A CMU which followed a Fast Track Prequalification Process can also follow a Standard Prequalification Process. To

¹⁶ ELIA reserves itself the right to delete a Delivery Point – following an agreement with the concerned Grid User – if the deletion by the initial user was not done within reasonable timings.

¹⁷ The adaptation of a Nominal Reference Power is triggered by the CRM Actor himself. There is no automatic and periodic re-calculation planned by ELIA. However, if ELIA (or the DSO) observes significant differences between the parameters of a Prequalification File and the reality, the correction of these data can be requested to the CRM Actor.

do so, the CRM Candidate archives his Fast Track Prequalification File and creates a new CMU following the Standard Prequalification Process.

5.6.1.4 Review of the submitted information

257. ELIA reviews the change(s) by following the same procedure as for the review of the information submitted for a new Prequalification File (as detailed in section 5.3.2).

5.6.1.5 Volumes determination

258. In parallel with the review of the information submitted in the Prequalification File in accordance with the rules set out in section 5.3.2, ELIA proceeds with the volumes determination process according to section 5.4 for a CMU related to a Standard Prequalification Process or to a Fast Track Prequalification Process.

5.6.1.6 Prequalification results notification

259. ELIA notifies the results of the change(s) by following the same procedure as for the prequalification results notification for a new Prequalification File (as detailed in section 5.5).

260. The change(s) come(s) into effect from either:

- the prequalification results notification in case no date of entry into force was submitted by the CRM Actor; or
- the date of entry into force in case a date of entry into force was submitted by the CRM Actor.

The new volumes are effective for the future Transactions taking place after the change has entered into force.

5.7 NOTIFICATION TO THE CREG AND THE FEDERAL PUBLIC SERVICE ECONOMY

261. If the CRM Candidate notified ELIA of his intention to introduce an Investment File, ELIA communicates specific information to the CREG at the following times:

- from the submission date of the Prequalification File in which it is indicated that the CMU is linked to one (or more) investment file(s); and
- from the notification to the CRM Candidate of the rejection of his Prequalification File; and
- from the notification of the final Nominal Reference Power of each Delivery Point part of the CMU to the CRM Candidate; and
- from the results notification of the Prequalification Process by ELIA to the CRM Candidate – and no later than September 1 of the year in which an Auction is organized for a Prequalification File submitted at the latest on June 15 of the same year.

262. In case of problems with the automatic data exchange between CREG and ELIA, ELIA communicates the required information per email, within two Working Days starting from the four moments defined in the previous § 261.

The information communicated by ELIA per CMU are summarized in the following table:

	From the Prequalification File submission date	From the Prequalification File rejection date	From the final Nominal Reference Power notification	From the prequalification results notification
ID of the CRM Candidate	X	X	X	X
Legal status of the company	X			
Company name / CRM Candidate name	X			
Company address / CRM Candidate address	X			
Contact details (the person who will be the point of contact for the CREG)	X			
Project ID	X	X	X	X
CMU ID	X	X	X	X
Delivery Point(s) ID	X	X	X	X
EAN code of the Delivery Point(s)	X			
The Declared Nominal Reference Power of each Additional Delivery Point of the CMU	X			
The Expected Nominal Reference Power of each Existing Delivery Point of the CMU	X			
The Nominal Reference Power of each Existing Delivery Point of the CMU			X	X
The prequalification results		X		X
Remaining number of Delivery Periods for a Capacity Contract Duration (compared to the initial Capacity Category allocated by the CREG) ¹⁸	X			

Table 8: Information communicated by ELIA to CREG during the Prequalification Process

¹⁸ The number of remaining years for a Capacity Contract Duration corresponds to the difference between the Capacity Category allocated by the CREG and the number of years for which the Delivery Point has already been contracted.

263. The information to be shared for Foreign Capacities have been listed in section 17.3.4.
264. At the latest ten Working Days after the Prequalification File submission deadline referred to in article *7undecies*, § 8, last alineas, of the Electricity Act, for each forthcoming Auction, ELIA sends an overview of the following information to the Federal Public Service Economy and to the CREG, per CMU:
- ID of the CRM Candidate;
 - Legal status of the company;
 - Company name / CRM Candidate name;
 - Contact details (the person who will be the point of contact for the CREG);
 - CMU ID;
 - Delivery Point(s) ID;
 - EAN code of the Delivery Point(s);
 - The Declared Nominal Reference Power of each Additional Delivery Point of the CMU;
 - The Expected Nominal Reference Power of each Existing Delivery Point of the CMU;
 - The CO2 emissions in g/kWh of each Delivery Point of the CMU.
265. At the end of the Prequalification Process, ELIA communicates the following information to the CREG & FPS Economy, for each forthcoming Auction, no later than five Working Days following the prequalification results notification deadline referred to in article *7undecies*, § 8, last paragraph, of the Electricity Act:
- a table containing the CMU IDs of the corresponding CMUs over time;
 - the list of Archived CMUs
 - the list of Prequalified CMUs and, for each one, the below information:
 - the CMU-ID;
 - the name of the Delivery Point;
 - the type of CMU (Existing/Additional/Virtual/New Build);
 - the type of CMU (individual/Aggregated, with the name of the CMU with which it is associated);
 - the CRM Actor;
 - the technology of the Delivery Point;
 - the Nominal Reference Power;
 - the applicable Derating Factor;
 - the Grid (ELIA, DSO, CDS, Foreign TSO) and, if applicable, the name of the DSO or the CDSO or of the Foreign TSO;
 - the correction made to the Demand Curve;
 - if applicable, the waiver of any operating aid;

- in a separate document, for the Aggregated CMUs, the relevant information included above for each Delivery Point;
- a list of CMUs that have opted for the Fast Track Prequalification Process, with the below information for each of them:
 - the CMU-ID;
 - the name of the Delivery Point;
 - the type of CMU (Existing/Additional/Virtual/New Build);
 - the technology of the Delivery Point;
 - the Nominal Reference Power;
 - For the Additional CMUs, the expected in service arrival;
 - the applicable Derating Factor;
 - the Opt-out classification ("IN" or "OUT");
 - the Grid (ELIA, DSO, CDS, Foreign TSO) and, if applicable, the name of the DSO or the CDSO or of the Foreign TSO;
 - the correction made to the Demand Curve;
- a complete list of all Capacities («eligible» and «non eligible»), that submitted a Prequalification File between May 15 and the Prequalification File Submission deadline as per § 91 , enabling ELIA to adjust the Demand Curve for the forthcoming Auctions;
- the reason(s) for assigning the status "rejected" for each Prequalification File that receives such status;
- insofar as possible, a description of Grid Constraints identified.

6 AUCTION PROCESS

6.1 INTRODUCTION

In accordance with article 7, § 10 of the Electricity Act, ELIA organizes three Auctions for each Delivery Period:

A first Auction four years ahead of the Delivery Period (hereafter referred to as "Y-4 Auction");

A second Auction two years ahead of the Delivery Period (hereafter referred to as "Y-2 Auction");

A third Auction one year ahead of the Delivery Period (hereafter referred to as "Y-1 Auction").

The purpose of the Auction process is to determine the capacities to be contracted through the Primary Market, by means of the selection of Bids submitted in the Auction by Prequalified CRM Candidates for their respective Prequalified CMU(s).

This chapter is structured around three sections.

Section 6.2 elaborates on the modalities of the submission of Bids, describing the Bid compliance conditions, the process for Bid submission via the CRM IT Interface and the (Remaining) Eligible Volume requirement.

Section 6.3 specifies the clearing of the Auction. After defining the parameters and grid constraints that serve as input to an Auction, the section defines the Auction clearing methodology and the Bid remuneration methodology.

Section 6.4 elaborates on the Auction results.

6.2 BID SUBMISSION

- 266. Each Bid is indivisible, meaning that it can only be selected in its entirety or not at all.
- 267. Subject to the conditions as detailed in §§ 286 and 287, a Prequalified CRM Candidate can label a Bid as being part of a set of Linked Bids together with one or more of its other Bids when the Bids refer to CMUs that form Linked Capacities, specified in accordance with § 100 during the Prequalification Process. In such case, these Bids are automatically bundled together and designated as part of the same set of Linked Bids.
- 268. Bids that are part of a set of Linked Bids can only be selected jointly.
- 269. Subject to the conditions as detailed in § 288, a Prequalified CRM Candidate can label a Bid or a set of Linked Bids as being part of a set of mutually exclusive Bids together with one or more of its other Bids. In such case, the Bids are automatically bundled together and designated as part of the same set of mutually exclusive Bids.
- 270. From a set of mutually exclusive Bids, only one Bid or one set of Linked Bids can be selected.

6.2.1 Bid compliance conditions

6.2.1.1 Bid compliance conditions for all Bids

271. A Bid relates to a single Prequalified CMU.

272. A maximum of five Bids per Auction may be submitted for one CMU.

273. No Bid submitted during a Y-2 or Y-1 Auction may relate to a Virtual CMU.

274. A Bid includes:

- one single Bid Price, expressed in EUR/MW/year with a precision of 0,01 EUR/MW/year, subject to the conditions specified in §§ 277 and 278; and
- one single positive volume, expressed in MW with a precision of 0,01 MW, subject the conditions specified in §§ 281 to 283; and
- one single positive Capacity Contract Duration, expressed in number of Delivery Periods with a precision of one Delivery Period, subject to the conditions specified in §§ 284 and 285; and
- if applicable, submit the indication of a mutually exclusive relationship with other Bids, according to the conditions specified in §§ 276 and 288.

The Bidder shall indicate to ELIA the portion of the Eligible Volume of the CMU that will contribute to security of supply during the Delivery Period related to the Auction, if the CMU is not selected in the Auction.

275. If Bids for the same CMU submitted for multiple Auctions organized in the same year do not have overlapping Transaction Periods, these Bids are independent of the (non-)selection of the Bid(s) for the same CMU in the other Auction(s).

276. If Bids for the same CMU submitted for multiple Auctions organized in the same year have overlapping Transaction Periods, these Bids are mutually exclusive.

6.2.1.1.1 Bid Price

277. The Bid Price is less than or equal to the Global Auction Price Cap.

278. In the event that an application is made for an intermediate Price Cap derogation, in accordance with article 22 of the Royal Decree on "Methodology", the Bid Price is less than or equal to the missing money included in the derogation application, in accordance with article 22, § 2, 5° of the Royal Decree on "Methodology" when:

- the submitted Intermediate Price Cap derogation application is approved by the CREG in accordance with article 22, § 11 of the Royal Decree on "Methodology"; or
- the submitted Intermediate Price Cap derogation application is rejected by the CREG but the derogation applicant undertakes to file, within the time period referred to in article 29quater of the Electricity Act, an appeal against the CREG decision.

279. The Bid Price is less than or equal to the Intermediate Price Cap, in case this Bid is related to a CMU that is assigned a Capacity Contract duration covering a single Delivery Period, or in case it concerns a Bid of CMU that was assigned a Capacity Category related to a Capacity Contract that covers a maximum of eight Delivery Periods, in accordance with article 19/1, §1, 1° of the Royal Decree on "Investment Thresholds" and for which:

- no Intermediate Price Cap derogation application is submitted; or

- the submitted Intermediate Price Cap derogation application is rejected by the CREG and the derogation applicant has not undertaken to file, within the time period referred to in article 29quater of the Electricity Act, an appeal against the CREG.

280. In case the Bid Price related to a Foreign CMU is higher than the Bid Price of the selected Bid in the Pre-Auction, Elia informs both the CREG and the Auditor of the Capacity Market.

As a derogation to the above, in the event that the Bid Price of the Bid submitted in the Pre-Auction exceeds the Intermediate Price Cap and an Intermediate Price Cap derogation application, in accordance with article 22 of the Royal Decree on "Methodology", of the Foreign CMU is not approved by the CREG and the derogation applicant has not undertaken to file an appeal against the decision of the CREG, the Bid Price submitted by the foreign CMU is equal to the Intermediate Price Cap.

6.2.1.1.2 Bid volume

281. The volume of a Bid is greater than or equal to the minimum participation threshold in MW as determined in the Royal Decree on "Eligibility Criteria".
282. The volume of a Bid is less than or equal to the Eligible Volume of the CMU or, if a Transaction on the Primary Market or a transaction on the Secondary Market already took place previously for this CMU, the Remaining Eligible Volume.
283. A Prequalified CRM Candidate offers in the Auction at least once the entire Eligible Volume and Associated Eligible Volume of its Prequalified CMUs that are not Foreign CMUs or, if a Transaction on the Primary or Secondary Market already took place previously for these CMUs, the Remaining Eligible Volume. To comply with this requirement, the maximum volume that can be selected from all his Bids with the status "submitted" at the Bid submission deadline as described in § 306, needs to be equal to the Eligible Volume, or if applicable the Remaining Eligible Volume.

ELIA considers the CMUs that do not respect this requirement as a "full Opt-out", in accordance with §§ 211 or 217.

6.2.1.1.3 Capacity Contract Duration

284. For CMUs that are assigned by the CREG to a Capacity Category associated with a Capacity Contract for up to three, eight or fifteen Delivery Periods, the Capacity Contract Duration of a Bid is less than or equal to the maximum number of Delivery Periods that correspond to the concerned Capacity Category. However, for CMUs that are defined as "Existing Capacity" in accordance with the Royal Decree on "Investment Thresholds" that were assigned a Capacity Category related to a Capacity Contract duration of maximum eight Delivery Periods by the CREG and that also obtained an IPC derogation, the duration of the Capacity Contract cannot exceed the economic lifetime of the investment as determined in accordance with article 22, §7/1 of the Royal Decree "Methodology". In other cases, the Capacity Contract Duration of a Bid is equal to one Delivery Period.
285. The Capacity Contract Duration of a Bid that is related to a Virtual CMU is equal to one Delivery Period.

6.2.1.2 Complementary Bid compliance conditions for Linked Bids and mutually exclusive Bids

286. Bids that are part of a set of Linked Bids:
- do not relate to the same CMU; and

- relate to CMUs of the same Prequalified CRM Candidate; and
- relate to CMUs of Linked Capacities; and
- relate to the same Auction; and
- have the same Bid Price.

287. A Bid can only be part of one set of Linked Bids.

288. Bids that are part of a set of mutually exclusive Bids:

- relate to CMUs of the same Prequalified CRM Candidate; and
- relate to CMUs located in the same country; and
- relate to the same Auction.

289. In addition to the compliance conditions set out in § 288, and in case a set of mutually exclusive Bids contains Bids that are related to two, or more, different CMUs, that are not New-Build CMUs, these CMUs must be located in the same geographical location, defined in accordance with Article 1, §2, 9° of the Royal Decree on "Investment Thresholds".

6.2.1.3 Complementary Bid compliance condition for Bids related to Additional CMUs subject to a technical agreement

290. A Bid or set of Linked Bids related to one or more Additional CMUs that are subject to a technical agreement in accordance with the connection process as defined in the Code of Conduct, the Federal Grid Code or the applicable Regional Grid Code, has to comply with the technical configuration as specified in a related EDS that is the subject of the technical agreement.

6.2.2 Bid submission via CRM IT Interface

291. The Prequalified CRM Candidates use the CRM IT Interface for the submission of their Bid(s). To that end, the Prequalified CRM Candidates have access to the CRM IT Interface as from September 1 09:00.

292. ELIA integrates a compliance check in the CRM IT Interface as an automatic process that verifies whether Bids are compliant. A Bid is compliant when it respects all conditions listed in section 6.2.1.

6.2.2.1 Bid status

293. In the CRM IT Interface, a Bid can have the following statuses: "saved", "submitted", "cancelled" or "selected".

6.2.2.1.1 Status "saved"

294. A Prequalified CRM Candidate can save Bids in the CRM IT Interface from September 1 09:00 until the Bid submission deadline mentioned in § 306.

295. Bids that are saved in the CRM IT Interface get the status "saved".

296. From the moment a Bid gets the status "saved", the Bid Price is encrypted until the clearing of the Auction. As an exception, a decryption key is provided to the IT processes that execute compliance checks preceding the clearing of the Auction, referred to in § 292, or that perform the clearing of the Auction as described in section 6.3.
297. A Prequalified CRM Candidate can initiate a compliance check as referred to in § 292, of its Bids with the status "saved". Upon finalization of the compliance check, it will be indicated in the CRM IT Interface whether these Bids have successfully passed the compliance check. In case Bids do not pass the compliance check, the Prequalified CRM Candidate is informed about the reason(s) for non-compliance via the CRM IT Interface.

6.2.2.1.2 Status "submitted"

298. From the first Working Day after September 15 9h00 and until the Bid submission deadline mentioned in § 306, a Prequalified CRM Candidate may submit Bids in the CRM IT Interface with the status "saved". Upon submission of the Bids in the CRM IT Interface a compliance check as described in § 292 is performed.
299. Bids that successfully pass the compliance check, receive the status "submitted".
300. Bids that don't pass the compliance check according to § 292 keep the status "saved". In that case, the Prequalified CRM Candidate is informed about the reason(s) for non-compliance via the CRM IT Interface.
301. Each time a Bid of a Prequalified CRM Candidate gets the status "submitted" in the CRM IT Interface, ELIA provides by email an overview to this Prequalified CRM Candidate of all its Bids with the status "submitted".
302. From the first Working Day after September 15 until the Bid submission deadline referred to in § 306, ELIA performs a compliance check as referred to in § 292 of all Bids with the status "submitted" on a daily basis.
303. ELIA determines, for each Prequalified CMU, the maximum volume that can be selected from all Bids related to this CMU with the status "submitted" at the Bid submission deadline as referred to in § 306, taking into account the constraints that arise from the mutual exclusive relationship between Bids.

6.2.2.1.3 Status "cancelled"

304. Bids with the status "saved" or "submitted" for which ELIA notes during a compliance check conducted in application of §§ 297, 298 or 302 that they relate to a CMU that has meanwhile been archived in accordance with § 256, get the status "cancelled". In that case, the Prequalified CRM Candidate is informed by email.

6.2.2.1.4 Status "selected"

305. Following the Auction clearing described in section 6.3, Bids may get the status "selected".

6.2.2.2 Bid submission deadline

306. The Bid submission deadline is set at September 30 17:00, unless the fallback procedure as described in section 15.6.1 applies.
307. Only Bids with the status "submitted" at the Bid submission deadline as described in § 306, are considered during the clearing of the Auction, as described in section 6.3.

308. ELIA automatically reminds Prequalified CRM Candidates about the upcoming Bid submission deadline at least twice, once one week and once twenty-four hours before the Bid submission deadline.
309. The fallback procedure described in section 15.6.1 applies in the event of an IT problem attributable to ELIA which makes it impossible for a Prequalified CRM Candidate to submit its Bid(s) within the deadline referred to in § 306.

6.3 AUCTION CLEARING

310. As of the Bid submission deadline as described in § 306, ELIA proceeds with the clearing of the Auction according to the methodology described in section 6.3.3.

6.3.1 Adaptations and corrections of the Demand Curve

311. The volume to be contracted in an Auction must be corrected in order to take account of information that was not taken into account when determining the Demand Curve as described in the Royal Decree on "Methodology".

There are three types of corrections:

- **downward volume corrections** of the Demand Curve that result in a reduction of the volume to be contracted, implemented by shifting the Demand Curve to the left before the clearing of the Auction (section 6.3.1.2);
- **upward volume corrections** of the Demand Curve that result in an increase of the volume to be contracted, implemented by shifting the Demand Curve to the right before the clearing of the Auction (section 6.3.1.1);
- **conditional volume corrections** of the Demand Curve that result in a reduction or an increase of the volume to be contracted depending on the selection of Bids during the Auction clearing, implemented through conditional volume correction Bids that are considered during the clearing of the Auction (section 6.3.1.3).

The conditional volume correction Bids have no Bid Price, do not result in any contractual obligation for any Prequalified CRM Candidate and are not linked to any Capacity Contract duration.

6.3.1.1 Upward volume corrections of the Demand Curve

312. The total volume of upward volume corrections of the Demand Curve towards an Auction is equal to the sum of the following elements:

- a) capacities of Energy Constrained CMUs that are engaged in a Transaction with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates for which the Derating Factor has deteriorated (Derating Factor as indicated by the CRM Candidate in § 115 lower than Derating Factor(CMU,t)), calculated as

$$\frac{\text{average Total Contracted Capacity over the Delivery Period to which the Auction relates}}{\text{Derating Factor(CMU,t)}} * [\text{Derating Factor(CMU,t)} - \text{Derating Factor as indicated by the CRM Candidate in § 115}];$$

With $\text{Derating Factor(CMU,t)}$ equal to the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the Total Contracted

Capacity over the Delivery Period to which the Auction relates, calculated in accordance with the definition in chapter 3;

- b) capacities that were considered as non-eligible during the determination of the Demand Curve, but which are related to CMUs that nevertheless prequalified or for which the capacity has meanwhile been reduced, calculated in accordance with the rest of this section;
 - c) The reduction of the Contracted Capacities, for the same Delivery Period(s), in an Auction organized in a previous year, following a decision of the disputes committee, and which were not taken into account in the Demand Curve;
 - d) The reduction of the Contracted Capacities, for the same Delivery Period(s), as a result of a postponement of the Transaction Period following a delay of the Infrastructure Works and which were not taken into account in the Demand Curve;
 - e) The Contracted Capacities of previous Auctions for the targeted Delivery Period, whose Capacity Contract was broken or whose volume of Contracted Capacity was reduced;
313. Prior to the determination of the Demand Curve, based on a list of individually considered CHP, waste and biomass production units that is determined by ELIA and that minimally contains the name of the unit, a presumed Nominal Reference Power, the technology and a related Derating Factor, the Federal Public Service Economy indicates for each unit whether it is expected to receive subsidies and therefore should be considered non-eligible during the Delivery Period to which the Auction relates. During the Prequalification Process, ELIA will map the participating capacities to this list.
314. Prior to the determination of the Demand Curve, ELIA establishes a list of CMUs with technology CHP, waste, biomass, hydro run-of-river, solar, onshore wind or offshore wind that are not included in the list referred to in § 313 and that participated to the Prequalification Process for a previously organized Auction. During the Prequalification Process ELIA will map the participating CMUs to this list.
315. For prequalified capacities (as part of successfully prequalified CMUs) that were mapped to the list referred to in § 313 and that are according to the list considered as non-eligible, the contribution to the upward volume correction of the Demand Curve is calculated as the presumed Nominal Reference Power reduced by the Opt-out Volume classified as "OUT" then multiplied with the applicable Derating Factor of the unit, in accordance with the values used in the list.
- Not successfully prequalified units of the list referred to in § 313 that are according to the list considered as non-eligible, and that have meanwhile provided a definitive closure or definitive structural reduction notification or, for a Y-1 Auction, a temporary closure or temporary structural reduction, in accordance with article 4bis of the Electricity Law, are also considered to contribute to the upward volume correction of the Demand Curve. Their contribution is determined by multiplying the volume implied in the aforementioned article 4bis notification and the applicable Derating Factor in accordance with the value assumed for the unit in the list.
316. Prequalified capacities that could not be mapped to the list referred to in § 313 and § 314 contribute to the upward volume correction of the Demand Curve if their selected Technology is CHP, waste, biomass, hydro run-of-river, solar, onshore wind or offshore wind. Their contribution to the upward volume correction of the Demand Curve is calculated as the product of the Nominal Reference Power of the related Delivery Point and the Derating Factor related to the technology as used in the assumptions during the calibration of the Demand Curve.

6.3.1.2 Downward volume corrections of the Demand Curve

317. The total volume of downward volume corrections of the Demand Curve towards an Auction is equal to the sum of the following elements:

- a) capacities of Energy Constrained CMUs that are engaged in a Transaction with a Transaction Period that (partially) overlaps with the Delivery Period to which the Auction relates for which the Derating Factor has improved (Derating Factor as indicated by the CRM Candidate in § 115 higher than Derating Factor(CMU,t)), calculated as:

$$\frac{\text{average Total Contracted Capacity over the Delivery Period to which the Auction relates}}{\text{Derating Factor(CMU,t)}} *$$

[Derating Factor as indicated by the CRM Candidate in § 115 – Derating Factor(CMU,t)];

With *Derating Factor(CMU,t)* equal to the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the Total Contracted Capacity over the Delivery Period to which the Auction relates, calculated in accordance with the definition in chapter 3;

- b) capacities that are to be considered as non-eligible but that were not yet considered as such during the calibration of the Demand Curve, calculated as the sum of the derated not successfully prequalified capacities of the list referred to in § 313 that are according to the list not considered as non-eligible and that did not meanwhile provide a definitive closure or definitive structural capacity reduction notification in accordance with article 4bis of the Electricity Law. The values used in the list referred to in § 313 are used for the calculation;
- c) the capacities that contribute to security of supply for the targeted Delivery Period and that were not considered in the Demand Curve, including:
- the increase of the Contracted Capacities for the same Delivery Period(s), following a decision of the disputes committee, and which were not yet taken into account in the Demand Curve;
 - capacities contracted or selected for the same Delivery Period(s) in a previous Auction organized in the same year and not taken into account in the Demand Curve, including the derated Opt-out Volume associated to a CMU that was classified as "IN" towards the Auction in which the CMU was selected. In case of different Derating Factors between the two Auctions, this impact is also considered towards the correction, i.e., increasing/decreasing the downward correction in case of an improved/deteriorated Derating Factor;
- d) capacities that indicate not willing to participate to the Auction via an Opt-out Notification, but that can be expected to stay in the market, calculated as the sum of the derated Opt-out Volumes related to this Auction classified as "IN". For each CMU the derated Opt-out Volume is calculated by multiplying the Opt-out Volume with the Derating Factor applicable to the CMU determined during the Prequalification process in accordance with §§ 115 or 127 for the Auction to which the Opt-out Notification relates¹⁹. For capacities contracted or selected for the same Delivery Period(s) in a previous Auction in the same year, the Opt-out Volumes for this CMU towards this subsequent Auction are discarded, to avoid double counting as the Opt-out Volumes of the previous Auction are already considered;
- e) capacities with an obligation to submit a Prequalification File as described in article 7undecies, §, 8 al. 2 of the Electricity Law and supplemented by the description in § 126,

¹⁹ If applicable, the Opt-out Volume is first allocated to the individual Delivery Points based on their NRP, then multiplied with the Derating Factor.

second alinea, but for which no Prequalification Process has been initiated, which have not been taken into account in the Demand Curve and for which no notification of definitive closure or definitive structural capacity reduction in accordance with article 4bis of the Electricity Law has been submitted in the meantime;

- f) existing capacities that will contribute to security of supply in the targeted Delivery Period and that did not submit a notification of definitive closure or definitive structural capacity reduction in accordance with article 4bis of the Electricity Law, which did not participate to the Prequalification Process and that have not been taken into account in the Demand Curve;
 - g) for each border for which a Pre-Auction was organized, the Maximum Entry Capacity , reduced by the maximum volume that can be selected from all Bids with the status "submitted" at the Bid submission deadline as mentioned in § 306 related to Indirect Foreign Capacities located in the Adjacent European member state across the other side of this border;
 - h) For a Y-4 Auction, the increase of the volume reserved for later Auctions, in accordance with article 11 § 5 first alinea of the Royal Decree on "Methodology". This increase is equal to 50% of the volume that is equal to the capacity that has on average less than 200 running hours per year, as determined in the Ministerial Decree on "Volume and Parameters" and reduced by the maximum offered volume by capacities that do not have an obligation to submit a Prequalification File, as described in article 7undecies, § 8 al. 2 of the Electricity Act, complemented by the description in § 126, second alinea, with the intention of obtaining a Capacity Contract with a duration of one Delivery Period, with the exception of Unproven Capacities. For Aggregated CMUs, this volume is determined pro rata according to the NRPs of the Delivery Points part of the CMU that do not have the above-mentioned obligation to submit a Prequalification File. In case the correction is determined to be smaller than 0MW, the correction is not applied.
 - i) For a Y-1 Auction, fifty percent of the volume of DSR contained in the Ministerial Decision "Reference Scenario" for this Auction, reduced with:
 - The DSR volume and the volume of diesel installations that was contracted in the Y-4 Auction and the Y-2 Auction for the Delivery Period in question;
 - The maximum DSR volume and the maximum volume of diesel installations, for which no upward correction of the Demand Curve was applied, which was offered in the Y-1 Auction.
 - j) In the following cases:
 - An aggregated volume of more than 20MW of capacities that have contributed to the upward correction of the Demand Curve, in accordance with §§ 313 and 316 which were not selected during the clearing of the Auction; and / or
 - One or more Bids related to Indirect Foreign Capacity, situated in a bordering European member state, that were not selected from all Bids with the status "submitted" at the Bid submission deadline as mentioned in § 306
- a new clearing of the Auction is initiated, with the following updated input:
- All bids for the CMUs related to the aggregated volume of the abovementioned point a. are forcefully rejected during the new clearing of the Auction; and
 - ELIA considers the CMUs related to the abovementioned aggregated volume as a "full Opt-Out", in accordance with §§ 211 and 217; and
 - All bids related to the Foreign Indirect Capacity of the abovementioned point b. are forcefully rejected during the new clearing of the Auction; and

- The Demand Curve is corrected downwards with the volume related to the forcefully rejected Bids of Indirect Foreign Capacity.

This process is repeated at most five times and as long as:

- An aggregated volume of more than 20MW of capacities that have contributed to the upward volume correction of the Demand Curve, in accordance with §§ 313 to 316 are not selected during the clearing of the Auction; and / or
- One or more Bids related to Indirect Foreign Capacity were not selected from all Bids with the status "submitted" at the Bid submission deadline as mentioned in § 306.

6.3.1.3 Conditional volume corrections of the Demand Curve

318. A conditional volume correction Bid is created by ELIA for each Auction and for each Opt-out Volume that falls under the descriptions provided in §§ 209, 210, 215 or 216, whose volume is equal to the Opt-out Volume multiplied by the Derating Factor applicable to the CMU for the Auction to which the Opt-out Notification relates. Its treatment ("IN" or "OUT") depends on the clearing of the Auction and is further described in § 357, second and third bullet.
319. Before the clearing of the Auction, the conditional Opt-out Volumes that are related to § 209 and § 215 are considered as "IN".
320. Before the clearing of the Auction, the conditional Opt-out Volumes that are related to § 210 and § 216 are considered as "OUT".

6.3.2 Grid constraints

6.3.2.1 Definitions

321. In accordance with article 7undecies §12, al. 2, 4° of the Electricity Act this section defines the grid constraints and the methodology for their calculation and application applicable for Y-4, Y-2 and Y-1 Auctions.
322. Grid constraints are limitations on the feasibility of a CMU or a combination of CMUs requiring additional connection capacity within the CRM framework. This additional connection capacity is mentioned by the CRM Candidate in its Prequalification File. These constraints are based on the expected grid infrastructure and its operating conditions as determined by the reference scenario used to calibrate the Demand Curve in order to ensure compliance with applicable Belgian and European regulations.
323. The grid constraints applicable to a CMU that requires additional connection capacity, are determined by ELIA during the Prequalification Process of that CMU. The grid constraints applicable to a combination of multiple CMUs requiring additional connection capacity are determined during the calculation phase of grid constraints.
324. External grid constraints are grid constraints on third party grids (Fluxys or (C)DSOs), other than those calculated by ELIA. External grid constraints are notified by Fluxys or (C)DSO to ELIA when a combination of multiple CMUs requiring additional connection capacity within the CRM framework, as mentioned by the CRM Candidate in its Prequalification File, could, based on the potential outcome of the Auction clearing, generate an outcome that would not be feasible taking into account the expected development of these third-party grids.

6.3.2.2 Process

325. The grid constraint calculation phase and application phase, described in the remainder of this section, are only executed by ELIA in case:

- Article 33, 34 or 57 of the Code of Conduct, of the article 166 of the Federal Grid Code, of the article 109 of the Federal Grid Code 2002 or of the corresponding article of the applicable Regional Grid Code, contain provisions for capacity allocation based on a competitive process; and
- the CRM can take the role of the competitive process referenced in the abovementioned Federal or Regional Grid Code.

ELIA does not apply any grid constraints for the ELIA grid if any of the abovementioned conditions are not fulfilled. Where applicable, the requirement set out in § 116, for CMUs to sign the waiver declaration (capacity reservation and allocation), does not apply.

326. ELIA informs Capacity Holders on its website whether or not grid constraints are applied towards the upcoming Auction(s) before the start of the Prequalification Process for this (these) Auction(s).

6.3.2.2.1 Calculation phase

327. The calculation phase for grid constraints starts on June 15 and ends on September 15 of the year in which the Auction takes place.

328. During this calculation phase, ELIA identifies the ELIA Grid constraints to be taken into account during the Auction clearing based on the factors described in section 6.3.2.4 and using calculation methodology described in section 6.3.2.3.

329. During the calculation phase, ELIA is, where necessary, notified of external grid constraints by a third party (DSO, Fluxys or (C)DSOs), in accordance with the procedures specified in section 6.3.2.5.

330. In a year in which multiple Auctions are organized, ELIA determines the separate grid constraints for each Auction. For the calculation of the grid constraints for an Auction, ELIA takes into account the CMUs selected in an Auction organized in the same year and for which ELIA has already applied the clearing methodology according to § 353.

6.3.2.2.2 Application phase

331. The application phase starts on September 15 and ends on October 15 of the year in which the Auction takes place.

332. During the application phase, ELIA applies the ELIA Grid constraints and external grid constraints and implements those into the Auction algorithm used for the Auction clearing in order to ensure that the unacceptable combinations of CMUs are not retained.

As soon as possible after September 15 but no later than September 30 of the year in which the Auction takes place, ELIA submits the ELIA Grid constraints and external grid constraints via the combination matrix as referred to in § 351 to the CREG and the concerned regional regulatory authorities as well as, where appropriate, to the Capacity Market Auditor. Only the external grid constraints that were received within the time period referred to in § 349 and which respect the grid constraint format defined in § 351 are included in the combination matrix.

6.3.2.3 Calculation methodology for ELIA Grid constraints

- 333. ELIA does not calculate grid constraints for CMU(s) with existing grid connections i.e., for which a final operational notification exists at the time the Prequalification Process starts within the meaning of article 2, 62° of EU Regulation 2016/631 establishing a network code on requirements for grid connection of production units for electricity and energy storage facilities.
- 334. ELIA does not calculate grid constraints for CMU(s) with connection capacity allocated following the signing of a connection agreement for which the Fast Track Prequalification Process was followed.
- 335. In order to determine grid constraints, ELIA applies a three-step methodology.

6.3.2.3.1 First step: determination of reference grid

- 336. Grid constraints are determined based on information that ELIA has concerning future conditions of its grid and that are relevant to the Auction and CMU(s) concerned.
- 337. In order to determine the future conditions of the grid, ELIA uses the electricity flows determined by the reference scenario to calibrate the Demand Curve, as defined in the Royal Decree on "Methodology". Using this reference scenario, ELIA shall calculate the effects of the combinations of prequalified CMUs, considering their location, size and technology on the electricity flows with the objective of verifying whether these combinations of CMUs allow the compliance of the ELIA Grid with EU Regulation 2019/943.
- 338. ELIA takes account of definitive decommissioning or definitive capacity reductions of power production facilities, as referred to in article 4bis of the Electricity Act, if those are notified prior to June 15 of the year of the Auction concerned, or if there are any other legal requirements for decommissioning or phase-out of existing power units.
- 339. In case specific conditions are imposed on a CMU in its technical agreement, ELIA takes into account those conditions in the reference grid for determination of grid constraints.
- 340. ELIA uses the most recent status and anticipation (as known on June 15 of the year of the Auction concerned) of the planned and approved grid infrastructure projects as listed in the latest Federal Development Plan & Regional Investment Plans, including new Grid Users in line with the Code of Conduct. In this measure, the reference grid for determination of grid constraints can hence deviate from the reference grid used for the reference scenario to determine the volume to be procured through the Auction, as defined in the Royal Decree on "Methodology".
- 341. Prior to the calculation phase as per § 327, ELIA provides to the CREG, if applicable, for information a list of all grid infrastructure projects relevant to the grid constraints for which there is a risk that the delay or advance relative to the planning indicated in the latest Federal Development Plan would affect the grid constraints applicable to the reference grid.
- 342. In case a grid infrastructure project presents a delay known prior to the calculation phase of the grid constraints as per § 327, such that this infrastructure risks not being available at the start of the Capacity Delivery Period of the considered Auction a CMU combination cannot be selected during the Auction if the availability of this infrastructure is a necessary condition of this CMU combination.
- 343. In case a grid infrastructure project presents a delay known prior to the calculation phase of the grid constraints as per § 327 but the availability at the start of the Delivery Period of the Auction concerned of this grid infrastructure is not a necessary condition for CMUs combination, such combination can be selected during the Auction clearing on the condition

that the selection of these CMUs does not hinder the realization of the delayed grid infrastructure project.

6.3.2.3.2 Second step: verification of the feasibility of the combination of CMUs

344. ELIA applies a combinatory methodology which consists of verifying the feasibility of all relevant combinations of Prequalified CMUs requiring additional connection capacity in the reference grid for the Auction concerned. ELIA applies this methodology in accordance with the grid constraint factors referred to in section 6.3.2.4 and following the connection process as defined in the Code of Conduct or the Federal Grid Code and in the relevant Regional Grid Code(s) applicable. ELIA assesses these CMU combinations one by one to derive which CMU combinations are infeasible.

6.3.2.3.3 Third step: establishment of a matrix of the grid constraints

345. ELIA sets up a combination matrix that retakes the Prequalified infeasible CMU combinations in the smallest set possible in order to avoid redundant information. For each infeasible combination, ELIA indicates the technical reason based on section 6.3.2.4 in the combination matrix. The combination matrix summarizes and combines all information from each individual grid constraint (both those calculated by ELIA and potentially received from Fluxys or (C)DSO) in accordance with the table included in § 351.

6.3.2.4 ELIA Grid constraint factors

346. The first category of ELIA Grid constraint factors is system security. ELIA applies rules to ensure security of the overall electricity grid without structurally requiring re-dispatch while respecting all applicable European and Belgian legislation.
347. The second category of ELIA Grid constraint factors concerns the physical spacing limitation. ELIA determines any known limitations related to available physical space within the available terrains at the relevant substations necessary for the connection of the Additional Capacity envisaged.

6.3.2.5 External grid constraints

348. ELIA accommodates in the Auction the external grid constraints to the extent they comply with the legal and regulatory framework applicable to Fluxys, Foreign TSOs and (C)DSOs and where they are notified by the third party system operator within the required time period and following the format specified in § 351.
349. Third parties (Fluxys, Foreign TSOs or (C)DSOs) notify the external grid constraints, previously approved by the competent regulatory authority at the latest before September 15 of the year where the considered Auction takes place.
350. ELIA shall not be liable for the correctness of the content of these external grid constraints, nor for their calculation. ELIA does not bear any liability for the calculation methodology or the calculated results. ELIA is only responsible for the correct application of the information received.

6.3.2.6 Grid constraints format

351. A grid constraint, including an external grid constraint, shall take the form of a combination of a number of defined CMUs that would lead to an unacceptable Auction result. The table below illustrates the case, listing the non-acceptable combinations for three CMUs:

CMU 1	CMU 2	CMU 3	Reason for non-acceptability of combination
1	1	0	For example, overload of line X
1	0	1	For example, no sufficient space at substation X

Table 9: Illustration which summarizes 2 grid constraints for 3 CMUs in a table format

The grid constraints presented in this table are combined into a combination matrix as referred to in § 345.

6.3.3 Auction clearing methodology

352. The Auction clearing methodology consists of two phases. The optimization phase as detailed in section 6.3.3.1, is performed in any case. The tie-breaking rules as detailed in section 6.3.3.2 are applied only in case multiple equivalent combinations of Bids result from the optimization phase.

353. In a year in which multiple Auctions are organized, ELIA applies the Auction clearing methodology to the Auctions in chronological order according to the start of the Delivery Period to which the Auctions relate.

354. The Auction clearing is only performed if point B of the corrected Demand Curve, as referred to in article 9, § 1 of the Royal Decree on "Methodology", has a volume that is strictly positive. Otherwise, no Auction clearing is performed and no Bid is selected.

6.3.3.1 Optimization phase

355. The corrected Demand Curve is used as input for the optimization phase, which is the Demand Curve after taking into account the necessary corrections and adaptations as described in section 6.3.1. Where necessary, ELIA approximates the values to achieve a precision of 0,01 EUR/MW/year and 0,01 MW.

356. The optimization phase identifies the combination of Bids or multiple equivalent combinations of Bids that best meet the objective as described in sections 6.3.3.1.1 and 6.3.3.1.2 respectively, depending on the concerned Auction.

357. ELIA only considers combinations of Bids that respect the following requirements:

- the combination of Bids includes the conditional volume correction Bids described in § 318 related to opt-outs as described in §§ 209 or 215, when no Bid is included in the combination related to another CMU with an EDS in which the conditionality as described in §§ 209 or 215 is incorporated;
- the combination of Bids includes the conditional volume correction Bids described in § 318 related to opt-outs as described in §§ 210 or 216 when at least one Bid is included in the combination related to the CMU to which also the partial Opt-out as described in §§ 210 or 216 relates;
- the combination of Bids – for a Y-4 and Y-2 Auction including the Bids related to Additional CMUs that are subject to a technical agreement that have been selected in Auctions

organized in the same year and for which ELIA has already applied the clearing methodology according to § 353 – does not violate any grid constraint, the grid constraints being determined according to section 6.3.2;

- the sum of the volumes of the Bids related to Virtual CMUs included in the combination of Bids is not higher than the maximum volume of Unproven Capacity determined by the Minister in accordance with article 7undecies, § 6 of the Electricity Act.

358. In case the optimization phase results in one unique combination of Bids that is superior to all other considered combinations of Bids, the Auction clearing is finished and all Bids within this combination of Bids are selected.

6.3.3.1.1 Y-4 or Y-2 Auction

359. For the clearing of a Y-4 or Y-2 Auction, ELIA pursues the combination of Bids with maximal social welfare. Social welfare is calculated as the difference between:

- the integral of the corrected Demand Curve over the capacity volume interval $[0,x]$ with x equal to the minimum of the sum of the Bid volumes of all Bids considered in the combination and the capacity volume related to point C of the corrected Demand Curve, as referred to in article 9, § 1 of the Royal Decree on "Methodology"; and
- the cost of the Bids of the combination, calculated by multiplying the Bid volume by the Bid Price, summed over all Bids of the combination.

360. In case multiple combinations of Bids are equivalent in terms of social welfare, ELIA pursues the combination of Bids that results in the highest capacity volume calculated as the sum of the volumes of all Bids retained in the combination.

6.3.3.1.2 Y-1 Auction

361. In a Y-1 Auction, ELIA pursues the combination of Bids with minimal cost, for which the sum of the Bid volumes of all Bids considered in the combination covers at least the volume to be procured in accordance with the corrected Demand Curve.

362. The cost is calculated as the Bid volume multiplied by the Bid Price, summed over all Bids considered in the combination.

363. In case no combination of Bids covers the volume to be procured, in accordance with the corrected Demand Curve, ELIA pursues the combination of Bids for which the sum of the offered volumes is the highest. In case more than one combination of Bids results in the highest capacity volume, ELIA pursues the combination of Bids with the lowest cost.

6.3.3.2 Tie-breaking rules

364. The following tie-breaking rules apply sequentially, until one unique combination of Bids is retained. When a unique combination is found, the Auction clearing is finished and all Bids within this combination of Bids are selected.

6.3.3.2.1 Tie-breaking rule 1: Carbon dioxide emissions

365. Preference is given to the combination of Bids that is characterized by the lowest carbon dioxide emissions (CO_2), calculated as the Bid volume weighted average of the emission factors (in gCO_2/kWh) of the CMUs to which the Bids considered in the combination relate.

6.3.3.2.2 Tie-breaking rule 2: Capacity Contract Duration

366. Preference is given to the combination of Bids that is characterized by the shortest Capacity Contract Duration, calculated as the Bid volume weighted average of the Capacity Contract Durations (in number of Delivery Periods) of the Bids considered in the combination.

6.3.3.2.3 Tie-breaking rule 3: First come, first served

367. The “first come, first served” rule applies as follows:

- a) all unique Bids within all remaining combinations of Bids are sorted according to their Bid submission time;
- b) based on the sorted list of Bids, from the first submitted Bid to the last submitted Bid:
 - i. ELIA discards the combination(s) of Bids that do not include the first submitted Bid.
 - ii. ELIA continues the process of discarding combinations of Bids with the next submitted Bids until only one combination of Bids remains.

6.3.4 Bid remuneration methodology

368. ELIA applies a “pay-as-bid” Bid remuneration methodology, meaning that the price allocated to a selected Bid is equal to its Bid Price.

369. The price allocated to a selected Bid shall not be indexed nor revised over the course of the Capacity Contract Duration.

6.4 AUCTION RESULTS

370. In order to enable the CREG to effectively exercise its power of validation of results of the Auction, in accordance with the Royal Decree on "Monitoring", ELIA shall send to the CREG, no later than three Working Days after the Bid submission deadline as referred to in § 306, the following information relating to the Bids submitted:

- The CMU-ID;
- The country and Control Zone where the CMU is located;
- The Bid volume;
- The Bid Price;
- Any link with an Investment File;
- The requested duration of the Capacity Contract;
- The type of Bid (mutually exclusive Bid, Linked Bid, individual Bid) as well as, if applicable, the identification of the Bids concerned;
- Where applicable, the Opt-out volume per CMU that submitted a Bid;

371. Upon finalization of the Auction clearing and at the latest by October 15, ELIA submits the list of selected Bids to the CREG for validation.

This notification contains, for each selected Bid, the following information:

- The CMU-ID;
- The country and control zone where the CMU is located;
- The Bid volume;
- The Bid Price;
- The obligation to Prequalify or not;
- Any link with an Investment File;
- The requested duration of the Capacity Contract;
- The type of Bid (mutually exclusive Bid, Linked Bid, individual Bid) as well as, if applicable, the identification of the Bids concerned;
- Where applicable, the Opt-out volume per CMU selected;
- Where applicable, in relation to Additional CMUs, the additional connection capacity to be developed;
- Any application to the CMU linked to the selected Bid of a grid constraint, indicating whether the selection of the CMU gave rise to the exclusion of one or more other CMUs, with the identification of these CMUs.

This notification also includes a list of Bids that were not selected because of grid constraints, together with a detailed explication related to the grid constraint and its impact on the selection.

In its notification, ELIA shall also mention which tie breaking rules were applied, if applicable, and whether an excess or missing volume was selected.

372. In addition, the notification referred to in the previous § contains the final Demand Curve as well as all information relating to corrections made to the initial Demand Curve, in particular:

- The corrections relating to the Fast Track Volumes with the ID of the CMUs involved;
- the corrections relating to the prequalified Capacities that waive the operating aid with the ID of the CMUs concerned;
- the corrections relating to the Opt-out volumes with the ID of the CMUs concerned;
- the non-selected capacities that gave rise to a correction of the demand curve.

373. Once the CREG has validated the results, ELIA informs each Prequalified CRM Candidate who submitted at least one Bid from the selection or not from its Bid(s). Selected Bids get the status "selected" in the CRM IT Interface.

374. Auction results are published as described in section 16.4.

375. Each contestation of the results of the Auction is done in accordance with articles 29bis and 29quater of the Electricity Act.

376. The fallback procedure as described in section 15.6.3 applies in case of IT issues at ELIA preventing the determination of the Auction results.

7 CAPACITY CONTRACT SIGNATURE

377. When a Transaction is confirmed, either consecutive to a selection of a Bid in the Auction or following a validation of a Transaction on the Secondary Market, a Capacity Contract and an annex A of the Capacity Contract needs to be signed between the Capacity Provider and ELIA. The contractual procedure following the validation of a Secondary Market Transaction is described in section 10.6.
378. The remainder of this section describes the contractual process after selection of a Bid in the Auction.
- If no Capacity Contract is signed for a CMU on the Transaction Validation Date, a Capacity Contract as well as an annex A for the concerned Transaction, is signed by ELIA and the Capacity Provider. The Capacity Contract to be signed corresponds to the latest version of the standard capacity contract approved by the CREG and published on the Transaction Validation Date; or
 - If a Capacity Contract has already been concluded for a CMU on the Transaction Validation Date, a new annex A of the Capacity Contract is added and signed by ELIA and by the Capacity Provider.
379. The Derating Factor included in the annex A of the Capacity Contract for the concerned Transaction is the Derating Factor applied to determine the Eligible Volume of the associated Bid, in accordance with §§ 222 or 223 (as applicable).
380. In case a Bid is selected for a multi-year Capacity Contract Duration related to a CMU for which the CRM Candidate has indicated a degradation over time of its capacity for energy storage as described in § 100, the Contracted Capacity per Delivery Period in annex A of the Capacity Contract is determined by multiplying the Contracted Capacity with the specified energy retention percentage for that Delivery Period.
381. The signature by the Prequalified CRM Candidate of a Capacity Contract and/or the annex A for the concerned Transaction occurs either:
- within twenty Working Days from the moment of the signature of the Connection Contract, if the signature of the Connection Contract is required under the prerequisites in accordance with § 382; or
 - within forty Working Days from the Transaction Validation Date, if the signature of a Connection Contract is not required as pre-requisite.
382. The signature of a Connection Contract is a prerequisite for the signature of the Capacity Contract for an Additional CMU in the following cases:
- when the connection applicant has for an Additional CMU an agreement with ELIA on the technical solution, in accordance with articles 34 and 46 of the Code of Conduct or articles 153 and 160 of the Federal Grid Code;
 - when the connection applicant does not yet have for an Additional CMU an agreement with ELIA on the technical solution.
- In both cases, the Connection Contract must be signed no later than sixty Working Days after the Transaction Validation Date, such that the Capacity Contract must be signed no later than eighty Working Days after the Transaction Validation Date.
383. The signature of the Capacity Contract and/or the annex A for the concerned Transaction by ELIA occurs within five Working Days, following reception of the Capacity Contract and/or the

annex A for the concerned Transaction signed by the Prequalified CRM Candidate. ELIA notifies the Capacity Provider per e-mail as soon as the Capacity Contract and/or the annex A for the concerned Transaction is signed by ELIA. The date of said notification is considered to be the date on which the Capacity Contract and/or the annex A for the concerned Transaction was signed.

384. If the Capacity Contract and/or the annex A for the concerned Transaction is not signed by the Prequalified CRM Candidate within the timing detailed in § 381, ELIA applies to the Prequalified CRM Candidate concerned a penalty of €10,000 per MW selected for which no Capacity Contract and/or annex A is signed. The application of this penalty does not exempt the Prequalified CRM Candidate from his obligation to sign the Capacity Contract and/or the annex A, or his liability as under chapter 13.
385. The possible actions for ELIA consecutive to the non-payment of the financial penalty referred to in § 384 are described in chapter 11.
386. The Capacity Contract describes, among other things, the modalities of the procedure of suspension of payment of the Capacity Remuneration of the Capacity Provider, subject of a procedure based on European or national law, according to which the aid can be reclaimed, as indicated in article 7undecies, § 11, of the Electricity Act.
387. At the latest 85 Working Days after the Transaction Validation Date ELIA provides a report to the CREG that contains a complete and actualized list of the signed Capacity Contracts that concern a Transaction on the Primary Market. As for the Transactions on the Secondary Market, ELIA provides each trimester a report to the CREG for the signed Capacity Contracts. These reports contain at least the following data: year of the Auction, start and end of the Delivery Period, name of the Delivery Point, CMU ID, CMU type, CMU status, technology type, derated capacity (MW) for each Delivery Period, price (EUR/MW/year), energy retention factor. Next, ELIA completes this report for each CMU and includes the Pre-delivery Penalties, Unavailability Penalties, any reductions of the Capacity and the Payback Obligation. ELIA keeps this report up to date and provides the most recent version of this report at the request of the CREG.

8 PRE-DELIVERY CONTROL

8.1 INTRODUCTION

The purpose of the pre-delivery control is to ensure that a CMU's Total Contracted Capacity becomes effectively available (if the Total Contracted Capacity is associated to an Additional or Virtual CMU) or remains effectively available (if the Total Contracted Capacity is associated to an Existing CMU) as of the start of the Transaction Period.

Pre-delivery controls are performed by ELIA during the Pre-delivery Period (defined in section 8.2), based on quarter-hourly measurement data (when available), on information provided by the Capacity Provider through its quarterly reports or on updated prequalification results. Pre-delivery control abides with the modalities described in section 8.3 and follows a four-step process that may vary in function of the status of the CMU (existing, additional or virtual).

As a first step, ELIA determines the Capacity Provider's Pre-delivery Obligation (section 8.4.1). It is then compared to the Pre-delivery Measured Power (when quarter-hourly measurement data is available), to the information shared with ELIA through the quarterly reports (section 8.3.4) or to updated prequalification results which indicate a Missing Volume (section 8.4.2). A Missing Volume leads to financial penalties (section 8.4.3.1) and may also impact the initial Transaction Period(s) (section 8.4.3.3). Finally, the Pre-delivery control results are communicated to the Capacity Provider (section 8.4.4).

8.2 PRE-DELIVERY PERIOD DEFINITION

- 388. In the context of the pre-delivery control, Y represents the Delivery Period concerned.
- 389. A Pre-delivery Period always relates to one Delivery Period. A Pre-Delivery Period starts with the publication of the Y-4 Auction results for the corresponding Delivery Period and ends with the start of the Delivery Period.
- 390. There are as many Pre-delivery Periods as there are Delivery Periods that contain the start date of a Transaction Period.
- 391. Taking into consideration the possible impact of a pre-delivery control on an initial Transaction Period (see section 8.4.3.3), one Additional CMU may end up in more than one Pre-delivery Period. As a consequence, it becomes subject to more than one pre-delivery control after the first moment of control and may face related penalties each time (up to the penalty cap detailed in section 8.4.3.2). To illustrate this principle, an example is provided in annex 18.2.2.
- 392. Secondary Market Capacity that has been bought by a CMU is subject to all control modalities that still remain for the Pre-delivery Period linked to the Delivery Period concerned, taking into account the timing of these control modalities.

8.3 PRE-DELIVERY CONTROL MODALITIES

8.3.1 Moments of control

- 393. Per Pre-delivery Period, ELIA performs its pre-delivery control for each CMU separately or on a combination of CMUs in case of Linked Capacities at the moments of control (hereafter $t_{control}$). The number of moments of control as well as when they take place vary depending

on the Auction in which the CMU or combination of CMUs in case of Linked Capacities was first contracted:

- For CMUs that were first contracted in the Y-4 Auction linked to the Delivery Period Y, $t_{control\ 1}$ takes place on August 31 Y-2 and $t_{control\ 2}$ takes place on October 31 Y;
- For CMUs that were first contracted in the Y-2 Auction linked to the Delivery Period Y, $t_{control\ 1}$ takes place on August 31 Y-1 and $t_{control\ 2}$ takes place on October 31 Y;
- For CMUs that were first contracted in the Y-1 Auction linked to the Delivery Period Y there is only the $t_{control\ 2}$ that takes place on October 31 Y.

A CMU or a Linked Capacity that has a multi-year Capacity Contract is only subject to moments of control for the first Delivery Period of the Transaction Period (i.e. the first year of delivery of the multi-year Capacity Contract). An example of determination of moments of control is given in annex 18.2.1.

8.3.2 Total Contracted Capacity

394. ELIA verifies, through the pre-delivery control, whether the Total Contracted Capacity of a CMU remains (if the Total Contracted Capacity is associated to an Existing CMU) or becomes (if the Total Contracted Capacity is associated to an Additional CMU or a Virtual CMU) effectively available as from start of the corresponding Delivery Period.
395. The Total Contracted Capacity of a CMU subject to a pre-delivery control for a Delivery Period (hereafter *Total Contracted Capacity (CMU, DP)*) corresponds to the highest simultaneous sum of the CMU's Contracted Capacities that respects the following conditions:
- the corresponding Transaction Period covers partially or totally the Delivery Period; and
 - The corresponding Transaction Period has not started at the moment of the pre-delivery control ($t_{control\ 1}$ or $t_{control\ 2}$).
396. Transactions resulting from both the Primary Market and from the Secondary Market are considered in the determination of a CMU's Total Contracted Capacity.

Transactions on the Secondary Market are only considered if they have been approved prior to the moment of control as per section 10.5.4.1.

397. To illustrate the determination of a CMU's Total Contracted Capacity, several examples are given in annex 18.2.1.

8.3.3 Permit reports

398. For Existing CMUs the Capacity Provider sends a permit report to ELIA through the CRM IT Interface during the two weeks preceding $t_{control\ 1}$.
399. One permit report covers one CMU or a combination of CMUs in case of Linked Capacities.
400. The permit report is aimed at enabling ELIA to verify whether the Capacity Provider has been granted, in the last administrative instance, all relevant permits required for the Delivery Period(s) part of the Transaction Period.
401. In the event that the Capacity Provider holds all relevant permits required, he includes a copy of said permits in the permit report.

402. In the event that the Capacity Provider does not hold all the relevant permits required, he indicates in the permit report the permits that he does not have and includes a mitigation plan to cope with this situation, as well as a copy of the permits that he does hold.
403. A permit report template is available in annex 18.2.4.
404. In the event that ELIA did not receive the permit report by the deadline defined in § 398, ELIA sends a reminder to the Capacity Provider via the CRM IT Interface on the expiry date of the concerned deadline. The Capacity Provider then provides the permit report to ELIA within a period of seven Working Days starting from the aforementioned reminder.

8.3.4 Quarterly reports

405. For both Additional CMUs and Virtual CMUs, the Capacity Provider sends quarterly reports to ELIA through the CRM IT Interface, only within the following periods of time and throughout the entire Pre-delivery Period:
- From January 30 to February 14;
 - From April 30 to May 14;
 - From July 30 to August 14;
 - From October 30 to November 14.
406. The first quarterly report is sent by the Capacity Provider in the second period following the first Transaction Validation Date of one of the Transactions taken into account in the determination of the Total Contracted Capacity in accordance with § 395.
407. One quarterly report covers one CMU or several CMUs in case of Linked Capacities and applies to the Total Contracted Capacity as determined per § 395. A quarterly report contains a single document which evolves over time. Each time it is provided to ELIA, it includes at least the following information:
- an update of the project execution plan (including the update of the dates for the key milestones provided as part of the Prequalification File (see annex 18.1.4.2). The update of the project execution plan respects the same requirements as the original project execution plan itself, in accordance with section 5.2.3;
 - an identification of the delay(s) – if any – along with a mitigation plan containing the detailed measures to cope with this(these) delay(s);
 - an identification of the residual delay, if any, within the meaning of § 412;
 - when relevant, a follow-up of the Infrastructure Works that could influence the on-going project realization and timing as identified in the project execution plan communicated in the Prequalification File (see annex 18.1.4), supported by a dated written confirmation from the concerned infrastructure operator, if other than ELIA (Fluxys, DSOs or the Adjacent TSO).

The quarterly report includes all project updates that occurred between the last quarterly report sent to ELIA and a maximum of five Working Days before the report submission date.

408. The quarterly report also enables ELIA to verify whether the Capacity Provider has been granted, in the last administrative instance, all relevant permits required for the Delivery Period(s) part of the Transaction Period.

ELIA considers the Permitting Milestone reached when the Capacity Provider can demonstrate that, as per the definition in chapter 3, all relevant permits have been delivered in the last administrative instance, are definitive, enforceable and cannot be disputed anymore.

409. In the event that a Capacity Provider holds all relevant permits required, he includes a copy of said permits, along with the claim of reaching its Permitting Milestone, at any time during the Pre-delivery Period via the CRM IT Interface.
410. In the event that the Capacity Provider does not hold all the relevant permits required, he indicates in the quarterly report the permits that he does not have and includes a mitigation plan to cope with this situation, as well as a copy of the permits that he does hold.
411. A delay is identified by the Capacity Provider in his quarterly report when all the following conditions are met:
 - it concerns a Project Works or an Infrastructure Works; and
 - it concerns a volume higher or equal to 1 MW derated; and
 - it leads to an Unavailable Capacity for at least two months, starting from the first day of the Delivery Period.
412. If a Capacity Provider aims to resolve a delay as described in § 411 via a Secondary Market transaction but has not yet concluded said transaction, he includes in its mitigation plan as explained in § 407, second bullet point, a declaration of both the Buyer and the Seller of the Secondary Market transaction that they reached a bilateral agreement for an upcoming Secondary Market transaction.
413. A residual delay is any delay in the project execution plan, with the exception of any delay linked to Infrastructure Works, for which no mitigation plan has been presented by the Capacity Provider, or which the mitigation plan is not, according to ELIA, able to resolve.
414. When the Capacity Provider declares a residual delay in its quarterly report, he also declares to which Transaction(s) (among the transactions used to determine the Total Contracted Capacity as per § 395) it is related to.
415. Based on the elements provided by the Capacity Provider in his quarterly reports, ELIA may request any relevant additional information, explanation or details from the Capacity Provider to best assess a CMU's situation. Such request is sent by ELIA via the CRM IT Interface within twenty Working Days following the submission deadline of the quarterly report and is handled by the Capacity Provider within a period of twenty Working Days starting from ELIA's request. In the event that the Capacity Provider does not respond to ELIA's request, ELIA will consider, at one of the moments of control $t_{control\ 1}$ or $t_{control\ 2}$, that the Missing Volume (as defined in sections 8.4.2.2 and 8.4.2.3) is equal to the Pre-delivery Obligation.
416. In the event that ELIA did not receive a quarterly report within the time period defined in § 405, ELIA sends a reminder to the Capacity Provider via the CRM IT Interface on the expiry date of the concerned deadline. The Capacity Provider then sends the quarterly report to ELIA within a period of seven Working Days from the aforementioned reminder.
417. If the Capacity Provider fails to send the quarterly report at the end of the periods mentioned in the previous §, ELIA applies to the Capacity Provider, per Working Day of delay after the expiration of the last day of the deadline mentioned in the previous §, a financial penalty equal to:

$$100 \left(\frac{\text{€}}{\text{MW}} \right) \times \text{Total Contracted Capacity (MW)}$$

418. The procedure described in §§ 416 and 417 can only be applied two times for the same CMU or for a combination of CMUs in case of Linked Capacities. After these two applications, if the Capacity Provider does not send its quarterly report within the deadlines indicated in § 405, ELIA applies to the Capacity Provider, per Working Day of delay after expiration of the deadline mentioned in § 405, a financial penalty equal to:

$$100 \left(\frac{\text{€}}{\text{MW}} \right) \times \text{Total Contracted Capacity (MW)}$$

419. ELIA duly notifies the Capacity Provider when any of the penalties mentioned in §§ 417 and 418 are applied.
420. Penalties that are determined following §§ 417 and 418 are to be paid at the first moment of control following the deadline for which the quarterly report was due. They are included in the pre-delivery activity report as per section 8.4.4. In the event that there is no longer a remaining moment of control, the penalties are to be paid within 10 Working Days after the submission deadline of the late quarterly report.
421. If the CRM Actor wishes to contest the penalties referred to in §§ 417 or 418, it uses one of the methods of appeal described in chapter 14.
422. The minimum elements that need to be included in a quarterly report can be found in annex 18.2.3. ELIA verifies the completeness of the quarterly reports according to section 8.4.2.2.

8.4 PRE-DELIVERY CONTROL PROCESS

8.4.1 Step 1 - Pre-delivery Obligation

8.4.1.1 Pre-delivery Obligation on Existing CMUs and Additional CMUs

423. For both Existing CMUs and Additional CMUs, the determination of the Pre-delivery Obligation depends on whether the CMU is an Energy Constrained CMU or not.
424. For Existing CMUs and Additional CMUs at the moment of control $t_{control\ 1}$ and the moment of control $t_{control\ 2}$, the Pre-delivery Obligation corresponds to:
- the Total Contracted Capacity as determined per § 395 if the CMU is a Non-energy Constrained CMU; or
 - the Total Contracted Capacity as determined per § 395 divided by the Derating Factor if the CMU is an Energy Constrained CMU. This is represented by the formula below:

$$\text{Pre-delivery Obligation} = \frac{\text{Total Contracted Capacity (CMU, DP)}}{\text{Derating Factor (CMU, t)}}$$

where:

- *Derating Factor (CMU, t)* is the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the *Total Contracted Capacity (CMU, DP)* over the Delivery Period at the moment of ($t_{control\ 1}$ or $t_{control\ 2}$) calculated in accordance with the definition in chapter 3;
- *Total Contracted Capacity (CMU, DP)* is the Total Contracted Capacity over the Delivery Period.

8.4.1.2 Pre-delivery Obligation for a Virtual CMU

425. For a Virtual CMU, the Pre-delivery Obligation evolves according to the moment of control ($t_{control\ 1}$ or $t_{control\ 2}$):
- at moment of control $t_{control\ 1}$, the Pre-delivery Obligation is equal to seventy-five percent of the Total Contracted Capacity of the Virtual CMU; and
 - at moment of control $t_{control\ 2}$, the Pre-delivery Obligation is equal to one hundred percent of the Total Contracted Capacity of the Virtual CMU.

8.4.2 Step 2 - Missing Volume

8.4.2.1 Missing Volume on Existing CMUs

426. To determine a Missing Volume on Existing CMUs, ELIA follows a three-step process: at first, ELIA calculates the Pre-delivery Measured Power of each Delivery Point part of the Existing CMU (section 8.4.2.1.1). Then, ELIA sums each Delivery Point's Pre-delivery Measured Power to determine the CMU Pre-delivery Measured Power (section 8.4.2.1.2). Finally, ELIA determines the Missing Volume (section 8.4.2.1.3).
427. Notwithstanding the rules listed in sections 8.4.2.1.1 to 8.4.2.1.3, in the event that a Capacity Provider does not send the permit report within the time period referred to in § 404, ELIA will consider the Missing Volume of the CMU of this Capacity Provider as equal to the Pre-delivery Obligation.
428. Notwithstanding the rules listed in sections 8.4.2.1.1 to 8.4.2.1.3, ELIA will consider the Missing Volume of the CMU of this Capacity Provider as equal to the Pre-delivery Obligation, if the permit report referred to in § 399 shows that the Capacity Provider was not granted all the relevant permits required in the last administrative instance for the Delivery Period(s) part of the Transaction Period.

By way of derogation from the above, the Missing Volume is only determined based on the rules listed in sections 8.4.2.1.1 to 8.4.2.1.3 if:

- The Capacity Provider shows in its mitigation plan referred to in § 399 that at the moment of control $t_{control\ 1}$, it could not yet legally submit an application to the competent authority with a view to the granting of the relevant permits required; or
- The Capacity Provider shows in its mitigation plan referred to in § 398 that at the moment of control $t_{control\ 1}$, it could legally submit an application to the competent authority with a view to the granting of the relevant permits required, but having submitted it with all due diligence, it was not legally able to have them granted given the time required by the competent authority to process its application;
- The Capacity Provider has provided a mitigation plan accepted by ELIA in support of its permit report.

8.4.2.1.1 Delivery Point Pre-Delivery Measured Power

429. The Pre-delivery Measured Power of a Delivery Point results from the analysis of the quarter-hourly measurements of the Delivery Point. Therefore, to determine it, ELIA uses one of the two following methods: the use of historical data (method 1) or the organization of a pre-delivery test (method 2).

430. If the Nominal Reference Power of the CMU has been determined following either methods in section 5.4.1.1.1.1 in the framework of any Prequalification process since the last publication of the CRM Functioning Rules, the results of such volumes determination are valid as Pre-delivery Measured Power as well and no further measurements are needed. This includes the volumes determination to evolve from an Additional CMU to Existing CMU as per section 8.6.1.
431. By way of derogation of the above, if the results from previous volumes determination are available but the Capacity Provider does not want to make use of these, he duly notifies ELIA by e-mail at the latest one month before the moment of control. In that case, the volume is determined anew following the method described in 8.4.2.1.1.1 and 8.4.2.1.1.2.

8.4.2.1.1.1 Method 1 – Use of historical data

432. The determination of the Pre-delivery Measured Power based on historical data follows the same modalities as described in section 5.4.1.1.1.1.1.
433. When the use of this method is impossible to determine the Pre-delivery Measured Power of a Delivery Point (e.g.: in absence of historical quarter-hourly measurements), ELIA applies method 2 as per section 8.4.2.1.1.2.

8.4.2.1.1.2 Method 2 – Organization of a pre-delivery test

434. The determination of the Pre-delivery Measured Power based on a pre-delivery test follows the same modalities as described in section 5.4.1.1.1.1.2.

8.4.2.1.2 CMU Pre-delivery Measured Power

435. The Pre-delivery Measured Power of the CMU corresponds to the sum of the Pre-Delivery Measured Power of each Delivery Point, as illustrated in the formula below:

$$PreDelivery\ Measured\ Power_{CMU} = \sum_{i=1}^n PreDelivery\ Measured\ Power_i$$

Where:

- n is the number of Delivery Points of the CMU.
436. In case of DSO-connected Delivery Points or CDS-connected Delivery Points when the CDS is connected to the DSO Grid, ELIA communicates to the DSO at the latest one month before the moment of control the Delivery Points for which the Pre-delivery Measured Power needs to be determined.

The DSO provides ELIA with the result of the Pre-delivery Measured Power determination for these Delivery Points at the latest ten Working Days after the moment of control.

In case of a Foreign CMU, the concerned Adjacent Transmission System Operator provides ELIA with the Measured Power data for the calculation of the Pre-delivery Measured Power at the latest ten Working Days after the moment of control.

8.4.2.1.3 Determination of the Missing Volume

437. The pre-delivery Missing Volume corresponds to the maximum between zero and the difference between the Pre-delivery Obligation determined per section 8.4.1 and the Pre-Delivery Measured Power of the CMU determined in section 8.4.2.1.2, and is represented by the following formula:

$$Pre - Delivery\ Missing\ Volume = \text{Max}(0 ; (PreDelivery\ Obligation_{CMU} - PreDelivery\ Measured\ Power_{CMU}))$$

8.4.2.2 Missing Volume on Additional CMUs

438. At the moment of control $t_{control\ 1}$, ELIA determines the pre-delivery Missing Volume based on the last quarterly report to be sent by the Capacity Provider in accordance with the deadlines defined in § 405. A Missing Volume represents the part of the Total Contracted Capacity determined as per § 395 for which a residual delay (as defined per § 412) is identified by the Capacity Provider.
439. In order to determine any potential Missing Volume as per § 438, ELIA also performs a more thorough compliance check of the quarterly report at the moment of control. To that extent, the quarterly report must at least include the elements that are listed in annex 18.2.3 and be duly justified.

In the absence of any of the elements listed in annex 18.2.3 ELIA will follow the procedure in § 415 to request additional information.

440. In the event that the Capacity Provider fails to send the quarterly report at the moment of control $t_{control\ 1}$, ELIA will consider the Missing Volume of this CMU as equal to the Pre-delivery Obligation, after having sent a reminder as per § 416 to the Capacity Provider explicitly mentioning the consequences of failing to send the concerned quarterly report.
441. When a Missing Volume is determined based on the absence of the quarterly report, a financial penalty following §§ 416 to 418 for that particular quarterly report is not applied.
442. At the moment of control $t_{control\ 2}$, ELIA uses the available quarter-hourly measurements – upon the condition that they are gathered from validated metering devices (as described in annex 18.1.1) – to determine the pre-delivery Missing Volume. This approach allows Additional CMU to prove the availability of a part of their Pre-delivery Obligation, even though the whole CMU has not finished the Prequalification Process yet. The methodology followed is identical to the one applicable to Existing CMUs (as per section 8.4.2.1).
443. In absence of any validated metering devices, the Missing Volume corresponds to the Pre-delivery Obligation of the Additional CMU.

8.4.2.3 Missing Volume on Virtual CMUs

444. The pre-delivery Missing Volume of a Virtual CMU corresponds to the maximum between zero and the difference between the Pre-delivery Obligation (as determined per section 8.4.1.2), and the total amount of the initial Contracted Capacity (on the VCMU) that has been fully prequalified and transferred to one (or more) Existing CMU(s) (following the process of section 8.6.2) prior to the moment of control.

In this way, at the moment of control the Missing Volume corresponds to:

$$\text{Pre-delivery Missing Volume} = \text{Max} (0 ; \text{Predelivery Obligation} - \text{Contracted Capacity(ies)}_{\text{Existing CMUs}})$$

445. It is the Capacity Provider's responsibility to ensure that, when requesting ELIA to validate the change from a Virtual CMU to one (or more) Existing CMU(s), ELIA is given sufficient time for such validation in order for it to be effective at the time of control. ELIA cannot be held liable in case, the validation request having been submitted late, the change has not become effective before the moments of control.
446. From the moment an Existing CMU has been prequalified and linked to this Virtual CMU (as per section 8.6.2), the concerned CMU is subject to the Pre-delivery control of an Existing CMU. This control is performed by ELIA at the moments of control, at the same time as the Pre-delivery control of the Virtual CMU.

8.4.2.4 Missing Volume on Energy Constrained CMUs

447. The determination of the Missing Volume for Energy Constrained CMUs equals the Missing Volume that is calculated in section 8.4.2.1 to 8.4.2.3 multiplied with the relevant Derating Factor, where the latter is equal to the one used in § 424, second bullet point.

8.4.3 Step 3 - Pre-delivery control penalties

8.4.3.1 Financial penalties

448. When Missing Volume is determined for an Existing CMU (as per section 8.4.2.1), ELIA applies during each moment of control ($t_{control\ 1}$ and $t_{control\ 2}$), the following financial penalty:

$$Financial\ penalty\ (in\ EUR) = \alpha \left(\frac{\text{€}}{MW} \right) \times Missing\ Volume(MW)$$

449. During the moment of control $t_{control\ 1}$ the parameter α used in the formula detailed in the previous paragraph represents an amount fixed based on the following situations:

- It is equal to 3,000€/MW if the Capacity Provider has not been granted the relevant permits required in a last administrative instance covering the Delivery Period(s) part of the Transaction Period, but shows in its mitigation plan that it has made all reasonable efforts to obtain these permits;
- It is equal to 6,250 €/MW if:
 - The Capacity Provider shows in its permit report that it was granted, in a last administrative instance, all relevant permits required for the Transaction Period;
 - The Capacity Provider was not granted the relevant permits required in a last administrative instance covering the Delivery Period(s) part of the Transaction Period but, due to the justifications provided in its mitigation plan as referred to in § 428, alinea 2, the Missing Volume is not considered as equal to the Pre-delivery Obligation but is determined pursuant to sections 8.4.2.1.1 to 8.4.2.1.3;
- it is equal to 10,000 €/MW if the Capacity Provider:
 - has not sent its permit report within the time period required in accordance with § 404;
 - has not been granted the relevant permits required in a last administrative instance and does not show in the mitigation plan that it falls under one of the situations referred to above enabling a lesser or no penalty to be applied to it.

450. During the moment of control $t_{control\ 2}$, the parameter α used in the formula detailed in § 448 is equal to 6,250 €/MW.

451. When Missing Volume is determined on an Additional CMU at the moment of control $t_{control\ 1}$, ELIA applies the following financial penalty:

$$Financial\ penalty\ (in\ EUR) = \frac{1}{2} \times \beta \left(\frac{\text{€}}{MW} \right) \times Missing\ Volume(MW)$$

452. When Missing Volume is determined on an Additional CMU at the moment of control $t_{control\ 2}$, ELIA applies the following financial penalty:

$$Financial\ penalty\ (in\ EUR) = \beta \left(\frac{\text{€}}{MW} \right) \times Missing\ Volume(MW)$$

453. The parameter β used in formulas detailed in §§ 451 and 452, represents an amount that depends on the type of CMU in question and the information provided in the quarterly reports:

- It is equal to 20,000 €/MW for a New Build CMU if the Permitting Milestone is relevant for the concerned project and not reached yet at the moment of control.
- It is equal to 15,000 €/MW for a New Build CMU if the Permitting Milestone is:
 - either relevant for the concerned project and already reached by the Capacity Provider at the moment of control;
 - or not relevant for the concerned project;
- It is equal to 10,000 €/MW for a New Build CMU if the Permitting Milestone is relevant for the concerned project and has not yet been reached at the moment of control, but the Capacity Provider shows ELIA that it has made all reasonable efforts to reach the Permitting Milestone;
- It is equal to 15,000 €/MW for any Additional CMU that is not a New Build CMU if the Permitting Milestone is relevant for the concerned project and not reached yet at the moment of control;
- It is equal to 11,000 €/MW for any Additional CMU that is not a New Build CMU if the Permitting Milestone is:
 - either relevant for the concerned project and already reached by the Capacity Provider at the moment of control;
 - or not relevant for the concerned project;
- It is equal to 7,500 €/MW, for any Additional CMU that is not a New Build CMU if the Permitting Milestone is relevant for the concerned project and not reached yet at the moment of control, but the Capacity Provider shows ELIA that all reasonable efforts have been made to reach the Permitting Milestone.

454. When Missing Volume is determined on a Virtual CMU, ELIA applies during each moment of control ($t_{control\ 1}$ and $t_{control\ 2}$), the following financial penalty:

$$Financial\ penalty\ (in\ EUR) = 20,000 \left(\frac{€}{MW} \right) \times Missing\ Volume(MW)$$

8.4.3.2 Penalty cap

455. The financial penalty of an Additional CMU at the moment of control $t_{control\ 1}$ can be applied by ELIA for a maximum of three consecutive times on the same Total Contracted Capacity of the CMU. The possibilities for contract termination in this context are detailed in the Capacity Contract.

8.4.3.3 Reduction of Transaction Period of Total Contracted Capacity(ies)

456. In addition to the financial penalty calculated as per section 8.4.3.1, a Missing Volume may also impact the Transaction Period of a Contracted Capacity(ies).

457. If a Missing Volume is identified on an Additional CMU at the moment of control $t_{control\ 1}$, the Contracted Capacity of the initial Transaction(s) is(are) reduced by the Missing Volume for the entire duration of the first Delivery Period covered by this(these) Transaction(s). In that case the Transaction Period is reduced as well.

The Transaction(s) subject to this reduction of Transaction Period is(are) identified by the Capacity Provider as per § 414.

The Capacity Contract is therefore adapted accordingly.

458. If a Missing Volume is identified on a Virtual CMU at the moment of control $t_{control\ 1}$, the Total Contracted Capacity is reduced by the Missing Volume for the entire duration of the first Delivery Period covered by this Transaction. This reduction is applied to all Transactions related to the Delivery Period that are still associated to the Virtual CMU at the moment of control.

The Transaction(s) subject to this reduction of Transaction Period is(are) identified by the Capacity Provider as per § 414.

The Capacity Contract is therefore adapted accordingly.

459. If, due to the reductions mentioned above, the Total Contracted Capacity of the (remaining) Transaction Period equals 0 MW, the Capacity contract is terminated.
460. The Transaction Period of a Contracted Capacity(ies) is (are) not impacted if a Missing Volume (on an Existing CMU, Additional CMU or Virtual CMU) is identified during the moment of control $t_{control\ 2}$.

8.4.4 Step 4 - Pre-delivery activity reports issuance and contestation

8.4.4.1 Pre-delivery activity report issuance

461. A pre-delivery activity report is established by ELIA after each moment of control and contains at least the following information, per CMU:

- The Pre-delivery Obligation;
- The financial penalties (if any) caused by tardy submission of quarterly reports, determined following the modalities of §§ 416 to 418;
- The Missing Volume (if any), including the intermediate calculations applied by ELIA during the Missing Volume determination process as explained in section 8.4.2;
- The financial and / or contractual penalties (if any), determined following the modalities of sections 8.4.3.1, and/or 8.4.3.3;
- The information established in section 8.5.2.

462. The pre-delivery activity report is sent via the CRM IT Interface to the Capacity Provider within the timeframe set in the Capacity Contract.

463. After each moment of control, ELIA also sends a report to the CREG, at the latest on the 15th of month M+2, containing all the Missing Volumes determined, the CMUs concerned, as well as all relevant information, in particular the reasons for the determination of the Missing Volume. An anonymized copy of this report is sent to the Federal Public Service Economy.

ELIA sends the CREG within five Working Days following a moment of control a table that includes the list of controlled CMUs, the control results and the actions taken.

ELIA equally immediately informs the CREG and the Federal Public Service Economy in case of a significant problem expounded in the quarterly reports as per section 8.3.4.

8.4.4.2 Contestation

464. The pre-delivery control results are deemed final if no contestation is raised by the Capacity Provider within twenty Working Days as from the pre-delivery activity report notification date.
465. In case of contestation, the Capacity Provider notifies it to ELIA through the CRM IT Interface. Any contestation is supported by a detailed justification. In such a case, the Capacity Provider and ELIA enter into negotiations in order to reach an amicable agreement within sixty Working Days as of the date of notification of contestation by the Capacity Provider. ELIA and the Capacity Provider may, if necessary, request additional information from each other on the parameters in the pre-delivery activity report.

In case a partial or total amicable agreement is reached between the parties within sixty Working Days, this agreement gives rise, where applicable, to a credit note for the amount in the agreement in accordance with the Capacity Contract.

If within sixty Working Days no partial or total agreement is reached, the disputed amount or part of the disputed amount of the penalties is the subject of a separate credit note in accordance with the Capacity Contract and, at the same time, both parties continue to seek an amicable solution within the sixty Working Days following the end of the first period of sixty Working Days.

In case an amicable agreement is reached between the parties in the second sixty Working Days, this agreement will give rise, where applicable, to a corrective invoice related to the amount that was the subject of the separate credit note, in accordance with the Capacity Contract.

If within sixty Working Days such agreement has still not been reached, the parties commence the litigation procedure in accordance with chapter 14.

466. Consecutive to this contestation and depending on its content, the organization of an additional pre-delivery control may be required²⁰. Such additional control is agreed between ELIA and the Capacity Provider and follows the rules of the second method (organization of a pre-delivery test, section 8.4.2.1.1.2), based on a proposed test date that is set no later than ten Working Days as from the contestation notification date. For Indirect Foreign Capacity providers, such additional control is agreed between ELIA, the concerned Foreign TSO and the Indirect Foreign Capacity Provider.

If no additional pre-delivery control is required, ELIA updates (if relevant) the pre-delivery activity report within twenty Working Days from the contestation date and sends it to the Capacity Provider.

If an additional pre-delivery control is agreed upon as per this paragraph, the updated pre-delivery control results – if more favorable to the Capacity Provider than the initial ones – are considered final and notified to the Capacity Provider within forty Working Days as from the initial pre-delivery report notification date. If the updated pre-delivery control results are less favorable than the initial ones, the latter remain valid. The final results of the additional Pre-delivery control are sent to the Capacity Provider via the pre-delivery activity report.

²⁰ The organization of a new pre-delivery control is only accepted if a Pre-delivery Measured Power has been calculated by ELIA at the second moment of control.

467. If he wishes to contest the final results of the additional pre-delivery control, the Capacity Provider follows the dispute resolution mechanism set out in chapter 14.

8.5 DELAYS ON INFRASTRUCTURE WORK

468. This section describes the fallback procedure applicable when ELIA (or the relevant system operator, via the Capacity Provider's project execution plan), identifies a delay in Infrastructure Work impacting already contracted Capacities.

8.5.1 Trigger

469. The procedure described in section 8.5.2 is only applicable to delays on Infrastructure Works, upon the following conditions:
- the need to realize Infrastructure Works causing the delay was identified during the Prequalification Process as part of the project execution plan and the technical agreement(s); and
 - the delay influences the possible start of delivery of capacity for an already Contracted Capacity(ies) by more than two months; and
 - the CMU(s) associated to the impacted Contracted Capacity(ies) is (are) Additional CMU(s).
470. If the delay has an impact of two months or less on the possible start of the delivery of capacity for one or more Capacity(ies) already contracted, the Capacity Provider may request the application of the operational procedure in order to create a shift of one year for the Delivery Period(s) covered by the Capacity Contract in accordance with § 474, second bullet point.

8.5.2 Applicable operational procedure

471. A delay on an Infrastructure Work can occur between the signing of a Capacity Contract (after the publication of the Auction results) and the start of the Delivery Period the related Capacity has been contracted for.
472. As soon as a delay in Infrastructure Work is identified by the system operator concerned, it notifies the Capacity Provider(s) concerned by the delay. It provides the Capacity Provider(s) concerned with any additional information requested by the Capacity Provider(s).

The Capacity Provider(s) keeps ELIA informed with regards to the impact of the aforementioned delays on the project execution plan via the quarterly report as per section 8.3.4.

Based on the information provided by the Capacity Provider(s), ELIA may request additional information from the Capacity Provider(s) and/or, if applicable, the concerned system operator.

473. The system operator concerned keeps the Capacity Provider(s) concerned duly informed about developments with regard to the delay.

The Capacity Provider(s) duly informs ELIA about developments with regards to the delay via the quarterly reports as per section 8.3.4.

474. If a delay on Infrastructure Work is identified or confirmed at the moment of control $t_{control 1}$, the following procedure applies:

- ELIA determines the impact of this delay on the initial Contracted Capacity;
 - ELIA adapts the impacted Capacity Contract(s) and postpones by one year the Delivery Period(s) covered by the Capacity Contract. The last Delivery Period covered by the Contract is correspondingly postponed by one year;
 - In its report as per § 463 ELIA indicates the identified delays, the reasons for it and the impact of this delay on the initially Contracted Capacity.
475. If a delay on Infrastructure Work is identified after the moment of control $t_{control\ 1}$ and confirmed three months after its identification and no later than the moment of control $t_{control\ 2}$:
- ELIA determines the impact of this delay on the initially Contracted Capacity;
 - ELIA adapts the impacted Capacity Contract(s) and postpones by one year the Delivery Period(s) covered by the Capacity Contract. The last Delivery Period covered by the Contract is correspondingly postponed by one year;
 - ELIA mentions in a report to the CREG and to the General Direction of Federal Public Service Economy the determined delays, the reasons for it and the impact of this delay on the initially Contracted Capacity.
476. If the delay on the Infrastructure Work is identified before finalisation by ELIA of the report referred to in article 7undecies, § 3, al. 1, of the Electricity Act, ELIA takes into account, in this report, the unavailability for the Delivery Period concerned of the corresponding volume identified in §§ 474 and 475 above.

8.5.3 Participation to Secondary Market

477. Independent of the postponement of the Delivery Period(s) covered by the Capacity Contract, a Capacity Provider to which a delay in Infrastructure Work applies is allowed to participate to the Secondary Market from the moment its Contracted Capacity(ies) become “existing” as per procedure described in section 8.6.1 and provided that the Infrastructure Works concerned are completed.

8.5.4 Penalties

478. A delay in Infrastructure Work does not give rise to the application of pre-delivery penalties.

8.6 PROCESS TO CHANGE FROM ADDITIONAL CMU OR VIRTUAL CMU TO EXISTING CMU

8.6.1 From Additional CMU to Existing CMU

479. To evolve from Additional CMU to Existing CMU, the Capacity Provider finalizes the Prequalification Process described in chapter 5. Access to the Prequalification File related to the Additional CMU is made via the CRM IT interface.
480. As Existing Delivery Points part of an Additional CMU are considered as already complete and do not require additional information, the Capacity Provider is only required to complete the required information as per section 5.2.3.1 for the Additional Delivery Points.

481. In order to evolve from Additional CMU to Existing CMU in time (before the moment of control $t_{control\ 2}$), the Capacity Provider submits an amended Prequalification File to ELIA via the CRM IT Interface:

- Either by the Prequalification File submission deadline referred to in article 7undecies, § 8, last alinea, of the Electricity Act (first case); or
- Or at the latest twenty Working Days preceding the moment of control $t_{control\ 2}$ (second case).

482. ELIA reviews the modifications of the Prequalification File submitted within the time windows as per § 481:

- In the first case, as per the timings foreseen in section 5.3.2;
- In the second case, at the latest, fifteen Working Days preceding the moment of control $t_{control\ 2}$.

483. In the second case, the Capacity Provider must finalize his Prequalification File at the latest ten Working Days preceding the moment of control $t_{control\ 2}$.

484. If the Capacity Provider does not manage to submit an amended Prequalification File respecting the deadlines set out in § 481, the Capacity Provider submits as soon as possible an amended Prequalification File to ELIA via the CRM IT Interface any time after the moment of control $t_{control\ 2}$ to evolve from Additional CMU to Existing CMU.

In such case, ELIA reviews the modifications of the submitted Prequalification File and notifies the Capacity Provider within fifteen Working Days starting from the Prequalification File submission date.

The Capacity Provider must then finalize his Prequalification File at the latest ten Working Days after notification of ELIA's review.

If an Additional CMU does not evolve into an Existing CMU by the moment of control $t_{control\ 2}$, then the Missing Volume will, partly or fully, correspond to the Pre-delivery Obligation of the Additional CMU as per section 8.4.1.1. This Missing Volume is subject to the Pre-delivery penalties in accordance with section 8.4.3.

485. In parallel to the compliance check of the Prequalification File, ELIA starts the Nominal Reference Power determination process, in accordance with section 5.4.1.

486. The Nominal Reference Power of each Delivery Point that becomes Existing, and the Nominal Reference Power of the CMU, are determined in accordance with the section 5.4.1.1.1.1. Historical data (including commissioning data) can be used provided that the concerned Capacity was already delivered an Energization, Interim or Final Operational Notification (EON, ION or FON) in accordance with the relevant legal requirements as detailed in the European Grid Code RfG.

In case the methodology described in section 5.4.1.1.1.1 is used in the process, the following exceptions apply:

- By way of derogation of § 161, the period during which the historical quarter-hourly measurements are used ends at the latest the last Working Day preceding the Working Day during which the determination of the Nominal Reference Power is carried out. In this case the Capacity Provider indicates to ELIA or the concerned DSO or, if applicable, to the Foreign TSO, the last day that is to be considered for the calculation of the Nominal

Reference Power, at the latest twenty Working Days preceding the moment of control $t_{control 2}$;

- For Low Voltage Delivery Groups, the last used data are the most recently validated measurement data available at the moment of the determination of the Nominal Reference Power;
- The organization of a Prequalification test as described in section 5.4.1.1.1.2 cannot be used in the framework of the process to evolve from Additional CMU to Existing CMU in the framework of a contestation of the Nominal Reference Power determined following the use of historical data described in section 5.4.1.1.1.1.

487. A Prequalification test can be organized if the process to evolve from an Additional CMU to an Existing CMU was launched after the Bids submission deadline.

By way of derogation of § 166, the timing of such test date must be set between ELIA and the Capacity Provider in order to finalize the process of evolving from Additional CMU to Existing CMU before $t_{control 2}$.

- In case of a Delivery Point connected to the ELIA Grid or to a CDS itself connected to the ELIA Grid, the Capacity Provider is required to provide ELIA with the identification of the Delivery Point(s) being tested at least two Working Days prior to the test start date;
- In case of a Delivery Point connected to a DSO Grid or to a CDS itself connected to the DSO Grid, the communication of the test date is done through communication channel communicated in advance by the DSO to the Capacity Provider. The Capacity Provider must agree with the DSO on the timings, which should respect the deadline foreseen in § 481;
- In case of a foreign Delivery Point connected to a Foreign TSO, the communication of the test date is done through communication channel communicated in advance by the Foreign TSO to the Indirect Foreign Capacity Provider. The Indirect Foreign Capacity Provider must agree with the Foreign TSO on the timings, which should respect the deadline foreseen in § 481.

If such test is to be realized after $t_{control 2}$, the timing and the starting and ending MTUs of the test must be set between ELIA and the Capacity Provider in order to finalize the process of evolving from Additional CMU to Existing CMU within the timeframe foreseen in § 484.

488. The Secondary Market (Remaining) Eligible Volume is then determined by ELIA following the rules of section 5.4.6.

489. The results of the process to evolve from an Additional CMU to an Existing CMU will be communicated to the Capacity Provider:

- In the first case, in accordance with § 235;
- In the second case, at the latest on October 31 ahead of the moment of control $t_{control 2}$;
- Within thirty Working Days if the amended Prequalification File has been submitted following the procedures set out in § 484.

490. ELIA cannot be held liable in the event that the Capacity Provider does not have the possibility to finalize this process prior to the moment of control $t_{control 2}$.

8.6.2 From Virtual CMU to Existing CMU(s)

491. To evolve from a Virtual CMU to an Existing CMU (or several Existing CMUs) and transfer the corresponding Contracted Capacity(ies), the Capacity Provider prequalifies this (these) Existing CMU(s) during the Pre-delivery Period.

No Additional CMU can be used in this context. The Capacity Provider follows the Standard Prequalification Process (as per chapter 5) to prequalify its Existing CMU(s). The Capacity Provider submits a Prequalification File to ELIA via the CRM IT Interface:

- Either by the Prequalification File submission deadline referred to in article 7undecies, § 8, last alinea, of the Electricity Act (first case);
- Or at the latest twenty Working Days preceding the moment of control $t_{control\ 2}$ (second case).

492. ELIA reviews the Prequalification File submitted within the time windows as per § 491:

- In the first case, as per the timings foreseen in section 5.3.2;
- In the second case, at the latest, fifteen Working Days preceding the moment of control $t_{control\ 2}$.

493. In the second case, the Capacity Provider must finalize his Prequalification File at the latest ten Working Days preceding the moment of control $t_{control\ 2}$.

494. If the Capacity Provider does not manage to transfer the Virtual CMU's Total Contracted Capacity to Existing CMU(s) through submission of Prequalification File(s) respecting the deadlines set out in § 491, the Capacity Provider submits as soon as possible the Prequalification File(s) for its Existing CMU(s) to ELIA via the CRM IT Interface any time after the moment of control $t_{control\ 2}$.

In such case, ELIA reviews the submitted Prequalification File and notifies the Capacity Provider within fifteen Working Days starting from the Prequalification File submission date.

The Capacity Provider must then finalize his Prequalification File within ten Working Days after ELIA's notification.

If a Virtual CMU does not transfer its full or partial Contracted Capacity to an Existing CMU by the moment of control $t_{control\ 2}$, then the Missing Volume will, partly or fully, correspond to the Pre-delivery Obligation of the Virtual CMU as per section 8.4.1.2. This Missing Volume is subject to the Pre-delivery penalties in accordance with section 8.4.3.

495. The link between the newly prequalified Existing CMU and the Virtual CMU is notified by the Capacity Provider during the Prequalification Process of the Existing CMU, as part of the first Prequalification File submission date. Such identification allows ELIA:

- not to request a Financial Security for the Existing CMU(s) as one was already submitted by the Capacity Provider on the initial Virtual CMU; and
- to use the Derating Factors defined in the Ministerial Decree for the Delivery Period and the Auction during which the Contracted Capacity(ies) on the Virtual CMU were selected for the transfer of the Contracted Capacity from the Virtual CMU to the Existing CMU(s).

496. Once the Existing CMU(s) is (are) prequalified, ELIA automatically transfers the Contracted Capacity allocated to the Virtual CMU to this (these) Existing CMU(s):

- In case the Eligible Volume of the Existing CMU(s) (determined using the Derating Factors as per § 495) is equal to or exceeds the Contracted Capacity, all Contracted Capacity is transferred; or

- In case the Eligible Volume of the Existing CMU(s) (determined using the Derating Factors as per § 495) is strictly lower than the Contracted Capacity, the Eligible Volume is transferred.
497. When, following the procedure of § 496, second bullet, not all Contracted Capacity allocated to the Virtual CMU has been transferred to Existing CMU(s), the Capacity Provider can either:
- Add more Delivery Points to the Existing CMU(s) linked to the Virtual CMU; in this case, the Remaining Eligible Volume of the Existing CMU determines the amount of capacity that can be transferred; or
 - Prequalify another Existing CMU: in this case, the procedure of § 496 applies.
498. When processing Prequalification Files of multiple Existing CMUs linked to a Virtual CMU, ELIA applies the 'first come, first served' rule.
499. Within two Working Days after the approval of the Prequalification File of the Existing CMU(s) linked to the Virtual CMU, ELIA sends to the Capacity Provider:
- For the Virtual CMU: a new annex A of the Capacity Contract; and
 - For the Existing CMU(s) linked to the Virtual CMU:
 - In case § 496 applies and the Existing CMU thus does not have a Capacity Contract yet, a new Capacity Contract where in annex A the Derating Factor is used as referred to in § 495, second bullet point; or
 - In case § 497, first bullet applies and the Existing CMU thus already has a Capacity Contract, a new annex A of the Capacity Contract where the Derating Factor is used as referred to in § 495, second bullet point.
500. The Capacity Provider has three Working Days to sign the new annexes A of the respective Capacity Contracts or, if applicable, the new Capacity Contract. If the Capacity Provider fails to duly sign the new annexes A or, if applicable, the new Capacity Contract, ELIA cancels the procedure and no Contracted Capacity is transferred.
501. ELIA signs the annexes A of the respective Capacity Contracts or, if applicable, the new Capacity Contract at the latest ten Working Days after the approval of the Prequalification File of the Existing CMU(s) linked to the Virtual CMU, but subject to the receipt of the signed annexes A of the Capacity Contract or, if applicable, the new Capacity Contract from the Capacity Provider.
502. Following the successful transfer of Contracted Capacity from the Virtual CMU to the Existing CMU(s):
- the Financial Security is partially released following the procedure as per section 11.6; and
 - in case after the transfer the Contracted Capacity of the Virtual CMU is equal to zero, the Virtual CMU is archived as per section 5.6.1.3.2.2.
503. ELIA cannot be held liable in the event that this process is not finalized prior to the moment of control $t_{control\ 1}$ and $t_{control\ 2}$. It is the Capacity Provider's responsibility to start the process to become an Existing CMU taking into consideration the timing foreseen for each step.

8.7 PROCESSES TO FOLLOW PRIOR THE START OF ANY TRANSACTION PERIOD

504. In addition to the Pre-delivery controls described above, a Capacity Provider needs to provide during the Pre-delivery Period two additional parameters to ELIA: his Declared Day-ahead Price, to be used by ELIA during the Availability Monitoring Process on CMUs not subject to Daily Schedule (section 9.4.3.2.3), and the identification of the NEMO to be used as reference in the context of the Payback Obligation.

8.7.1 Declared Day-ahead Price

505. The Declared Day-ahead Price is only relevant to CMUs not subject to the obligation to submit a Daily Schedule.
506. An initial Declared Day-ahead Price can be communicated by the Capacity Provider to ELIA through the CRM IT interface from the moment the CMU is an Existing CMU and at the latest before the start of the Delivery Period. ELIA acknowledges receipt of it by notifying back the Capacity Provider.

In case no Declared Day-ahead Price is communicated by the Capacity Provider to ELIA prior to the start of the Transaction Period of a CMU, ELIA sends a reminder to the Capacity Provider within a period of three Working Days after the expiration of the aforementioned deadline.

Once the initial Declared Day-ahead Price has been correctly received by ELIA the Capacity Provider can update Declared Day-ahead Price following the modalities of section 9.4.2.

As long as no Declared Day-Ahead Price is provided to ELIA, the Remaining Maximum Capacity is considered equal to zero as per § 564.

8.7.2 NEMO

507. The NEMO indicates the market operator in which the Reference Price is observed in the Day-ahead Market (DAM). The choice of the NEMO is provided by the Capacity Provider to ELIA via the CRM IT Interface on CMU level, regardless the status of such CMU (existing CMU, virtual CMU or additional CMU), at the latest before the start of the Delivery Period.

This NEMO must be active on the Day-ahead market of the Control Zone in which the CMU is located.

9 AVAILABILITY OBLIGATION

9.1 INTRODUCTION

This chapter contains the rules relating to the Availability Obligation of the Capacity Providers for their CMUs, which aim to ensure the availability of the CMU's Contracted Capacity, resulting from a Transaction in the Primary Market or in the Secondary Market, during the Delivery Period.

Section 9.2 contains general provisions applying to the Availability Obligation.

Section 9.3 describes the obligation for a Capacity Provider to notify ELIA of temporary limitations on the capacity of their CMUs, as well as the modalities for this notification.

Section 9.4 describes the Availability Monitoring. It comprises the identification of the precise moments during the Delivery Period relevant for the monitoring as well as how ELIA verifies whether the Capacity Provider complies with the obligation.

Section 9.5 describes the Availability Tests, as a complementary tool to the Availability Monitoring to verify whether the Capacity Provider has committed to the obligation.

Section 9.6 describes the Unavailability Penalty applicable if the Capacity Provider has violated its Availability Obligation.

Section 9.7 describes the Penalty that applies if the Capacity Provider provides an Overcapacity compared to its Required Volume.

Section 9.8 describes the notification, settlement and contestation of any financial penalties resulting from the Availability Monitoring and Availability Testing processes.

9.2 GENERAL PROVISIONS

- 508. In this chapter, a CMU refers to a CMU having Contracted Capacity.
- 509. In this chapter, a Market Time Unit refers to a settlement period for the associated market (day-ahead, intraday, or balancing).
- 510. As part of the Availability Obligation, the Capacity Provider is responsible for the provision of correct, complete and up to date information to ELIA. ELIA is not liable for penalties incurred by the Capacity Provider as a result of incorrect, incomplete or out of date information that he had communicated.
- 511. Any exchange of data and other information between ELIA and other system operators, including the DSOs and Foreign TSOs, relevant to the provisions in this chapter, are described in Annex 18.3.7.

9.3 DECLARATION OF UNAVAILABILITY AND SCHEDULED MAINTENANCE

9.3.1 Declaration of unavailability

512. Each Capacity Provider is obliged to notify ELIA of each limitation of the Nominal Reference Power of which he is aware.

9.3.1.1 Content of the notification

513. Notifications submitted to ELIA in accordance with § 512 must contain the following information:

- the CMU ID; and
- the Remaining Maximum Capacity; and
- the start date and time of the unavailability; and
- the end date and time of the unavailability; and
- the reason for the unavailability, being one of the following:
 - planned outage; or
 - Forced Outage; or
 - other limitation, with a description provided by the Capacity Provider.
- The possible wish of the Capacity Provider to register the Unavailable Capacity as Announced Unavailable Capacity, if applicable in accordance with section 9.3.1.4.

Sections 9.3.1.2 and 9.3.1.3 describe the modalities for the submission of this information for CMUs with and without Daily Schedule, respectively.

514. The Unavailable Capacity is calculated by Elia as equal to the last updated Nominal Reference Power minus the Remaining Maximum Capacity stated in the last accepted notification that contains Unavailable Capacity. This is represented by the following formula:

$$P_{Unavailable}(CMU, t) = NRP(CMU, t) - P_{Max, Remaining}(CMU, t)$$

Where:

- $P_{Max, Remaining}(CMU, t)$ is the Remaining Maximum Capacity stated in the last accepted notification for MTU t that contains Unavailable Capacity;
 - $NRP(CMU, t)$ is the last updated Nominal Reference Power for the CMU;
 - t represents any date and time within the Delivery Period between the start and end date stated in the notification.
515. For every day d during the Delivery Period Y ELIA notes the last accepted Remaining Maximum Capacity that was notified before 11:00 in $d - 1$, as *Remaining Maximum Capacity DA*(CMU, t). This parameter is used for the settlement of the Payback Obligation (as detailed in chapter 12).
516. For any MTU t during the Delivery Period Y and for any CMU, ELIA applies the information stated in the last accepted notification applying to MTU t . In case no limitation applying to MTU t were declared, the Remaining Maximum Capacity is equal to the last updated Nominal Reference Power of the CMU.

9.3.1.2 Automatic notification

517. For all CMUs with a Daily Schedule (except for Indirect Foreign CMUs) and for CMUs without a Daily Schedule that follow the Outage Planning Process, a notification is created by ELIA based on the Availability Plan, from the moment the information was provided by the Capacity Provider.
518. Starting from Thursday $W - 1$ during the Delivery Period and for any CMU with a Daily Schedule, ELIA collects the information concerning the availability of the CMU from the Availability Plan for week W .
519. For each MTU for which ELIA observes that the Maximum Available Capacity $P_{max,available}$ is lower than the last updated value of the Nominal Reference Power, ELIA immediately and automatically creates a notification in the CRM IT Interface. ELIA informs the Capacity Provider about this notification within one Working Day of its creation.

The method used to map the information collected from the Availability Plan to the required information in accordance with section 9.3.1.1, is described in annex 18.3.1.

520. Notifications created in the process set out as per § 519 are automatically accepted by ELIA at the moment of creation.
521. Unavailable Capacity contained in notifications, created in accordance with § 519, can in first instance be registered as either Announced Unavailable Capacity or Unannounced Unavailable Capacity, depending on the preference of the Capacity Provider. Capacity Providers can still modify the nature of the Unavailable Capacity in the CRM IT Interface after the initial registration until 11:00 of the day before the start date of the unavailability.

9.3.1.3 Manual notification

522. For CMUs that do not follow the Outage Planning Process and for foreign CMUs, the Capacity Provider creates a notification in the CRM IT Interface.
523. ELIA only accepts such a notification if:
- it contains all the information in accordance with § 513; and
 - the Remaining Maximum Capacity does not surpass the last updated Nominal Reference Power of the CMU, according to section 5.6; and
 - in case it is notified after 11:00 am the day before the start date of the unavailability, it does not state a higher Remaining Maximum Capacity than the last notified Remaining Maximum Capacity; and
 - it is submitted at the latest ten Working Days after the start date of the unavailability.
524. If the notification fails to meet any one of these conditions, ELIA rejects it. The Capacity Provider can submit a new notification.
525. ELIA informs the Capacity Provider of the acceptance or rejection of the notification within five Working Days from the date of the notification via the CRM IT Interface.
526. In case a Capacity Provider submits a notification for its CMU that overlaps with another previously made notification of Unavailable Capacity, the most recently submitted notification prevails.

527. The Capacity Provider has the option to request ELIA that a CMU without Daily Schedule follows the same process as CMUs with Daily Schedule described in section 9.3.1.2. This request can only be accepted if the following conditions are met:
- the request is submitted to ELIA via email at the latest fifteen Working Days before the start of the Delivery Period; and
 - the request contains the CMU ID of the CMU; and
 - all Delivery Points part of the CMU must have already signed an OPA contract thirty Working Days before the start of the Delivery Period.
528. In case any Delivery Point of the CMU for which the automatic notification was in place following the conditions set out in § 527 terminates the OPA contract, the manual notification is again applicable for the CMU starting from the day of the termination of the contract.

9.3.1.4 Types of unavailability

529. Each unavailability notified before 11:00 the day before the start date of the unavailability, shall be registered as Unannounced Unavailable Capacity, except if the Capacity Provider chooses to register it as Announced Unavailable Capacity before this moment. The Unavailable Capacity will be definitively registered as Unannounced Unavailable Capacity in any other case.
530. Each unavailability notified after 11:00 the day before the start date of the unavailability will be registered as Unannounced Unavailable Capacity.
531. A Capacity Provider can declare an Announced Unavailability for a maximum of seventy-five calendar days cumulatively per Delivery Period, of which cumulatively a maximum of twenty-five calendar days during the Winter Period. Once this limit is reached, the obligation to notify limitations on the Capacity persists but no more Announced Unavailable Capacity can be determined. All Unavailable Capacity is then registered as Unannounced Unavailable Capacity as of this point for the remainder of the Delivery Period.
532. ELIA monitors the declaration of Announced Unavailable Capacity for a CMU with respect to indicators of presence in the market, such as provision of other services to ELIA, including but not limited to frequency-related Ancillary Services, Redispatching Services and the CMU's scheduling information.
533. In case of evidence that the CMU was present in the market, in contradiction with the Announced Unavailable Capacity, ELIA notifies the Capacity Provider and requests explanation for the inconsistency. ELIA notifies the CREG of the evidence, the analysis performed by Elia and the response of the Capacity Provider.

In case a notification is submitted after 11:00 the day before the start date of the unavailability, any potential status change to previously notified Unavailable Capacity caused by this new notification, can never lead to the amount of (remaining) available days to declare as Announced Unavailable Capacity, as per § 529, to increase again.

9.3.2 Declaration of Scheduled Maintenance

534. Capacity Providers have the possibility to notify ELIA when a CMU will be subject to Scheduled Maintenance during the Delivery Period. Section 9.3.2.1 and 9.3.2.2 describe the modalities of this notification for CMUs with and without Daily Schedule respectively.

535. A Capacity Provider can declare days with Scheduled Maintenance for a maximum of twenty calendar days cumulatively per Delivery Period, of which no calendar days during the Winter Period.
536. Whenever the Capacity Provider notifies ELIA of any Announced Unavailable Capacity, following the modalities set out in section 9.3.1, for a CMU on a day d that was correctly notified as a day with Scheduled Maintenance, the Obligated Capacity on this day d will be modified in accordance with section 9.4.3.1.
537. Whenever a CMU acquires any Obligation on the Secondary Market that has a Transaction Period that (partly) overlaps with a day that has been notified as a day with Scheduled Maintenance, this day is automatically no longer considered as a day with Scheduled Maintenance.
538. A Black Start capability test, taking into account the minimum requirements set out in Article 44(1) of the NC ER and Article 45(5) of the NC RfG, is not considered as Scheduled Maintenance by ELIA. In the event of the determination of Missing Capacity following such test in the delivery activity report, a Capacity Provider can contest the determination of the Missing Capacity following the modalities set out in section 9.8.3. In such case the Capacity Provider shall submit sufficient proof to ELIA.
539. An outage on request of a TSO or DSO, for example due to maintenance works, is not considered as Scheduled Maintenance by ELIA. In the event of the determination of Missing Capacity following such outages in the delivery activity report, a Capacity Provider can contest the determination of the Missing Capacity following the modalities set out in section 9.8.3. In such case the Capacity Provider shall submit sufficient proof to ELIA.

9.3.2.1 Declaration of Scheduled Maintenance for CMUs with Daily Schedule

540. For CMUs with Daily Schedule (excluding foreign CMUs) the declaration of days with Scheduled Maintenance will only be based on the unavailability of the Delivery Point submitted in the Availability Plan.
541. For each calendar year Y , ELIA follows a stepwise process to determine the set of days with Scheduled Maintenance:
- i. On 30/11/ $Y - 1$ ELIA selects the validated days in the Availability Plan for the calendar year Y during which the Delivery Point(s) of the CMU is labelled as unavailable (denoted by the unavailability status "U") as the list of days eligible to be declared as days with Scheduled Maintenance.
 - ii. From the days selected in step i. ELIA excludes any days that occur during the Winter Period.
 - iii. From the list of days resulting from step ii. the Capacity Provider has until 31/12/ $Y-1$ to select the set of days with Scheduled Maintenance for year Y .
 - If the Capacity Provider does not select a set of days from the list of eligible days before the aforementioned deadline and if the list obtained after step ii contains less than or exactly twenty days, ELIA automatically includes all eligible days in the set of days with Scheduled Maintenance.
 - If the Capacity Provider does not select a set of days before the aforementioned deadline and if the list obtained after step ii. contains more than twenty days, ELIA automatically includes the first twenty eligible days in the set of days with Scheduled Maintenance.

9.3.2.2 Declaration of Scheduled Maintenance for CMUs without Daily Schedule

542. For CMUs without Daily Schedule and all foreign CMUs the declaration of days with Scheduled Maintenance will take place in the CRM IT Interface.

ELIA only accepts such declaration if:

- It does not contain any days occurring during the Winter Period; and
- The first day with Scheduled Maintenance included in the declaration is more than ninety calendar days after the day of the declaration; and
- The cumulative number of days with Scheduled Maintenance, thereby taking into account any previously accepted declarations for the Delivery Period Y does not exceed the limitations set out in § 535.

543. If the declaration fails to meet any one of these conditions, ELIA rejects it. The Capacity Provider can submit a new notification.

9.4 AVAILABILITY MONITORING

544. The Availability Monitoring aims to determine whether the Capacity Provider complies with its Availability Obligations.

545. Section 9.4.1 describes the way the moments of control are selected.

546. Section 9.4.2 describes the procedure to determine the Declared Market Price and the Required Volume, which are parameters used for the Availability Monitoring. Section 9.4.3 describes the procedure that ELIA applies to determine the Available Capacity and the Obligated Capacity.

9.4.1 Selection of moments of control

9.4.1.1 AMT Moments and AMT MTUs determination

547. Availability Monitoring can only occur during an AMT moment. An AMT moment is a moment during which the Day-ahead Price is equal to or exceeds the AMT-price (determined according to section 9.4.1.2)

9.4.1.2 AMT Price determination

548. ELIA determines the AMT Price for Delivery Period Y based on the latest reference scenario defined in the *of Royal Decree "Methodology"* to set the Auction Parameters for the $Y - 1$ Auction applying to Delivery Period Y .

549. Before determining the AMT Price, ELIA adapts the reference scenario by replacing hypotheses relating to capacities installed in the reference scenario for the $Y-1$ Auction with the Contracted Capacities for the Delivery Period in the $Y-1$ Auction. In case no instruction is given by the Minister to organize the $Y-1$ Auction, this step is omitted.

550. Elia subsequently creates a new simulation. This simulation is applied to a "set of simulation years", as referred to in article 10, §6 of the *Royal Decree "Methodology"*.

551. ELIA determines the AMT Price based on the simulated prices obtained from the scenario obtained after § 550, as the minimum of:

- the median value of the price in each simulation year that is surpassed during hundred hours;
- the lowest value of the tenth percentile of the price in each simulation year that is surpassed during twenty hours.

ELIA applies the required inflation coefficient to the obtained result in order to express the price in EUR of the Delivery Period.

552. ELIA publishes the value of the AMT Price for Delivery Period γ on its website before May 15 prior to the Delivery Period. Prior to every Delivery Period, the Capacity Provider is responsible for taking note of the AMT Price.

9.4.1.3 Determination and Publication of AMT MTUs and AMT Moments

553. After the determination of the Day-ahead Market Price, Elia compares it to the AMT Price:

- if the Belgian Day-ahead Market Price is equal to or exceeds the AMT Price, the concerning market segment is identified by ELIA as an AMT MTU;
- if the Belgian Day-ahead Market Price does not exceed the AMT Price, the concerning market segment is not identified as an AMT MTU.

554. An AMT-moment can consist of one single AMT MTU or of multiple subsequent AMT MTUs during the same day.

555. ELIA publishes identified AMT MTUs and AMT Moments on their website within two hours of the publication by the relevant NEMOs of the of the Day-ahead market clearing results of their Day-ahead market.

556. The Capacity Provider is responsible for inquiring about the identified AMT MTUs and AMT Moments²¹, and cannot contest them.

9.4.1.4 Selection of moments subject to Availability Monitoring during AMT Moments

557. ELIA selects the AMT MTUs to be verified according to a procedure approved by the CREG. The procedure is not disclosed publicly.

ELIA submits this procedure for approval to the CREG at the latest on March 15, 2023. Afterwards any potential revisions of this procedure are to be submitted for approval to the CREG at the submission date of the Functioning Rules.

²¹ The Capacity Provider can, on a voluntary basis, subscribe to receive an automatic notification of AMT Moments via the ELIA website. This subscription does not supersede the provisions of § 556

The selection procedure includes provisions to avoid selecting AMT MTUs to be verified on days with a particularly low risk of adequacy issues.

558. ELIA expects to verify the Availability Obligation during fifteen AMT Moments per Delivery Period. The total number of AMT Moments during which ELIA verifies the Availability Obligation cannot exceed thirty for a single Delivery Period.
559. De Availability Monitoring executed by Elia during a selected AMT Moment applies to each AMT MTU part of it and for each CMU subject to the Availability Obligation.

9.4.2 Declared Prices and Required Volume for CMUs without Daily Schedule

560. For any AMT MTU ELIA determines the Required Volume (according to section 9.4.2.2) of a CMU without Daily Schedule, based on all Declared Prices and Associated Volumes communicated by the Capacity Provider (according to section 9.4.2.1), as well as the reference prices for the concerned Market Time Unit.
561. The Required Volume or V_{req} is the volume required to be supplied in reaction to the electricity market prices. ELIA determines it based on the Associated Volumes by comparing the reference prices with the corresponding (Partial) Declared Price(s). This parameter is applied to establish Available Capacity during AMT MTUs as defined in section 9.4.3.2.3.
562. ELIA notifies to the CREG any Declared prices and evolution thereof that could trigger doubts about anti-competitive behavior. Such behaviors include, but are not limited to, behavior aiming to avoid the Availability or Payback Obligations or consistent declaration of Declared or Partial Declared Intraday or Balancing Prices lower than their day-ahead counterparty.

9.4.2.1 Declared Prices and Associated Volumes

563. For each CMU without Daily Schedule the Capacity Provider has to submit before the start of a Delivery Period at least the Declared Day-Ahead Price as per section 8.7.1. The Capacity Provider has the option to also submit (sets of) Partial Declared Day-Ahead Prices, as well as (sets of) (Partial) Declared Intraday and/or Balancing Prices.
564. In case the Capacity Provider fails to provide the Declared Day-Ahead Price to ELIA before the start of a Delivery Period as per section 8.7.1, ELIA applies a Remaining Maximum Capacity of zero MW for the CMU, superseding any declarations made by the Capacity provider according to section 9.3.1, until a (set of) Declared Day-Ahead Price(s) has been provided by the Capacity Provider for the CMU. During this period the Unavailable Capacity cannot have the status "Announced Unavailable Capacity".
565. The Capacity Provider notifies (partial) Declared Prices and Associated Volumes to ELIA for CMU(s) without Daily Schedule whenever he identifies a need to update this information via the CRM IT Interface, following the modalities set out in annex 18.3.6.
566. (Partial) Declared Prices relate to one of the three price reference:
- The Reference Price for the Day-ahead Market at the selected NEMO as per section 8.7.2; and
 - The intraday reference price for the Intraday Market at the selected NEMO as per §§ 567 and 568; and

- The positive imbalance price²².
567. A Capacity Provider can choose as intraday market where his intraday reference price is observed, any NEMO operating the intraday market for the respective control zone of the CMU if this NEMO was active before the start of the Delivery Period.
568. ELIA uses as the intraday reference price for each relevant NEMO for each MTU the volume weighted average price of the intraday transactions that have been concluded on the respective NEMO for the MTU.
569. For any AMT MTU, ELIA applies:
- the last accepted value(s) of (sets of) (Partial) Declared Day-Ahead Price(s) notified before 11:00 the day before the day of the occurrence of the MTU; and
 - The last accepted value(s) of (sets of) (Partial) Declared Intraday or Balancing Price(s) notified more than two hours before the start of the MTU.
570. For the Associated Volumes of the Declared Price(s), ELIA uses the last updated Nominal Reference Power according to section 5.6.
571. For the Associated Volumes of the partial Declared Price(s), ELIA uses the volumes listed in the last accepted notification from the Capacity Provider as per annex 18.3.6.2.
572. In case the NRP is updated following the modalities of section 5.6, the last accepted (sets of) partial Declared Prices are cancelled. The Capacity Provider can submit new (sets of) partial Declared Prices.
573. With the exception of the Declared Day-Ahead Price, the Capacity Provider may request, when they deem it relevant, ELIA to terminate the application of the Declared Price.

At any moment, the Capacity Provider may request ELIA to terminate the application of any of the Partial Declared Prices.

The request to terminate the application of any (sets of) (Partial) Declared Prices is done via the CRM IT Interface, subject to the modalities set out in Annex 18.3.6.3.

9.4.2.2 Determination of the Declared Market Price and Required Volume

574. For any MTU with a Payback Obligation, the Required Volume is equal to the last updated Nominal Reference Power according to section 5.6. This rule does not apply to storage facilities that are subject to the Payback Obligation.

²² For Belgium, the positive imbalance price can be found [here](#).
 For France, the positive imbalance price refers to the [Imbalance Settlement Price](#)
 For Germany, the positive imbalance price refers to the [Ausgleichsenergiepreis](#)
 For the Netherlands, the positive imbalance price refers to [Settlement Prices](#)

9.4.2.2.1 Determination of the Required Volume

575. For a given AMT MTU not covered by § 574, ELIA determines the Required Volume as the highest volume that is expected to react to any of the different reference price signals occurring over the AMT MTU. ELIA does so according to the following procedure:
- i. For each time unit occurring within the AMT MTU, ELIA retains the highest Associated Volume for which the positive imbalance price surpassed or was equal to its (Partial) Declared Balancing Price (or zero MW if no such price was surpassed). This results in a set of x volumes, where x is the number of Balancing Market Time Units within an AMT MTU. Each volume relates to a specific Balancing Market Time Unit.
 - ii. For each Intraday Market Time Unit occurring within the AMT MTU ELIA calculates the average volume of the x volumes determined in step i. This results in a set of y volumes, where y is the number of Intraday Market Time Unit within an AMT MTU. Each volume relates to a specific Intraday Market Time Unit.
 - iii. For each time unit occurring within the AMT MTU, ELIA retains the maximum between the volume determined in step ii and the highest Associated Volume for which the intraday reference price surpassed or was equal to the (Partial) Declared Intraday Price (or zero MW if no such price was surpassed). This results in a set of y volumes, where y is the number of Intraday Market Time Units within an AMT MTU. Each volume relates to a specific Intraday Market Time Unit.
 - iv. ELIA calculates the average of the volumes in the set determined in step iii. This results in one value.
 - v. The Required Volume for a given AMT MTU is the maximum between the volume determined in step iv and the highest Associated Volume for which the Reference Price for the Day-ahead market that has been selected as per section 8.7.2 surpassed or was equal to their (partial) Declared Day-ahead Price during the AMT MTU. The Required Volume equals zero MW if no such price was surpassed.

ELIA uses the Required Volume for Availability Monitoring during AMT MTUs.

9.4.2.2.2 Determination of the Declared Market Price

576. For a given AMT MTU, ELIA determines the Declared Market Price as the Declared Price for the Day-ahead Market with an Associated Volume corresponding to the Required Volume.

The Declared Market Price is a composition of (Partial) Declared Day-Ahead Prices. Each price is associated to the corresponding Associated Volume to (Partial) Declared Intraday or Balancing Prices. ELIA then determines it by applying the following procedure:

- i. For each Balancing Market Time Unit occurring within the AMT MTU, ELIA retains the x (Partial) Day-Ahead Price(s) corresponding to the x Associated Volumes obtained in step i for determining the Required Volume in section 9.4.2.2.1.
- ii. Within each Intraday Market Time Unit occurring within the AMT MTU ELIA calculates the volume weighted average price for the x prices determined in step i. This results in a set of y prices, where y is the number of Intraday Market Time Units within an AMT MTU. Each price relates to a specific Intraday Market Time Unit. Each price is associated with the corresponding volume in the set of y volumes obtained in step ii for determining the Required Volume in section 9.4.2.2.1.
- iii. ELIA retains the y prices corresponding to the y volumes obtained in step iii for for determining the Required Volume in section 9.4.2.2.1.
- iv. ELIA determines the Declared Market Price as the volume-weighted average over all prices in the set obtained in step iii.

577. ELIA applies the Declared Market Price for a CMU and an AMT MTU t ($DMP(CMU_{id}, t)$) to determine the Payback Obligation (see chapter 12).
578. ELIA notifies to the CREG any Declared Prices and evolution thereof that could trigger doubts on anti-competitive behavior. Such behaviors can be, but are not limited to, a behavior aiming to avoid Payback Obligations or a consistent declaration of Declared or Partial Declared Intraday or Balancing Prices lower than their day-ahead counterparty.

This section lapses if the articles in the Royal Decree Methodology on which section 12.3.1.2.3 is based is removed on the condition that this removal enters into force before the Bid Submission deadline as per § 306.

9.4.3 Obligated Capacity and Available Capacity determination

9.4.3.1 Determination of the Obligated Capacity

9.4.3.1.1 General provisions

579. The CMU has to provide Available Capacity at least equal to the Obligated Capacity at every AMT MTU individually during an AMT Moment.
580. The method for determining Obligated Capacity depends on whether the CMU is a Non-Energy Constrained or Energy Constrained CMU.
581. The Obligated Capacity is reduced by the amount of capacity that is considered as Scheduled Maintenance as per section 9.3.2. Following Annex 18.8, a CMU can have Transactions to which Scheduled Maintenance is available and not available at the same time. In this case, the Announced Unavailable Capacity is allocated based on the Contracted Capacity of each Transaction. The Announced Unavailable Capacity is only deducted as Scheduled Maintenance from the Obligated Capacity for the Transactions to which it is available. This is represented by the following formula:

$$\begin{aligned} & \text{Announced Unavailable Capacity}_{\text{Transaction}}(CMU, t) \\ &= \frac{\text{Contracted Capacity}_{\text{Transaction}}(CMU, t)}{\text{Total Contracted Capacity}(CMU, t)} \text{Announced Unavailable Capacity}(CMU, t) \end{aligned}$$

Where:

- $\text{Contracted Capacity}_{\text{Transaction}}(CMU, t)$ is the Contracted Capacity of a Transaction of the CMU with a Transaction Period covering MTU t ; and
- $\text{Total Contracted Capacity}(CMU, t)$ is the sum of the all the Contracted Capacities for the CMU with a Transaction Period covering t , be it acquired via the Primary or Secondary Market; and
- $\text{Announced Unavailable Capacity}(CMU, t)$ is the Announced Unavailable Capacity of a CMU for MTU t , as per section 9.3.1.

9.4.3.1.2 Non-energy Constrained CMU

582. For Non-energy Constrained CMUs, the Obligated Capacity for every AMT MTU is equal to the Total Contracted Capacity²³, applying to the AMT MTU, reduced by the Announced Unavailable Capacity during days with Scheduled Maintenance. It is represented by the following formula:

$$P_{obligated}(CMU, t) = \text{Max}(\text{Total Contracted Capacity}(CMU, t) - P_{\text{Announced, Unavailable, Maintenance}}(CMU, t) \cdot \text{Derating Factor}(CMU, t); 0)$$

Where:

- *Total Contracted Capacity* is the sum of the all the Contracted Capacities for the CMU with a Transaction Period covering t , be it acquired via the Primary or Secondary Market; and
- $P_{\text{Announced, Unavailable, Maintenance}}(CMU, t)$ is the Announced Unavailable Capacity calculated in accordance with § 514 for all AMT MTUs t that occur during days with Scheduled Maintenance. This value is zero for all AMT MTUs t that do not occur during days with Scheduled Maintenance; and
- $\text{Derating Factor}(CMU, t)$ is the Derating Factor calculated in accordance with the definition in chapter 3.

9.4.3.1.3 Energy Constrained CMU

583. Energy Constrained CMUs have to provide the Service in accordance with their Service Level Agreement (SLA), that is:

- for the duration of the hours specified by the CMU's SLA; and
- for one activation per day.

The MTUs for one day during which the CMU provides its capacity in accordance with its SLA are defined as SLA MTUs.

ELIA determines the SLA MTUs for each day for which an Availability Monitoring Trigger occurs from the MTUs:

- not exceeding the above-mentioned SLA's constraints; and
- during which ELIA observes (ex-post) that the CMU dispatched its capacity; and
- for which the dispatching is in accordance with the (Partial) Declared Prices (applicable only to CMUs without Daily Schedule Obligation) according to section 9.4.2.

The determination of the SLA MTUs is explained in annex 18.3.4. The methodology varies depending on whether or not the CMU has a Daily Schedule (annex 18.3.4.1) or not (annex 18.3.4.2).

The determination of the Obligated Capacity depends on whether or not the AMT MTU in question is an SLA MTU.

584. On AMT MTUs that are SLA MTUs, the Obligated Capacity of the CMU is equal to the sum of the non-derated *ex-ante* Total Contracted Capacity and the ex-post acquisitions and sales of

²³ Without prejudice to the applied formula, this capacity consists of a 'derated' quantity for ex-ante Transactions and a 'non-derated' quantity for ex-post Transactions.

obligations on the Secondary Market with a Transaction Period covering the AMT MTU (according to section 10.5.3), reduced by the Announced Unavailable Capacity that occurs during days with Scheduled Maintenance (according to section 9.3.2). This is defined by the following formula:

$$P_{Obligated}(CMU, t) = \max \left(\frac{Total\ Contracted\ Capacity_{ex-ante}(CMU, t)}{Derating\ Factor\ (CMU, t)} + Contracted\ Capacity(CMU, t)_{ex-post} - P_{Announced, Unavailable, Maintenance}(CMU, t); 0 \right)$$

Where:

- t is a measure for time expressed as an AMT MTU; and
- $Total\ Contracted\ Capacity_{ex-ante}(CMU, t)^{24}$ is the Total Contracted Capacity established at the time of closure for the *ex-ante* Secondary Market trades; and
- $Contracted\ Capacity(CMU, t)_{ex-post}$ is the sum of Contracted Capacities bought or sold *ex-post* on the Secondary Market, where sales count negatively and acquisitions count positively; and
- $Derating\ Factor\ (CMU, t)$ is the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the $Total\ Contracted\ Capacity_{ex-ante}(CMU, t)$ during AMT MTU t , calculated in accordance with the definition in chapter 3; and
- $P_{Announced, Unavailable, Maintenance}(CMU, t)$ is the Announced Unavailable Capacity calculated in accordance with § 514 for all moments t that occur during days with Scheduled Maintenance. This value is zero for all moments t that do not occur during days with Scheduled Maintenance.

585. On AMT MTUs which are not SLA MTUs, The Obligated Capacity is equal to the sum of the *ex-post* acquisitions and sales of obligations on the Secondary Market, permitted according to section 10.5.3, with a Transaction Period covering the AMT MTU. This is defined by the following formula:

$$P_{Obligated}(CMU, t) = Contracted\ Capacity(CMU, t)_{ex-post}$$

Where:

- t is a measure for time expressed as an AMT MTU; and
- $Contracted\ Capacity(CMU, t)_{ex-post}^{25}$ represents the *ex-post* Contracted Capacities on the Secondary Market, calculated as the sum of the acquired *ex-post* capacities, reduced with the sold *ex-post* capacities.

²⁴ Without prejudice to the applied formula, this capacity represents a 'derated' quantity.

²⁵ Without prejudice to the applied formula, this capacity represents a 'non-derated' quantity.

9.4.3.2 Determination of the Available Capacity

9.4.3.2.1 General Principles

586. This section establishes the rules for determining Available Capacity. The information ELIA receives from CMUs with and without Daily Schedule differs. ELIA therefore applies different methods to determine Available Capacity for both CMU types.

For the determined Available Capacity, the status of the availability can either be Proven or Unproven Availability, depending on whether or not the CMU submitted (Partial) Declared Prices, participates to the provision of frequency-related Ancillary Services or Redispatching Services. For each component in Available Capacity, this section explicitly states which proportion counts as Proven or Unproven Availability. Both types are considered of equal value for the determination of Available Capacity, but ELIA uses this distinction when identifying the need for Availability Tests on CMU's (according to section 9.5).

587. In case a CMU is contracted in multiple CRMs across multiple countries, ELIA applies the rules set out in article 19 of the ACER Decision²⁶ regarding cross-border participation in capacity mechanisms by using the pro-rata principle set out in said article.

588. In case one or more Delivery Point(s) are prequalified in one or several reserved frequency-related Ancillary Services or (on a voluntary or mandatory basis) offers them for the Redispatching Services, ELIA will take into account this participation to determine the Available Capacity of the Delivery Points. Under frequency-related Ancillary Services, the following are included:

- Frequency Containment Reserve (FCR)
- Automatic Frequency Restoration Reserve (aFRR)
- Manual Frequency Restoration Reserve (mFRR)

The determination of these corrections is set out in annex 18.3.5.

589. Due to different data available for their frequency-related Ancillary Services, corrections for Indirect Foreign Capacities can be different. Their respective methodologies are included in annex 18.3.5.2.

Corrections for Indirect Foreign Capacities are only carried out insofar data with regards to frequency-related Ancillary Services and Redispatching Services can be made available by the foreign TSO.

590. For Low Voltage Delivery Points, the corrections are only carried out when the Low Voltage Delivery Points Group is equal in composition to the Reserve Providing Group used to contract frequency-related Ancillary Services and Redispatching Services.

591. ELIA takes into account participation by the CMU's Delivery Point(s) in Redispatching Services and frequency-related Ancillary Services, as from:

- the day after the successful prequalification for the Redispatching Services or frequency-related Ancillary Services, if the notification took place before 11:00; or

²⁶ [ACER decision on common rules for cross-border participation in electricity capacity mechanisms](#)

- two days after the successful prequalification for the Redispatching Services or frequency-related Ancillary Services, if Elia sent the notification after 11:00.

The resulting volumes are then used to determine the final Available Capacity, Proven Availability and Active Volume.

9.4.3.2.2 Determination of the Available Capacity for CMUs with Daily Schedule

592. For any MTU t during the Delivery Period Y the Available Capacity for CMU with Daily Schedule, is equal to the Remaining Maximum Capacity stated in the last accepted notification applying to MTU t . In case no limitations applying to MTU t were declared, the Available Capacity is equal to the last updated value of the Nominal Reference Power of the CMU, in accordance with § 516. This Available Capacity is split into Proven Available Capacity and Unproven Available Capacity.

593. For each CMU with Daily Schedule and for each MTU t , ELIA calculates the Unproven Availability as follows:

$$P_{Available,unproven}(CMU,t) = P_{Available}(CMU,t) - P_{Available,proven}(CMU,t)$$

Where:

- $P_{Available}(CMU,t)$ is the Available Capacity of the CMU during MTU t as per § 592;
- $P_{Available,proven}(CMU,t)$ is the proven Available Capacity during MTU t , as calculated according to § 594.

594. For a Daily Schedule CMU the Proven Availability is based on the Measured Power.

In case one or more duly notified – as stated in § 588 – Delivery Point(s) is (are) retained in one or several energy bids for frequency-related Ancillary Services or participate in Redispatching Services for the period covered by the AMT MTU, ELIA corrects the Measured Power for said Delivery Point(s). The Proven Availability is calculated as follows:

$$P_{Available,proven}(CMU,t) = MIN(P_{Available}(CMU,t); -P_{Measured}(CMU,t) + V_{correction}(CMU,t))$$

Where:

- $P_{Available}(CMU,t)$ is the Available Capacity of the CMU during MTU t as per § 592; and
- $P_{Measured}(CMU,t)$ is the Measured Power for the CMU for MTU t ; and
- $V_{correction}(CMU,t)$ is a correction for the participation of the CMU to frequency-related Ancillary Services and Redispatching Services, calculated as per annex 18.3.5.

9.4.3.2.3 Determination of the Available Capacity for CMUs without Daily Schedule

595. ELIA determines Available Capacity for CMUs without Daily Schedules on the basis of:

- the CMU's (Partial) Declared Prices (according to section 9.4.2); and
- the CMU's last updated Nominal Reference Power, according to section 5.6; and
- the CMU's Measured Power; and
- the CMU's Remaining Maximum Capacity (according to section 9.3.1); and

- any participation of the CMU's Delivery Points to frequency-related Ancillary Services or Redispatching Services.

596. For a Non-daily Schedule CMU, ELIA calculates the Available Capacity as follows:

$$P_{Available}(CMU, t) = MIN(V_{act}(CMU, t) + (NRP(CMU, t) - V_{req}(CMU, t)); P_{max,remaining}(CMU, t))$$

Where:

- t is a measure of time expressed as an MTU; and
- $V_{Act}(CMU, t)$ is the Active Volume, according to section 9.4.3.2.3.1; and
- $NRP(CMU, t)$ is the CMU's last updated Nominal Reference Power, according to section 5.6; and
- $V_{req}(CMU, t)$ is the Required Volume according to section 9.4.2.2; and
- $P_{Max,Remaining}(CMU, t)$ is the Remaining Maximum Capacity.

597. For a Non-daily Schedule CMU, ELIA calculates the Proven Availability as follows:

$$P_{Available,proven}(CMU, t) = MIN(P_{max,remaining}(CMU, t); V_{Act}(CMU, t))$$

Where:

- $P_{Max,Remaining}(CMU, t)$ is the Remaining Maximum Capacity; and
- $V_{Act}(CMU, t)$ is the Active Volume, according to section 9.4.3.2.3.1.

9.4.3.2.3.1 Determination of Active Volume

598. The Active Volume measures the part of the CMU's capacity which has reacted to market price signals, in accordance with its (Partial) Declared Prices in section 9.4.2.

599. ELIA establishes the initial Active Volume for each Delivery Point separately. The Active Volume is subsequently calculated over all Delivery Points, thereby taking into account participation in frequency-related Ancillary Services and Redispatching Services.

600. For a Delivery Point i providing capacity by the potential for injecting energy into the electricity grid and an AMT MTU t , it is equal to the injection at the Delivery Point. It is determined according to the following formula:

$$V_{Act,initial,i}(t) = -P_{measured,i}(t)$$

Where:

- $P_{measured,i}(t)$ is the Measured Power for the Delivery Point i during AMT MTU t .

601. For a Delivery Point i providing capacity by the potential for reduction of offtake from the electricity grid (as per the information submitted according to section 5.2.3.1.1) and an AMT MTU t , it is equal to the reduction in offtake at the Delivery Point. It is determined according to the following formula:

$$V_{Act,initial,i}(t) = Max\{P_{Baseline,i}(t) - P_{measured,i}(t); 0\}$$

Where:

- $P_{measured,i}(t)$ is the Measured Power for the Delivery Point i and AMT MTU t ;

- $P_{Baseline,i}(t)$ is the Baseline for the Delivery Point i and AMT MTU t , determined according to annex 18.3.2 or annex 18.3.3.

602. The CMU's initial Active Volume for AMT MTU t is the sum of the initial Active Volumes in the Delivery Points. It is calculated by the following formula:

$$V_{Act,initial}(CMU, t) = \sum_{i=1}^{n_{DP}} V_{Act,initial,i}(t)$$

Where:

- n_{DP} is the number of Delivery Points for the CMU.

603. During the Availability Monitoring, ELIA may cross-check the Active Volume of a Delivery Point located downstream of an Access Point with measurements at:

- the corresponding Access Point for an ELIA Grid-connected Delivery Point;
- the corresponding CDS Market Access Points for a CDS-connected Delivery Point (ELIA Grid-connected CDS).

In case of inconsistencies, ELIA may request the Capacity Provider to provide additional explanation.

604. In case one or more Delivery Point(s) is (are) retained in one or several energy bids for frequency-related Ancillary Services or participate in Redispatching Services for the period covered by the AMT MTU, ELIA corrects the initial Active Volume as per § 602 for said Delivery Point(s) by adding $V_{correction}(CMU, t)$ determined as per annex 18.3.5. The final Active Volume is thus calculated as:

$$V_{Act}(CMU, t) = V_{Act,initial}(CMU, t) + V_{correction}(CMU, t)$$

9.5 AVAILABILITY TESTS

9.5.1 Modalities

9.5.1.1 Decision to perform an Availability Test

605. ELIA can verify whether a Capacity Provider has committed to the Availability Obligation for any of its CMUs through unannounced Availability Tests.
606. ELIA can test a CMU up to three times successfully during the Winter Period and one time successfully outside of the Winter Period. Additionally, ELIA can test at maximum one time the full duration of the SLA (if any) successfully per Delivery Period. A test is successful if during each quarter hour between the quarter hour of the start and the quarter hour of the end time, zero MW of Missing Capacity was determined. As long as the limit of successful Availability Tests have not been reached, ELIA can continue to perform Availability Tests for this CMU.
607. A CMU is only tested for its full SLA (if any) if it has failed the previous Availability Test in the same Delivery Period.
608. ELIA selects the moment of the Availability Test and the CMUs on which to perform Availability Tests according to an internal procedure, which is not disclosed publicly. The procedure is

submitted to and approved by the CREG. Any possible revisions of this procedure are to be submitted for approval of the CREG, if applicable, at the request of the CREG, at the same moment of submission of the Functioning Rules.

The selection of the CMUs is based on criteria including, but not limited to:

- the amount of Proven Availability relative to the Obligated Capacity;
- previously failed Availability Tests by the CMU;
- missing Capacity during Availability Monitoring;
- correlations of the CMU's volume that reacted to price signals with the communicated prices according to section 9.4.2.

The internal selection procedure includes provisions to avoid Availability Tests on days with a particularly low risk of adequacy issues.

609. In parallel with the determination of the AMT Price as described in section 9.4.1.2, ELIA performs an analysis of the amount of forecasted scarcity moments in the simulations described in § 550. If no scarcity moments are expected in June, July and August of the simulation, no Availability Tests are carried out during these months of the Delivery Period on a CMU unless Missing Capacity is determined for this CMU during Availability Monitoring in the last twelve months.
610. The Capacity Provider can also request an Availability Test to ELIA in order to meet the conditions for reinstating the original remuneration after downwards revision due to three AMT Moments and/or Availability Tests during which Missing Capacity was established (according to section 9.6). These tests need operational approval by ELIA and follow the same procedure as an Availability Test at the initiative of ELIA.
611. Different Availability Tests for the same CMU take place on different calendar days.
612. Any costs of Availability Tests are borne by the Capacity Provider.

9.5.1.2 Notification of an Availability Test

613. ELIA instructs the Capacity Provider to perform an Availability Test via the CRM IT Interface as well as via email between 07:00 and 07:30 the day before it is to take place. ELIA includes in their instruction the quarter hour of the begin and the quarter hour of the end time of the Availability Test. The expected duration can be one of two options:
- the full SLA duration (if applicable, and only if the conditions of § 607 are fulfilled); or
 - one quarter hour.

The notification contains the quarter hour of the start and the quarter hour of the end time for the Availability Test. The quarter hour of the start and end times determine the period during which the Obligated Capacity is verified by ELIA. The quarter hours of the start and end time of the test are specified by ELIA. Within that period of time, the Capacity Provider has to deliver the Obligated Capacity (according to section 9.5.2.1).

As from the time of notification, the Capacity Provider is restricted from trading obligations on the CMU in the Secondary Market for the period falling within the quarter hour of the start and end time of the Availability Test. As a consequence, all transactions on the Secondary Market for the CMU for the concerned period of the Availability Test for which the Transaction Date

(according to section 10.5.2) later than the time of notification of the Availability Test are rejected (according to section 10.5.4.1).

At the explicit request of the TSO or DSO, a Test that was notified can be cancelled for system security reasons.

614. In case the CMU is part of a Linked Capacity, ELIA simultaneously instructs an Availability Test to each CMU that is part of the Linked Capacity for the same quarter hour of the start and end time and test duration. The CMUs that are part of the Linked Capacities that receive a simultaneous instruction for testing are permitted to exchange obligations on the Secondary Market, provided that both the CMU of the Buyer and the CMU of the Seller of the Obligation are part of the Linked Capacities.
615. Proven Availability for the purpose of determining the Secondary Market Remaining Eligible Volume, according to section 10.4.8.2, for ex-post trades in the above-mentioned case is equal to the Available Capacity determined in section 9.5.2.2.
616. In case the Availability Test concerns an Indirect Foreign Capacity or DSO-connected Delivery Points or CDS-connected Delivery Points when the CDS is connected to the DSO Grid, ELIA notifies the relevant Foreign TSO or DSO one week before the Test is to take place.

When the proposed Test moment is unfeasible for the Foreign TSO or DSO due to system security reasons, he notifies ELIA and proposes an alternative Test moment.

9.5.2 Determination of the Obligated Capacity and the Available Capacity

9.5.2.1 Determination of the Obligated Capacity

617. In case the Availability Test coincides with an AMT Moment, the Capacity Provider is held to the Obligated Capacity for the Availability Test as determined in this section rather than to the Obligated Capacity for the AMT MTUs.
618. For the Non-energy Constrained CMU ELIA tests outside the Winter Period whether the CMU is able to provide an instantaneous level of capacity that ensures the availability of the Total Contracted Capacity. ELIA does not test volumes which are part of Announced Unavailable Capacity (according to section 9.3.1). The Obligated Capacity is determined by the following formula:

$$P_{Obligated}(CMU, t) = \min \left(NRP(CMU, t) - P_{Unavailable, Announced}(CMU, t); Total Contracted Capacity(CMU, t) \right)$$

Where:

- t is a quarter hour within the quarter hour of the start and end time of the Availability Test;
- $NRP(CMU, t)$ is the CMU's last updated Nominal Reference Power, according to section 5.6;
- $P_{Unavailable, Announced}(CMU, t)$ is the Announced Unavailable Capacity, determined according to section 9.3.1. Only Announced Unavailable Capacity that was notified prior to the instruction of the Availability Test as per § 613 is taken into account;
- $Total Contracted Capacity(CMU, t)$ is the Total Contracted Capacity for the CMU established at the time of notification of the Availability Test.

This Obligated Capacity only applies between quarter hour of the start and the quarter hour of the end time of the Availability Test.

619. For the Energy Constrained CMUs and Non-energy Constrained CMUs during the Winter Period ELIA tests whether the CMU is able to provide an instantaneous level of capacity that ensures the availability of the Total Contracted Capacity (in accordance with the SLA if applicable), taking into account the applicable Derating Factor²⁷. ELIA does not test volumes which are part of Announced Unavailable Capacity (according to section 9.3.1). The Obligated Capacity is determined by the following formula:

$$P_{Obligated}(CMU, t) = \min \left(NRP(CMU, t) - P_{Unavailable, Announced}(CMU, t); \frac{Total\ Contracted\ Capacity(CMU, t)}{Derating\ factor(CMU, t)} \right)$$

Where:

- t is a quarter hour within the quarter hour of the start and the quarter hour of the end time of the Availability Test;
- $NRP(CMU, t)$ is the CMU's last updated Nominal Reference Power, according to section 5.6;
- $P_{Unavailable, Announced}(CMU, t)$ is the Announced Unavailable Capacity, determined according to section 9.3.1. Only Announced Unavailable Capacity that was notified prior to the instruction of the Availability Test as per § 613 is taken into account;
- $Total\ Contracted\ Capacity(CMU, t)$ is the Total Contracted Capacity for the CMU established at the time of notification of the Availability Test;
- $Derating\ factor(CMU, t)$ is calculated in accordance with the definition in chapter 3.

This Obligated Capacity only applies between the start and the quarter hour of the end time of the Availability Test.

9.5.2.2 Determination of the Available Capacity

620. Available Capacity during quarter hour of the start and the quarter hour of the end time is established as the share of the CMU's capacity that responded with delivery of energy to ELIA's test signal. ELIA establishes a contribution for each Delivery Point comprising the CMU.
621. For a Delivery Point i providing capacity by the potential for injecting energy into the electricity grid, it is equal to the injection at the Delivery Point. It is determined according to the following formula:

$$P_{Available, initial, i}(t) = -P_{measured, i}(t)$$

Where:

- $P_{measured, i}(t)$ is the 15-minute measurement in Delivery Point i during quarter hour t .

For a Delivery Point i providing capacity by the potential for reduction of offtake from the electricity grid (as per the information submitted according to section 5.2.3.1.1), it is equal to

²⁷ The resulting capacity represents a 'non-derated' quantity.

the reduction in offtake at the Delivery Point. It is determined according to the following formula:

$$P_{Available,initial,i}(t) = \text{Max}\{P_{Baseline,i}(t) - P_{measured,i}(t); 0\}$$

Where:

- $P_{measured,i}(t)$ is the quarter-hourly measurement in Delivery Point i and quarter hour t ;
- $P_{Baseline,i}(t)$ is the quarter-hourly Baseline for the Delivery Point i and quarter hour t , determined in annex 18.3.2 or 18.3.3.

622. For the CMU, during a quarter hour t , the initial Available Capacity is determined as the sum of the Available Capacity for its Delivery Points. This is defined by the following formula:

$$P_{Available,initial}(CMU, t) = \sum_{i=1}^n P_{Available,initial,i}(t)$$

Where:

- n is the number of Delivery Points comprising the CMU;
- $P_{Available,initial,i}(t)$ is Available Capacity for Delivery Point i during quarter hour t .

623. The CMU's Available Capacity is the sum of the initial Available Capacity in accordance with § 622 and the corrections, for frequency-related Ancillary Services and Redispatching Services determined as per annex 18.3.5.1 and 18.3.5.2, respectively. It is determined by the following formula for the CMU and AMT MTU t :

$$P_{Available}(CMU, t) = P_{Available,initial}(CMU, t) + V_{correction}(CMU, t)$$

624. During an Availability Test, ELIA may cross-check the Available Capacity of a Delivery Point located downstream of an Access Point with measurements at:

- the corresponding Access Point for an ELIA Grid-connected Delivery Point; and
- Access Point that corresponds to a Delivery Point connected to the grid of a Bordering Transmission System Operator; and
- Access Point that corresponds to a Delivery Point connect to the grid of a DSO; and
- the corresponding CDS Market Access Points for a CDS-connected Delivery Point (ELIA Grid-connected CDS).

In case of inconsistencies, ELIA may request the Capacity Provider to provide additional explanation.

9.6 MISSING CAPACITY AND UNAVAILABILITY PENALTY

625. The Missing Capacity of a CMU represents the amount of capacity that this CMU fails to make available in contradiction with its Availability Obligation.

ELIA determines a CMU's Missing Capacity based on the information collected during the Availability Monitoring and/or Availability Tests of the CMU (section 9.6.1).

626. The Capacity Provider is sanctioned with an Unavailability Penalty for any Missing Capacity on their CMU(s) (section 9.6.2).

ELIA notifies the Capacity Provider of any Missing Capacity and Unavailability Penalty for its CMU. The Capacity Provider has the right to contest any Unavailability Penalty (section 9.8).

In case of multiple Unavailability Penalties for the same CMU, ELIA applies an escalating penalties procedure (section 9.6.3).

9.6.1 Determination of Missing Capacity

627. The Missing Capacity of a CMU is equal to the maximum between the positive difference between Obligated and Available Capacity for a given AMT MTU during Availability Monitoring (see section 9.4) or quarter hour during an Availability Test (see section 9.5) and the positive difference between the amount of capacity that was contracted by means of an *ex-post* Secondary Market Transaction and its Proven Availability for a given AMT MTU during Availability Monitoring (see section 9.4). The amount of Available Capacity above the Obligated Capacity at any given moment is not taken into consideration in the determination of the Missing Capacity. ELIA does not consider any negative value for the Missing Capacity. The Missing Capacity for time t is determined by the following formula:

$$MC(CMU, t) = \text{Max}(P_{\text{Obligated}}(CMU, t) - P_{\text{Available}}(CMU, t); \text{Contracted Capacity}(CMU, t)_{\text{ex-post}} - \text{Proven Availability}(CMU, t); 0)$$

Where:

- t is either an AMT MTU or quarter hour within an Availability Test;
 - $P_{\text{Obligated}}(CMU, t)$ is the Obligated Capacity of the CMU for time t ;
 - $P_{\text{Available}}(CMU, t)$ is the Available Capacity of the CMU for time t ;
 - $\text{Contracted Capacity}(CMU, t)_{\text{ex-post}}$ is the sum of Contracted Capacities bought *ex-post* on the Secondary Market;
 - $\text{Proven Availability}(CMU, t)$ is the amount of Proven Availability of the CMU for time t , determined as per §§ 594 and 597.
628. After determining the Missing Capacity, ELIA determines the part considered as Announced Missing Capacity, based on both the Missing Capacity for time t and the Announced Unavailable Capacity. The following formula defines how this amount is calculated:

$$AMC(CMU, t) = \text{Min}(P_{\text{Unavailable, Announced}}(CMU, t); MC(CMU, t))$$

Where:

- t is either an AMT MTU or quarter hour within an Availability Test;
- $P_{\text{Unavailable, Announced}}(t)$ is the Announced Unavailable Capacity that covers the time t ;
- $MC(CMU, t)$ is the Missing Capacity of the CMU for time t .

ELIA determines the Unannounced Missing Capacity (UMC) based on both the Missing Capacity for time t and the Announced Missing Capacity for time t previously calculated. This amount represents the remaining Missing Capacity for time t and is calculated as follows:

$$UMC(CMU, t) = \text{Max}(MC(CMU, t) - AMC(CMU, t); 0)$$

Where:

- t is either an AMT MTU or quarter hour within an Availability Test;
- $MC(CMU, t)$ is the Missing Capacity of the CMU for the moment t ;
- $AMC(CMU, t)$ is the Announced Missing Capacity for time t .

Both values $AMC(CMU, t)$ and $MC(CMU, t)$ are used to calculate the amount of Unavailability Penalty.

By way of derogation of § 628, if any Missing Capacity has been determined during a period that has been declared by the Capacity Provider as a period of Scheduled Maintenance for the CMU as per section 9.3.2, this Missing Capacity is by default considered as Unannounced Missing Capacity.

9.6.2 Unavailability Penalty calculation

629. The Capacity Provider is sanctioned with an Unavailability Penalty for any Missing Capacity on their CMU(s). The Unavailability Penalty of a CMU is determined for the entire AMT Moment or Availability Test duration.
630. To calculate the amount of the Unavailability Penalty of a CMU, ELIA applies the following parameters according to this section:
- the penalty factor to be applied to the Missing Capacity; and
 - the weighted average contracted value of the CMU at time t corresponding to the AMT MTU or quarter hour within the Availability Test during which the Missing Capacity was determined; and
 - the duration expressed in MTUs of the AMT Moment or in quarter hours of the Availability Test for which the penalty applies; and
 - a constant number, defined as UP , equivalent to ELIA's expectation of the number of AMT Moments during which availability is verified by ELIA.
631. ELIA applies the penalty factor depending on the type of Missing Capacity and the time it occurs (time t). For both Unannounced and Announced Missing Capacity the penalty factor is set according to the season where the Missing Capacity was detected. The following table summarizes the value of the penalty factor X :

	Unannounced Missing Capacity 01/04/20xx – 31/10/20xx	Unannounced Missing Capacity 01/11/20xx-1 – 31/03/20xx	Announced Missing Capacity 01/04/20xx – 31/10/20xx	Announced Missing Capacity 01/11/20xx-1 – 31/03/20xx
Penalty factor (X)	0,5	1,4	0	0,9

Table 10 - Value of the Penalty factor (X)

632. The weighted contracted value of a CMU at time t corresponds to the Capacity Remuneration of each Transaction of the CMU with a Transaction Period covering time t weighted by the amount of Contracted Capacity in the Transaction. The value expressed in € per MW per year is determined by the following formula:

$$\text{weighted contracted value}(CMU, t) = \frac{\sum_{i=1}^N (\text{Capacity Remuneration}_i * \text{Contracted Capacity}_i)}{\sum_{i=1}^N \text{Contracted Capacity}_i}$$

Where:

- N is the number of Transactions (in Primary or Secondary Market) with a Transaction Period covering time t , being the AMT MTU for Availability Monitoring (see section 9.4) or quarter hour during an Availability Test (see section 9.5) during which Missing Capacity was determined.

633. The period for which the Unavailability Penalty applies is calculated can be one of the following:

- the number of quarter hours within the duration of the Availability Test (see section 9.5); or
- in case of an Energy-Constrained CMU, the number of SLA MTUs; or
- in all other cases, the number of AMT MTUs included in the considered AMT Moment.

634. ELIA calculates the Unavailability Penalty for each period as per § 633 with the following formula:

$$\begin{aligned} & \text{Unavailability Penalty [€]} \\ &= \frac{1}{Q * UP} \left[\sum_{t=1}^T (1 + X) * \text{weighed contract value}(CMU, t) * UMC(CMU, t) \right. \\ & \quad \left. + \sum_{t=1}^T (1 + X) * \text{weighed contract value}(CMU, t) * AMC(CMU, t) \right] \end{aligned}$$

Where:

- T are the MTUs of the AMT Moment or quarter hours of the Availability Test;
- Q is the total amount of AMT MTUs of the AMT Moment or quarter hours part of the Availability Test;
- X^{28} is the penalty factor to be applied to the Missing Capacity for time t (as in Table 10);
- $UMC(CMU, t)$ is the Unannounced Missing Capacity at time t according to section 9.6.1;
- $AMC(CMU, t)$ is the Announced Missing Capacity for time t according to section 9.6.1;
- UP is the number of AMT Moments where ELIA expects to verify the availability, namely equal to fifteen. It is an order of magnitude and not a limitation nor a minimum number of AMT Moments during which ELIA effectively verifies availability;
- $\text{weighed contract value}(CMU, t)$ is as described in § 632.

635. A limit applies to the total amount of the Unavailability Penalty applicable to a Capacity Provider for Transactions of a CMU over one Delivery Period and one month meeting one of the following conditions:

- it concerns a Transaction of the Primary Market; or
- the Transaction Period covers one or more full Delivery Periods.

²⁸ The value of X differs depending on the situation.

No limits apply to the total amount of Unavailability Penalties a Capacity Provider can receive for any other Transactions.

636. The limit of the Unavailability Penalty for the Delivery Period is equal to the sum of the awarded Capacity Remunerations for the Delivery Period multiplied with their respective Contracted Capacities as recorded on October 31 preceding the Delivery Period, for all Transactions of the CMU meeting one of the two above conditions.
637. The limit of the Unavailability Penalty for one month is equal to twenty percent of the sum of the awarded Capacity Remunerations for the Delivery Period multiplied with their respective Contracted Capacities as recorded on October 31 preceding the Delivery Period, for all Transactions of the CMU meeting one of the two above conditions.
638. In addition, the transaction(s) to which the limit apply is (are) no longer included in the above calculation of the weighted contract value for the remainder of the Delivery Period or month for the Delivery Period or monthly limit respectively.

9.6.3 Penalty escalation procedure

639. A Capacity Provider with a CMU, for which ELIA has determined Missing Capacity on three separate instances over the same Delivery Period, incurs a downwards revision of its Monthly Remuneration (as defined in the Capacity Contract) and is subject to other adaptations to its contractual situation, in accordance with the terms provided for in this section.
640. ELIA issues the downwards revision of the Monthly Remuneration of a CMU if:
- the CMU fails to meet its Availability Obligations three times over a Delivery Period during AMT Moments and/or Availability Tests. These three times do not require to be consecutive but do occur on separate calendar days; and
 - each of these failures constitutes an Unannounced Missing Capacity over twenty percent of Obligated Capacity established during an AMT Moment and/or Availability Test.
641. The Monthly Remuneration for the Capacity Provider is reduced by a factor equal to the maximum ratio of the three Unannounced Missing Capacities and the Obligated Capacity values established during the three failures.

However, the Capacity Provider retains the initial Availability Obligation and remains liable for possible Unavailability Penalties for that CMU as in the Capacity Contract before the downwards revision was issued. The Contracted Capacity is not altered.

642. The downwards revision of the Monthly Remuneration applies as of the moment of notification and is calculated *pro rata* starting from the day during which the third fault was established, regardless of the initiation of the contestation procedure. The agreement after contestation can be settled in a future invoice to the Capacity Provider. In addition, ELIA considers the reduction of the Nominal Reference Power when updating the volumes according to section 5.6.1.5.
643. For each month during which the Capacity Provider is subject to a reduced Monthly Remuneration, the reduced amount for that month is added as a penalty for that month. This penalty contributes to the limit of the Unavailability Penalty for a Delivery Period, calculated in accordance with § 635, for the CMU's Transactions to which such a limit applies.

Once the penalty cap is reached for the concerned Delivery Period, the original Monthly Remuneration is restored for the remainder of the ongoing Delivery Period and is calculated pro-rata based on the number of days starting from the day the limit was reached.

644. From the moment the Capacity Provider receives the downwards revision, the CMU has to successfully provide its Obligated Capacity three consecutive times during an AMT Moment and/or Availability Tests to reinstate the original Monthly Remuneration. For each of these three occurrences, the total Obligated Capacity must be fully covered by Proven Availability.

The original Monthly Remuneration is reinstated in the first monthly delivery activity report from the first day following the third consecutive successful Availability Test or successful AMT Moment. The Capacity Provider is informed via the Monthly Delivery Activity Report following the third consecutive successful AMT Moment or Availability Test and the remuneration for that month is calculated pro-rata the number of days starting from the first day after the third consecutive successful AMT Moment or Availability Test.

645. The Capacity Provider can request an Availability Test (according to section 9.5) to ELIA for the purpose of reinstating the Capacity Remuneration.
646. The downward revision automatically carries over to the next Delivery Period for multi-year Capacity Contracts and sequential one-year contracts if the Capacity Provider failed to recover the initial Monthly Remuneration before the end of the Delivery Period during which the downward revision was applied.
647. As long as the CMU has not reinstated its Monthly Remuneration in accordance with §§ 644 to 646, its Capacity Provider is prohibited from carrying out, for this CMU, a transaction on the Secondary Market as a Buyer of an Obligation.
648. In case a new Unannounced Missing Capacity greater than the previous three ones is determined by ELIA during an Availability Test or AMT Moments for this CMU before performing three consecutive successful tests or successful deliveries during an AMT Moment, ELIA updates the value of the downward revision of its Monthly Remuneration, calculated in accordance with the procedure referenced in § 642, taking into account this last Unannounced Missing Capacity. This update is applicable as from the moment of notification to the Capacity Provider.
649. In case the CMU was subject to a downwards revision of Monthly Remuneration during two consecutive Delivery Periods and the CMU each time failed to reinstate the original Capacity Remuneration within twelve weeks after the notification of the downward revision via the monthly delivery activity report, the Capacity Provider loses the possibility to reinstate the original Monthly Remuneration for the CMU. All current and future Contracted Capacities assigned to the CMU are reduced in proportion to the permanent reduction in Monthly Remuneration. Any Transactions having, as a result, zero MW Contracted Capacity are subsequently terminated, along with the associated rights and obligations.

9.7 OVERCAPACITY AND OVERCAPACITY PENALTY

650. For Non-daily Schedule CMUs, the Overcapacity represents the extra amount of capacity a CMU provides on top of its Required Volume.

ELIA determines the Overcapacity based on the information it gathers in the course of the Availability Monitoring of the CMU (section 9.7.1).

651. The Capacity Provider is penalized for a part of its Overcapacity with an Overcapacity penalty. (section 9.7.2).

ELIA notifies the Capacity Provider of any Overcapacity and Overcapacity penalty of its CMU(s). The Capacity Provider has the right to contest the Overcapacity penalty.

9.7.1 Overcapacity determination

652. The Overcapacity is only determined when the Required Volume is equal to zero.
653. The Overcapacity is not applicable during MTUs during which an activation of upwards Redispatching or frequency-related Ancillary Services upon request of ELIA (or the foreign TSO when applicable) has been made using Delivery Points of the CMU.
654. The Overcapacity of a CMU is equal to the initial Active Volume capped by the Obligated Capacity during an AMT MTU verified in the course of the Availability Monitoring (as per section 9.4) that exceeds 20 percent of the Nominal Reference Power. The Overcapacity (OC) for the MTU t is determined by the following formula:

$$OC(CMU, t) = \text{Max} \left(\text{Min} \left(V_{Act, initial}(CMU, t); P_{Obligated}(CMU, t) \right) - 0.2 * NRP(CMU, t); 0 \right)$$

Where:

- t is an AMT MTU verified in the course of the Availability Monitoring; and
 - $V_{Act, initial}(CMU, t)$ is the initial Active Volume of the CMU for moment t as per section 9.4.3.2.3.1; and
 - $P_{Obligated}(CMU, t)$ is the Obligated Capacity of the CMU for moment t as per section 9.4.3.1; and
 - $NRP(CMU, t)$ is the last updated Nominal Reference Power of the CMU as per section 5.6.
655. The Overcapacity is equal to zero during the AMT MTUs where the CMU is subject to an Availability Test (section 9.5).

9.7.2 Overcapacity penalty calculation

656. The Capacity Provider is penalized with an Overcapacity penalty based on the Overcapacity calculated in § 654. The Overcapacity penalty of a CMU is determined for the entire duration of the AMT Moment.
657. ELIA applies a penalty factor in function of the spread between the reference price (as per § 566) and the Declared Prices. This spread is the minimum between:
- The difference between either the lowest Partial Declared Day-Ahead Price or the Declared Day-Ahead Price and the reference price on the Day-Ahead market; and
 - the difference between either the lowest Partial Declared Intraday Price or the Declared Intraday Price and the reference price on the Intraday market; and
 - the difference between either the lowest Partial Declared Day-Ahead Price or the Declared Day-Ahead Price and the reference price on the Day-Ahead market.

The following table summarizes the applied penalty factor F :

	Price spread < 50 €/MWh	50€/MWh ≤ Price spread < 100 €/MWh	Price spread ≥ 100 €/MWh
Penalty factor (F)	0	1	2

Table 11 Values for the Penalty factor F

658. ELIA calculates the Overcapacity penalty in accordance with § 633 for every period in a way that is similar to section 9.6.2, with the following formula:

Overcapacity penalty =

$$\frac{1}{Q * UP} * \sum_{t=1}^T F * \text{weighted average contract value}(CMU, t) * OC(CMU, t)$$

Where:

- T are the MTUs of the AMT Moment or quarter hours of the Availability Test;
 - Q is the total amount of AMT MTUs of the AMT Moment or quarter hours part of the Availability Test;
 - UP is the number of AMT Moments where ELIA expects to verify the availability, namely equal to fifteen. It is an order of magnitude and not a limitation nor a minimum number of AMT Moments during which ELIA effectively verifies availability;
 - F is the penalty factor as per § 657; and
 - *weighted contract value*(CMU, t) is as described in § 632;
 - $OC(CMU, t)$ is the Overcapacity as described in section 9.7.1.
659. For every month where a Capacity Provider is effectively subject to an Overcapacity penalty, the penalty for the concerned month is added to the amount of penalties that contribute to the Unavailability Penalty cap for a Delivery Period, as described in § 635, for the Transactions of the CMU to which this cap applies.

9.8 NOTIFICATION AND CONTESTATION

9.8.1 Monthly delivery activity report

660. In accordance with the Capacity Contract and no later than the 15th day of month M+2, ELIA provides the Capacity Provider with the delivery activity report for his CMUs via the CRM IT Interface. The delivery activity report covers the entire month M and is created for all CMUs that are related to a Transaction with a Transaction Period that (partially) overlaps with month M.

The report contains at least the following information for all AMT MTUs subject to Availability Monitoring, selected in accordance with § 557, and for all MTUs during which an Availability Test of the CMU took place:

- Date and time; and
- The CMU's Available Capacity in MW; and
- The CMU's Proven Available Capacity and Unproven Available Capacity in MW; and
- The CMU's Obligated Capacity in MW; and
- The CMU's Missing Capacity in MW; and
- The CMU's Announced and Unannounced Missing Capacity in MW; and

- The ratio between the CMU's Unannounced Missing Capacity and the CMU's Obligated Capacity; and
- The CMU's Unavailability Penalty in €.
- The CMU's Overcapacity penalty in €.

In addition to the information set out above and in line with § 642, ELIA also includes the following information related to the Downward Revision in the report:

- Whether or not a downward revision of the monthly remuneration applies to the CMU; and
- In case the downward revision applies, the factor that will be applied to the monthly remuneration, calculated in accordance with § 641; and
- In case the downward revision applies, the total amount of downwards revision that is applied in the form of a penalty, in accordance with § 643.
- If the downwards revision is removed in the course of the month M, the moment where the downwards revision is removed;
- Whether the downwards revision is permanently applied.

661. ELIA informs the CREG about the performance of the Capacity Providers and their Contracted CMUs during the Delivery Period. To this end, ELIA sends the delivery activity reports of all CMUs related to a Transaction that (partially) overlaps with month M to the CREG within one Working Day after sending the delivery activity report to the Capacity Providers, in accordance with § 660.

In addition to the abovementioned delivery activity reports, ELIA also sends a separate report to the CREG that contains the following information for each CMU related to a Transaction that (partially) overlaps with month M:

- the sum of all Unavailability Penalties occurring in month M in €; and
- the sum of all Overcapacity penalties occurring in month M in €; and
- the total Effective Payback Obligation occurring in month M in euros; and
- the total Effective Payback Obligation paid by the Capacity Provider for month M.

Lastly, the report that covers the first month M of a Delivery Period also contains the following information:

- the total value of any Pre-Delivery Penalties related to the Transaction in euros; and
- the total reduction of the Transaction Contracted Capacity in MW.

ELIA also sends a monthly report concerning the Tests, that at the least contains the list of tested CMUs, the time, duration and result of the Test and, if applicable, the consequences.

9.8.2 Settlement of the Availability Obligation

662. The Capacity Provider sends a credit note for the Unavailability Penalties or the Overcapacity penalties downwards revision of its CMU's Transactions in accordance with the terms set out in the Capacity Contract.

663. The delivery activity report, as detailed in § 660, is part of the credit note sent by the Capacity Provider.

9.8.3 Contestation

664. If the Capacity Provider wishes to contest any parameters or calculation leading to an Unavailability Penalty and/or Overcapacity penalty or downwards revision, he has twenty Working Days from the notification of the delivery activity report to notify such motivated contestation to ELIA. In such a case, the Capacity Provider and ELIA enter into negotiations in order to reach an amicable agreement within sixty Working Days as of the date of notification of contestation by the Capacity Provider. ELIA and the Capacity Provider may request additional information from each other on the parameters in the delivery activity report if needed.

In case a partial or total amicable agreement is reached between the parties within sixty Working Days, this agreement will give rise, where applicable, to a credit note for the amount subject of the agreement, in accordance with the Capacity Contract.

If within sixty Working Days no partial or total agreement is found, the disputed amount or part of the disputed amount of the Unavailability Penalty and/or Overcapacity penalty is the subject of a separate credit note in accordance with the Capacity Contract and at the same time, both parties continue to seek an amicable solution within the sixty Working Days following the end of the first period of sixty Working Days.

In case an amicable agreement is reached between the parties in the second sixty Working Days, this agreement will result, where applicable, in a corrective invoice related to the amount that was the subject of the separate credit note, in accordance with the Capacity Contract.

If within sixty Working Days still no such agreement has been reached, the parties commence the litigation procedure in accordance with chapter 14.

10 SECONDARY MARKET

10.1 INTRODUCTION

This chapter describes the Secondary Market, which allows the transfer of (part of) the Contracted Capacity of a CMU to another CMU.

It explains the principles, conditions and the different processes that are to be followed by the Parties on the Secondary Market in order to participate to the Secondary Market.

Section 10.2 provides the general provisions which form the basis for more elaborate rules in the subsequent sections.

Section 10.3 describes the conditions for the Parties on the Secondary Market and their CMUs to notify a Secondary Market transaction to ELIA.

Section 10.4 describes the content of a Secondary Market transaction and the related requirements in order to obtain an approved Secondary Market transaction, conditions in Section 10.3 notwithstanding.

Section 10.5 describes the process of notification to ELIA of a Secondary Market transaction to ELIA and its approval or rejection by ELIA.

Section 10.6 describes the process of contractual modification for ELIA resulting from an approved Secondary Market transaction.

Section 10.7 describes the Capacity Contract's possible escalation of penalties in case of underperformance of CMUs having concluded a Secondary Market Transaction.

Section 10.8 describes the start, accessibility and end of the Secondary Market.

Finally, section 10.9 describes the high-level IT requirements of a functioning and efficient Secondary Market participation.

10.2 GENERAL PROVISIONS

665. Parties on the Secondary Market may participate in the Secondary Market on a voluntary basis, provided they meet the necessary requirements according to section 10.3.
666. The Secondary Market process is solely a title transfer facility that is part of the CRM IT Interface. The process entails a notification of the Secondary Market transaction between the Parties on the Secondary Market, as well as the processing of received information and approval or rejection of it. Approved transactions result in a modification of the obligations and remuneration of the involved parties in accordance with the content of the approved Transaction.
667. The term 'Secondary Market transaction' is to be distinguished from the defined term Transaction. The Secondary Market transaction consists of a joint request, subject to approval, from a Seller of an Obligation and a Buyer of an Obligation to transfer rights and obligations, or from an Exchange. The approval of a Secondary Market transaction leads to the creation/modification of Transactions, which are registered by ELIA in the Capacity Contract.

In this section, the term "Transaction Period" refers to the Transaction Period related to a transaction on the Secondary Market, unless otherwise expressly stated.

A transaction on the Secondary Market can be made ex-ante or ex-post:

- An "ex-ante transaction on the Secondary Market" has a Transaction Period start date and time after the Transaction Date.
- An "ex-post transaction on the Secondary Market" has a Transaction Period end date and time before or equal the Transaction Date, taking into account the deadline pursuant to § 695.

This is to be distinguished from the status of the resulting Transaction:

- A Transaction resulting from an ex-ante transaction on the Secondary Market is given an "ex-ante status", similar to Transactions created in the Primary Market;
- A Transaction with an "ex-post status" is a Transaction resulting from an ex-post transaction on the Secondary Market.

668. The phases prior to the notification towards ELIA of a Secondary Market transaction are arranged either solely between the Parties on the Secondary Market, or via an Exchange. No interventions by ELIA are provided for during these phases.
669. The process to be followed in order to successfully notify a Secondary Market transaction is performed by:
- both Parties on the Secondary Market: a primary Party on the Secondary Market submits a notification of the Secondary Market transaction to ELIA via the CRM IT Interface, after which the secondary Party on the Secondary Market confirms or rejects the data; or
 - the Exchange mandated by both Parties on the Secondary Market for the notification of the Secondary Market transaction to ELIA via the CRM IT Interface.
670. ELIA is not required to make its own Exchange or trading platform for Secondary Market transactions available to Secondary Market parties. Its role, in connection with these Functioning Rules, is to provide and manage the process of notification of Secondary Market transactions via the title transfer facility, approve or reject Secondary Market transactions, publish the relevant data listed in chapter 16 and update the contractual modalities accordingly.
671. The Secondary Market transactions are processed by ELIA. Therein, ELIA performs a verification on the submitted data to ensure that the content is consistent with the contractual information and remains within the limits of involved CMUs' maximum capacity. However, ELIA does not judge the quality of the transaction from a business point of view and cannot be held responsible for losses incurred on approved transactions, meeting the requirements of this chapter. ELIA is not responsible for any arrangements, of any kind, made between Secondary Market Parties and, where applicable, an Exchange.
672. A Secondary Market transaction can be notified solely after the opening of the Secondary Market according to section 10.8.1 and no Secondary Market transaction can be notified after the closure of the Secondary Market according to section 10.8.3.
673. Any approved Secondary Market transaction implies a full transfer of the contractual rights (e.g., the payment of the Capacity Remuneration) and obligations (e.g., the Availability Obligation) between the Secondary Market Parties. The Seller of an Obligation yields the specified amount of Contracted Capacity and associated rights and obligations from a Transaction in their Capacity Contract to the Buyer of an Obligation via a new Transaction under the Capacity Contract of the Buyer of this Obligation.

674. The approval of a Secondary Market transaction notified by the Secondary Market Parties or by an Exchange results in contractual implications for the Secondary Market Parties, according to section 10.6.
675. All formulas described in sections 10.4 and 10.5 are related to parameters evolving in time and incorporate all parameters and Transactions (incl. modifications) in the Capacity Contract. At any time, the most recent data are used by ELIA for the approval or rejection of a Secondary Market transaction.
676. Two dimensions of time determine the applied parameters in the formulas for this section:
- the t_{notif} defining the moment at which ELIA acknowledges reception of the notification of the Secondary Market transaction, according to § 745; and
 - the Transaction Period TP on which the Secondary Market transaction applies.
677. A granularity of 0,01 MW is applicable for MW data.
678. The rounding rule is rounding-up so that the result is rounded up or down to the nearest number (with a rounding-up if there is no nearest number) and applies to each formula.

10.3 CONDITIONS FOR SECONDARY MARKET PARTICIPATION

679. To participate in the Secondary Market, the Secondary Market Parties and their CMUs must satisfy the conditions stipulated in this section.
680. Potential Parties on the Secondary Market that mandated an Exchange to notify on their behalf a Secondary Market transaction must equally satisfy these conditions.
681. Exchanges may only participate in the Secondary Market on behalf of Parties on the Secondary Market if they meet the conditions in section 10.3.2.
682. ELIA exclusively approves Secondary Market transactions that comply with the conditions set out in this section. In case of non-compliance, these Secondary Market transactions are rejected. ELIA does so via the process detailed in section 10.5.4.

10.3.1 Conditions for Parties on the Secondary Market

683. Only Capacity Providers are entitled to be Sellers of an Obligation.
684. The Buyer of an Obligation is either a Prequalified CRM Candidate or a Capacity Provider.
685. The Buyer of an Obligation cannot be subject to contractual restrictions inhibiting him from participating to the Secondary Market as a result of an Availability Test pursuant to § 613 , or as a result of the penalty escalation process, according to § 647 and § 778.

10.3.2 Conditions for Exchanges

686. To participate in the Secondary Market, an Exchange should be mandated by the two Parties on the Secondary Market each having signed a valid Secondary Market Exchange Mandate, duly communicated to ELIA for registry.

687. The Secondary Market Exchange Mandate is completed, signed and sent to ELIA by both the Exchange and the Parties on the Secondary Market.
688. The notifications of Secondary Market transactions can be sent by the Exchange at the earliest five Working Days after reception by ELIA of duly completed and signed Market Exchange Mandates.
689. A Secondary Market Exchange Mandate can be revoked in two ways:
- either unilaterally, by one of the Secondary Market Parties that gave the Market Exchange Mandate, by sending to ELIA a completed and signed copy of annex 18.4.1 with option B.1 selected. The revocation takes effect twenty Working Days after receipt by ELIA of the completed copy;
 - or by mutual agreement between the Exchange and the Secondary Market Party that gave the Market Exchange Mandate, by sending jointly to ELIA a completed and signed copy of annex 18.4.1 with option B.2 selected. The revocation takes effect five Working Days after receipt by ELIA of the completed copy.
690. As from the day the revocation takes effect, ELIA no longer approves Secondary Market transactions submitted by the Exchange for the concerned Prequalified CRM Candidate or Capacity Provider, be it new or in process.

10.3.3 Conditions for CMUs

691. A Secondary Market transaction is solely considered if it involves two different CMUs: the CMU of the Seller of an Obligation and the CMU of the Buyer of an Obligation.
692. A CMU must meet the following criteria for participation in the Secondary Market:
- in case it concerns the CMU of the Seller of an Obligation, it has a positive Contracted Capacity on the Transaction Period, according to section 10.4.8.1; and
 - in case it concerns the CMU of the Buyer of an Obligation, it is an Existing CMU that is prequalified for each Delivery Period (partly) covered by the Transaction Period and it has a positive Secondary Market Remaining Eligible Volume for at least one Market Time Unit during the current or future Delivery Period(s), covered by the Secondary Market Transaction according to section 10.4.8.2.
693. A Buyer of an Obligation can only use an Energy-constrained CMU without Daily Schedule for ex-post transactions if the CMU was already subject to a Capacity Contract that covers the entire Transaction Period of the ex-post transaction on the Secondary Market at the Transaction Date in order to ensure that the Proven Availability can be calculated (cf. section 10.4.8).

10.4 SECONDARY MARKET TRANSACTIONS REQUIREMENTS

694. ELIA exclusively approves Secondary Market transactions complying with all the requirements listed in this section. Secondary Market transactions that do not match these requirements are rejected. ELIA does so via the process detailed in section 10.5.4.
695. The Transaction Date cannot exceed the start of the Transaction Period by more than ten Working Days.

696. In case of a bilateral Secondary Market transaction (i.e. without the involvement of an Exchange), a primary Party on the Secondary Market submits a notification to ELIA via the CRM IT Interface containing all the information relating to the Secondary Market transaction, after which the secondary Party on the Secondary Market confirms or reject it.
697. In case of a Secondary Market transaction notified via an Exchange, both Parties on the Secondary Market approve the content of the Secondary Market transaction prior to the notification thereof according to § 743. The Exchange submits a single notification on their behalf.
698. The Secondary Market Transaction contains all the information listed in the Table 12 and respects the stated format.

Information	Type	Unit	Information	Details
Secondary Market transaction ID	6 alphabet letters followed by 6 digits	NA	The automatically generated ID of the Secondary Market transaction	As detailed in section 10.4.1
Seller of an Obligation	Capacity Provider ID	NA	Identification of the Capacity Provider considered as the Seller of an Obligation	As detailed in section 10.4.2
CMU of the Seller of an Obligation	CMU ID	NA	Identification of the CMU of the Seller of an Obligation	As detailed in section 10.4.3
Country of the CMU of the Seller of an Obligation	"BE", "NL", "DE" or "FR"	NA	Country of the CMU of the Seller of an Obligation	As detailed in section 10.4.3
Transaction of the Seller of an Obligation's CMU	Transaction ID	NA	Identification of the Transaction from which the obligation is deducted for the CMU of the Seller of an Obligation	As detailed in section 10.4.4
Buyer of an Obligation	Capacity Provider ID or Prequalified CRM Candidate ID	NA	Identification of the Capacity Provider or Prequalified CRM Candidate considered as the Buyer of an Obligation	As detailed in section 10.4.5
CMU of the Buyer of an Obligation	CMU ID	NA	Identification of the CMU taking over the obligation	As detailed in section 10.4.6
Country of the CMU of the Buyer of an Obligation	"BE", "NL", "DE" or "FR"	NA	Country of the CMU taking over the obligation	As detailed in section 10.4.6
Secondary Market Capacity	Decimal number	MW	The volume of the Secondary Market Capacity that is transferred	As detailed in section 10.4.8
Transaction Period	Date / Time to Date / Time	Time	The Transaction Period indicating the start date/time until the end date/time (included)	As detailed in section 10.4.7
Capacity Remuneration	Decimal number	€/MW/year	The Capacity Remuneration of the identified Transaction of the CMU of the Seller of an Obligation	As detailed in section 10.4.9

Strike Price of the Transaction	Decimal number	€/MWh	The Strike Price of the identified Transaction of the CMU of the Seller of an Obligation	As detailed in section 10.4.10
Auction year for the monthly actualization of the Strike Price	Integer or "NA"	Year	The monthly actualization of the Strike Price in time represented by its parameter Auction year	As detailed in section 10.4.10
Auction type for the monthly actualization of the Strike Price	"Y-4", "Y-2", "Y-1" or "NA"	NA	The monthly actualization of the Strike Price in time represented by its parameter Auction type Y-4, Y-2 or Y-1	As detailed in section 10.4.10

Table 12 – Requirements on the notification content of a Secondary Market transaction

10.4.1 Secondary Market transaction ID

699. A *Secondary Market transaction ID* is generated in the Secondary Market module of the CRM IT Interface, applicable for both the Buyer of the Obligation and the Seller of the Obligation. This *Secondary Market transaction ID* is composed of six letters (of the Latin alphabet of twenty-six letters) followed by six digits (each from zero to nine).

The *Secondary Market transaction ID* is unique and has never been used previously in a Secondary Market transaction, whether for a transaction that is in process, rejected or approved.

10.4.2 Seller of an Obligation

700. The Seller of an Obligation is exclusively identified by its *Capacity Provider ID*, listed in annex A of its Capacity Contract.

10.4.3 CMU of the Seller of an Obligation

701. The CMU of the Seller of an Obligation is exclusively identified by its *CMU ID*, listed in annex A of its Capacity Contract.

702. The CMU of the Seller of an Obligation is associated to a single country, determined by the geographical location of the Delivery Point(s) included in the CMU.

10.4.4 Transaction of the Seller of an Obligation's CMU

703. The Secondary Market transaction contains the Transaction ID, as listed in annex A of the Capacity Contract of the Seller of an Obligation. After approval of the transaction on the Secondary Market, annex A of its Capacity Contract is updated, and the Secondary Market Capacity is deducted from the Contracted Capacity related to relevant Transaction ID.

10.4.5 Buyer of an Obligation ID

704. The Buyer of an Obligation is identified as follows:

- if it concerns a Capacity Provider, by its *Capacity Provider ID*, as specified in its Capacity Contract, annex A; or

- if it concerns a Prequalified CRM Candidate, by its *Prequalified CRM Candidate ID* communicated in connection with the Prequalification Process.

10.4.6 CMU of the Buyer of an Obligation

705. The CMU of the Buyer of an Obligation is identified by its *CMU ID*, communicated in the Prequalification Process or in annex A of the Capacity Contract.
706. The CMU of the Buyer of an Obligation is associated to a country, determined by the geographical location of the Delivery Point(s) included in the CMU.
707. The CMU of the Buyer of an Obligation is prequalified for all MTUs of the Transaction Period of the transaction on the Secondary Market.

10.4.7 Transaction Period

708. The Transaction Period is composed of a start date/start time (date and Market Time Unit (MTU) (hh:mm:ss)) and an end date/end time (date and Market Time Unit).
709. As a general rule, the granularity in terms of period covered by the Secondary Market transaction is, unless further specified in the further paragraphs of this section:
 - one full calendar day (measured from 00:00 to 23:59) or multiple consecutive full calendar days during the same Delivery Period or multiple Delivery Period(s); or
 - one Market Time Unit or multiple consecutive Market Time Units within a single calendar day.
710. The Transaction Period of the Secondary Market transaction cannot cover more than one Delivery Period at a time.
711. The Transaction Period of the Secondary Market transaction is equal to or part of the Transaction Period of the corresponding Transaction ID of the Seller of an Obligation's CMU in annex A of the Capacity Contract.
712. In case the Transaction of the Seller of an Obligation was obtained on the Primary Market and covers more than one Delivery Period and the Investment File relating to the CMU of this Seller of an Obligation has not yet undergone the ex post control as described in articles 12 to 18 of the Royal Decree on "Investment Thresholds", then the Transaction Period on the Secondary Market cannot exceed one full Delivery Period and shall only be notified during the Delivery Period immediately preceding the one covered by the Transaction Period.
713. The Transaction Period for an ex-ante Secondary Market transaction, as determined according to section 10.5.3, transferring an obligation from or to an Energy Constrained CMU covers one or multiple full calendar days (i.e. from 00:00 to 23:59 for each day in the Transaction Period).
714. The Transaction Period for an ex-post Secondary Market transaction, as determined according to section 10.5.3, covers an MTU or a set of consecutive MTUs considered as AMT MTU(s) within the same calendar day. Any Transaction Period of an ex-post Secondary Market transaction including at least one MTU not considered as an AMT MTU is rejected according to § 756.

An exception applies for ex-post Secondary Market transactions during an Availability Test, exclusively permitted under the conditions of § 614. There, the Transaction Period may cover any MTU to which the Obligated Capacity applies, according to §§ 618 and 619.

10.4.8 Secondary Market Capacity

715. The Secondary Market Capacity is a fixed positive value in MW over the Transaction Period TP .
716. The value of the Secondary Market Capacity does not exceed the limitations specified in this section. These limitations are based on the characteristics of the involved CMUs, belonging to the Buyer of an Obligation and the Seller of an Obligation.
717. All parameters and characteristics in this section are evaluated on the time of notification t_{notif} , the moment at which ELIA acknowledges reception of the notification according to section 10.5.2.

10.4.8.1 Limitations relative to the Seller of the Obligation's CMU

718. The Secondary Market Capacity of a CMU of the Seller of an Obligation is limited to the minimum Contracted Capacity over the Transaction Period TP . This is represented by the following formula:

$$\text{Secondary Market Capacity}(\text{CMU}) \leq \text{Contracted Capacity}_{\min}(\text{CMU}, \text{Transaction ID}, TP)$$

Where:

- Transaction ID refers to the unique identifier of a Transaction of the Seller of an Obligation's CMU according to section 10.4.4 as specified in the annex A of the Capacity Contract or in the CRM IT Interface; and
- $\text{Contracted Capacity}_{\min}(\text{CMU}, \text{Transaction ID}, TP)$ is the minimum Contracted Capacity associated to the Transaction identified by its Transaction ID in annex A of the CMU's Capacity Contract over the Transaction Period TP ; and
- TP is the Transaction Period of the Secondary Market transaction according to 10.4.7.

10.4.8.2 Limitations relative to the Buyer of the Obligation's CMU

719. The Secondary Market Capacity does not exceed the Secondary Market Remaining Eligible Volume (SMREV) for the CMU of the Buyer of an Obligation.

This is represented by the following formula:

$$\text{Secondary Market Capacity} \leq \text{SMREV}(\text{CMU}, TP)$$

The method for determining the Secondary Market Remaining Eligible Volume differs based on whether the CMU of the Buyer of an Obligation is an Energy Constrained CMU or a Non-Energy Constrained CMU and is calculated in accordance with §§ 720 to 722.

720. For Secondary Market Transactions with the status "ex-ante", the Secondary Market Remaining Eligible Volume of a Non-Energy-Constrained CMU and an Energy Constrained CMU is equal to the positive result of the Remaining Maximum Capacity, reduced by the Total Contracted Capacity divided by the Derating Factor and Opt-Out Volume "IN", and then multiplied by the Last Published Derating Factor. This is represented by the following formula:

$$SMREV(CMU, TP) = \text{Max} \left(0 ; (\text{Remaining Maximum Capacity}_{min}(CMU, TP) - \frac{\text{Total Contracted Capacity}_{max}(CMU, TP)}{\text{Derating Factor}(CMU, t)} - \text{OptOut Volume}_{max}(CMU, TP)) \cdot \text{Last Published Derating Factor}(CMU) \right)$$

Where:

- *Derating Factor*(*CMU, t*) is the weighted average Derating Factor of all Transactions in annex A of the CMU's Capacity Contract that constitute the *Total Contracted Capacity_{max}*(*CMU, TP*) over the Transaction Period *TP*, calculated in accordance with the definition in chapter 3; and
- *TP* is the Transaction Period of the Secondary Market transaction according to 10.4.7; and
- *Remaining Maximum Capacity_{min}*(*CMU, TP*) is the minimum value of the CMU's Remaining Maximum Capacity applicable by considering unavailability declarations according to section 9.3.1, over the Transaction period *TP*; and
- *OptOut Volume_{max}*(*CMU, TP*) is the maximum Opt-out Volume of the CMU, that was classified as "IN" in accordance with section 5.4.2, over the Transaction Period *TP*; and
- *Last Published Derating Factor*(*CMU*) is the last published value of the Derating Factor selected by the CMU in accordance with section 10.4.8.3; and
- *Total Contracted Capacity_{max}*(*CMU, TP*) is the maximum of the CMU's Total Contracted Capacity over the Transaction Period *TP*.

721. For Secondary Market Transactions with either the status "ex-post", the Secondary Market Remaining Eligible Volume of a Non-Energy Constrained CMU of the Buyer of an Obligation is equal to the positive result of the Remaining Maximum Capacity, reduced by the Opt-out Volume "IN", multiplied by the Last Published Derating Factor and then reduced by the Total Contracted Capacity. This is represented by the following formula:

$$SMREV(CMU, TP) = \text{Max}\{0; \text{Remaining Maximum Capacity}_{min}(CMU, TP) - \text{OptOut Volume}_{max}(CMU, TP) \cdot \text{Last Published Derating Factor}(CMU) - \text{Total Contracted Capacity}_{max}(CMU, TP)\}$$

Where:

- *TP* is the Transaction Period of the Secondary Market transaction according to 10.4.7; and
- *Remaining Maximum Capacity_{min}*(*CMU, TP*) is the minimum value of the CMU's Remaining Maximum Capacity applicable by considering unavailability declarations according to section 9.3.1, over the Transaction period *TP*; and
- *OptOut Volume_{max}*(*CMU, TP*) is the maximum Opt-out Volume of the CMU, that was classified as "IN" in accordance with section 5.4.2, over the Transaction Period *TP*; and
- *Last Published Derating Factor*(*CMU*) is the last published value of the Derating Factor selected by the CMU in accordance with section 10.4.8.3; and
- *Total Contracted Capacity_{max}*(*CMU, TP*) is the maximum of the CMU's Total Contracted Capacity over the Transaction Period *TP*.

722. For Secondary Market Transactions with the status "ex-post", the Secondary Market Remaining Eligible Volume of an Energy-Constrained CMU is equal to the positive result of the

Remaining Maximum Capacity, reduced by the Opt-Out Volume “IN”, multiplied by the Last Published Derating Factor and reduced by the Obligated Capacity. This is represented by the following formula:

$$SMREV(CMU, TP) = \text{Max} \left(0 ; \text{Remaining Maximum Capacity}_{\min}(CMU, TP) - P_{\text{Obligated, max}}(CMU, TP) - \text{OptOut Volume}_{\max}(CMU, TP) * \text{Last Published Derating Factor}(CMU) \right)$$

Where:

- *TP* is the Transaction Period of the Secondary Market transaction according to 10.4.7; and
- *Remaining Maximum Capacity_{min}(CMU, TP)* is the minimum value of the CMU’s Remaining Maximum Capacity, according to section 9.3.1, over the Transaction period *TP*; and
- *OptOut Volume_{max}(CMU, TP)* is the maximum Opt-out Volume of the CMU, that was classified as “IN” in accordance with section 5.4.2, over the Transaction Period *TP*; and
- *Last Published Derating Factor(CMU)* is the last published value of the Derating Factor selected by the CMU in accordance with section 10.4.8.3; and
- *P_{Obligated, max}(CMU, TP)* is the maximum value of the Obligated Capacity, calculated in accordance with section 9.4.3.1.3, of the CMU over the Transaction Period *TP*.

723. For a Secondary Market transaction between a Buyer of an Obligation and a Seller of an Obligation with a Foreign CMU located in the same country, the Secondary Market Capacity does not exceed the Contracted Capacity of the Seller of the Obligation. If the Foreign CMUs are not located in the same country, the Secondary Market Capacity does not exceed the Remaining Maximum Entry Capacity on the border between Belgium and the adjacent European Member State where the Foreign CMU of the Buyer of the Obligation is located. This is represented by the following formula:

$$\text{Secondary Market Capacity} \leq RMEC(\text{border}, TP)$$

The Remaining Maximum Entry Capacity is calculated in accordance with § 724.

724. The Remaining Maximum Entry Capacity (RMEC) for a border is calculated as the difference between the total Bid volume of the Indirect Foreign Capacity that has been selected from Bids in the Y-1 Auction across this border, reduced by the maximum Total Contracted Capacity for Foreign CMUs across this border, over the Transaction Period *TP*. This is represented by the following formula:

$$\begin{aligned} RMEC(\text{border}, TP) \\ = \text{Max}(0; \text{Foreign volume selected in Auction}(\text{border}, TP) \\ - \text{Total Contracted Capacity}_{\max}(\text{border}, TP)) \end{aligned}$$

Where:

- *border* is the border between Belgium and the adjacent European Member State; and
- *TP* is the Transaction Period of the Secondary Market transaction according to section 10.4.7; and
- *Foreign volume selected in Auction(border, TP)* is the total Bid volume of all Foreign CMUs located in the adjacent European Member State selected in the Y-1 Auction over the Transaction Period *TP*; and

- *Total Contracted Capacity_{max} (border, TP)* is the maximum Total Contracted Capacity of all Foreign CMUs located in the adjacent European Member State over the Transaction Period *TP*.

10.4.8.3 Last Published Derating Factor applying to a Secondary Market transaction

725. The Last Published Derating Factor applying to the Secondary Market Remaining Eligible Volume of a Transaction on the Secondary Market, according to section 10.4.8.2, is defined by t_{notif} and the Delivery Period covering the Transaction Period.
726. At t_{notif} , the Last Published Derating Factor applying to the Secondary Market transaction is the last published value of the Derating Factor applicable to the CMU of the Buyer of an Obligation's category applicable to the first Delivery Period covering (part of) the Transaction Period.
727. If at t_{notif} , no Derating Factor is published for the Delivery Period covering the Transaction Period, the Last Published Derating Factor applying to the Secondary Market transaction is the last published value of the Derating Factor category for the CMU of the Buyer of an Obligation's category, applicable to the Delivery Period nearest to the first Delivery Period covering (part of) the Transaction Period.

10.4.9 Capacity Remuneration

728. The Capacity Remuneration is a value in €/MW/y.
729. The Capacity Remuneration corresponds to the Capacity Remuneration initially awarded in the Auction to the CMU of the Seller of an Obligation. The remuneration is listed in the Capacity Contract annex A.

10.4.10 Strike Price

730. The Strike Price is a value in €/MWh.
731. The original Strike Price and the parameters for its actualization applicable to the Transaction of the CMU of the Seller of an Obligation, set out in the Capacity Contract annex A remain applicable to the transaction on the Secondary Market.

10.4.11 Requirement of Financial Security

732. For any ex-ante Secondary Market transaction notified at a certain moment in time t_{notif} prior to the start of the Delivery Period covering the start date of Transaction Period, the Buyer of an Obligation increases its Financial Security in accordance with section 11.2.
733. Such Secondary Market transaction for which the Buyer of an Obligation provides an insufficient (increase of the) Financial Security is rejected according to § 756.

10.4.12 Version of the Functioning Rules applicable to a Transaction

734. The last version of the Functioning Rules is applicable to all Transactions on the Secondary Market, except for any paragraphs that do not apply retro-actively, contained in annex 18.8.

735. For the paragraphs that are not applicable retro-actively, contained in annex 18.8, the Transaction Date of the original Primary Market Transaction determines the version of the Functioning Rules that are applicable to these paragraphs.

10.5 SECONDARY MARKET TRANSACTION APPROVAL PROCESS

736. Prequalified CRM Candidates and Capacity Providers, wishing to obtain approval for a Secondary Market transaction comply with the process described in this section.
737. Obtaining the approved status for a Secondary Market transaction is only possible in case of compliance with the conditions for participation in the Secondary Market, as detailed in section 10.3, and the requirements of the Secondary Market transaction, as detailed in section 10.4.
738. During an Auction process, ELIA does not process any transactions on the Secondary Market with a Transaction Period that covers (part of) the Delivery Period of the Auction and with a Transaction Date later than 15 Working Days before the Bid submission deadline.
739. For CMUs that participate to an Auction, ELIA does not process any transactions on the Secondary Market with a Transaction Period that covers (part of) the Delivery Period(s) covered by the Bid(s) in the Auction between Bid submission and Capacity Contract signing for the selected Bids.

10.5.1 Notification of a Secondary Market transaction

740. Any notification of a Secondary Market transaction made by the Secondary Market Parties or by an Exchange is submitted via the CRM IT Interface.
741. In case the Parties on the Secondary Market have not mandated an Exchange, a first Party on the Secondary Market submits a notification to ELIA via the CRM IT Interface containing all the information relating to the Secondary Market transaction, after which the second Party on the Secondary Market confirms or rejects it. Such confirmation or rejection of the secondary Party on the Secondary Market is not required if the Buyer of an Obligation and Seller of Obligation are the same Capacity Provider.
742. If at the latest three Working Days after the first notification by a Party on the Secondary Market, the other party has not confirmed the notification, ELIA communicates at the latest the next Working Day by email and/or via the CRM IT Interface to the Parties on the Secondary Market, the rejection of the Secondary Market transaction.
743. In case of a Secondary Market transaction notified by an Exchange, according to § 697, the notification process of the Secondary Market transaction consists of one single notification, with the content as detailed in § 694. The Exchange carries out this notification content through its individual access to the CRM IT Interface.
744. In case of an ex-ante transaction on the Secondary Market, the Buyer of an Obligation may still have to provide the following information during the notification of a Secondary Market transaction via the CRM IT Interface:
- Initial choice of NEMO; and/or
 - Initial choice of Declared Day-ahead Price (DDAP).

In case of absence of the NEMO determination during the Secondary Market ex-ante transaction notification or in case of missing or conflicting data related to a specific CMU's NEMO choice, the Day-ahead Market Price is used as fallback value.

In case of absence of the initial choice of Declared Day-ahead Price, the Remaining Maximum Capacity is considered equal to zero as per § 564.

10.5.2 Acknowledgement of receipt by ELIA

745. ELIA acknowledges receipt of the notifications in respect of the Parties on the Secondary Market or the Exchange (as applicable) in compliance with sections 10.4.1 and 10.5.1:

- in case of Secondary Market transaction, notified by the Parties on the Secondary Market, the acknowledgement of reception is sent by ELIA to the Parties on the Secondary Market within one Working Day after reception of the first notification.
- in case of a Secondary Market transaction notified by an Exchange, the acknowledgement of receipt is sent by ELIA within one Working Day after receipt of the notification, according to § 743.

The acknowledgment of receipt includes:

- the notification of the Secondary Market transaction details (as described in section 10.5.1)
- the Transaction Date which is (and logged as) the official acknowledgement of receipt creation timestamp (date and time) by ELIA.

10.5.3 Determination of the Ex-ante or Ex-post status of the Secondary Market transaction

746. ELIA uses the Transaction Date to automatically determine the ex-ante or ex-post status of a Secondary Market transaction pursuant to § 667.

10.5.4 Processing of the Secondary Market transaction by ELIA

747. ELIA processes the Secondary Market transaction.

748. The eight possible statuses of a Secondary Market transaction notified to ELIA are either:

- "Submitted" (being, when the first Party on the Secondary Market submits the transaction); or
- "Cancelled" (being, when the first Party on the Secondary Market that submitted the transaction revokes the transaction with status "submitted"); or
- "Rejected by the Counterparty" (being, when the second Party on the Secondary Market has rejected the transaction or if the counterparty does not confirm the transaction within three Working Days); or
- "In Process" (being, when an Exchange submits the transaction or when the second Party on the Secondary Market has confirmed the transaction, but ELIA has not yet approved or rejected the transaction); or
- "Rejected by ELIA" (pursuant to §§ 742, 754 and 755);

- "Approved by ELIA" (pursuant to § 753); or
 - "Contract refused"; or
 - "Contract signed - Closed".
749. The up-to-date status of the Secondary Market transaction is available on the CRM IT Interface.
750. ELIA processes transactions on the Secondary Market according to their Transaction Date.
751. Without prejudice to the previous paragraph, no later than three Working Days after confirming receipt, ELIA processes (i.e. approves or rejects) the Secondary Market transaction in the event that:
- The processing of the transaction is not subject to the approval or rejection of a transaction with an earlier Transaction Date. This implies that the respect of the restrictions on the Secondary Market Capacity for both the Seller of the Obligation's CMU (cf. section 10.4.8.1) and the Buyer of the Obligation's CMU (cf. section 10.4.8.2) is not subject to the processing of a transaction with an earlier Transaction Date.
 - The processing of the transaction is subject to the approval or rejection of one or more transaction(s) with an earlier Transaction Date, but this (these) transaction(s) have been rejected or approved.
752. In the event that § 751 does not apply, and the treatment of the transaction is thus subject to the approval or rejection of one or more, other transaction(s) in process, but with an earlier Transaction Date, ELIA treats (i.e. approves or rejects) the Secondary Market transaction no later than three Working Days after the rejection or the approval of the other transaction(s).
753. The Secondary Market transaction is "approved" if it respects all Secondary Market participation conditions according to section 10.3, Secondary Market transaction requirements according to section 10.4 and the related process steps according to sections 10.5.1, 10.5.2, 10.5.3 and 10.5.4.
754. If at least one of the conditions in the above-mentioned sections is not respected, ELIA rejects the Secondary Market transaction.
755. A maximum of fifty notifications of Secondary Market transactions involving the same CMU are authorized within a same calendar day. Once this limit reached, new Secondary Market transactions are automatically rejected.
756. In case of reasonable doubts of ELIA on whether a Secondary Market transaction, or a group of Secondary Market transactions, might be affected by or constitute anti-competitive behaviour or market abuse attributable to the Prequalified CRM Candidate or Capacity Provider, ELIA communicates the details of the Secondary Market transaction or group of Secondary Market transactions, including the content as detailed in section 10.4, its process steps and timings, to CREG and if necessary, to the Capacity Market Auditor, within five Working Days after ELIA's transaction approval.

10.5.4.1 Approval or rejection of a Secondary Market transaction by ELIA

757. ELIA notifies the Parties on the Secondary Market, or the Exchange, of the final status ("approved" or "rejected") of a Secondary Market transaction.

The “approved” status given by ELIA is a necessary condition to initiate the contractual modifications applied by ELIA according to section 10.6.

758. In case of an approved Secondary Market transaction, ELIA provides directly two sets of emails confirming the ‘approved’ status of the Secondary Market transaction.

759. ELIA sends the initial set of emails to:

- the Seller of an Obligation; and
- the Exchange, if applicable

These emails contain the following information relating to the Secondary Market transaction approved:

Information	Type	Unit	Information
Secondary Market transaction ID	Six alphabet letters followed by six digits	NA	The automatically generated ID of the Secondary Market transaction
Seller of an Obligation	Capacity Provider ID	NA	Identification of the Capacity Provider of the CMU of the Seller of an Obligation and considered as the Seller of an Obligation
CMU of the Seller of an Obligation	CMU ID	NA	Identification of the CMU of the Seller of an Obligation
Transaction of the Seller of an Obligation’s CMU	Transaction ID	NA	Identification of the Transaction from which the obligation is deducted of the CMU of the Seller of an Obligation
Secondary Market Capacity	Decimal number	MW	The volume of the Secondary Market Capacity that is transferred
Transaction Period	Date / Time to Date / Time	Time	The Transaction Period indicating the start date/time until the end date/time (included)
Capacity Remuneration	Decimal number	€/MW/year	The Capacity Remuneration of the identified Transaction of the CMU of the Seller of an Obligation
Strike Price of the Transaction	Decimal number	€/MWh	The Strike Price of the identified Transaction of the CMU of the Seller of an Obligation
Auction year for the monthly actualization of the Strike Price	Integer or “NA”	Year	The monthly actualization of the Strike Price in time represented by its parameter Auction year
Auction type for the monthly actualization of the Strike Price	“Y-4”, “Y-2”, “Y-1” or “NA”		The monthly actualization of the Strike Price in time represented by its parameter Auction type Y-4, Y-2 or Y-1
Transaction Date	Date / Time	Time	The acknowledgment of receipt date/time

Table 13 – Content of the approved transaction on the Secondary Market to the Seller of an Obligation (and the Exchange)

ELIA sends the second set of emails to:

- the Buyer of an Obligation; and
- the Exchange, if applicable.

These emails contain the following information relating to the Secondary Market transaction approved:

Information	Type	Unit	Information
Secondary Market transaction ID	Six alphabet letters followed by six digits	NA	The automatically generated ID of the Secondary Market transaction
Buyer of an Obligation	Capacity Provider ID	NA	Identification of the Capacity Provider or Prequalified CRM Candidate of the CMU taking over the obligation and considered as the Buyer of an Obligation
CMU of the Buyer of an Obligation	CMU ID	NA	Identification of the CMU taking over the obligation
Secondary Market Capacity	Decimal number	MW	The volume of the Secondary Market Capacity that is transferred
Transaction Period	Date / Time to Date / Time	Time	The Transaction Period indicating the start date/time until the end date/time (included)
Capacity Remuneration	Decimal number	€/MW/year	The Capacity Remuneration of the identified Transaction of the CMU of the Seller of an Obligation
Strike Price of the Transaction	Decimal number	€/MWh	The Strike Price of the identified Transaction of the CMU of the Seller of an Obligation
Auction year for the monthly actualization of the Strike Price	Integer or "NA"	Year	The monthly actualization of the Strike Price in time represented by its parameter Auction year
Auction type for the monthly actualization of the Strike Price	"Y-4", "Y-2", "Y-1" or "NA"		The monthly actualization of the Strike Price in time represented by its parameter Auction type Y-4, Y-2 or Y-1
Last Published Derating Factor	Decimal number	No unit	The Derating Factor applicable on the Secondary Market Capacity for the CMU taking over the obligation according to 10.4.8.3
Transaction Date	Date / Time	Time	The acknowledgment of receipt date/time

Table 14 - Content of the approved transaction on the Secondary Market to the Buyer of an Obligation (and the Exchange)

760. In case of a 'rejected' status Secondary Market transaction, ELIA sends an email to the following recipients, indicating the reason for the rejection and the list of requirements in sections 10.3 and 10.4 that were not respected:

- the Seller of an Obligation; and
- the Buyer of an Obligation; and
- the Exchange, if applicable.

761. In case of rejection of a Secondary Market transaction the Seller of an Obligation remains responsible for the obligation intended for transfer. If the Parties on the Secondary Market nevertheless want to carry out their transaction, a new Secondary Market transaction with updated and required data can be re-submitted to ELIA with another Secondary Market transaction external ID according to section 10.4.1.
762. Any contestation regarding a “rejected” Secondary Market transaction has to be dealt with according to chapter 14.

10.6 CONTRACTUAL IMPACT OF A TRANSACTION ON THE SECONDARY MARKET

10.6.1 General provisions

763. An approved Secondary Market transaction leads to a full transfer of the obligation of the Secondary Market Capacity during the Transaction Period from the Seller of an Obligation to the Buyer of an Obligation, after both Parties on the Secondary Market and ELIA have signed the adapted annexes A of the Capacity Contract, according to the modalities set out in the present section. This section involves solely the Seller of an Obligation, the Buyer of an Obligation and ELIA, and therefore does not include the Exchange.

ELIA applies the modifications to the Capacity Contracts and their Transactions as detailed in section 10.6.2.

10.6.2 Contractual implementation of the transaction

764. ELIA initiates the contractual implementation of a Transaction within fifteen Working Days after the approval of a Secondary Market Transaction. When relevant, ELIA can initiate and process the contractual implementation of multiple approved Transactions simultaneously, provided that the Transactions do not relate to the same CMU. ELIA notifies the Parties on the Secondary Market of the initiation of the contractual implementation.
765. At the latest two Working Days after the initiation of the contractual implementation of the Transaction, ELIA sends a new annex A of the Capacity Contract to the Buyer of an Obligation and an updated annex A of the Capacity Contract to the Seller of an Obligation in the format of Table 15 below. If the Buyer of an Obligation has not signed a Capacity Contract yet, the Buyer of an Obligation signs the most recent version of the Capacity Contract as part of the contractual implementation.
766. Table 15 below presents the format of the annex A of the Capacity Contract for the Buyer of an Obligation:

Capacity Provider ID	
CMU ID	
Market Type (Secondary Market)	
Financial Security ID (if applicable)	
Contracted Capacity (MW)	
Transaction Period	
Pre-delivery Period	

Transaction Date	
Transaction Validation Date.	Date of signature by ELIA.
Strike Price	
Auction Type (Y-4; Y-2; Y-1)	
Year of Auction	
Derating Factor	
Capacity Remuneration	

Table 15: Format of annex A of the Capacity Contract for the Buyer of an Obligation

767. Elia updates the annex A of the Capacity Contract for the Seller of an Obligation by reducing the Contracted Capacity by the amount of the Secondary Market Capacity on the Transaction Period of the Secondary Market Transaction.
768. Both Parties on the Secondary Market have three Working Days to sign the new annex A of the respective Capacity Contract. If one of the Parties on the Secondary Market fails to duly sign the new annex A of the Capacity Contract, ELIA cancels the Secondary Market transaction. If the Buyer of an Obligation has already signed a Capacity Contract, he only signs the new Capacity Contract annex A to which the new Transaction following the transaction on the Secondary Market as detailed in § 766 is assigned. If the Buyer of an Obligation has not signed a Capacity Contract yet, the most recent version of the Capacity Contract is signed as part of the contractual implementation.
769. ELIA signs the updated annex A of the Capacity Contract of the Seller of Obligation and the new annex A of the Capacity Contract of the Buyer of Obligation at the latest 10 Working Days after the initiation of the contractual implementation of the Secondary Market transaction, but subject to receipt of the signed annex A of the Capacity Contract from both the Buyer of an Obligation and the Seller of an Obligation (cf. previous §). ELIA signs the annex A of both Parties on the Secondary Market on the same date, but first signs the annex A of the Capacity Contract of the Buyer of an Obligation and afterwards the updated annex A of the Capacity Contract of the Seller of an Obligation.
770. By way of derogation from previous §, if ELIA or the Capacity Market Auditor, in accordance with article 9 of the Royal Decree on "Monitoring", transmits an ad hoc report to CREG within five Working Days after the approval of the Secondary Market Transaction, and CREG does not ask ELIA to cancel the Secondary Market Transaction in question within ten Working Days following the approval of the Secondary Market Transaction, then ELIA signs the updated annex A of the Capacity Contract of the Seller of Obligation and the new annex A of the Capacity Contract of the Buyer of Obligation at the latest fifteen Working Days after the initiation of the contractual implementation of the Secondary Market Transaction.
771. The Transaction Validation Date on the Secondary Market is equal to the date and time stamp of ELIA's signature of the updated annex A of Capacity Contract of the Seller of an Obligation.
772. If, in accordance with article 20 of the Royal Decree on "Monitoring", the CREG asks ELIA to cancel the Secondary Market transaction, according to article 20 of the Royal Decree on "Monitoring", the status of the Secondary Market transaction is changed to "rejected".

10.6.3 Transaction impact for the Buyer of an Obligation

773. The Capacity Remuneration, Pre-delivery control, the Availability Obligations, Availability Penalties, the Payback Obligation and the Financial Security are applied to the Buyer of an Obligation for the Secondary Market Capacity on the Transaction Period.

774. The obligations taken over by the Buyer of an Obligation following an ex-post Secondary Market transaction as determined in section 10.5.3 have to be covered by Proven Availability, which is verified during the Availability Monitoring. In case (part of) the obligations acquired following an ex-post Secondary Market transaction are not covered by Proven Availability, this (part of) the acquired obligations are considered as Missing Capacity as per § 627.
775. For the Transaction Period, the Buyer of an Obligation will be remunerated by ELIA for the Secondary Market Capacity instead of the Seller of an Obligation, applying the Capacity Remuneration which was transferred via the Secondary Market transaction, in accordance with the terms and conditions set out in the Capacity Contract.

10.6.4 Transaction impact for the Seller of an Obligation

776. The Financial Security (if applicable) and the Payback Obligation are adapted in accordance with the updated Contracted Capacity of the Transaction of the Seller of an Obligation.

Following the decrease in Contracted Capacity on the Transaction Period, the Seller of an Obligation will no longer be remunerated by the ELIA for the Secondary Market Capacity.

777. Prior to the Transaction Validation Date, the Seller of an Obligation remains responsible for the Secondary Market Capacity, i.e. the (part of) the Contracted Capacity to which the Secondary Market transaction relates.

10.7 PENALTY ESCALATION FOR THE SECONDARY MARKET

778. In addition to the applicable standard Unavailability Penalty escalation in accordance with § 639, a penalty escalation is provided in the event of recurring ignorance of the obligations resulting from a transaction on the Secondary Market.

After three consecutive underperformances resulting in a Missing Capacity, according to section 9.6.1, of more than twenty percent of the Obligated Capacity, according to 9.4.3.1, the CMU of the Buyer of an Obligation is suspended for any new Secondary Market transaction. Notwithstanding this suspension, the CMU remains subject to the Pre-delivery control, Availability Obligations, Penalties & Payback Obligation all its ongoing Contracted Capacities.

No later than twenty Working Days after the third underperformance date and time detected here above, an Availability Test is organized on the CMU of the Buyer of an Obligation according to section 9.5.1.

779. If the Availability test according to previous paragraphs:
- is not successful, in accordance with the criterion stipulated in § 606, a suspension for new transactions on the Secondary Market is activated for the Buyer of an Obligation for all its CMUs, except for Transactions between CMUs of the same CRM Actor this suspension remains in effect until the end of the current Delivery Period and for the full next Delivery Period. At the end of this suspension, the Buyer of an Obligation can participate again in the Secondary Market if it prequalifies its CMUs.

However, the Buyer of an Obligation remains, where applicable, responsible for the already Contracted Capacities and previous obligations.

- is successful, in accordance with the criterion set out in § 606, the Buyer of an Obligation recovers the possibility of concluding further Secondary Market Transactions.

10.8 TIMING AND DURATION

10.8.1 Secondary Market implementation

780. The Secondary Market will open in the first semester of the year 2023. ELIA publicly communicates the information to the market and provides it in the CRM IT Interface. In any case, no Secondary Market transactions can be notified to ELIA prior the start date on which the Secondary Market opens.

10.8.2 Access to the Secondary Market platform

781. The Secondary Market is a continuous market.
782. Access to the Secondary Market platform is provided twenty-four hours a day, seven days a week with prior notification by ELIA of any scheduled unavailability.
783. ELIA will use its best efforts to reduce unscheduled unavailability of the Secondary Market platform and applies, where appropriate, a fallback procedure, according to section 15.9.

10.8.3 Termination of the Secondary Market

784. The Secondary Market remains available until the end of the last Transaction Period of all CRM Transactions plus twenty Working Days.

10.9 HIGH-LEVEL IT REQUIREMENTS

785. ELIA provides the CRM IT Interface, which enables each Prequalified CRM Candidate to submit Secondary Market transaction notification(s) to participate in the Secondary Market.

Access rights to this CRM IT Interface related to the Secondary Market are granted once the conditions according to section 10.3 are fulfilled. The Prequalified CRM Candidate is authorized to access it according to the Secondary Market timing and duration (as per section 10.8).

786. The CRM IT Interface performs automatic checks in order to validate the compliancy of the Secondary Market transactions as detailed in section 10.5 and in this context also informs the Prequalified CRM Candidate when and why some of their submitted Secondary Market transactions are considered as non-compliant.
787. In case of unavailability of the CRM IT Interface caused by technical issues, the fallback procedure applies in accordance with section 15.9. All Secondary Market transactions notified to ELIA through the CRM IT Interface instead of via the fallback procedure by the Prequalified CRM Candidate within the timeframe of a foreseen or, unforeseen unavailability of the CRM IT Interface, are considered as rejected as detailed in section 10.5.4.1.
788. If any, the duration of the unavailability of the CRM IT Interface is considered in the determination of the ex-ante or ex-post status of the Secondary Market transaction according to section 10.5.3. This consideration is also based on the timing t_{notif} of the notification issuance according to section 10.5.2. For the ex-post Secondary Market transactions, the authorized delay of notification after the start of the Transaction Period according to § 695 is extended by the duration of the unavailability of the CRM IT Interface.

11 FINANCIAL SECURITIES

11.1 INTRODUCTION

This chapter establishes the obligation for the CRM Actor to provide the Financial Securities. Financial Securities serve as a guarantee in case of non-payment of potential penalties arising during the signature of the Contract or during the Pre-delivery Period.

This chapter is structured around five sections:

Section 11.2 provides several general provisions regarding the Financial Security obligation for Transactions on the Primary Market and the Secondary Market over the related Validity Period.

Section 11.3 elaborates on the valid types of Financial Securities, being a bank guarantee, an Affiliate guarantee and a cash payment.

Section 11.4 specifies the amount that should be secured by the Financial Security, calculated in function of the volume that should be covered and the Required Level per MW.

Section 11.5 includes details on the modalities for calling upon the Financial Security.

Finally, section 11.6 describes the modalities for the release of the Financial Security.

11.2 GENERAL PROVISIONS REGARDING THE FINANCIAL SECURITY OBLIGATION

789. The CRM Actor provides a Financial Security for each CMU via the dedicated module of the CRM IT Interface²⁹ (section 2.6.3) for the transactions to which a Financial Security obligation applies (in accordance with section 11.2.1).

In case the CRM Actor is not able to submit the proof of the Financial Security to ELIA via the CRM IT Interface due to an IT problem, the fallback procedure described in section 15.10 applies.

790. The CRM Actor ensures that the sum of the amounts of the CMU's Financial Securities is at least equal to the Secured Amount (as calculated according to section 11.4) during any moment t of the CMU's Validity Period(s).

The amounts of the CMU's Financial Securities must not be adjusted to its initial level when ELIA has partly or fully invoked the Financial Security. However, for every new Transaction to which a Financial Security obligation applies, the entire Secured Amount must again be covered by the sum of the amounts of the CMU's Financial Securities, in accordance with the rules described in section 11.2.1.

²⁹ The original document also needs to be sent by post to ELIA in case it is not possible to provide the Financial Security electronically signed in an official manner via the CRM IT Interface.

791. The CRM Actor can provide a single Financial Security for multiple CMUs, whereby the Financial Security obligation is determined jointly across all transactions to which a Financial Security obligation applies (as described in section 11.2.1) only in the following cases:

- in case these CMUs concern different configurations of an installation located on the same geographical site – which would result in mutually exclusive Bids if these configurations would be offered in the Auction; or
- in case these CMUs concern Linked Capacities; or
- in case of Aggregated CMUs with common Delivery Points or common Low Voltage Delivery Point Groups; or
- in case these CMUs concern a Virtual CMU and its linked Existing CMU(s) as part of the process described in section 8.6.2.

792. From the moment a Financial Security is submitted to ELIA in accordance with the timings mentioned in § 803 and in § 808 respectively for a transaction on the Primary Market and on the Secondary Market, ELIA verifies the information included in the Financial Security form (listed in annex 18.5.1 and in annex 18.5.2) and informs the CRM Actor within fifteen Working Days after the submission whether the Financial Security is approved or provisionally rejected.

If ELIA does not identify any missing and/or erroneous data in the Financial Security form when it is submitted by the CRM Actor, the Financial Security receives the status “approved”.

If ELIA notices missing information and/or wrong data as stated in § 793, the Financial Security receives the status “provisionally rejected”. ELIA notifies the status to the CRM Actor alongside the justification. The CRM Actor corrects its Financial Security in accordance with § 794.

If ELIA notices a manifest error, the Financial Security receives the status “rejected”. ELIA notifies the status to the CRM Actor alongside the justification.

793. A Financial Security is provisionally rejected if:

- the bank guarantee or the affiliated company’s guarantee does not comply with the forms set out in, respectively, annex 18.5.1 and annex 18.5.2 of the Functioning Rules, applicable at the time that the Financial Security is submitted; and/or
- the amendment does not comply with the forms set out in annex 18.5.3 and annex 18.5.4 of the Functioning Rules, applicable at the time that the Financial Security is submitted; and/or
- ELIA notices that the Financial Securities does not respect the requirement mentioned in § 818; and/or
- ELIA notices an error regarding the expiry date, the CMU ID, the CRM Actor name, or the signature of the Financial Security form.

794. The CRM Actor corrects the missing information and/or wrong data and resubmits its Financial Security via the CRM IT Interface within five Working Days after ELIA sends the notification to the CRM Actor mentioned in § 792.

795. After the deadline mentioned in § 794, with respect to the Financial Security obligation for the upcoming Auction or Pre-Auction, a CRM Candidate can only submit or adapt a Financial Security upon request of ELIA.

796. ELIA notifies the CRM Actor of an adaptation in the following cases:

- without prejudice to the situation referred to in § 806 and in accordance with § 790, the total amount of the CMU's Financial Securities is less than the Secured Amount; and/or
 - the Financial Security does not cover the Validity Period anymore; and/or
 - ELIA notices that the minimum rating requirement (in accordance with § 819) is not respected anymore.
797. At the latest by 17:00 on the thirtieth Working Day after ELIA's notification mentioned in § 796 or, if applicable, before the Auction, or even the Pre-Auction in case of cross-border participation, the CRM Actor ensures – by providing additional Financial Security – that the aggregated amount of the CMU's Financial Securities is again at least equal to the Secured Amount for any future moment t that is part of the related Validity Period (per § 790).
798. If ELIA does not receive an additional Financial Security within the aforementioned deadline, ELIA sends, without delay, a written reminder to the CRM Actor via the CRM IT Interface. The CRM Actor provides the additional Financial Security at the latest by 17:00 on the twentieth Working Day after this reminder.
799. If the CRM Actor fails to submit an additional Financial Security within the above mentioned deadline, ELIA is authorized, depending on the case, to restrict access to the Primary Market or Secondary Market, or even the Pre-Auction in case of cross-border participation, or to reduce the Total Contracted Capacity accordingly so that the Financial Security obligation as described in § 790 is respected. If ELIA decides not to restrict access to the Primary Market or Secondary Market, or to reduce the Total Contracted Capacity, although the Financial Security obligation as described in § 790 is not respected, ELIA informs CREG and provides a written motivation on it to CREG.
800. The CRM Actor may provide different Financial Securities to ELIA at any time, each securing a different amount or a different period.
801. The CRM Actor may, subject to a prior written notice of at least twenty Working Days to ELIA, substitute one form of Financial Security for another provided that the replacement Financial Security respects the requirements detailed in section 11.3 and has the same expiry date or a longer one.

11.2.1 Transactions for which a Financial Security obligation applies

11.2.1.1 Primary Market transactions

802. A Financial Security obligation applies to every Additional and Virtual CMU that is being prequalified, or that is renewing its Prequalification in accordance with section 5.2.4, in view of participating in the Auction and to every Foreign CMU, regardless of its status, that is going through the Admission Process in view of participating in the Pre-Auction and subsequently, upon selection in the Pre-Auction, in the Auction.
803. To be able to participate to the Primary Market the CRM Candidate submits its Financial Security via the Financial Security module of the CRM IT Interface (in accordance with section 2.6.3):
- in case of a CMU participating to the Auction, no later than September 1 of the year during which the Auction is organised; or
 - in case of a Foreign CMU participating to the Pre-Auction, no later than May 10 of the year during which the Pre-Auction is organized.

ELIA sends a reminder to all CRM Candidates subject to the Financial Security obligation about the upcoming deadline for the submission of the Financial Securities, ten Working Days before the relevant deadline.

804. In case of a Foreign CMU, if the correction of an Admission File, previously qualified as “provisionally rejected” according to § 1123, modifies the required level, the CRM Candidate must correct its Financial Security no later than May 17.
805. The CRM Candidate is free to anticipate the Secured Amount (calculated in accordance with section 11.4) required to participate in the Auction or the Pre-Auction, i.e. the Secured Amount that must be covered:
- in case of a CMU participating to the Auction, on the Bid submission deadline referred to in § 306; or
 - in case of a Foreign CMU participating to the Pre-Auction, on the Pre-Auction Bid submission deadline referred to in § 1171.
806. If the Financial Security (or the combination of Financial Securities) applicable until the end of the Validity Period, covers less than the Secured Amount of the CMU on the applicable deadline as referred to in § 805, access to the Auction or to the Pre-Auction is denied for this CMU.

ELIA considers the CMUs that do not respect this requirement towards the Auction as a “full Opt-out”, in accordance with §§ 211 or 217.

11.2.1.2 Secondary Market transactions

807. A Financial Security obligation applies for transactions on the Secondary Market:
- for which the Transaction Date falls before the start date of the Delivery Period containing the Transaction Period start date; and
 - for which the transactions on the Secondary Market result in an increase of the CMU’s Volume to be Guaranteed during the Validity Period related to the Transaction.
808. When a Transaction is subject to a Financial Security obligation, the submission of the Financial Security via the Financial Security module of the CRM IT Interface must be made prior to the notification of the transaction on the Secondary Market to ELIA.

11.2.2 Validity Period

809. The Validity Period is the period related to a Transaction of a CMU during which the CRM Actor has to provide a valid Financial Security.
810. In case of multiple Transactions for a CMU with different Validity Periods, several Validity Periods are associated to this CMU.
811. The Validity Period is to be distinguished from the expiry date of the Financial Security, the latter being the date until when the Financial Security is valid and can be called upon. For a bank guarantee and an Affiliate guarantee, the expiry date is included in the forms of annex 18.5.1 and 18.5.2 respectively. For a cash payment, the expiry date is unlimited in time.
812. The start date of the Validity Period differs depending on whether it applies to transactions on the Primary Market or on the Secondary Market, and in the former case whether it concerns a transaction with a Foreign CMU:

- for a transaction on the Primary Market with a CMU that is not a Foreign CMU, the Validity Period starts on September 30 of the year of the Auction; or
 - for a transaction on the Primary Market with a Foreign CMU, the Validity Period starts on May 25 of the year of the Pre-Auction; or
 - for a transaction on the Secondary Market, the Validity Period starts on the Transaction Date.
813. For transactions on the Primary Market, before the Transaction Validation Date the Financial Security is only provisory. Therefore, the Financial Security can only be called upon as of the Transaction Validation Date.
814. The end date of the Validity Period related to a Transaction is on the last day of the first Delivery Period of a Transaction.
815. If the CMU has not reached the 'existing' status before the aforementioned end date, the Validity Period is extended by two years. In this case, an additional Financial Security may have to be provided in accordance with the procedure described in §§ 796 to 799. In addition to the provisions in §§ 796 to 799, if the Capacity Provider fails to submit an additional Financial Security within the required deadline, a financial penalty for an amount of EUR 15,000 EUR/MW of the Contracted Capacity applies.

11.2.3 Transfer of Capacity Contract

816. As stipulated in the Capacity Contract, ELIA's authorisation of the transfer of the Capacity Contract is subject to the condition that the transferred CMU(s) is (are) covered by a Financial Security provided by the transferee of the contract, such that the Financial Security obligation as described in § 789 is respected by the transferee of the contract.
817. As soon as ELIA authorises the transfer of the Capacity Contract, in accordance with the terms provided for in the Capacity Contract, the Volume to be Guaranteed for the transferor of the contract is reduced to zero MW only for the Volume which was the subject of the transfer. In that case, the procedure for release of the Financial Security as detailed in section 11.6 applies.

11.3 TYPES OF FINANCIAL SECURITIES

818. The following types of Financial Securities are permissible:
- a bank guarantee, which satisfies all of the requirements detailed in section 11.3.1;
 - an Affiliate guarantee, which satisfies all of the requirements detailed in sections 11.3.1 and 11.3.2;
 - a cash payment, which satisfies all of the requirements detailed in section 11.3.3.

11.3.1 Common requirements for a bank guarantee and an Affiliate guarantee

819. The bank guarantee and the Affiliate guarantee respect the following requirements:
- they must be drafted in the form set out in respectively annex 18.5.1 and annex 18.5.2 of the Functioning Rules applicable at the moment that the Financial Security is submitted; and

- they are irrevocable, unconditional and on first-demand (on request of ELIA according to § 837); and
- they are issued by a financial institution or an Affiliate of the CRM Actor (as defined in § 822) that:
 - meets the minimum official rating requirements of 'BBB' issued by the credit rating agency Standard & Poor's (S&P) or of 'Baa2' issued by the credit rating agency Moody's Investor Services (Moody's); and
 - is permanently established in a Member State of the European Economic Area, the European Free Trade Association or the United Kingdom (either via its headquarters or via a branch).

820. The CRM Actor ensures that the minimum rating requirement (see previous §) is respected until the expiry date of the guarantee. The CRM Actor notifies ELIA via e-mail (operations.crm@elia.be) at the latest two months after a 'downgrade event' resulting in the loss of the minimal rating required for the financial institution or Affiliate Company that issues the Security.

821. In this case, a new Financial Security must be provided in accordance with the procedure described in § 797.

11.3.2 Additional requirements for an Affiliate guarantee

822. The corporate institution issuing the Affiliate guarantee is an Affiliate³⁰ of the company owning the CMU that, pursuant to the law applicable to the guarantor³¹, has the capacity to validly issue the guarantee. The guarantee must include the signature of persons that can validly represent the company according to its bylaws.

The CRM Actor provides a legal opinion together with the Affiliate guarantee, issued by a law firm with national or international reputation to ELIA, confirming that the guarantee issued by the Affiliate is legal, valid, binding and enforceable under the applicable law. The legal opinion is to be provided in English, French or Dutch.

11.3.3 Requirements concerning cash payment

823. In case a CRM Actor elects to provide the Financial Security through a cash payment, the amount is transferred to a bank account of ELIA following the rules of section 11.2.1.

For each payment, the word 'Financial Security' and the concerned CMU ID(s) (cf. section 2.6.2.2) shall be indicated in the 'Message' field.

The said account shall not accumulate interest for the CRM Actor.

824. Once the Transaction has been validated, ELIA is entitled to take possession of the sums transferred for the cash payment by the CRM Actor, on the condition that ELIA returns an equivalent amount, to the extent that the Financial Security has not been called upon, when

³⁰ "Affiliate" in relation to the company owning the CMU means any company that, directly or indirectly, controls, is controlled by, or is under common control with such company owning the CMU. For the purposes of this definition, "control" has the meaning of art 1:14 of the Belgian Companies and Associations Code

³¹ E.g., from a Belgian law perspective, the guarantor should be entitled according to its articles of association to issue such a guarantee and issuing the guarantee should be in accordance with its corporate interest.

the cash payment is replaced with a bank guarantee or an Affiliate guarantee or when the Financial Security is released.

825. At the latest within six months after the cash payment has been made and without prejudice to section 11.2, the CRM Actor replaces the cash payment by a bank guarantee or an Affiliate guarantee.

After six months, the CRM Actor provides an objective argumentation to ELIA, in the form of a written statement signed by persons that can validly represent the company according to its bylaws, justifying why a replacement by a bank guarantee or an Affiliate guarantee is not feasible. ELIA (who is acting reasonably) notifies the CRM Actor within ten Working Days after receipt of the written statement.

If ELIA does not consider the written statement to be manifestly unreasonable, the cash payment remains in place and shall not be replaced until the end of the Validity Period of the concerned Transaction.

If the arguments are deemed manifestly unreasonable, ELIA communicates the reasons to the CRM Actor and the CRM Actor is entitled to provide further argumentation to ELIA in the form of a written statement signed by persons that can validly represent the company according to its bylaws to ELIA within ten Working Days after receipt of ELIA's decision. In case the argumentation provided by the additional written statement is still not deemed satisfactory by ELIA (who is acting reasonably), a new Financial Security is to be provided (i.e. a bank guarantee or an Affiliate guarantee to replace the cash payment).

11.4 SECURED AMOUNT

826. For any moment t which is part of one or more Validity Period(s) of a CMU, the Secured Amount for a CMU (expressed in €) is calculated by multiplying the Required Level (expressed in €/MW) with the Volume to be Guaranteed (expressed in MW). The Required Level and Volume to be Guaranteed are further detailed below in sections 11.4.1 and 11.4.2 respectively.

11.4.1 Required Level

827. The Required Level is determined at CMU level, in function of the status of the CMU.

11.4.1.1 Existing CMUs

828. For an Existing CMU, the Required Level equals 10,000 €/MW.

11.4.1.2 Additional CMUs

829. For a New Build CMU, the Required Level of Financial Security equals:

- 20,000 €/MW; or
- 15,000 €/MW from the moment the "Permitting Milestone" has been reached during the Pre-delivery Period in accordance with § 408 or when the "Permitting Milestone" is not applicable.

For any other Additional CMU, the Required Level of Financial Security equals:

- 15,000 €/MW, or

- 11,000 €/MW from the moment that the “Permitting Milestone” has been reached during the Pre-delivery period in accordance with § 408 or when the “Permitting Milestone” is not applicable.

11.4.1.3 Virtual CMUs

830. For a Virtual CMU, the Required Level equals 20,000 €/MW.

11.4.2 Volume to be Guaranteed

831. For any moment t which is part of one or more Validity Period(s) related to one or more transaction(s) of a CMU, the Volume to be Guaranteed for this CMU equals the Maximum Expected Contracted Capacity for the corresponding Delivery Period(s) that is/are (partly) covered by the Transaction Period of the transaction(s). The usage of the Expected Contracted Capacity, as detailed in § 833, serves to determine the Financial Security obligation also for transactions that have not yet been validated.

832. The Financial Security obligation of a CMU does not apply cumulatively when several Validity Periods overlap.

For each moment t during which one or more Validity Period(s) are in progress, the Volume to be Guaranteed of a CMU is equal to the Maximum Expected Contracted Capacity for the CMU for all the moments τ part of one (or more) Delivery Period(s) that is/are (partly) covered by the Transaction Period of the transaction(s) to which a Financial Security obligation applies. This is represented by the following formula:

$$\text{Volume to be Guaranteed (CMU, } t) = \max_{\tau} [\text{Expected Contracted Capacity (CMU, } \tau, t)]$$

Where:

- τ represents a moment of the Delivery Period(s) related to the Validity Period(s) in progress at moment t ;
 - *Expected Contracted Capacity (CMU, τ , t)* is the expected Contracted Capacity at moment τ that would apply at moment t , determined in accordance with the next §.
833. For any moment t which is part of one or more Validity Periods, the Maximal Expected Contracted Capacity at moment τ for a CMU corresponds to the sum of the CMU’s Expected Contracted Capacities that respect the following conditions:
- the corresponding Transaction Validation Date is prior to the start of the Delivery Period of which moment τ is part; and
 - the corresponding Transaction Period covers partially or totally the Delivery Period of which moment τ is part.

Additionally, in case the transaction has not been validated at moment t , also the following volumes are taken into account in the total:

- in case the Validity Period relates to a Primary Market transaction with a CMU that is not a Foreign CMU, the sum of the Eligible Volume and Associated Eligible Volume, if applicable, or the Remaining Eligible Volume, thereby assuming that the total volume that can be offered in the Auction will be contracted. The number of Delivery Periods during which the volume considered applies corresponds to the number of Delivery Periods associated with the Capacity Category in which the CMU has been classified by the CREG; or

- in case the Validity Period relates to a Primary Market transaction with a Foreign CMU, the maximum volume that can be selected from all Bids submitted in the Pre-Auction, thereby assuming that the total volume that is offered in the Pre-Auction will be selected; or
- in case the Validity Period relates to a Secondary Market transaction, the Secondary Market Capacity related to the transaction, thereby assuming that ELIA will approve the transaction.

834. The Volume to be Guaranteed for a moment t that is part of one or more Validity Period(s) (calculated in accordance with §§ 832 and 833) for a CMU can change over time in function of the Transactions on the Primary Market and/or on the Secondary Market.

11.5 CALL UPON THE FINANCIAL SECURITY

835. The Financial Security can be called upon by ELIA as of the Transaction Validation Date when the following penalties remain unpaid:

- the financial penalties resulting from the pre-delivery control (chapter 8); or
- the penalty due in the event of the non-signature of the Capacity Contract (chapter 7).

836. In order to be able to validly call upon the Financial Security, the following procedure must be followed:

- in case of financial penalties resulting from the pre-delivery control or – for Foreign CMUs only – from a failure to comply with the Admissibility Conditions, the Capacity Provider issues a credit note or, in the absence of the credit note, ELIA issues an invoice, as foreseen in the Capacity Contract;
- in case of penalty resulting from the non-signature of the Capacity Contract,
 - ELIA sends a reminder to the Capacity Provider via the CRM IT Interface within ten Working Days starting from the deadline for the signature of the Capacity Contract;
 - if the CRM Actor does not sign the Capacity Contract within ten Working Days starting from the date of this reminder, ELIA issues an invoice for the penalties arising from the non-signature of the Capacity Contract. The due date of this invoice is thirty Working Days from the invoice date;
- in both cases, if the credit note or the aforementioned invoice remains unpaid at the due date, ELIA sends a reminder to the Capacity Provider via the CRM IT Interface within ten Working Days starting from the due date.
 - in this reminder, ELIA informs the Capacity Provider of:
 - the Transaction(s) and associated Financial Security(ies) that relate to these unpaid credit notes or the aforementioned invoice;
 - that it will call upon the Financial Security within ten Working Days starting from the date of this reminder in case the credit note or the aforementioned invoice remains unpaid;
- in case multiple Financial Securities cover such Transaction(s), the Capacity Provider can indicate to ELIA which Financial Security(ies) will be used first in response to this reminder.

- if the Capacity Provider does not pay the credit note or the aforementioned invoice within ten Working Days after ELIA has sent the reminder via the CRM IT Interface, ELIA has the right to call upon the Financial Security.
 - in order to validly call upon a bank guarantee or an Affiliate guarantee, ELIA provides a written statement to the issuer of the Financial Security that the Capacity Provider has not fulfilled its payment obligations during the Pre-Delivery Period or related to the signature of a Capacity Contract, arising from the Functioning Rules. In addition, ELIA provides a copy of the credit note or the aforementioned invoice related to the unpaid due penalties to the issuer of the Financial Security. ELIA sends a copy of this written statement and the credit note or the aforementioned invoice related to the unpaid due penalties to the Capacity Provider via the CRM IT Interface within ten Working Days after providing the written statement to the issuer of the Financial Security;
 - in order to validly call upon a cash payment, ELIA provides the CRM Actor via the CRM IT Interface with a written statement explaining that it has not fulfilled its payment obligations during the Pre-Delivery Period or related to the signature of a Capacity Contract, arising from the Functioning Rules.
837. If ELIA calls upon the CMU's Financial Securities at any moment t , which is part of one or more Validity Periods, and for which the CRM Actor has submitted several Financial Securities to cover the Secured Amount, the Financial Securities will be used on a pro rata basis, unless the CRM Actor has informed ELIA of which Financial Security(ies) should be claimed first in accordance with § 732. For each Financial Security, the claimed amount is calculated by multiplying the total amount of the claim by the ratio between the amount of the Financial Security at moment t and the total amount of all the Financial Securities that have been submitted at that moment t .
838. In line with the description in § 790, the amount of the Financial Security must not be adjusted to the initial level at the moment ELIA partly or fully invokes the Financial Security.

11.6 RELEASE OF THE FINANCIAL SECURITY

839. A full or partial release of a Financial Security is possible at certain defined moments, which are described in section 11.6.1. The procedure for such releases is described in section 11.6.2.

11.6.1 Release moments

840. A full or a partial release of all the Financial Securities related to a CMU is only possible if:
- the Secured Amount for this CMU is lower than the aggregated amount of those Financial Securities minus the amounts of the Financial Securities that have been invoked by ELIA since the last Transaction; and
 - there are no outstanding penalties related to the CMU.
841. A release of the Financial Securities related to a Virtual CMU is only possible from the moment that all of its obligations have been successfully transferred to one or more Existing CMUs.
842. The notification to the CRM Actor for a Financial Security release – when relevant – is launched by ELIA only within ten Working Days starting from the following defined moments:
- at the moment of the Pre-Auction result notification; and
 - at the moment of a Primary Market Transaction Validation Date; and

- after the Capacity Contract signature, whenever the "Permitting Milestone" has been reached and/or whenever the status of the CMU changes from Additional/Virtual to Existing; and
- at the moment of a rejection of a Secondary Market Transaction; and
- at the end of the Validity Period; and
- at the moment of the transfer of the Capacity Contract; and
- at the moment a cash payment is replaced by another type of Financial Security.

11.6.2 Procedure for the release

843. Whenever a full or partial release is applicable in accordance with §§ 840 and 842, the following procedure applies:

- ELIA notifies the CRM Actor via the CRM IT Interface within ten Working Days starting from one of the moments defined in § 842, about the possibility for a Financial Security(ies) release linked to the CMU, informing it of the CMU ID and the amount (in €) of the applicable release;
- Within ten Working Days after the notification of ELIA, the CRM Actor communicates its choice of whether or not to proceed with the release of the Financial Security(ies) to ELIA via the CRM IT Interface;

If the release concerns more than one Financial Security and if the release is a partial release, the CRM Actor also communicates the way it intends to split the release between all the Financial Securities³².

844. Depending on the choice made by the CRM Actor as per the previous §:

- ELIA releases the submitted Financial Security(ies) in accordance with the procedure detailed in § 845; or
- the submitted Financial Security is not released and remains available for future transactions on the Primary Market and/or the Secondary Market, as long as the expiry date of the Financial Security is not exceeded.

845. From the moment the release is approved by the CRM Actor or when the deadline as described in § 843 has expired if no choice has been made by the CRM Actor, the release will be carried out by ELIA within a maximum of ten Working Days. In order for the release to be considered as executed, ELIA must perform the following actions:

- notify the CRM Actor of the release via the CRM IT Interface; and
- make a refund based on the amount to be released and the choice made as per § 843; or
- notify the bank or the Affiliate of this release via a registered letter, including at least the CMU ID, the bank reference of the concerned Financial Security and the amount released.

³² Without answer from the CRM Actor regarding that point, ELIA will split the release amount on a pro rata basis between all the Financial Securities.

12 PAYBACK OBLIGATION

12.1 INTRODUCTION

A Payback Obligation applies to the Capacity Providers in accordance with the rules described in this chapter, relating to the calculation of the Payback Obligation, its communication to the Capacity Provider, its settlement and invoicing.

This chapter applies in addition to and without prejudice to the Electricity Act and its implementing Royal Decrees, in particular in that they set out rules applicable to the Payback Obligation.

Section 12.2 describes the general provisions applicable to the Payback Obligation.

Section 12.3 describes the parameters necessary for the application of the Payback Obligation formula, the Payback Obligation formula and the Stop-Loss Amount of a Transaction.

Section 12.4 describes the process followed by ELIA to determine the Effective Payback Obligation of a Capacity Provider CMU's Transaction.

Section 12.5 describes the notification, settlement and contestation of the Effective Payback Obligation resulting from the Payback Obligation process.

12.2 GENERAL PROVISIONS

846. Without prejudice to § 847, the Payback Obligation applies to all CMUs' Transactions at any moment of their Transaction Period when the Reference Price exceeds the Actualized Strike Price.

847. Delivery Points of the Demand Side Response (DSR) and energy storage technology are exempted from the Payback Obligation.

For energy storage technologies this exemption does not come into force until the amendment to the Royal Decree 'Methodology' on which this exemption is based comes into force. If this amendment does not come into force before the deadline for the submission of Bids referred to in § 306, the exemption of the Payback Obligation for energy storage lapses.

848. For Aggregated CMUs that include Delivery Points of the DSR and/or energy storage technology, the Payback Obligation is calculated in proportion to the share of the NRP of the DSR and/or energy storage Delivery Points' NRP in the CMU's total NRP.

849. The Payback Obligation is calculated in accordance with a formula based on the positive difference between:

- the Reference Price, in €/MWh; and
- the Actualized Strike Price, in €/MWh.

850. The Payback Obligation of a Transaction is calculated for every Market Time Unit of the Delivery Period covered by the Transaction Period and is expressed in EUR.

851. The Payback Obligation calculations are performed by ELIA with the contractual and operational data related to (a) Transaction(s) and parameters of the CMU, which are communicated to ELIA by the Capacity Provider. These parameters include the Reference Price

as detailed in section 12.3.1.1, the Actualized Strike Price as detailed in section 12.3.1.2. The other parameters are to be found in the annex A of the Capacity Contract.

852. A granularity of 0,01 MW is applicable for MW data.
853. A granularity of 0,01 is applicable for € and €/MWh data.
854. If the values of an element of the formulas are expressed in MW or €/MWh and have a lower granularity than an hour, an hourly average of those values applies to reach the hourly granularity.
855. The result of each formula is rounded up or down to the nearest number, with a rounding-up if there is no nearest number³³.

12.3 MODALITIES OF THE PAYBACK OBLIGATION

856. This section describes, for a CMU's Transaction, the parameters necessary for the application of the Payback Obligation formula and the Stop-Loss Amount of a Transaction.
857. The Payback Obligation modalities may vary depending on the following CMU and Transaction features:
- Energy Constrained or Non-energy Constrained CMU;
 - CMU with Daily Schedule or without Daily Schedule;
 - Transaction with an ex-ante or ex-post in accordance with section 10.5.3;
 - Transaction on the Primary Market or the Secondary Market.

12.3.1 Parameters of the calculation formula of the Payback Obligation

12.3.1.1 Reference Price

858. The Reference Price is the price observed for each Market Time Unit t in the related Day-ahead Market of the NEMO chosen by the Capacity Provider for the CMU. It is expressed in €/MWh and is represented by *Reference Price* (CMU_{id}, t), where:
- CMU_{id} is the CMU unique identifier available in the Capacity Contract and in the CRM IT Interface; and
 - t is the Market Time Unit to which the Payback Obligation calculation applies.
859. The same Reference Price is applicable to the Payback Obligation of all Transactions of the CMU at the moment t .

³³ As an example, a number ending by 0,005 is therefore rounded up to 0,01 and a number ending by 0,0049 is rounded down to 0,00.

12.3.1.1.1 Initial choice of NEMO for a CMU

860. In accordance with § 507, Capacity Provider communicates to ELIA, before the start of the Transaction Period the chosen NEMO for the CMU.

In case of absence of choice of the NEMO for a CMU or in case of missing or conflicting data related to this specific choice, the Day-ahead Market Price is used as default value.

12.3.1.1.2 Modification of the NEMO of a CMU

861. The Capacity Provider can notify to ELIA, at any moment, a modification of its choice of NEMO.

862. As soon as the change of NEMO is notified to ELIA, it becomes applicable in the Payback Obligation calculation, ELIA confirms the reception of the notification of this change to the Capacity Provider within five Working Days.

12.3.1.2 Strike Price

863. The section relates to the Strike Price of a Transaction of a CMU. This value is determined in accordance with section 12.3.1.2.1 and then actualized according to section 12.3.1.2.2.

864. The Strike Price of a Transaction is represented by *Strike Price* ($CMU_{id}, Transaction_{id}, t$) and expressed in €/MWh, where:

- CMU_{id} is the CMU unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction unique identifier as displayed on the CRM IT Interface; and
- t is the Market Time Unit to which the Payback Obligation calculation applies within the Delivery Period.

12.3.1.2.1 Strike Price of a Transaction

865. The Strike Price of an Auction is the value determined by the Ministerial Decree "Volume and Parameters" for the year in which the Auction takes place. It is represented by the *Strike Price* (*Auction*) where *Auction* is the Auction in which the Transaction has been concluded.

866. The Strike Price is a fixed value applicable in the Payback Obligation to all Transactions of the Primary Market resulting from an Auction at the Auction results publication date for that Auction.

It is represented by the following formula:

$$Strike\ Price\ (CMU_{id}, Transaction_{id}, t) = Strike\ Price\ (Auction)$$

where:

- CMU_{id} is the CMU unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction unique identifier as displayed on the CRM IT Interface; and
- t is the Market Time Unit during the Transaction Period; and
- *Auction* is as defined in chapter 3.

The Strike Price applicable to a Payback Obligation resulting from a Secondary Market Transaction is determined according to section 10.4.10.

12.3.1.2.2 Actualized Strike Price of a Transaction of a Daily Schedule CMU

867. During the Delivery Period, the Strike Price of the Transaction is actualized ex-post by application of a monthly correction factor. This update is realized during the entire duration of the Capacity Contract as of the start of the first Delivery Period as detailed in article 26 of the Royal Decree on "Methodology".

868. The Actualized Strike Price is equal to the sum of a fixed component and of a variable component:

- The fixed component is equal to the difference between the Strike Price as detailed in § 866 and the DAM simple average prices for the winter months of the same years as the ones used for the calibration of the Strike Price (referred to in § 866) as detailed in article 27 § 1 of the Royal Decree on "Methodology".
- The value of the fixed component of the Actualized Strike Price remains, at all times, constant during the entire Transaction Period.
- The variable component is calculated for each month M of the ongoing Delivery Period after the end of month M . This variable component is the average non weighted price from DAM of month M of the ongoing Delivery Period.

The Actualized Strike Price is represented by the following formula:

$$\begin{aligned} & \text{Actualized Strike Price } (CMU_{id}, Transaction_{id}, t) \\ &= \text{Strike Price } (CMU_{id}, Transaction_{id}, t) - \text{Average DAM (winter months calibration)} \\ & \quad + \text{average DAM}_M \end{aligned}$$

Where:

- *Strike Price* is the Strike Price of a Transaction determined according to section 12.3.1.2.1; and
- CMU_{id} is the CMU unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction unique identifier as displayed on the CRM IT Interface; and
- t is the Market Time Unit in the Transaction Period that is linked to a Delivery Period DPe ; and
- *Average DAM (winter months calibration)* is the average of Day-Ahead prices during Peak Hours, Working Days, winter months used for the calibration of the Strike Price as detailed in article 26 of the Royal Decree on "Methodology"; and
- *Winter months calibration* represents the winter months that were used for the calibration of the Strike Price as detailed in article 26 of Royal Decree on "Methodology"; and
- DAM_M equals the average monthly Day-ahead price of the specified month of the ongoing Delivery Period DPe_t ; and
- M is the month of the Market Time Unit t of the ongoing Delivery Period DPe .

869. The *Actualized Strike Price* ($CMU_{id}, Transaction_{id}, t$) is calculated by ELIA for the last month M of the Delivery Period DPe_t according to the formula described in § 868 and is available on the CRM IT Interface, prior to the Payback Obligation determination process (according to section 12.3.2). The practical details regarding the timing of the calculation of such Actualized Strike Price are described in section 12.4.2.

For a Secondary Market Transaction, the Actualized Strike Price corresponds to the Strike Price of the Transaction of the Seller of an Obligation, listed in annex A of the Capacity Contract and actualized based on the methodology described in this same section. This Strike Price and the Auction it relates to are listed in the notification on the Secondary Market transaction according to § 731 and are registered by ELIA on the Secondary Market Transaction as contractual parameter available in the annex A of the Capacity Contract according to section 10.4.10.

12.3.1.2.3 Actualized Strike Price of a Transaction of a Non-daily Schedule CMU

870. For a Non-daily Schedule CMU and a MTU t that is part of the Transaction Period, the Actualized Strike Price that is used for the determination of the Payback Obligation is the maximum between the Declared Market Price determined as per section 9.4.2.2.2 and the Actualized Strike Price determined as per section 12.3.1.2.2.

This section lapses if the articles of the Royal Decree "Methodology" on which it is based is removed, on the condition that this removal enters into force before the Bid submission deadline as per § 306.

12.3.1.3 Payback Volume

871. The Payback Volume equals the amount of capacity of a Transaction for which the Payback Obligation is applicable. It differs in function of the type of CMU and Transaction.
872. For a Non-energy Constrained CMU, the Payback Volume of a Transaction is equal to the Contracted Capacity. It is represented by the following formula:

$$Payback\ Volume(CMU, Transaction, t) = Contracted\ Capacity(CMU, Transaction, t)$$

Where:

- t is a MTU in the Transaction Period of the CMU's Transaction; and
- $Contracted\ Capacity(CMU, Transaction, t)$ is the Contracted Capacity of the CMU's Transaction with a Transaction Period covering t .

873. For an Energy Constrained CMU during a SLA MTU, the Payback Volume of an ex-ante Transaction is equal to the non-derated Contracted Capacity. It is represented by the following formula:

$$Payback\ Volume(CMU, Transaction, t) = \frac{Contracted\ Capacity(CMU, Transaction, t)}{Derating\ Factor(CMU, Transaction)}$$

Where:

- t is a measure of time which represents an SLA MTU, as defined in annex 18.3.4, or a Market Time Unit belonging to the set of Market Time Units having the highest Measured Power that are Non-SLA MTUs forming with the SLA MTUs a continuous period in time within a day. A Non SLA MTU(s) is (are) only considered on top of the SLA MTUs of the

CMU for the concerned day if the SLA MTUs observed during the concerned day remains less than the N hours of the CMU's SLA; and

- *Contracted Capacity(CMU,Transaction,t)* is the Contracted Capacity of the CMU's Transaction with a Transaction Period covering t ; and
- *Derating Factor(CMU,Transaction)* is the Derating Factor of the Transaction listed in annex A of the CMU's Capacity Contract.

874. For an Energy Constrained CMU during a Non-SLA MTU (not including the MTUs envisaged in § 873, first bullet point), the Payback Volume of an ex-ante Transaction is equal to zero.

875. For an Energy Constrained CMU the Payback Volume of an ex-post Transaction is equal to the Contracted Capacity. It is represented by the following formula:

$$\text{Payback Volume}(\text{CMU}, \text{Transaction}, t) = \text{Contracted Capacity}(\text{CMU}, \text{Transaction}, t)$$

Where:

- t is a MTU in the Transaction Period of the CMU's Transaction; and
- *Contracted Capacity(CMU,Transaction,t)* is the Contracted Capacity of the CMU's ex-post Transaction with a Transaction Period covering t .

12.3.1.4 Availability Ratio and Activation Ratio

12.3.1.4.1 Availability Ratio

876. The Availability Ratio of a CMU reflects the applicability of Payback Obligation in the event of planned or unplanned unavailability duly communicated by the Capacity Provider to ELIA in accordance with section 9.3.1.

877. The exemption is considered in the Availability Ratio via the Remaining Maximum Capacity notified according to section 9.3.1. This Availability Ratio is taken into account for the determination of the Payback Obligation.

878. The Availability Ratio is based on the total Payback Volume, which is the sum of each Transaction's Payback Volume whose Transaction Period covers MTU t . It is represented by the following formula:

$$\text{total Payback Volume}(\text{CMU}, t) = \sum \text{Payback Volume}(\text{CMU}, \text{Transaction}, t)$$

Where:

- *Payback Volume(CMU,Transaction,t)* is the Payback Volume (as per section 12.3.1.3) of a Transaction with a Transaction Period covering MTU t .

879. The Availability Ratio of a CMU for a Market Time Unit is a value obtained by the division of the minimum between the CMU's total Payback Volume and the Remaining Maximum Capacity DA, by the CMU's total Payback Volume .

This is represented by the following formula:

$$\text{Availability Ratio } (\text{CMU}_{id}, t) = \frac{\text{Min}(\text{total Payback Volume}(\text{CMU}, t) ; \text{Remaining Maximum Capacity DA } (\text{CMU}_{id}, t))}{\text{total Payback Volume}(\text{CMU}, t)}$$

where:

- *CMU* is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- *t* is the Market Time Unit on which the Payback Obligation calculation applies within the Transaction Period, when the Reference Price exceeds the Actualized Strike Price of the Transaction of the CMU; and
- *total Payback Volume(CMU, t)* is the CMU's total Payback Volume as established in § 878 on the Market Time Unit *t*; and
- *Remaining Maximum Capacity DA (CMU_{id}, t)* is the CMU Remaining Maximum Capacity on the Market Time Unit *t* according to section 9.3.1.

12.3.1.4.2 Activation Ratio

880. The Activation Ratio of a CMU reflects the applicability of Payback Obligation in the event of a partial activation based on the partial Declared Prices duly communicated by the Capacity Provider to ELIA as per section 9.4.2.

881. For a CMU with Daily Schedule, the Activation Ratio is equal to 1.

882. For a CMU without Daily Schedule, the Activation Ratio is obtained by dividing the minimum of the CMU's total Payback Volume and the Required Volume for a Market Time Unit *t* by the CMU's total Payback Volume for that same Market Time Unit.

This is represented by the following formula:

$$\text{Activation Ratio}(CMU, t) = \frac{\text{Min}(\text{total Payback Volume}(CMU, t); \text{Required Volume}(CMU_{id}, t))}{\text{total Payback Volume}(CMU, t)}$$

where:

- *CMU* is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- *t* is the Market Time Unit on which the Payback Obligation calculation applies within the Transaction Period, when the Reference Price exceeds the Strike Price of the Transaction of the CMU; and
- *total Payback Volume(CMU, t)* is the CMU's total Payback Volume as established in § 878 on the Market Time Unit *t*; and
- *Required Volume (CMU_{id}, t)* is the CMU's Required Volume during Market Time Unit *t* according to section 9.4.2.2.1.

883. This section lapses if the articles of the Royal Decree "Methodology" on which it is based is removed, on the condition that this removal enters into force before the Bid submission deadline as per § 306.

12.3.2 Payback Obligation formula

884. The Payback Obligation formula is used to determine the amount due to ELIA by the Capacity Provider for a CMU's Transaction for a Market Time Unit *t* of the Transaction Period.

885. The Payback Obligation for a Market Time Unit t is equal to the positive difference between the Reference Price and the Actualized Strike Price of the Transaction for this Market Time Unit t , multiplied by the Payback Volume of the Transaction while accounting for the proportion of the CMU's Capacity that comes from the technology DSR and/or energy storage and the Availability Ratio for the same Market Time Unit t .

This is represented by the following formula:

$$\begin{aligned} & \text{Payback Obligation}(CMU, Transaction, t) = \\ & = (\text{Reference Price}(CMU, t) - \text{Actualized Strike Price}(CMU, Transaction, t)) \\ & \quad * \text{Payback Volume}(CMU, Transaction, t) \\ & \quad * \frac{\text{NRP}(CMU, Transaction) - \sum_{i=1}^n \text{NRP DSR, STORAGE DP}_i(CMU, Transaction)}{\text{NRP}(CMU, Transaction)} \\ & \quad * \text{Min}(\text{Availability Ratio}(CMU, t), \text{Activation Ratio}(CMU, t))/4 \end{aligned}$$

where:

- CMU is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction$ is the Transaction's unique identifier as displayed on the CRM IT Interface; and
- t is the Market Time Unit to which the Payback Obligation calculation applies within the Transaction Period, when the Reference Price exceeds the Strike Price of the Transaction of the CMU and for which an Availability Ratio is calculated; and
- $\text{Reference Price}(CMU, t)$ is determined according to section 12.3.1.1; and
- $\text{Actualized Strike Price}(Transaction_i, t)$ is determined according to section 12.3.1.2; and
- $\text{Payback Volume}(CMU, Transaction, t)$ is the Payback Volume of the CMU's Transaction with a Transaction Period covering MTU t , as per section 12.3.1.3; and
- $\text{Availability Ratio}(CMU, t)$ is the CMU Availability Ratio according to section 12.3.1.4.1 on the Market Time Unit; and
- $\text{NRP}(CMU, Transaction)$ is the Nominal Reference Power of the CMU defined by a unique CMU's identifier available in the Capacity Contract and in the CRM IT Interface for the Transaction; and
- $\sum_{i=1}^n \text{NRP DSR, STORAGE DP}_i(CMU, Transaction)$ is the sum of the Nominal Reference Power of the Delivery Points of the CMU for which the technology indicated was DSR or energy storage for this Transaction; and
- $\text{Activation Ratio}(CMU, t)$ is the Activation Ratio of the CMU for MTU t determined in accordance with section 12.3.1.4.2.

12.3.3 Stop-Loss Amount of a Transaction

886. For Primary Market Transactions and ex-ante Secondary Market Transactions for which the Transaction Period covers at least one complete Delivery Period, the sum of all Payback Obligations for the same Delivery Period cannot exceed the Transaction Stop-Loss Amount for that Delivery Period.

887. The Stop-Loss Amount of a Transaction of a CMU for a Delivery Period is calculated by ELIA according to section 12.4.1.

888. The Stop-Loss Amount for a Delivery Period is equal to the sum on all Market Time Units of the Delivery Period of the Contracted Capacity multiplied with the Transaction's Capacity Remuneration divided by the number of Market Time Units on the Delivery Period.

This is represented by the following formula:

$$\begin{aligned} & \text{StopLoss Amount } (CMU_{id}, Transaction_{id}, Delivery \text{ Period}) \\ &= \sum_{t=1}^w \left(\text{Contracted Capacity } (CMU_{id}, Transaction_{id}, t) \right. \\ & \quad \left. * \frac{\text{Capacity Remuneration } (CMU_{id}, Transaction_{id})}{w} \right) \end{aligned}$$

where:

- CMU_{id} is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction's unique identifier as displayed on the CRM IT Interface; and
- t and w respectively, represent a market time unit and the total number of Market Time Units on the Delivery Period; and
- $\text{Contracted Capacity } (CMU_{id}, Transaction_{id}, t)$ is the Contracted Capacity of a CMU Transaction on the Market Time Unit t available in the Capacity Contract and the CRM IT Interface; and
- $\text{Capacity Remuneration } (CMU_{id}, Transaction_{id})$ is the CMU's Transaction Capacity Remuneration according to the Capacity Contract.

12.4 PAYBACK OBLIGATION PROCESS

889. In case of inconsistency or non-compliance of at least one of the below elements and modalities, ELIA can request extra information to the Capacity Provider in order to perform the Payback Obligation calculation.

12.4.1 Stop-Loss Amount initial calculation

890. Once a year as of October 31 preceding the considered Delivery Period, ELIA calculates the Stop-Loss Amount of the considered Delivery Period for each CMU's Transaction of the Primary Market and each ex-ante Secondary Market Transaction, which has a Transaction Period covering at least the full Delivery Period concerned.

891. The calculation of the Stop-Loss Amount of a Transaction for a Delivery Period is performed with the Transaction contractual data available as of October 31 preceding the considered Delivery Period.

The result of the calculation by ELIA is made available for Capacity Provider via the CRM IT Interface at the latest when the first monthly delivery activity targeted in section 12.5.1 report is communicated to the Capacity Provider. The result contains the following content:

- the identification of the Capacity Provider of the CMU and its Capacity Provider ID available in the Capacity Contract; and
- the identification of the CMU and its CMU_{id} available in the Capacity Contract; and
- the ID of each of the CMU's Transactions; and

- the Stop-Loss Amounts of each of the CMU's Transactions.

12.4.2 Calculation of the Actualized Strike Price applicable for the Payback Obligation calculation

892. No later than fifteen Working Days after each month M of the ongoing Delivery Period DPe_t , ELIA calculates the value of the Actualized Strike Price of Transaction of a CMU used for the calculation of the Payback Obligation taking place according to the modalities described in section 12.3.1.2.2.
893. This Actualized Strike Price is applicable for all Market Time Units of the month M of the ongoing Delivery Period DPe_t .

12.4.3 Effective Payback Obligation calculation

894. The Payback Obligation calculation is performed by ELIA in month M+2 for the month M of the Delivery Period and applies to each Market Time Unit of the Transaction Period related to the month M for which the Reference Price exceeds the Actualized Strike Price of a Transaction of a CMU.

For each Market Time Unit t of the Transaction Period included in the month M, ELIA calculates the *Strike Price* ($CMU_{id}, Transaction_{id}, t$) determined according to section 12.3.1.2.

For each Market Time Unit t of the Transaction Period included in the month M for which the Reference Price exceeds the Actualized Strike Price of a Transaction of a CMU, ELIA calculates the:

- *Availability Ratio* (CMU_{id}, t) of the CMU according to section 12.3.1.4.1; and
 - *Payback Obligation* ($CMU_{id}, Transaction_{id}, t$) of the Transaction according to section 12.3.2
895. If the Transaction is a Primary Market Transaction or an ex-ante Secondary Market Transaction for which the Transaction Period covers at least the Delivery Period concerned, as detailed in § 886 ELIA calculates the cumulative Payback Obligation which is the sum of the Payback Obligations of Market Time Units of all the previous months and of the month M of the Delivery Period to which the month M is linked for the Transaction, if any.

This is represented by the following formula:

$$\text{cumulative Payback Obligation } (CMU_{id}, Transaction_{id}, M) = \sum_{t=1}^p \text{Payback Obligation } (CMU_{id}, Transaction_{id}, t)$$

where:

- CMU_{id} is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction's unique identifier as displayed on the CRM IT Interface; and
- t and p respectively represent a Market Time Unit and the total number of Market Time Units of the past months of the Delivery Period and of the month M of the Delivery Period; and

- *Payback Obligation* ($CMU_{id}, Transaction_{id}, t$) is the Payback Obligation of a CMU Transaction on the Market Time Unit t according to section 12.3.2.

896. If the Transaction is a Primary Market Transaction or an ex-ante Secondary Market Transaction for which the Transaction Period covers at least the Delivery Period concerned, as detailed in § 886, and if the cumulative Payback Obligation does not exceed the Stop-Loss Amount, the Effective Payback Obligation for the CMU's Transaction of the month M equals the sum of the Payback Obligations of Market Time Units- of the Transaction of the Transaction of the CMU for all the Market Time Units of month M.

This is represented by the following formula:

$$\text{Effective Payback Obligation } (CMU_{id}, Transaction_{id}, M) = \sum_{t=1}^m \text{Payback Obligation } (CMU_{id}, Transaction_{id}, t)$$

where:

- CMU_{id} is the CMU's unique identifier of the CMU; and
- $Transaction_{id}$ is the Transaction's unique identifier; and
- t and m respectively, represent a Market Time Unit and the total number of Market Time Units of the month M of the Delivery Period; and
- *Payback Obligation* ($CMU_{id}, Transaction_{id}, t$) is the Payback Obligation of a CMU's Transaction on the Market Time Unit t according to section 12.3.2.

897. If the Transaction is a Primary Market Transaction or an ex-ante Secondary Market Transaction for which the Transaction Period covers at least the Delivery Period concerned, as detailed in § 886, and if the cumulative Payback Obligation exceeds the Stop-Loss Amount, as defined in § 895, the Effective Payback Obligation for the CMU's Transaction of the month M equals the positive difference between the Stop Loss Amount and the sum of the Payback Obligations of the preceding months of the Delivery Period to which month M is linked.

This is represented by the following formula:

$$\text{Effective Payback Obligation } (CMU_{id}, Transaction_{id}, M) = \text{Max} \left(0; \text{StopLoss Amount } (CMU_{id}, Transaction_{id}, \text{Delivery Period}) - \sum_{t=1}^n \text{Payback Obligation } (CMU_{id}, Transaction_{id}, t) \right)$$

where:

- CMU_{id} is the CMU's unique identifier available in the Capacity Contract and in the CRM IT Interface; and
- $Transaction_{id}$ is the Transaction's unique identifier as displayed on the CRM IT Interface; and
- t and n respectively, represent a Market Time Unit and the total number of Market Time Units of the past months of the Delivery Period prior the month M of the Delivery Period; and

- *Payback Obligation* (CMU_{id} , $Transaction_{id}$, t) is the Payback Obligation of a CMU's Transaction on the Market Time Unit t according to section 12.3.2; and
- *Stop Loss Amount* (CMU_{id} , $Transaction_{id}$, $Delivery Period$) is the Stop-Loss Amount of a CMU Transaction on the Market Time Unit t according to section 12.3.3.

12.5 NOTIFICATION AND CONTESTATION

12.5.1 Monthly delivery activity report

898. ELIA communicates the result of the Effective Payback Obligation calculation via the delivery activity report, as described in § 660. The report contains the following information for each Transaction with a Transaction Period that (partially) overlaps with month M and for all MTUs with Payback Obligation:

- The CMU ID; and
- The Transaction's unique identifier; and
- The Reference Price in €/MWh; and
- The Actualized Strike Price of the Transaction in €/MWh; and
- The Availability Ratio in %; and
- the Payback Obligation in €.

In addition to the information set out above, ELIA also includes the following information:

- For each Transaction, the total value of the Payback Obligations in €, calculated as the sum of the Payback Obligation on all MTUs during the Transaction Period that (partially) overlaps with month M; and
- For each Transaction, the Effective Payback Obligation in € for month M.

12.5.2 Settlement and invoicing of the Effective Payback Obligation

899. ELIA determines and invoices the Effective Payback Obligation of the Capacity Providers' CMU's Transactions in accordance with the terms set out in the Capacity Contract.

900. The delivery activity report, as detailed in § 660 and § 898, is part of the invoice by ELIA.

12.5.3 Contestation

901. If the Capacity Provider wishes to contest any parameters or calculation that he believes has led to an incorrect Stop-Loss Amount, Payback Obligation or Effective Payback Obligation, he has twenty Working Days from the notification of the delivery activity report to notify such motivated contestation to ELIA via the CRM IT Interface. In such a case, the Capacity Provider and ELIA enter into negotiations in order to reach an amicable agreement within sixty Working Days as of the date of notification of the contestation by the Capacity Provider. ELIA and the Capacity Provider may request additional information from each other's on the parameters in the delivery activity report if needed.

In the event of a partial or total amicable agreement being reached between the parties within the sixty Working Days, the undisputed amount agreed upon shall then be subject to an invoice in accordance with Capacity Contract.

If within sixty Working Days no partial or total agreement is found, the disputed amount or part of the disputed amount of the Payback Obligation is the subject of a separate invoice in accordance with the Capacity Contract. At the same time, both parties continue to seek an amicable solution during a second period of sixty Working Days following the end of the first period of sixty Working Days.

In case an amicable agreement is reached between the parties during the second period of sixty Working Days, this agreement will result, where applicable, in a corrective credit note related to the amount that was the subject of a separate invoice, in accordance with the Capacity Contract.

If within sixty Working Days still no such agreement has been reached, the parties commence the litigation procedure in accordance with chapter 14.

13 LIABILITY AND FORCE MAJEURE

13.1 LIABILITY

13.1.1 Notification of the breach

902. In the event that a CRM Actor or ELIA remains in default of an obligation under the Functioning Rules, the creditor of that obligation shall notify the defaulting party of said default as soon as possible and in any case within sixty Working Days, counting from the day during which the performance of the obligation in question is in default. The defaulting party is required to respond within fifteen Working Days as of the notification. Failure to respond within this period shall be deemed to constitute an acknowledgement of the facts set out in the notification.

13.1.2 Liability of CRM Actors and ELIA

903. Without prejudice to the application of the Penalties provided for in the present Functioning Rules, a CRM Actor or ELIA may, in connection with the CRM, only be liable for Direct Damage suffered by the creditor of its obligation as a result of gross negligence on its part. However, no limitation of liability is applicable in the case of fraud or willful misconduct.
904. Direct Damage is defined as damage that is the direct and immediate result of a fault on the part of a CRM Actor or ELIA, by their employees, subcontractors or performing agents in the performance of his obligations under the Functioning Rules. Under no circumstances, except in cases of fraud or willful misconduct, will the CRM Actor and ELIA be mutually liable or obliged to guarantee or indemnify each other against claims for indirect or consequential damages, including, but not limited to, any loss of profit, loss of revenue, loss of use, loss of contracts or loss of goodwill.
905. In all cases, the liability of a CRM Actor in respect of ELIA and of ELIA in respect of a CRM Actor in the event of gross negligence is limited to a maximum amount of EUR 600 multiplied by the sum of the Nominal Reference Power, expressed in MW, of all the CMUs of this CRM Actor, it being understood that this amount (being the result of the multiplication) may not be less than EUR 50,000 per claim per year or exceed EUR 2,500,000 per claim per year. ELIA's liability in respect of the CRM Actor in the event of gross negligence is limited to a maximum amount of EUR 600 multiplied by the sum of the Nominal Reference Power, expressed in MW, of all of the CMUs of this CRM Actor, it being understood that this amount (being the result of the multiplication) may not be less than EUR 50,000 per CRM Actor or exceed EUR 5,000,000 per claim, calculated, where applicable, on a pro rata basis with respect to the amount of the compensation order. However, ELIA's liability is limited to a total amount of EUR 15,000,000 per year, regardless of the number of claims. There is no limitation of liability in the event of willful misconduct.
906. The application of Penalties provided for in the Functioning Rules when the CRM Actor breaches its obligations, does not preclude ELIA's entitlement to compensation for any Direct Damage suffered as a result of such breach, provided that ELIA establishes that said Direct Damage is the result of fraud, willful misconduct or gross negligence on the part of the CRM Actor, on the one hand, and that it affects ELIA's assets, on the other hand. Within the meaning of this provision, ELIA's assets are only affected if ELIA is unable to remedy the consequences of the said breach via the mechanisms established by these Functioning Rules or via other regulatory mechanisms provided by or by virtue of the Electricity Act and covered in accordance with article 12 of the Electricity Act.
907. ELIA does not have a direct claim against the Grid Users or CDS Users relied upon by the CRM-Actor to form a CMU. The CRM-Actor shall be liable to ELIA for the gross misconduct of such

Users, whether or not combined with its own gross misconduct, within the limits of liability applicable between the parties.

13.1.3 Warranty clause

908. Without prejudice to the application of the Penalties provided for in the present Functioning Rules, the CRM Actor and ELIA will guarantee each other against any compensation order for damage suffered by a third party resulting from their gross negligence, fraud or wilful misconduct in the performance of their obligations under these Functioning Rules.
909. Save for fraud or wilful misconduct, the warranty referred to in the previous section may not, under any circumstances, exceed the amount of EUR 5,000,000 per claim and per year.

13.1.4 Interaction with other regulated contracts

910. Without prejudice to the application of the Penalties as provided for in these Functioning Rules, the amount due by the CRM Actor or ELIA for one and the same claim, for reasons of gross negligence, as compensation under another Regulated Contract concluded between them shall be deducted from the amount of compensation due pursuant to sections 13.1.2 and 13.1.3.
911. The Regulated Contracts referred to in the previous section refer to the contracts listed in article 3 § 1 of the Code of Conduct and the regulated contracts at regional level and, where relevant, similar contracts in the adjacent Member States. Save for that which is provided in § 910, these Functioning Rules do not limit in any way the application of the provisions of said contracts, even if the non-performance of an obligation under the Functioning Rules has an impact on the performance of an obligation under the Regulated Contract.

13.1.5 Limitation of liability clauses in other contracts and third party rights

912. When a CRM Actor or ELIA enters into a contract with a third party for the purpose of participating in the CRM, the liability limitation clauses set out in said contract shall reflect the principles and thresholds set out in this chapter, in such a way that said third party cannot assert more rights in respect of the CRM Actors and ELIA than the latter are entitled to assert between themselves. Any contractual provision to the contrary shall be deemed not to have been written.
913. The Grid Users or CDS Users with whom the CRM Actor forms a CMU cannot take direct action against ELIA. For any Direct Damage that may have been suffered by said Grid Users or CDS Users, the CRM Actor is subrogated with respect to the rights of said Grid Users or CDS Users, within the liability limits that apply between the parties.
914. Third parties may only assert claims against a CRM Actor or ELIA if they can prove that it is guilty of gross negligence in respect of the satisfaction of the obligations set out in the Functioning Rules. The liability of a CRM Actor or ELIA in the event of gross negligence may not exceed the maximum amount set out in § 905. No limitation of liability shall apply in the event of fraud or wilful misconduct.

13.2 FORCE MAJEURE

915. Without prejudice to the definition of Force Majeure given in the applicable legal and regulatory provisions or additional definitions given in the Capacity Contract, the term Force Majeure means any unforeseeable or unusual event or situation which is beyond the reasonable control of the CRM Actor or ELIA, which is not attributable to any fault on the part of the CRM Actor

or ELIA, which cannot be avoided or overcome in spite of all reasonable due diligence or preventive measures deployed, which cannot be corrected by measures that it would be reasonable in technical, financial or economic terms for the CRM Actor or ELIA to undertake, and which temporarily or permanently prevent the CRM Actor or ELIA Party from fulfilling all or part of its obligations under these Functioning Rules.

916. Without prejudice to the provisions of the Capacity Contract, the following situations, among others, are to be considered as Force Majeure provided they meet the conditions of Force Majeure set out in the previous section:

- natural disasters like earthquakes, floods, storms, cyclones or other unusual weather events recognised as such by a public authority with expertise in this area, as well as epidemics and pandemics;
- a nuclear or chemical explosion and the consequences thereof;
- situations of unusual outages (or “non-categorised” outages) during which the sudden unavailability of one or more electricity or gas distribution or transmission grids (including closed grids) or of Capacity or CMU is caused by reasons other than ageing, lack of maintenance or the competence of operators, including the unavailability of the IT system, whether or not caused by a virus, when all state-of-the-art precautions had been taken;
- the temporary or permanent technical inability of the grid to exchange electricity because of disruptions within the Belgian Control Area caused by electricity flows resulting from energy exchanges within another Control Area or between two or more other Control Areas, where the identity of the market players involved in said energy exchanges is not, and cannot reasonably be, known to ELIA;
- an inability to operate the electricity or gas distribution or transmission grid (including closed grids), equipment forming a functional part of the grid, or equipment belonging to the CRM Actor or ELIA due to a labour dispute that gives rise to a unilateral measure by the employees (or groups of employees) or any other labour-management conflict;
- fire, explosion, sabotage, acts of a terrorist nature, acts of vandalism, damage caused by criminal acts, criminal coercion or threats of the same nature or acts that have the same consequences;
- war (whether declared or not), the threat of war, invasion, armed conflict, embargo, revolution or uprising;
- a situation in which a competent authority imposes unusual and temporary measures on CRM Actors, Grid Users, CDS Users or ELIA, such as the measures necessary to maintain or restore the safe and efficient functioning of grids, including load-shedding in the event of power shortages; and
- a decision or measure adopted by any competent public authority.

917. The CRM Actor or ELIA who invokes a situation of Force Majeure must immediately notify the creditor of his obligation in writing via the CRM IT Interface, or by telephone provided that the matters discussed and agreed upon verbally are confirmed by official correspondence within three Working Days of the said discussion. The written or verbal notification must be made in any event within three Working Days of the appearance of the situation of Force Majeure or the time at which he should reasonably have discovered it. He must describe precisely the event that he qualifies as Force Majeure and indicate the measures he intends to take to remedy it as soon as possible. Absent any notification within said deadline, the CRM Actor or ELIA will no longer be entitled to invoke a situation of Force Majeure.

918. The CRM Actor or ELIA who proves a situation of Force Majeure is discharged from all or part of his contractual obligations, without prejudice to financial obligations which arose before the situation of Force Majeure. The suspension of the relevant obligations only lasts for the duration of the situation of Force Majeure, insofar as the latter prevents him from fulfilling the relevant obligations. To the same extent, the creditor of the relevant obligation is not obliged to perform his counter-obligations. Nevertheless, the Party that invokes a situation of force majeure shall do everything possible to limit the consequences of the non-performance of its obligations in respect of the other Party and to once again fulfil said obligations.
919. If, as a result of a situation of Force Majeure, the CRM Actor or ELIA is unable to fulfil the relevant obligations under the Functioning Rules and if this situation of Force Majeure persists for at least [one hundred and eighty] consecutive days, the CRM Actor or ELIA that invokes the Force Majeure may be definitively released from these relevant obligations under the Functioning Rules by sending a registered letter or an email with acknowledgment of receipt setting out the reasons for the termination.

13.3 DAMAGE OR ELIA WARRANTY EXCEEDING THE LIMITATIONS

920. Any amount payable by ELIA to a third party due to gross negligence by a CRM Actor, or any Damage suffered by ELIA which is due to gross negligence by a CRM Actor, and which ELIA is unable to recover from the CRM Actor due to a limitation provided by these Functioning Rules, will be covered by the mechanism provided in article 7^{undecies} § 15 of the Electricity Act.

14 DISPUTE RESOLUTION

14.1 INTRODUCTION

This chapter describes the process for a CRM Actor or ELIA to follow in the event of a dispute arising in connection with the CRM.

If a dispute falls within the special or exclusive remit of the Markets Tribunal (article 29bis of the Electricity Act) or the Brussels Tribunal of First Instance (article 7undecies § 14 of the Electricity Act), the interested party may submit the dispute to said tribunal.

For any other dispute arising in connection with the CRM, the settlement of said dispute shall commence, as a general rule, with an optional consultation phase.

If the dispute cannot be resolved during the consultation phase, the parties have the option of submitting their dispute to the CRM Disputes Committee.

14.2 CONSULTATION PHASE

14.2.1 Specific or general consultation mechanism

- 921. If a CRM Actor or ELIA intends to contest an action or decision in connection with the CRM that directly affects or can affect its interests, it can invite the other party to open a consultation phase in order to resolve the dispute amicably.
- 922. If a specific consultation mechanism is provided in one of the other chapters of the Functioning Rules, the parties must follow said mechanism.
- 923. If no specific consultation mechanism is provided in the other chapters of the Functioning Rules, the general consultation mechanism described below applies. However, a party is not obliged to follow this general consultation mechanism prior to bringing a dispute before the relevant tribunal or the CRM Disputes Committee.

14.2.2 Consultation procedure

- 924. The interested party ("Notifying Party") shall notify its grievances to the other party ("Notified Party") within ten Working Days as of the notification of the decision taken by the other party, or, in the absence of a decision, after having become aware of an action likely to affect its interests. Grievances are notified via the CRM IT Interface or by e-mail.
- 925. The Notified Party will contact the Notifying Party within five Working Days after it has received the notification of grievances in order to either confirm its willingness to take part in the consultation, or to refuse to do so.
- 926. If both parties are prepared to take part in the consultation phase, they will begin a dialogue in order to find an amicable solution. This dialogue can be effected in writing only, or, if necessary, one or more meeting(s) can be organised between the parties in a mutually agreed location.
- 927. If an amicable solution is found within a period of thirty Working Days as of the notification of grievances, a period which can be extended via the written agreement of each party, the conditions governing said solution will be formalised in a written agreement. Said conditions must comply strictly with the applicable legislation and regulations.

928. If no solution is found within the aforementioned period, the first party to take action can undertake one of the procedures described in sections 14.3.3.1 and 14.3.3.2.

14.3 CRM DISPUTES COMMITTEE

14.3.1 Objective and Rules of Procedure

929. The role of the CRM Disputes Committee is to help the parties resolve disputes in connection with the CRM, either informally by engaging in discussions with the parties and, where necessary, issuing a recommended resolution ("Recommendation"), or, if said informal assistance does not resolve the dispute or is not requested, by taking a binding decision ("Binding Decision").
930. The CRM Disputes Committee takes action and decisions by virtue of the rules listed below and the Rules of Procedure annex 18.7.

14.3.2 Organisation

931. The CRM Disputes Committee is assisted by a secretariat which is responsible for receiving and managing dispute resolution applications of which it is notified ("Notifications") and checking whether the Notification contains all the information required and that the object of the dispute falls *prima facie* within the remit of the CRM Disputes Committee ("Secretariat").
932. The CRM Disputes Committee comprises three members: a chairman and two *ad hoc* members.
933. The chairman is, depending on the case, the person appointed by CREG following a public tender (the "Chairman" of the CRM Disputes Committee), or an *ad hoc* chairman appointed by the parties ("*ad hoc* Chairman"). The term Chairman below refers, depending on the case, to the Chairman of the CRM Disputes Committee or the *ad hoc* Chairman.
934. The Chairman must have legal training with proven experience in energy law and/or in the area of litigation. The two other members have either the legal or technical training relevant for resolving the dispute.

14.3.3 Procedures

935. In order to initiate a procedure, the interested party will send the Secretariat a Notification of its intention to submit the dispute to the CRM Disputes Committee. The Notification must, *inter alia*, contain the contact details of the parties, a summary of the grievances, the demands and the remedies demanded.
936. When a party submits a dispute to the CRM Disputes Committee via a Notification, it can request either a Recommendation or a Binding Decision.
937. If a party requests a Binding Decision and if the other party is not opposed thereto, the CRM Disputes Committee issues a Binding Decision.
938. Even if a Recommendation has been requested, the *ad hoc* members must already be appointed in order to participate, where necessary, in any Binding Decision.

14.3.3.1 Recommendation procedure

939. The recommendation procedure applies when, in the Notification, the interested party asks the CRM Disputes Committee for informal assistance with the dispute and the other party is not opposed thereto.
940. This procedure is handled by the chairman acting as an intermediary to reconcile the parties.
941. The chairman begins the informal discussions to this end, or if necessary, meetings with the parties. He may also request any information needed in order to be fully informed about the dispute.
942. Pursuant to discussions and after no more than thirty Working Days (as of the acknowledgement of receipt of the Notification), the chairman issues a written recommendation to the parties in order to enable them to facilitate an agreement ("Recommendation").
943. If an amicable solution is found within ten Working Days as of the issuance of the Recommendation, a period which may be extended via the written agreement of each party, the conditions for said solution will be formalised in a written agreement. These conditions must comply strictly with the applicable legislation and regulations.
944. If no amicable solution is found following the recommendation procedure, the first party to act may either ask the CRM Disputes Committee to issue a Binding Decision or may bring the matter before the relevant tribunal or court. A new Notification must be sent to the Secretariat ("Additional Notification") in the event of a request for a Binding Decision.

14.3.3.2 Binding decision procedure

945. The binding decision procedure applies when, in the Notification (or in an Additional Notification), the interested party submits the dispute to the CRM Disputes Committee in order to obtain a Binding Decision. If the interested party has indicated, in the Notification, its wish for the Binding Decision to have the status of an arbitral award, the other party(ies) shall communicate to the secretariat, within five Working Days of the acknowledgement of receipt of the (Additional) Notification, a notice of response ("Notice of Response") in which they adopt a position on the issue of arbitration. In the absence of any agreement regarding the conferring of the status of arbitral award on the Binding Decision, the Binding Decision shall have the status of a binding third-party decision.
946. The parties shall agree on a calendar for the exchange of arguments. The CRM Disputes Committee may, if necessary and after consulting the parties, establish a different period, ask for additional documents to be submitted, ask questions or demand any information needed for resolving the dispute.
947. If necessary, the CRM Disputes Committee may organise a hearing during which each party may present its point of view.
948. The CRM Disputes Committee will issue a Binding Decision within a period not exceeding three months as of the acknowledgement of receipt of the Notification by the Secretariat, or within a period not exceeding two months as of the acknowledgement of receipt of the Additional Notification. The CRM Disputes Committee may, with the agreement of the parties, extend this period in order to issue a Binding Decision.
949. If the dispute is of an urgent nature, the interested party may request in the Notification (or in the Additional Notification) to use the emergency procedure making it possible to issue a Binding Decision within a shorter period of time.

14.3.4 Main characteristics of the procedure before the CRM Disputes Committee

14.3.4.1 Fixed costs and schedule

950. The costs of bringing a matter before the CRM Disputes Committee will be determined in advance and as accurately as possible by the Chairman of the CRM Disputes Committee, in consultation, where necessary, with the *ad hoc* Chairman. These costs may be adjusted during the procedure, due to changes in the circumstances of the case, after having obtained the opinion of the parties. The costs of bringing a matter before the Committee may be charged to the losing party.

951. The procedures follow a strict schedule determined in advance.

14.3.4.2 Confidentiality

952. The information exchanged during the recommendation procedure remains confidential. If a binding decision procedure is launched following a recommendation procedure, the parties may agree to waive confidentiality for certain documents already communicated during the recommendation procedure.

953. The information exchanged between the parties during the binding decision procedure and the Binding Decision itself is confidential with regard to third parties, unless otherwise agreed by the parties. A party may invoke the confidentiality with regard to another party, of certain documents communicated to the CRM Disputes Committee, subject to justification.

14.3.4.3 Experts

954. The CRM Disputes Committee may request the assistance of experts.

14.3.4.4 Types of decisions issued

955. The Recommendations of the CRM Disputes Committee are not binding, whereas Binding Decisions are final and mandatory. Binding Decisions have the status of third-party decisions, unless expressly agreed by the parties to give them the status of arbitral awards within the meaning of article 1676 *et seq.* of the Belgian Judicial Code. Binding Decisions are taken by the majority of the members of the CRM Disputes Committee, except within the context of an emergency procedure or a procedure requesting provisional measures, in which the Chairman of the CRM Disputes Committee decides alone.

956. Within thirty Working Days following the receipt of the Binding Decision, a party may, via written Notification sent to the other parties, ask the CRM Disputes Committee to provide an interpretation of its Binding Decision or to correct its Binding Decision if it contains a calculation error, a typographical error or any other error or omission of that nature. If the CRM Disputes Committee deems that the request is justified, it will issue the interpretation or correction within thirty Working Days following receipt of the request.

15 FALLBACK PROCEDURES

15.1 INTRODUCTION

This chapter lists and describes all the fallback procedures applicable to ELIA and every CRM Actor. These fallback procedures include all the steps to be followed by the relevant party in case of specific issue.

Section 15.2 presents the general principles of the fallback procedures.

Section 15.3, 15.4, 15.5, 15.6, 15.7, 15.8, 15.9 and 15.10 respectively cover all CRM processes separately in order to make it easier to read and search for the right fallback procedure. Each CRM Process is divided into different sub-paragraphs depending on process involved. Every fallback procedure is structured so that the problem is first identified and referenced. Next, the procedure to be followed by the CRM Actor is described and finally the impact on deadline or processes is explained.

15.2 GENERAL PRINCIPLES

957. This section describes the general principles applicable to ELIA and each CRM Actor for whom a fallback procedure is required in order to resolve certain types of issues.

958. When ELIA communicates with a CRM Actor by e-mail in a fallback procedure, ELIA uses the e-mail address(es) that was provided by the actor during the Prequalification Process.

When a CRM Actor communicates with ELIA by e-mail in a fallback procedure, he uses the e-mail address provided by ELIA on ELIA's CRM webpage.

15.3 ADMISSION PROCESS

959. This section addresses the problems that may arise during the Admission procedure and require a fallback procedure.

15.3.1 Submission of the application form by Indirect Foreign Capacity holders

960. Prior to submitting his first Admission File, a Capacity Holder fills in an application form, via the CRM IT Interface.

In case an Indirect Foreign Capacity Holder is unable to submit the application form via the CRM IT Interface or did not receive the corresponding notification from ELIA within two hours, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to submit the application form, the Indirect Foreign Capacity Holder is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Indirect Foreign Capacity Holder contacts ELIA as soon as possible by e-mail explaining the nature of the problem;

- ELIA comes back to the Indirect Foreign Capacity Holder within maximum five Working Days starting from the Indirect Foreign Capacity Holder's email reception date, saying that either:
 - the problem has been solved and the Indirect Foreign Capacity Holder may try again to submit the form; or
 - the problem cannot be solved in the short term, and the application form is sent by e-mail so that the Indirect Foreign Capacity Holder can fill it in and return it back completed to ELIA also by e-mail. In these circumstances, the application form submission date corresponds to the sending date of the email corresponding to the first step of the fallback procedure described above by the Indirect Foreign Capacity Holder to ELIA.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.3.2 Acknowledgment and compliance checks for Indirect Foreign Capacity Holders

961. This issue refers to the section 17.3.2.2.2.
962. After the approval of the application form but prior to the possible submission of a Prequalification File, the Foreign CRM Candidate ensures compliancy with the various documents governing participation in the CRM by ticking the dedicated boxes in the CRM IT Interface.
963. In case the Foreign CRM Candidate is unable to mark these boxes via the CRM IT Interface, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to mark the dedicated boxes, the Foreign CRM Candidate is entitled to initiate the fallback procedure.
964. The fallback procedure consists in the following steps:
- the Foreign CRM Candidate contacts ELIA as soon as possible by e-mail explaining the nature of the problem.
 - ELIA comes back to the Foreign CRM Candidate within maximum five Working Days starting from the Foreign CRM Candidate's email reception date, saying that either:
 - the problem has been solved and the Foreign CRM Candidate may try again to mark the boxes via the CRM IT Interface; or
 - the problem cannot be solved in the short term. In this situation, the consent with each condition set in section 11.3 is given per email by the Foreign CRM Candidate to ELIA.
 - ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.3.3 Admission File

965. This issue refers to § 1090.
966. It is required from the Foreign CRM Candidate to submit complete and accurate Admission File(s), in line with obligations, requirements and Service Time Schedule. All data or document(s) are either filled in directly on the CRM IT Interface or uploaded as an attachment via the CRM IT Interface.
967. In case the Foreign CRM Candidate is unable to fill in the Admission File and/or upload a required document(s) and/or submit it on the CRM IT Interface due to IT problem, he checks

first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to complete his Admission File, the Foreign CRM Candidate is entitled to initiate the fallback procedure.

968. The fallback procedure consists in the following steps:

- the Foreign CRM Candidate contacts ELIA as soon as possible by e-mail explaining the nature of the problem.
- ELIA comes back to the Foreign CRM Candidate within maximum five Working Days starting from the Foreign CRM Candidate's email reception date, saying that either:
 - The problem has been solved and the Foreign CRM Candidate may try to fill in the Admission File and/or upload a required document on the CRM IT Interface; or
 - the problem cannot be solved in the short term. In this situation, the Foreign CRM Candidate can fill in and submit its Admission File to ELIA per email within three Working Days, following a Admission File template sent by ELIA. The Admission File submission date then corresponds to the date of Foreign CRM Candidate's Admission File's template reception from ELIA.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

969. If the results of the verification by the Foreign TSO have not been transmitted to Elia in a timely manner, in accordance with the calendar defined in the Annex A of the agreement among the TSOs signed by Elia and the Foreign TSO, Elia shall reject the Admission File either provisionally if it is the first submission as defined in § 1123, or definitively if it is the final verification of the Admission File, as defined in § 1123. In case of a provisional rejection, the Foreign CRM Candidate has the option to resubmit the Admission File during the finalization phase of the Admission File, as specified in § 1123.

15.4 PRE-AUCTION PROCESS

970. This section covers the problems that might occur during the Pre-auction Procedure that require a fallback procedure.

15.4.1 Bid submission issue

971. The standard procedure for Bid submission in the Pre-Auction by Foreign CRM Candidates via the CRM IT Interface is described in section 17.3.7.2.

972. In case the CRM IT Interface is unavailable to submit Bids on the day of the Bid submission deadline as described in § 1171, ELIA notifies all Admitted CRM Candidates via email that the following fallback procedure applies:

- ELIA extends the access to the CRM IT Interface and the Bid submission deadline by twenty-four hours.
- ELIA informs all Admitted CRM Candidates via email, in accordance with the relevant contact details as indicated in the application form process, when the problem has been solved, allowing all Admitted CRM Candidates to submit Bids via the CRM IT Interface.

973. In case the CRM IT Interface is unavailable to submit Bids on the day of the extended Bid submission deadline as described in § 972, ELIA extends the fallback procedure by another twenty-four hours. ELIA may repeat this process up to a maximum four consecutive periods of twenty-four hours after the standard Bid submission deadline as described in § 1171.

15.4.2 Grid constraints issues

974. These issues refer to the section 17.3.7.3.1.

975. In case the Foreign TSO did not communicate the respective grid constraints in a timely matter, in accordance with the timing defined in § 1177 and in the format defined in § 1179, ELIA will not be able to take these into account during the clearing process of the Pre-Auction.

976. In case of external grid constraints in the grid of the Foreign TSO which have not been communicated in accordance to section 17.3.7.3.1, Elia and the Foreign TSO will work to find a consensual solution.

15.5 PREQUALIFICATION PROCESS

977. This section covers the issues during that might occur during the Prequalification phase that require a fallback procedure.

15.5.1 Application form submission

978. This issue refers to § 79.

979. Prior to submitting his first Prequalification File, a Capacity Holder fills in an application form, via the CRM IT Interface.

In case a Capacity Holder is unable to submit the application form via the CRM IT Interface or did not receive the corresponding notification from ELIA within two hours, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to submit the application form, the Capacity Holder is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Holder contacts ELIA as soon as possible by e-mail explaining the nature of the problem.
- ELIA comes back to the Capacity Holder within maximum five Working Days starting from the Capacity Holder's email reception date, saying that either:
 - the problem has been solved and the Capacity Holder may try again to submit the form; or
 - the problem cannot be solved in the short term, and the application form is sent by e-mail so that the Capacity Holder can fill it in and return it back completed to ELIA also by e-mail. In these circumstances, the application form submission date corresponds to the sending date of the email corresponding to the first step of the fallback procedure described above by the Capacity Holder to ELIA.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.5.2 Acknowledgment and compliance checks

980. This issue refers to the section 5.3.1.

981. After the approval of the application form but prior to the possible submission of a Prequalification File, the CRM Candidate ensures compliancy by selecting dedicated boxes in the CRM IT Interface.

982. In case the CRM Candidate is unable to mark these boxes via the CRM IT Interface, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to mark the dedicated boxes, the CRM Candidate is entitled to initiate the fallback procedure.

983. The fallback procedure consists in the following steps:

- the CRM Candidate contacts ELIA as soon as possible by e-mail explaining the nature of the problem.
- ELIA comes back to the CRM Candidate within maximum five Working Days starting from the Capacity Holder's email reception date, saying that either:
 - the problem has been solved and the CRM Candidate may try again to mark the boxes via the CRM IT Interface; or
 - the problem cannot be solved in the short term. In this situation, the consent with each condition set in section 11.3 is given per email by the CRM Candidate to ELIA.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.5.3 Prequalification File

984. This issue refers to § 86.

985. It is required from the CRM Candidate to submit complete and accurate Prequalification File(s), in line with obligations, requirements and Service Time Schedule. All data or document(s) are either filled in directly on the CRM IT Interface or uploaded as an attachment via the CRM IT Interface.

986. In case the CRM Candidate is unable to fill in the Prequalification File and/or upload a required document(s) and/or submit it on the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to complete his Prequalification File, the CRM Candidate is entitled to initiate the fallback procedure.

987. The fallback procedure consists in the following steps:

- the CRM Candidate contacts ELIA as soon as possible by e-mail explaining the nature of the problem.
- ELIA comes back to the Capacity Holder within maximum five Working Days starting from the Capacity Holder's email reception date, saying that either:
 - the problem has been solved and the CRM Candidate may try to fill in the Prequalification File and/or upload a required document on the CRM IT Interface; or
 - the problem cannot be solved in the short term. In this situation, the CRM Candidate can fill in and submit its Prequalification File to ELIA per email within three Working Days, following a Prequalification File template sent by ELIA. The Prequalification File submission date then corresponds to the date of Capacity Holder's Prequalification File's template reception from ELIA. Finally, and as part of the Prequalification File, the CRM Actor also submits proof of a valid type of Financial Security, in accordance with the requirements in section 11.3, by email.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.5.4 Change of the Prequalification File submission

988. This issue refers to § 247.

989. A CRM Actor is entitled to modify data or documents upon different circumstances. Any change is submitted via the CRM IT Interface.

990. In case a CRM Actor is unable to modify data or documents on the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to apply the change(s) needed, the CRM Actor is entitled to initiate the fallback procedure.

991. The fallback procedure consists in the following steps:

- the CRM Actor contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned Delivery Point(s) and/or CMU(s); and
 - the data or the document(s) to be modified; and
 - the date of entry into force of the modification(s); and
 - the new value of the data or the new document(s) to be uploaded; and
 - the nature of the IT issue;
- ELIA comes back to the CRM Actor per email within maximum five Working Days starting from the CRM Actor's email reception date, saying that either:
 - the problem has been solved and the CRM Actor may try again to modify the data and/or document(s) in his Prequalification File; or
 - the problem cannot be solved in the short term, and ELIA modifies manually the data and/or the document(s) – instead of the CRM Actor – based on the information provided in the e-mail received from the CRM Actor and sends an e-mail to this CRM Actor to notify him that the change(s) has(have) been taken into account.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.5.5 Notification from ELIA

992. Throughout the Prequalification Process, ELIA sends notifications to the CRM Actors via the CRM IT Interface. The time period within which such notification is received is listed in the chapter 5.

993. In case the CRM Actor has not received the notification via the CRM IT Interface within the specific timeframe, he initiates the fallback procedure which consists in the following steps:

- the CRM Actor informs ELIA by e-mail as soon as possible that the notification has not been received and mentions the following information:
 - The type of notification that he was expecting to; and
 - The submission date of the involved file or form.
- ELIA comes back to the CRM Candidate within five Working Days starting from the CRM Actor's e-mail reception date, giving the same information as would have been provided by the notification.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.6 AUCTION PROCESS

994. This section covers the issue that might occur during the Auction process that require a fallback procedure.

15.6.1 Bid submission issue

995. The standard procedure for Bid submission via the CRM IT Interface is described in section 6.2.

996. In case the CRM IT Interface is unavailable to submit Bids on the day of the Bid submission deadline as described in § 306, ELIA notifies all Prequalified CRM Candidates via email that the following fallback procedure applies:

- ELIA extends the access to the CRM IT Interface and the Bid submission deadline by twenty-four hours.
- ELIA informs all Prequalified CRM Candidates via email, in accordance with the relevant contact details as indicated in the application form process, when the problem has been solved, allowing all Prequalified CRM Candidates to submit Bids via the CRM IT Interface.

997. In case the CRM IT Interface is unavailable to submit Bids on the day of the extended Bid submission deadline as described in § 996, ELIA extends the fallback procedure by another twenty-four hours. ELIA may repeat this process up to a maximum five consecutive periods of twenty-four hours after the standard Bid submission deadline as described in § 306.

15.6.2 Grid constraints issues

998. These issues refer to the section 6.3.2.

999. During the calculation phase, which starts on June 15 until September 15 of the year in which the Auction takes place, ELIA identifies, for the concerned Auction, the expected constraints of the public electrical transmission grid infrastructure to be taken into account during the Auction clearing.

Throughout this calculation phase, three problems could trigger this specific fallback process:

- in the event of a Force Majeure during the calculation phase, which would cause unforeseen & significant damage to one or more key grid infrastructure assets of the public electrical transmission grid, or the public gas transmission system or a public electricity distribution system provided that these have been duly communicated to ELIA by their system operator and which would as a result affect the hypotheses taken for the reference grid on the June 15 of the year in which the Auction takes place, based on which ELIA is calculating the grid constraints.
- if the hypotheses of the reference grid would significantly evolve during the calculation phase, when compared to the initial hypotheses taken in the defined reference grid at the June 15 of the year in which the Auction takes place, related to delays of Infrastructure Works which would negatively affect the possibility of Elia to connect new capacities on the transmission grid. Such delay of Infrastructure Works is considered significant when a specific grid infrastructure project has an expected delay higher than two months, compared to the initial schedule.
- in the extraordinary event that ELIA would be confronted with IT-calculation issues in determination of grid constraints, which would result in an incomplete set of grid

constraints by September 15 hence negatively affecting the ex-ante availability of all necessary and approved grid constraints.

1000. In the three above cases, ELIA initiates this specific fallback process after informing CREG of the exact cause(s).

1001. The fallback process itself consists in performing a grid feasibility check following the drivers specified in section 6.3.2.4 during the application phase after the Auction gate closing time, based on the considered clearing result. This fallback process guarantees that the grid feasibility of any Auction is ensured, in case the standard process, as specified in section 6.3.2, would fail. In case of application of this fallback process, ELIA takes reasonable measures and consults with CREG in order to improve and avoid such events for future Auctions. The fallback process can potentially imply some iterative steps after the Auction gate closing time, as defined in next §, in order to determine the optimal Auction result that respects all drivers defined in section 6.3.2.4 – while still leaving sufficient time for results validation prior to Auction result publication.

The fallback process would be as follows:

- based on the received Bids and the Demand Curve applied in the Auction, the Auction algorithm provides the clearing result but now without application of grid constraints from ELIA.
- the obtained clearing result is then subsequently verified by ELIA for grid feasibility following the methodology as defined in section 6.2.1.2 (only for the relevant CMU combinations for Additional Capacity that are part of the clearing result) and following the stepwise approach as detailed here:
 - step 1: In case the relevant CMU combination part of the clearing result respects the drivers as specified in section 6.3.2.4, no further steps are needed and the Auction result can be considered final.
 - step 2: In case the relevant CMU combination part of the clearing result does not respect the drivers as specified in section 6.3.2.4, the next optimal solution with the best objective function value needs to be determined in the Auction algorithm, by iteratively performing an Auction clearing with two additional constraints:
 - constraint 1: the best objective function value of step two worse than best objective function value of step one;
 - constraint 2: clearing result of step two does not equal clearing result of step one.
 - step 3: step two above should be repeated until a solution is found that respects all drivers as specified in section 6.3.2.4 for the respective Auction.

1002. In case no solution can be found after two iterations, fallback process described in section 15.6.3 applies.

15.6.3 Auction results issues

1003. The standard procedure for the determination of Auction results is described in section 6.4.

1004. In case of issues during the clearing of the Auction, meaning that ELIA cannot submit the list of selected Bids to CREG for validation by October 15, the following fallback procedure applies:

- ELIA informs CREG about the source of the issue.

- ELIA solves the problem. In case the amount of grid constraints would be at the source of the problem, ELIA can foresee an alternative implementation that aims to reduce the calculation complexity within the Auction clearing algorithm but which does not alter the information embodied in the exhaustive set of grid constraints calculated initially.
- ELIA submits the list of selected Bids to CREG for validation.

1005. In case the Auction results cannot be validated at the latest three Working Days before the deadline for the publication of Auction results as described in § 1065 for reasons other than the ones described in article 7*undecies*, § 13 of the Electricity Act, the following fallback procedure applies:

- CREG informs ELIA about the delay and the reason for the delay of the Auction results validation;
- when applicable, ELIA solves the problem;
- CREG validates the Auction results;
- once the results are validated, ELIA informs each Prequalified CRM Candidate about the selection of its submitted Bids. Selected Bids get the status "selected" in the CRM IT Interface;
- auction results are published as described in section 16.4, as soon as possible but at the latest on November 30.

15.7 PRE-DELIVERY CONTROL

1006. This section covers the issues that might occur during a pre-delivery control process that require a fallback procedure.

15.7.1 Pre-delivery test date notification for Existing CMUs

1007. In order to organize a pre-delivery test for a Delivery Point without sufficient historical data available (as detailed in section 8.4.2.1), ELIA sends a notification to the Capacity Provider via the CRM IT Interface, asking for a pre-delivery test date.

In case ELIA is not able to request a pre-delivery test date via the CRM IT Interface due to an IT issue, ELIA notifies the Capacity Provider that a test date is required by e-mail.

1008. In case the Capacity Provider is not able to communicate to ELIA the pre-delivery test date via the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to communicate the date, the Capacity Provider is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the date of the pre-delivery test.
- ELIA has maximum five Working Days starting from the reception of the Capacity Provider's e-mail reception date to acknowledge the pre-delivery test date communicated by e-mail.

15.7.2 Quarterly reports submission to ELIA for Additional and Virtual CMUs

1009. During a Pre-delivery Period related to an Additional or a Virtual CMU, a Capacity Provider shares with ELIA via the CRM IT Interface quarterly reports (according to section 8.3.4).

1010. In case the Capacity Provider is not able to submit a quarterly report via the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to submit the quarterly report, the Capacity Provider is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning the ID of the concerned CMU(s) as well as the date of the concerned quarterly report; and
- ELIA comes back to the Capacity Provider within maximum five Working Days starting from the Capacity Provider's email, saying that either:
 - the problem has been solved and the Capacity Provider may try again to submit the report; or
 - the problem cannot be solved in the short term, and the quarterly report may be sent by the Capacity Provider to ELIA by e-mail within five Working Days starting from ELIA's e-mail reception date.

1011. In the event that this fallback procedure is initiated, ELIA extends the deadline by five Working Days (defined in section 8.3.4) for providing the quarterly report to all Capacity Providers.

15.7.3 Pre-delivery control results

1012. For Additional and Virtual CMUs, ELIA notifies the pre-delivery control results to the Capacity Provider within a certain period of time defined in section 8.4.4 on the CRM IT Interface.

1013. In case the Capacity Provider has not received the results of his pre-delivery control via the CRM IT Interface within the timeframe specified, he initiates the fallback procedure which consists in the following steps:

- the Capacity Provider informs ELIA by e-mail that the pre-delivery control results have not been received yet and mentions the following information:
 - the ID of the CMU; and
 - the date of the quarterly report concerned.
- ELIA comes back to the Capacity Provider within maximum five Working Days starting from the Capacity Provider's email, saying that either:
 - the problem has been solved and the results are now made available on the CRM IT Interface; or
 - the problem cannot be solved in the short term, and ELIA sends the results to the Capacity Provider by e-mail.
- ELIA extends the related deadline with the number of Working Days as specified in § 53.

15.7.4 Contestation for Existing CMU

1014. The Capacity Provider is allowed to contest the provisional pre-delivery control results via the CRM IT Interface within a time period defined in section 8.4.4.2.

1015. In case the Capacity Provider is not able to notify his contestation through the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to submit his contestation, the Capacity Provider is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the nature of the IT issue;
- ELIA comes back to the Capacity Provider within maximum five Working Days starting from the Capacity Provider's email reception date, saying that either:
 - the problem has been solved and the Capacity Provider may submit his contestation via the CRM IT Interface.
 - the problem cannot be solved in the short term, and a contestation form is sent by e-mail so that the Capacity Provider can return it back completed also by e-mail.

1016. In the event the fallback procedure is initiated, ELIA extends the deadline to submit the related contestation by ten Working Days.

15.8 AVAILABILITY MONITORING AND TESTING

1017. This section covers the issues that might throughout the Delivery Period for an Availability Monitoring and Availability Testing that require a fallback procedure.

15.8.1 Notification of limitation on Available Capacity

1018. This issue refers to the section 9.3.

1019. In case the Capacity Provider is aware of a limitation on the Capacity of his CMU, the Capacity Provider notifies ELIA by providing the required information via the CRM IT Interface.

1020. In case the Capacity Provider is not able to notify its limitation on Available Capacity via the CRM IT Interface due to IT problem, he is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the Remaining Maximum Capacity; and
 - the start date and time of the unavailability; and
 - the end date and time of the unavailability; and
 - the nature of the IT issue;

- ELIA comes back to the Capacity Provider within five Working Days starting from the Capacity Provider's e-mail reception date, saying that either:
 - the problem has been solved and the Capacity Provider may try again to notify the limitation. In addition, ELIA applies the extension of related deadline by five Working Days.
 - the problem cannot be solved in the short term, but the limitation mentioned in the e-mail has been taken into account for the concerned CMU as from the date mentioned in the e-mail.

1021. It is the Capacity Provider's responsibility to notify limitations via the CRM IT Interface before 11:00 or timely initiate the fallback procedure in case of CRM IT interface failure. ELIA notes the limitation as Announced Unavailable Capacity for that CMU provided that the fallback procedure was initiated by the Capacity Provider (i.e., by sending the required email) before 11:00 the day before the start date of the limitation and that the required information is filled in following the template made available on ELIA's website.

15.8.2 AMT Moment identification

1022. This issue refers to the section 9.4.1.

1023. ELIA publishes identified AMT MTUs and AMT Moments on its website before 15:00 the day before the occurrence of the AMT Moments or no later than 18:00 in case a fallback procedure for the day-ahead market clearing applies. In case the publication of these AMT MTUs and AMT Moments is impossible because of IT issue prior to 18:00 the day before the occurrence of AMT Moment, these are not applicable.

1024. After every last Day-ahead Market gate closure time of the NEMOs composing the Day-ahead Market Price, ELIA verifies for every MTU of the concerned day if the Day-ahead Market Price exceeds the AMT Price. In case ELIA is unable to determine the Day-ahead Market Price for any given segment, it is not identified as an AMT MTU.

1025. In case a NEMO composing (part of) the Belgian Reference Price is decoupled from the Day-ahead Market (e.g., due to IT problems), this does not automatically lead to the triggering of an AMT MTU. ELIA notifies the Capacity Providers via the CRM IT Interface or by e-mail after Day-ahead Market clearing according to the following procedure:

- ELIA acknowledges the decoupling of the market before 15:00 at the latest, along with AMT MTUs and Moments identified by the resulting price information (as per section 9.4.1.2) via publication on their website.
 - Capacity Providers proceed as if these AMT Moments apply.
 - ELIA assesses the impact of the decoupling on the Day-ahead Market Price.
 - in case the impact is such that the price would exceed the AMT Price, ELIA continues to apply the identified AMT MTUs and AMT Moments.
 - in case the impact is such that the market decoupling itself likely caused the price to rise above the AMT Price, ELIA notifies its publication on its website and notifies the Capacity Providers via the CRM IT Interface or by e-mail that the concerned MTU are not considered as AMT MTU(s).

15.8.3 Declared Price and Associated Volume declaration

1026. This issue refers to the section 9.4.2.1.

15.8.3.1 Declaration modalities

1027. The Capacity Provider notifies (Partial) Declared Prices to ELIA for CMU(s) without Daily Schedule through declaration(s) via the CRM IT Interface.

1028. In case the Capacity Provider is not able to declare or update (Partial) Declared Price(s) and Associated Volume(s) via the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to declare or to update the information, the Capacity Provider is entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the new (Partial) Declared Price(s) and Associated Volume(s), if any; and/or
 - the (Partial) Declared Price(s) and Associated Volume(s) he wants to modify and their new value, if any; and
 - the nature of the IT issue;
- ELIA comes back to the Capacity Provider within five Working Days starting from the Capacity Provider's e-mail reception date, saying that either:
 - the problem has been solved and the Capacity Provider may try again to declare or update (Partial) Declared Price(s) and Associated Volume(s) via the CRM IT Interface.
 - the problem cannot be solved in the short term, but the information mentioned in the e-mail has been taken into account for the concerned CMU.

1029. If the Capacity Provider is not able to declare or update the value(s) of (the set of) Declared Day-ahead Price(s) before 9:00 the day before the occurrence of the AMT MTU due to this fallback procedure and the e-mail was sent to ELIA before that time, ELIA takes into account these prices for this AMT MTUs provided that the declaration/update information is compliant with section 9.4.2.

1030. If the Capacity Provider is not able to declare or update the value(s) of (the set of) Declared Intraday or Balancing Price(s) at least two hours before the start of the AMT MTU due to this fallback procedure and the e-mail was sent to ELIA before that time, ELIA takes into account these prices for this AMT MTUs provided that the declaration/update information is compliant with section 9.4.2

15.8.3.2 Rejection or acceptance notification

1031. In case of rejection, the Capacity Provider automatically receives a notification of rejection completed with a justification. In case of acceptance, the Capacity Provider automatically receives a notification of acceptance.

1032. In case the Capacity Provider has not received the rejection or acceptance notification via the CRM IT Interface, he initiates the fallback procedure which consists in the following steps:

- the Capacity Provider informs ELIA by e-mail as soon as possible that the notification has not been received and mentions the following information:
 - the ID of the concerned CMU; and
 - the time and date of the declaration/update; and

- the nature of the IT issue;
- ELIA comes back to the Capacity Provider within five Working Days starting from the Capacity Provider's e-mail reception date, giving the same information as would have been provided in the notification of rejection or acceptance.

15.8.4 Notification of the Availability Test

1033. This issue refers to the section 9.5.1.2.

1034. ELIA can verify whether a Capacity Provider has committed to the Availability Obligation for one of its CMUs through unannounced Availability Tests. ELIA instructs the Capacity Provider to perform an Availability Test via the CRM IT Interface at the latest before 07:30 the day before it is to take place.

1035. In case ELIA is not able to notify the Availability Test via the CRM IT Interface due to an IT issue, the following fallback procedure is initiated:

- ELIA communicates to the Capacity Provider the following information. Such communication happens by e-mail no later than 07:30 the day before it takes place and is confirmed immediately per phone:
 - the ID of the concerned CMU; and
 - the start date and time of the test; and
 - the end date and time of the test;

15.8.5 Submission of the delivery activity report

1036. This issue refers to the section 9.8.1.

1037. ELIA passes on to the Capacity Provider the delivery activity report for the 15th of month M+2 at the latest related to AMT Moments and Availability Tests having taken place during month M for which the Unavailability Penalties linked to this period are notified.

1038. In case the Capacity Provider has not received its delivery activity report via the CRM IT Interface within the timeframe specified hereabove, he initiates the fallback procedure which consists in the following steps:

- the Capacity Provider informs ELIA by e-mail as soon as possible that the delivery activity report has not been received and mentions the following information:
 - the ID of the concerned CMU; and
 - the month of report; and
- ELIA immediately comes back to the Capacity Provider, giving the same information as would have been provided in the delivery activity report. Such email replaces the delivery activity report communicated to the Capacity Provider through the CRM IT Interface.

15.8.6 Notification of downwards revision

1039. This issue refers to section 9.6.3.

1040. The notification of downwards revision takes place via the monthly activity report. In case the Capacity Provider did not receive its delivery activity report, the procedure of section 15.8.5 applies.

15.8.7 Notification of three successful deliveries

1041. This issue refers to § 644.

1042. From the moment the Capacity Provider receives a downwards revision, the CMU has to successfully provide its Obligated Capacity three consecutive times during an AMT Moment and/or Availability Tests to reinstate the Capacity Provider's original Capacity Remuneration. The Capacity Provider notifies ELIA via the CRM IT Interface after completing the third successful delivery.

1043. In case the Capacity Provider is not able to notify that he successfully completed three deliveries via the CRM IT Interface due to IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to notify ELIA, the Capacity Provider initiates the fallback procedure.

The fallback procedure consists in the following steps:

- the Capacity Provider contacts ELIA as soon as possible by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the start date and time of each concerning Availability Test and/or AMT Moment ; and
 - the nature of the IT issue.
- ELIA comes back to the Capacity Provider within five Working Days starting from his e-mail reception date, saying that either:
 - the problem has been solved and the Capacity Provider may try again to notify the three successful deliveries.
 - the problem cannot be solved in the short term, but the information mentioned in the e-mail has been taken into account for the concerned CMU.

The use of this fallback procedure does not impact the moment from which the initial remuneration is re-established.

15.9 SECONDARY MARKET

1044. This section covers the issues that might occur on the Secondary Market and that require a fallback procedure.

15.9.1 Notification issuance of a Secondary Market transaction

1045. This part refers to the section 10.5.1, where for any Secondary Market transaction the Buyer of an Obligation and Seller of an Obligation, or the Exchange, have first to notify ELIA via the CRM IT Interface.

1046. In case the Prequalified CRM Candidates, Capacity Providers or the Exchange are not able to issue the transaction to ELIA via the CRM IT Interface due to IT problem, they check first that the CRM IT Interface is not under maintenance. If this is not the case and after a new and failed attempt to notify the transaction, they are entitled to initiate the fallback procedure.

The fallback procedure consists in the following steps:

- the Prequalified CRM Candidates, Capacity Providers or the Exchange contacts ELIA by e-mail mentioning:
 - the CMU ID of the Seller of an Obligation; and
 - the CMU ID of the Buyer of an Obligation; and
 - the start date (date and hour) of the Transaction Period; and
 - the end date (date and hour) of the Transaction Period; and
 - the nature of the IT issue;
- ELIA comes back to the Prequalified CRM Candidates, Capacity Providers or the Exchange within maximum five Working Days starting from their e-mail's reception date, saying that either:
 - the problem has been solved and the Prequalified CRM Candidates, Capacity Providers or the Exchange may try again to issue the transaction via the CRM IT Interface.
 - the problem cannot be solved in the short term and the transaction form is sent by e-mail so that the Prequalified CRM Candidates, Capacity Providers or the Exchange can fill it in and return it back completed to ELIA also by e-mail (if applicable, including proof of a permissible type of Financial Security, in accordance with the requirements set in section 11.3).
- ELIA applies the extension of related deadline as specified in the § 53 above.

1047. In case of bilateral Secondary Market transaction, if the other party cannot confirm the transaction within five Working Days following the first notification due to the fallback procedure and he has notified ELIA by e-mail within the time limit, ELIA considers the notification issuance of that transaction to be compliant (upon the condition that the other validity conditions are satisfied). The date of the first email sent by the Prequalified CRM Candidate or Capacity Provider to ELIA to initiate the fallback procedure above is then used to determine the Transaction date, including its ex-ante or ex-post character.

15.9.2 Acknowledgement of reception by ELIA

1048. This part refers to the section 10.5.2.

1049. After the notification issuance of the transaction, ELIA notifies the good reception with an acknowledgement of reception towards the counterparty(ies) issuing the notifications.

1050. For a bilateral Secondary Market transaction, the acknowledgement of reception is sent by ELIA to the Seller of an Obligation and the Buyer of an Obligation within one Working Day after reception of the first notification.

1051. For Secondary Market transaction notified by an Exchange, the acknowledgement of reception is sent by ELIA to the Exchange within one Working Day after reception of one notification.

1052. If the Prequalified CRM Candidates, Capacity Providers or the Exchange have not received the notification via the CRM IT Interface within one Working Day, they initiate the fallback procedure which consists in the following steps:

- the Prequalified CRM Candidates, Capacity Providers or the Exchange inform ELIA by e-mail as soon as possible that the notification has not been received and mentions the following information:
 - the CMU ID of the Seller of an Obligation; and

- the CMU ID of the Buyer of an Obligation; and
- Secondary Market Transaction ID; and
- the date of the notification in case of transaction notified by an Exchange; or
- the date of the notification in case of bilateral transaction;
- ELIA comes back to the Prequalified CRM Candidates, Capacity Providers or the Exchange within two Working Days starting from the e-mail reception date, giving the acknowledgement of reception.

15.9.3 Approval or rejection of a Secondary Market transaction by ELIA

1053. This issue refers to § 756.

1054. As a final step of the Secondary Market process, a notification providing the results linked to a Secondary Market transaction – i.e., whether the Secondary Market transaction is compliant or not – is provided by ELIA to the Buyer and Seller of an Obligation or to the Exchange, within five Working Days from the acknowledgement of reception by ELIA.

1055. In case the Prequalified CRM Candidates, Capacity Providers or the Exchange have not received the notification within five Working Days, they initiate the fallback procedure which consists in the following steps:

- the Prequalified CRM Candidates, Capacity Providers or the Exchange informs ELIA by e-mail as soon as possible that the notification has not been received and mentions the following information:
 - the CMU ID of the Seller of an Obligation; and
 - the CMU ID of the Buyer of an Obligation; and
 - Secondary Market transaction ID; and
 - the date of the acknowledgment of reception of the transaction;
- ELIA comes back to Prequalified CRM Candidates, Capacity Providers or the Exchange within five Working Days starting from the e-mail reception date, giving the same information as would have been provided in the notification of approval or rejection.

15.10 FINANCIAL SECURITIES

1056. This section covers the issues that might occur during the Financial Security process and that require a fallback procedure.

15.10.1 Submission of Financial Security

1057. This part refers to the Financial Security obligation as per chapter 11:

- for a Transaction on the Primary Market, the submission of Financial Security is a condition to be able to participate to the Primary Market and the process happens partially in parallel with the Prequalification Process, so the fallback procedure is incorporated in section 15.3;

- for a transaction on the Secondary Market, the submission of Financial Security is a condition to obtain ELIA's approval for a notified transaction on the Secondary Market, so the fallback procedure is incorporated in section 15.9.

1058. In case the CRM Actor is not able to submit the Financial Security to ELIA via the CRM IT Interface due to an IT problem, he checks first that the CRM IT Interface is not under maintenance. If this is not the case and after trying again to submit the Financial Security, he initiates the fallback procedure.

The fallback procedure consists in the following steps:

- the CRM Actor contacts ELIA by e-mail mentioning:
 - the ID of the concerned CMU; and
 - the date by which he needs to submit a Financial Security; and
 - the amount of the Financial Security he needs to submit; and
 - the expiry date of the Financial Security he needs to submit; and
 - the type of Financial Security he wants to submit; and
 - the nature of the IT issue.
- ELIA comes back to the CRM Actor within maximum five Working Days starting from the CRM Actor's e-mail, saying that either:
 - the problem has been solved and the CRM Actor may try again to submit the Financial Security via the CRM IT Interface.
 - the problem cannot be solved in the short term, so the CRM Actors submits the Financial Security by email.

15.10.2 Release of Financial Security

1059. In case the CRM Actor has not received the notification via the CRM IT Interface in due time and the corresponding amount of the Secured Amount was not released, he initiates the fallback procedure which consists in the following steps:

- the CRM Actor informs as soon as possible ELIA by e-mail with the following information:
 - the ID of the concerned CMU; and
 - the value in [€] of the Secured Amount that needs to be released; and
 - the date of the Secured Amount decrease; and
 - the name of the financial or corporate institution that issued the bank guarantee (if applicable);
- ELIA comes back to the Capacity Provider within maximum five Working Days starting from the e-mail reception, saying that either:
 - the conditions of release are met and ELIA does its best effort to release the Secured Amount as soon as possible.
 - the conditions of release are not met and ELIA explains the reasons why the Secured Amount is not released.

16 TRANSPARENCY AND MOTIVATION

16.1 INTRODUCTION

This section of the Functioning Rules includes the rules to ensure the transparency of the Capacity Remuneration Mechanism.

This chapter is structured around five sections.

Section 16.2 establishes the general principles on Transparency and Motivation.

Section 16.3 describes the prequalification results that are published in order to enable transactions on the Secondary Market.

Section 16.4 explains the information that ELIA publishes related to the Opt-out Volumes, volume corrections of the Demand Curve and Auction results, distinguishing between information for the submitted Bids and information for selected Bids.

Section 16.5 specifies the information that is included in the pre-delivery activity reports.

Finally, section 16.6 details the information provided in the reports published before the start of a Delivery Period.

16.2 GENERAL PRINCIPLES

1060. ELIA ensures at all times compliance with the transparency obligation, specifically for the purpose of giving CRM Actors the information necessary for performing their obligations, ensuring the correct operation of the market and exchanges, and facilitating CREG supervision in connection with the CRM.
1061. In connection with the transparency obligation as defined below, ELIA publishes all relevant CRM -related information, except when such publication is prohibited by law or is likely to negatively impact the correct operation of the CRM. Without prejudice to information which must be divulged in accordance with the sections below, when ELIA deems that information must not be published, it will inform CREG of the reasons for said decision. If CREG deems that these reasons are not justified or that balancing out the interests at hand justifies such publication, it can require that ELIA publish the information in question.
1062. The provisions set out in the sections below determine the information which ELIA must at a minimum publish in connection with the CRM.
1063. In connection with the processing of each stage of an Actor's involvement in the CRM implying a decision by ELIA, ELIA shall ensure full compliance with the obligation to provide reasons in respect of said Actor. To that end, ELIA will send to the CRM Actor in question, in a timely fashion, the *de facto* and/or *de jure* reasons on which its decision is based. In addition, ELIA send CREG the necessary information, in an intelligible format, in order to enable it to take a decision on the validity of the Auction.

16.3 PREQUALIFICATION RESULTS REPORT

1064. ELIA publishes a list of Prequalified CMUs on the CRM webpage of its website including the following information:

- name of the CMU;
- contact details as provided by the Prequalified CRM Candidate via the application form during the Prequalification Process (according to § 79);

At the latest ten calendar days after each of the following dates ELIA updates the list of Prequalified CMUs by adding new Prequalified CMUs and removing CMUs whose Prequalification is not valid anymore or for which the CRM Actor has requested to archive the CMU (according to section 5.6):

- January 1; and
- April 1; and
- July 1 (containing a screenshot of the situation before 15/6, so without consideration of the results of the Prequalification Process for the upcoming Auctions later that year); and
- November 1 (i.e., after the publication of the Auction results. Hence this timing is postponed in case of a delay in the Auction results publication as described in section 15.6.3).

16.4 AUCTION REPORT

1065. For each conducted Auction, and pursuant to CREG's Auction result validation decision, ELIA publishes an Auction report on its website by October 31 at the latest. The Auction report includes, at the very least, the information described in the sections below.

16.4.1 Opt-out Volumes

1066. For every Auction, the Auction report includes the following aggregated information:

- the total Opt-out Volume contributing to adequacy (category "IN") (derated³⁴) – and a split per technology – is included in the Auction report and is calculated in accordance with section 5.4.2.2.1.
- the total Opt-out Volume not contributing to adequacy (category "OUT") (derated³⁵) is included in the Auction report and is calculated and split in accordance with section 5.4.2.2.1.

16.4.2 Volume corrections of the Demand Curve

1067. ELIA publishes the details of corrections made to the demand curve. These include detailed information received during the Prequalification process (which was not yet known during the demand curve calibration), and on the basis of which ELIA corrects the volume to be procured during the Auction.

16.4.3 Results of the Auction

1068. The Auction report includes specific information on the selected Bids in connection with the Auction. This information pertains, at the very least, to the maximum volume offered by each

³⁴ Based on the Derating Factors provided by the CRM Candidate as part of the Prequalification File submission.

³⁵ Based on the Derating Factors provided by the CRM Candidate as part of the Prequalification File submission.

CMU as well as the volume of the selected bid, the particulars of the CMU (with the type(s) of technology and status) and of the Prequalified CRM Candidate whose bid was selected, link(s) between the bids ("Linked Bids"), if any, and the duration of the Capacity Contract.

1069. In addition, the Auction Report contains the aggregated data set out in sections 16.4.3.1 and 16.4.3.2.

16.4.3.1 Submitted Bids

16.4.3.1.1 Bid information

1070. The report contains aggregated information on the valid Bids that have been submitted in the Auction. As shown in annex 18.6.2 the following information is provided:

- bid volume weighted average price of Bids, split into Bids that are subject to the Intermediate Price Cap and Bids that are not subject to the Intermediate Price Cap;
- average capacity volume of all Bids;
- total number of submitted Bids;
- total number of submitted CMUs;
- total number of unique CRM Candidates that have participated in the Auction.

In addition, information is provided on the share of mutually exclusive Bids:

- number of mutually exclusive Bids (in % of total number of submitted Bids);
- total volume of mutually exclusive Bids together with the maximum volume of mutually exclusive Bids that can be selected in the Auction.

16.4.3.1.2 Capacity volume information

1071. As shown in annex 18.6.2, the offered capacity volumes (expressed in MW) are separately aggregated by:

- Capacity Contract Duration (from minimum one year to maximum fifteen years); Within the category of capacity volumes with a Capacity Contract Duration of one year, difference is made between capacities subject to the Intermediate Price Cap or not;
- CMU status (Existing CMU, Additional CMU (excluding New Build CMUs), New Build CMU or Virtual CMU);
- technology classes, in line with the Derating Factor categories determined in the Royal Decree on "Methodology";
- TSO-connected vs. DSO-connected vs. Unproven Capacity vs. Indirect Foreign Capacity (TSO-connected).

16.4.3.2 Selected Bids

16.4.3.2.1 Bid information

1072. The report contains aggregated information on the Bids that have been selected in the Auction. As shown in annex 18.6.3, the following information is provided:

1073. Bid volume weighted average price of Bids, split into Bids that are subject to the Intermediate Price Cap and Bids that are not subject to the Intermediate Price Cap;

- average capacity volume of all selected Bids;
- total number of selected Bids;
- total number of selected CMUs;
- total number of unique CRM Candidates that have been selected in the Auction.

16.4.3.2.2 Auction price information

1074. In view of a pay-as-bid pricing rule the report contains information on the highest selected Bid Price.

16.4.3.2.3 Capacity volume information

1075. As shown by annex 18.6.3.3, the offered capacity volumes (expressed in MW) are separately aggregated by:

- Capacity Contract Duration (from minimum one year to maximum fifteen years); Within the category of capacity volumes with a Capacity Contract Duration of one year, difference is made between capacities subject to the Intermediate Price Cap or not; and
- In case a Capacity Contract of more than one year is awarded to a CMU for which a degradation factor was specified, the degradation factor for each Delivery Period over the duration of the Contract; and
- CMU status (Existing CMU, Additional CMU (excluding New Build CMUs), New Build CMU or Virtual CMU);
- Technology classes, in line with the Derating Factor categories determined in the Royal Decree on "Methodology";
- ELIA Grid-connected vs. DSO-connected vs. Unproven Capacity vs. Foreign Indirect Capacity (TSO-connected).

16.5 PRE-DELIVERY ACTIVITY REPORT

1076. No later than March 31 of every calendar year and starting on March 31, 2023, ELIA publishes on its website a pre-delivery activity report for every Delivery Period covered by the pre-delivery controls during the past year.

1077. As shown by annex 18.6.4, the pre-delivery activity report contains the following information presented for every forthcoming Delivery Period separately:

- For Existing CMUs:
 - Contracted Capacities of Transactions with a Transaction Period covering the respective Delivery Period, aggregated over the CMUs with an 'existing' status;
 - Missing Volumes identified during the pre-delivery controls during the past year, aggregated over the CMUs with an 'existing' status.
- For Additional CMUs:

- Contracted Capacities of Transactions with a Transaction Period covering the respective Delivery Period, aggregated over the CMUs with an 'additional' status;
 - Missing Volumes identified during the pre-delivery controls during the past year and before the volume determination for the Y-1 Auction, aggregated over the CMUs with an 'additional' status;
 - Missing Volumes identified during the pre-delivery controls during the past year and after the volume determination for the Y-1 Auction, aggregated over the CMUs with an 'additional' status.
- For Virtual CMUs:
- Contracted Capacities of Transactions with a Transaction Period covering the respective Delivery Period, aggregated over the Virtual CMUs.
 - Missing Volumes identified during the pre-delivery controls during the past year and before the volume determination for the Y-1 Auction, aggregated over the Virtual CMUs;
 - Missing Volumes identified during the pre-delivery controls during the past year and after the volume determination for the Y-1 Auction, aggregated over the Virtual CMUs.

16.6 OTHER REPORTS

16.6.1 Yearly report before the start of the Delivery Period

1078. Next to the publication of the results of the Auction, ELIA publishes on its website, no later than three months before the start of the Delivery Period, a yearly report containing information on the upcoming Delivery Period. As shown by annex 18.6.5, this yearly report includes, among others, the following elements:

- Contracted Capacities, aggregated over the CMUs, awarded in the Y-4, Y-2 and Y-1 Auctions for the Delivery Period.
- Contracted Capacities, aggregated over the CMUs, awarded during earlier Auctions related to previous Delivery Periods, for which the Transaction Period covers the Delivery Period covered by the report.
- the Strike Price applicable to the Y-4 Auction, to the Y-2 Auction and to the Y-1 Auction for that Delivery Period.
- the AMT Price for that Delivery Period.

17 DIRECT AND INDIRECT FOREIGN CAPACITY PARTICIPATION

17.1 INTRODUCTION

Following article 26 (1) of Regulation (EU) 2019/943 a capacity mechanism shall be open to direct cross-border participation of Capacity Providers located in another Member State. Also, following article 26 (11) of Regulation (EU) 2019/943, the participation must comply with the technical specifications set out in ACER Decision 36-2020.

The Electricity Act distinguishes Direct Foreign Capacity and Indirect Foreign Capacity. Pursuant to the definition in article 2, 86° of the Electricity Act, the Direct Foreign Capacity is considered as a domestic capacity and not as cross-border participation as per article 26 of the Regulation (EU) 2019/943.

The participation of Indirect Foreign Capacity is enabled by the Royal Decree on "Indirect Foreign Capacities" since the first Y-1 Auction for the Delivery Period starting in November 2025. This Royal Decree defines the principles, terms and conditions applying to the Indirect Foreign Capacity holder in the context of its participation in the Belgian CRM.

17.2 DIRECT FOREIGN CAPACITY PARTICIPATION

1079. Given the definition of Direct Foreign Capacity in article 2, 86° of the Electricity Act, this capacity is considered on the same terms as a domestic capacity, and the Direct Foreign Capacity Holders are allowed to participate in the Belgian CRM at the same conditions as the Belgian Capacity Holders, while taking into account the additional specific conditions and modalities mentioned in article 7undecies §8, alinea 5, of the Electricity Act and any other legal requirement applicable on them.

1080. This means that as a general rule, unless specifically stated otherwise in the Functioning Rules, that the same rules apply to Direct Foreign Capacity and their Capacity Holders as for any other (domestic) Capacity and Capacity Holder.

1081. Nevertheless, several aspects related to the Prequalification Process of the Direct Foreign Capacity participation of the Eligible Direct Foreign Capacity Holder are specified in section 5.2.3.1.1.

1082. Any dispute with respect to the participation of the Direct Foreign Capacity Holder to the CRM will be ruled according to chapter 14.

17.3 INDIRECT FOREIGN CAPACITY PARTICIPATION

17.3.1 GENERAL PROVISIONS

1083. This section describes the provisions applicable to the Indirect Foreign Capacity Holder for their participation in the Belgian CRM.

17.3.1.1 CRM IT INTERFACE AND IT REQUIREMENTS

1084. The CRM IT interface and IT requirements are the same as mentioned in section 2.6, with the addition of the two sections below.

17.3.1.1.1 Admission Process module of the CRM IT Interface

1085. The Admission Process module of the CRM IT Interface is only open to Foreign CRM Candidates and is used for the Admission Process. The specificities of this Interface are similar to the ones from the Prequalification module, as detailed in section 2.6.2.

17.3.1.1.2 Pre-Auction module of the CRM IT Interface

1086. the Pre-Auction module of CRM IT Interface is only open to the Foreign CRM Candidates once the CMU has successfully completed the Admission Procedure. It allows the Foreign CRM Candidate to submit their Bid during the Pre-Auction.

17.3.1.2 Participation to multiple Capacity Mechanisms

1087. In case a CMU is contracted in multiple capacity mechanisms, across multiple countries, ELIA will apply the rules set out in the ACER Decision³⁶ regarding this case. ELIA uses the Belgian CRM method to assess the total availability of the unit and then apply the pro rata rule as set out in the ACER decision.

1088. For a CMU involved in a transaction in a capacity mechanism organised by another EU member state, with a transaction period that (partially) overlaps with the Delivery Period, the availability volume attributed to the Belgian CRM is defined according to the formula set out in the ACER Decision mentioned in § 1087. The formula is as follows:

$$\begin{aligned} & \text{Available volume}_{CRM}(MTU) \\ &= \text{Total available capacity}_{CRM}(MTU) * \frac{\text{Obligated Capacity}_{CRM}(MTU)}{\sum_{i \in MS} \text{Total contracted capacity}_i(CMU)} \end{aligned}$$

Where:

- *Available volume_{CRM}(MTU)* is the availability volume of the CMU in the CRM;
- *Total Available Capacity_{CRM}(MTU)* is the total Available Capacity of the CMU as a result of the Availability Monitoring as described in section 9.4.3.2;
- *Obligated Capacity_{CRM}(MTU)* is the Obligated Capacity of the CMU in the CRM defined in section 9.4.3.1;
- *Total contracted capacity_i(CMU)* is the total contracted capacity of the CMU in capacity mechanism i, as registered in the EU registry, that applies over the entire delivery period specific to each capacity mechanism.

³⁶ ACER decision on common rules for cross-border participation in electricity capacity mechanisms ([Microsoft Word - XBP CM - Annex I - technical specifications](#))

17.3.1.3 EU registry

1089. ELIA and the Foreign TSO use the EU registry, referred to in Article 26(15) of Regulation (EU) 2019/943 of the European Parliament and of the Council, to register the Prequalified CRM Candidates and the selected Capacity Providers of their Control Zone.

17.3.2 ADMISSION PROCESS

17.3.2.1 Introduction

1090. The Admission Process is to be followed by all Foreign CRM Candidates that wish to participate to the Auction.

1091. The purpose of the Admission Process is to determine whether and with which volume a Foreign CRM Candidate is eligible to participate in the Pre-Auction and to determine the volume that the CMU can offer at the Pre-Auction in accordance with section 17.3.3, based on declarations from the Foreign CMU.

As highlighted in section 17.3.2.2.3, the Admission Process is done on a declarative basis, where the Foreign CRM Candidate declares to provide all the required information/documentation during the full Prequalification process in case he is selected in the Pre-Auction.

17.3.2.2 Admission Process requirements

17.3.2.2.1 Preparation phase

1092. The preparation phase of Indirect Foreign Capacity holder going through the Admission Process is similar to the phase foreseen in section 5.2.1 for Capacities participating to the Prequalification Process.

17.3.2.2.2 Requirements prior to the submission of an Admission file

1093. Prior to submitting an Admission file, an Indirect Foreign Capacity Holder shall get the status of a Foreign CRM Candidate by filling in an application form and then declare that it undertakes to comply with the conformity checks.

17.3.2.2.2.1 Application form

1094. The requirements linked to the submission of the application form of the Indirect Foreign Capacity Holder to launch the Admission Process are similar to the ones of Prequalification Process detailed in section 5.2.2.1.

1095. At the latest within one Working Day after April 1, an Indirect Foreign Capacity Holder submits an application form through the ELIA CRM IT Interface.

17.3.2.2.2 Compliance check(s)

1096. Once the application form is approved by ELIA and prior to the submission of an Admission file, the Foreign CRM Candidate declares that it undertakes³⁷ to comply with the provisions listed below by ticking the corresponding boxes in the CRM IT Interface:

- the latest Functioning Rules approved by Royal Decree; and
- the admissibility criteria for the Prequalification Process fixed pursuant to article 7*undecies* § 8 al. 1er, 1° and 2° of the Electricity Act; and
- if applicable, the requirements in terms of prior authorisation for the establishment and operation of the facilities referred to in article 4 § 1 of the Electricity Act; and
- the admissibility conditions set out in article 5, §1 of the Royal Decree "Indirect Foreign Capacity"; and
- if applicable, the CO₂ Emissions Cap; and
- any other applicable legal and regulatory framework.

It is up to the Foreign CRM Candidate to remain fully compliant at all times with the checks mentioned above applicable to it.

17.3.2.2.3 Requirements for the submission of the Admission file

1097. This section lists all the requirements to be timely respected by a Foreign CRM Candidate for his Admission file to be considered as "approved" by ELIA. Admission files that fail to timely meet the requirements as described in this section will be considered as "rejected" by ELIA.

1098. Once an Admission file has been submitted, ELIA verifies its completeness, veracity and accuracy in order to ensure that it is compliant with the requirements listed in this section.

1099. An Admission file is for one CMU only.

1100. A Foreign CMU can only consist of Delivery Points located in the same Adjacent European member states and control zone.

1101. The requirements for the Admission file are different depending on the country in which the CMU is located. These specific requirements are covered respectively in sections 17.3.2.3.1.3 to 17.3.2.3.1.5.

1102. The application form submission date and Admission file submission date are the dates of receipt by ELIA for which a Foreign CRM Candidate receives a notification confirming the good reception by ELIA, of respectively the application form or the Admission file.

1103. To verify compliance by the Foreign CRM Candidate with legal and regulatory provisions, all the information submitted by the Foreign CRM Candidate are stored by ELIA for at least twelve years starting from:

- the Admission file rejection date;

³⁷ This can be done by any user of the CRM IT Interface and once it has been done, it is considered as validated for all other users linked to the same CRM Candidate.

- the Admission file approval date or the date of the notification that the Bid for this CMU was not selected in the Pre-Auction, both dates being subject to the absence of a Secondary Market Transaction;
- or the end date of the Capacity Contract in case a Capacity Contract is concluded.

17.3.2.3 General requirements for a Delivery Point of a Foreign CMU

1104. The general requirements applicable to Delivery Point(s) from a Foreign CMU for the Admission Process are similar to the ones applicable to Delivery Points of a CMU for the Prequalification Process as detailed in section 5.2.3.1.1.

ELIA applies the 'first come, first served' rule when processing Admission files.

1105. An Existing Delivery Point may be any point, or a group of points associated to:

- a Headmeter at the level of an Access Point connected to the Foreign TSO grid; or
- a Submeter within the electrical facilities of a Grid User downstream of an Access Point connected to the Foreign TSO grid.

1106. If data aggregation is necessary to comply with the requirements mentioned in section 17.3.2.2.3, the Foreign TSO of the relevant Control Zone is responsible for providing the appropriate aggregated data. This may include, amongst others, the Daily Schedule and measuring data.

1107. Some aspects depend on the country in which the Delivery Point is located. Such country-related aspects are listed in the tables below. They include all the data and documents that shall be provided per Delivery Point (existing or additional) to ELIA by a Foreign CRM Candidate as part of his Admission file in order to be considered as "approved".

The crosses in the table indicate for which status (existing and/or additional) the requirement applies. An asterisk in the last two columns means that the information is mandatory for all Existing or Additional Delivery Points, whereas an asterisk in the comments-column describes the subset of Delivery Points for which the information provision is mandatory.

			Delivery Point's status	
Requirement	Type of Data	Comments	Existing	Additional
General Information:				
Delivery Point name	Name	The Foreign CRM Candidate chooses and communicates a Delivery Point's name. There is no requirement with respect to the choice of this name.	X*	X*
Technology	Name (drop-down list)	The technology of the Delivery Point is supplied according to the list provided by Article 13 §1 of the Royal Decree on Methodology. If the technology selected for the Delivery Point(s) by the CRM Candidate is Demand Side Management, he undertakes to ensure that the Delivery Point(s) for which he wishes to prequalify and participate to the Auction is (are) not connected to a generation unit and cannot lead to an injection on such grid. The Foreign CRM Candidate should confirm this via the CRM IT Interface. This declaration is binding for the CRM Candidate in the event of selection in the Auction.	X*	X*
Type of Delivery Point	Name (drop-down list)	The Foreign CRM Candidate needs to inform ELIA about the fact that the Delivery Point is connected to the Foreign TSO grid as in first instance, only TSO-connected capacities are allowed.	X*	X*
Single line diagram	Declaration to provide document	A single line diagram (as defined in articles 366 and 367 of the Federal Grid Code) is a diagram with the specific identification of the exact location of the Delivery Point. It can include more than one Delivery Point.	X	X
Linked Capacities	Number (ID of the Delivery Point(s))	*The Foreign CRM Candidate provides ELIA with the list of Delivery Points which are linked together (Linked Capacities). The link between Delivery Points leads to links between CMUs and can be translated into "Linked Bids" for the Pre-Auction as specified in § 1140.	X	X
CO2 calculation module	Declaration to provide document	This is a calculation module provided by the Federal Public Service Economy on its CRM webpage and is filled in by the Foreign CRM Candidate as part of its Prequalification File. *This requirement is mandatory for Delivery Points that concern a production capacity using fossil fuels.	X	X
CO2 emission	Number (in g/kWh)	*The Foreign CRM Candidate must provide a CO2 emission of the Delivery Point if it concerns a production capacity using fossil fuels as detailed in annex 18.1.6. Other capacities can provide CO2 emission whenever relevant. Their value set by default is 0, with this parameter being used for the Pre-Auction and Auction in case tie-breaking rules are necessary. The CO2 emissions are the subject of a decision by ELIA based on an advice of Federal Public Service Economy during the Prequalification File review process as detailed in §§ 142 and 143. The Foreign CRM Candidate selecting a storage related technology undertakes to ensure that the storage facility for which he wishes to prequalify and participate to the Pre-Auction and to the Auction is not connected to a generation unit but to the TSO's network. The Foreign CRM Candidate should confirm this via the CRM IT Interface. This declaration constitutes a contractual clause inherent in the CRM. The FPS Economy reserves itself the right to verify the accuracy of this declaration at any time. Any offender is liable to sanctions.	X	X
CO2 emission additional documentation	Declaration to provide documentation	*Whenever desired by the Foreign CRM Candidate, or when explicitly requested by the Federal Public Service Economy, additional specific CO2 related documentation is provided via the CRM IT interface.	X	X
Grid User Declaration	Declaration to provide documentation	*The Grid User Declaration is a signed declaration to provide in case the Grid User differs from the Foreign CRM Candidate. The list of the clauses that must at least be presented into this signed declaration can be found in annex 18.1.2. A Delivery Point can be related to only one Grid User Declaration at a time.	X	
Information related to production or energy storage permit	Declaration to provide documentation	To the extent that the applicable foreign national legislation imposes a production or energy storage permit equivalent to that required under article 4 § 1 of the Electricity Act , the Foreign CRM Candidate provides: - the production or energy storage permit if the Foreign CRM Candidate already has it; or - proof that a production or energy storage permit request has been introduced at the latest by April 15 of the forthcoming Auction if the Foreign CRM Candidate does not yet have the production or energy storage permit. One production or energy storage permit can be valid for more than one Admission file as it may cover more than one CMU. For the CMU to be Admitted and prequalified, such production or energy storage permit must be valid at least until the notification of the Auction results (defined in section 6.4) and must be obtained within twenty days		X

		before the deadline for submitting Bids in connection with the auctions, in accordance with article 7undecies §12 al. 3, 2 a).		
Country and Control Zone	Name (drop-down list)	The Foreign CRM Candidate indicates in which country and Control Zone the Delivery Point is located.	X*	X*
Nominal Reference Power related information – for Existing Delivery Points:				
Expected Nominal Reference Power	Number (in MW)	In case of an Existing Delivery Point, the Foreign CRM Candidate provides the Expected Nominal Reference Power of the Delivery Point.	X*	
NRP based on injection data only	Name (drop-down list)	The Foreign CRM Candidate indicates to ELIA whether the NRP of his Delivery Point can be determined based on injection data only. This will have an impact on the methodology used to determine NRP.	X*	
Non-representative days for NRP determination	Y/N and declaration to provide if Y	In case the NRP of the Delivery Point cannot be determined based on injection data only, the Foreign CRM Candidate may provide a list of non-representative days of the past thirteen months, which will then be discarded from the period used to determine the NRP as described in the section 5.4.1.1.1.1.1. Non-representative days can only be exceptional holidays, strike days or closing periods that have an impact on the injection/offtake profile of the Delivery Point. This has to be justified as such by the Foreign CRM Candidate.	X	
Unsheddable Margin	Number (in MW)	The Unsheddable Margin cannot be lower than the negative of the Nameplate capacity of production and the negative of the maximal injection. *This requirement is mandatory only for Delivery Points for which NRP cannot be calculated based on injection data only	X	
Nominal Reference Power related information – for Additional Delivery Points:				
Declared Nominal Reference Power	Number (in MW)	In case of Additional Delivery Point, the Foreign CRM Candidate provides the Declared Nominal Reference Power of the Delivery Point.		X*

Table 16: Requirements for a Foreign Delivery Point

17.3.2.3.1.1 General requirements for an Indirect Foreign Capacity

1108. The general requirements linked to an Indirect Foreign Capacity are the same as the ones described for the Prequalification Process listed in section 5.2.3.2.2.

1109. The following table includes all the data and documents that shall be provided by a Foreign CRM Candidate to ELIA for each Indirect Foreign Capacity as part of his Admission file in order to be considered as “approved”.

The crosses in the table indicate for which status (Existing and/or Additional) the requirement applies. An asterisk in the last two columns means that the information is mandatory for all Existing or Additional CMUs, whereas an asterisk in the comments-column describes the subset of CMUs for which the information provision is required.

			CMU status	
Requirement	Type of Data	Comments	Existing	Additional
CMU name	Name	The Foreign CRM Candidate chooses and communicates a CMU name. There is no requirement with respect to the choice of this name.	X*	X*
Project execution plan	Declaration to provide document	The project execution plan is the document that establishes the method(s) used to execute the project linked to the Foreign CMU. More information about this project execution plan can be found in annex 18.1.4. A project execution plan can be linked to more than one CMU.	X	X*
Renouncing the Operating Aid	Declaration to provide document	The Foreign CRM Candidate provides to ELIA a declaration (according to the template provided by the relevant competent authority) renouncing all Operating Aid during the Delivery Period(s) covered by a Capacity Contract.	X*	X*
Permit requirement	Declaration to provide (tick box including	In accordance with § 119, in order to meet the permit requirements to be able to participate to the Primary or Secondary (as the Buyer of an Obligation) Market, the Foreign CRM Candidate provides ELIA proof that it has been awarded, in the last administrative instance, all relevant permits that are	X*	X*

	expiration date)	required under regional regulations for the construction and/or the operation of the Capacit(y)(ies) included in the Foreign CMU in question. If the targeted permits were already submitted during the previous Admission Process linked to the last Auction that took place and were not subject to any change (including on their validity), the CRM Candidate can indicate it via the CRM IT Interface and does not need to resubmit these permits. If the Foreign CRM Candidate hasn't indicated it via the CRM IT Interface, he has to follow the regular path described above.		
Derating Factor	Number (drop-down list)	The Foreign CRM Candidate selects the Last Published Derating Factor that corresponds to the category and, where appropriate, sub-category to which its CMU belongs. The chosen Derating Factor will lead to two values: one value valid for a Y-1 Auction. The chosen Derating Factor allows ELIA to determine the Eligible Volumes and to define whether or not the Foreign CMU is an Energy-constrained CMU: - If the Foreign CRM Candidate selects an SLA, the Foreign CMU is considered as an Energy-constrained CMU; - If the technology of a Foreign CMU is declared as falling under Category III with Daily Schedule, in line with article 13 of Royal Decree Methodology the CMU is categorized as an Energy Constrained CMU with a number of hours in line with its SLA, or in absence thereof categorized as an Energy Constrained CMU with an SLA of 4 hours; In all other cases, the Foreign CMU is categorized as a Non-Energy Constrained CMU.	X*	X*
Country and Control Zone	Name (drop-down list)	The Foreign CRM Candidate indicates in which country and Control Zone the CMU is located.	X*	X*
Generation Schedule	Yes/No	The Foreign CRM Candidate indicates whether or not the CMU is subject to an obligation to provide their Generation Schedule.	X*	X*

Table 17: Requirements for a Foreign CMU

17.3.2.3.1.2 Daily Schedule for Indirect Foreign CMUs

1110. For all Adjacent European Member States, the local equivalent of the "Generation Schedule", according to SOGL, must be used as the equivalent of the Daily Schedule in Belgium.

- For the Netherlands, "Generation Schedule" is defined as the "Generation Forecast";
- For France, "Generation Schedule" is defined as the "Entité de Capacité";
- For Germany, "Generation Schedule" is defined as the "Generation Block Unit".

1111. An Indirect Foreign CMU containing a Delivery Point with "Generation Schedule" cannot contain another Delivery Point.

17.3.2.3.1.3 Additional requirements for a Dutch Delivery Point and CMU

17.3.2.3.1.3.1 Additional requirements for a Dutch Delivery Point

1112. To be considered as an Existing Delivery Point, a Dutch Delivery Point must communicate EMS/SCADA data to the Foreign TSO. If a Dutch Delivery Point does not meet the metering conditions specific to EMS/SCADA data, it can participate in the Admission Process as an Additional Delivery Point. In this case, the Foreign CRM Candidate needs to contact the Foreign TSO to determine the requirements to fulfil the metering conditions, as specified in annex 18.1.1.3.2.

1113. In addition to the requirements outlined in § 1112 and in the table of § 1107, the following requirements apply to a Dutch Delivery Point.

Delivery Point's status

Requirement	Type of Data	Comments	Existing	Additional
EAN code(s) of the Access Point	Number	The EAN code of the Access Point is the unique identification number used to identify the metering device of the Access Point that is related to the Delivery Point. (EAN-18)	X*	X
EAN-18 code(s) of the Delivery Point	Number	The EAN code of the Delivery Point is a unique identification number used to identify the metering device of the Delivery Point.	X*	X

Table 18: Requirements for a Dutch Delivery Point

17.3.2.3.1.4 Additional requirements for a French Delivery Point and CMU

17.3.2.3.1.4.1 Additional requirements for a French Delivery Point

1114. In addition to the requirements outlined in the table of § 1107, the following requirements apply to a French Delivery Point.

			Delivery Point's status	
Requirement	Type of Data	Comments	Existing	Additional
EIC code(s) of the Delivery Point	Number	The EIC code of the Delivery Point is the unique identification number used to identify the metering device of the Delivery Point. (Code GRC) EIC object type Z (Measurement Point)	X*	X
Grid Access Contract (CART)	ID	The Grid Access Contract (CART) contains a large portion of the information required. An ID is required to verify. Only mandatory for existing RTE-connected Delivery Points.	X	

Table 19: Requirements for a French Delivery Point

17.3.2.3.1.4.2 Additional requirements for a French CMU

1115. In addition to the requirements outlined in the table of § 1109, the following requirements apply to a French CMU.

			CMU status	
Requirement	Type of Data	Comments	Existing	Additional
EDC ID	ID	The EDC ID Identifies which EDC ID the CMU has in case it is Generation Scheduled.	X	X

Table 20: Requirements for a French CMU

17.3.2.3.1.5 Additional requirements for a German Delivery Point and CMU

17.3.2.3.1.5.1 Additional requirements for a German Delivery Point

1116. In addition to the requirements outlined in the table of § 1107, the following requirements apply to a German Delivery Point.

			Delivery Point's status	
Requirement	Type of Data	Comments	Existing	Additional
MaLo-ID of the CMU	11-digit number	The MaLo-ID of the CMU is a unique number that identifies a market location where energy is either produced or consumed. A market location is connected to the grid by at least one transmission line.	X*	X
Metering Point Administration Number (Ger.: Zählpunkt-nummer/Messlokation) of the access point	33-alphanumeric characters	The Metering Point Administration Number is a unique number that identifies a metering point where energy is measured.	X*	X

Table 21: Requirements for a German Delivery Point

17.3.2.3.1.5.2 Additional requirements for a German CMU

1117. German CMUs must submit the local equivalent of the Generation Schedule as stated in § 1110 to participate in the Admission Process of the CRM.

1118. In addition to the requirements outlined in § 1117 and in the table of § 1109, the following requirements apply to a German CMU.

			CMU status	
Requirement	Type of Data	Comments	Existing	Additional
Generation Schedule identification (Daily Schedule Identification)	W-EIC Code (W-Code)	The Foreign CRM Candidate provides the ID of the Generation Schedule block / Daily Schedule of the CMU.	X*	X*

Table 22: Requirements for a German CMU

17.3.2.4 Review of the submitted information

17.3.2.4.1 Application form

1119. The requirements applicable to the review of the application form in the framework of the Admission Process are similar to the ones detailed in section 5.3.1 for the Prequalification Process.

17.3.2.4.2 Admission file

1120. The Foreign CRM Candidate may submit his Admission file until April 12 at the latest.

1121. No modification of the Admission file can be made by the Foreign CRM Candidate after April 12, except upon request of ELIA or the Foreign TSO.
1122. The process of Admission file compliance-check consists in verifying that the requirements of section 17.3.2.2.3 are respected.
1123. The review of an Admission file by ELIA is carried out in accordance with the process described below:
- ELIA performs the required checks on the Admission file and transfers all relevant data in the Admission file to the Foreign TSO governing the control zone indicated by the Foreign CRM Candidate in their Admission file. The Foreign TSO identifies any missing and/or erroneous information and communicates this to ELIA;
 - ELIA notifies the Foreign CRM Candidate by no later than May 3 about the results of the first compliance check of the Admission file to inform him about the status of his Admission file;
 - If ELIA or the Foreign TSO do not identify any missing and/or erroneous data in the Admission file when it is submitted, the Admission file receives the status "approved";
 - If ELIA or the Foreign TSO notices missing information and/or wrong data, the Admission file receives the status as "provisionally rejected";
 - In such case, ELIA asks to the Foreign CRM Candidate to correct its Admission file by making the necessary changes and resubmit its Admission file by May 15 at the latest;
 - ELIA performs the required checks on the Admission file on all requirements that weren't respected and transfers all relevant data to the Foreign TSO. The Foreign TSO identifies any missing and/or erroneous information and communicates this to ELIA;
 - If there is no longer any missing and/or wrong data, then the Prequalification File is given an "approved" status;
 - If data remain missing and/or erroneous, the Admission file receives the status "rejected".
1124. ELIA notifies the results of the final compliance check of the Admission file to the Foreign CRM Candidate together with the Admission Process results no later than four Working Days after May 15.

17.3.3 Volumes determination

1125. This section explains how ELIA determines the provisional Eligible Volumes and provisional Remaining Eligible Volumes for all Foreign CMUs following the Admission Process.
1126. The volumes determination process is performed in parallel with the review of the Admission file following the process described in section 17.3.2.4.
1127. The volumes determined during the Admission Process are provisional, based on declarations. The final values are determined during the Prequalification Process, when the CMU is selected in the Pre-Auction.

17.3.3.1 Nominal Reference Power declaration

1128. For the Admission Process, the Foreign CRM Candidate provides in his Admission file a Declared or Expected Nominal Reference Power for each Delivery Point depending on the status of his Delivery Point, no later than April 12.

17.3.3.2 Provisional Eligible Volume

1129. The Provisional Eligible Volume results from the application of a Derating Factor on the Declared or Expected Nominal Reference Power of the CMU.

$$\text{provisional Eligible Volume} = \text{Derating Factor} * \text{Expected or Declared NRP}$$

This Derating Factor is determined by the category (among the derating categories or the SLA categories) as provided by the Foreign CRM Candidate as part of his Admission file in accordance with section 17.3.2.3.1.1.

17.3.3.3 Provisional Remaining Eligible Volume

1130. The determination of the provisional Remaining Eligible Volume is done in accordance with the process to determine the Remaining Eligible Volumes during the Prequalification Process, as detailed in section 5.4.5.

17.3.4 Admission Process results notification

1131. The results of the Admission Process (including the status of each Admission file submitted) are communicated by ELIA to the Foreign CRM Candidate, via the CRM IT Interface, 4 Working Days after May 15.

1132. In case of an “approved” Admission file, the notification contains at least the following data depending on the CMU’s status:

- the Declared or Expected Nominal Reference Power of the CMU; and
- the provisional Eligible Volumes and/or provisional Remaining Eligible Volumes of the CMU.

17.3.5 Admission Process data transferred to Prequalification File

1133. All requirements and data provided by the Foreign CRM Candidate during Admission Process for his CMU(s) are fully and automatically transferred to the Prequalification File of this CMU(s) to go through the Standard Prequalification Process, after approval of the above-mentioned Admission file(s) and after selection in the Pre-Auction in accordance with article 7 § 2 of the Royal Decree “Indirect Foreign Capacities”.

1134. The Foreign CRM Candidate can only provide new/updated data during Prequalification for all fields of the Admission file that were indicated as “declaration to provide”. All other fields are kept as they are and cannot be changed anymore, except upon request by ELIA or the Foreign TSO or with permission from ELIA.

1135. All requirement checks that have been performed during the Admission Process and for which the information provided during the Prequalification Process is not different, do not have to be repeated during the Prequalification Process.

17.3.6 Notification to the CREG and the FPS Economy

1136. At the end of the Admission Process, ELIA communicates the following information to the CREG & FPS Economy, for each forthcoming Pre-Auction, no later than five Working Days following the Admission Process results notification referred to in section 17.3.4:

- A list of Admitted CMUs and, for each one, the below information:
 - the CMU-ID;
 - Delivery Point(s) ID;
 - Identification code (EAN or equivalent) of the Delivery Point(s);
 - the name of the Delivery Point(s);
 - the type of CMU (Existing/Additional/New Build);
 - the Admitted CRM Candidate;
 - the technology of the Delivery Point(s);
 - the Nominal Reference Power;
 - the applicable Derating Factor;
 - the provisional (Remaining) Eligible Volume
 - the Adjacent European Member State;
 - the Grid (Foreign TSO) and the name of the Foreign TSO.

17.3.7 Pre-Auction

17.3.7.1 Introduction

1137. A Pre-Auction relates to a single border.

1138. A Pre-Auction relates to a single Auction, acting as a pre-selection mechanism to determine – for that border – the set of Bids of Foreign CMUs that are allowed to the Prequalification Process and to participate in the Auction.

17.3.7.2 Bid submission

1139. Each Bid is indivisible, meaning that it can only be selected in its entirety or not at all.

1140. Subject to the conditions as detailed in §§ 1153 and 1154, a Admitted CRM Candidate can label a Bid as being part of a set of Linked Bids together with one or more of its other Bids when the Bids refer to CMUs that form Linked Capacities, specified in accordance with section 17.3.2.2.3 during the Admission Process. In such case, these Bids are automatically bundled together and designated as part of the same set of Linked Bids.

1141. Bids that are part of a set of Linked Bids can only be selected jointly.

1142. Subject to the conditions as detailed in § 1155, an Admitted CRM Candidate can label a Bid as being part of a set of mutually exclusive Bids together with one or more of its other Bids if these CMUs are participating to the Pre-Auction for the same border. In such case, the Bids

are automatically bundled together and designated as part of the same set of mutually exclusive Bids.

1143. From a set of mutually exclusive Bids, only one Bid can be selected.

17.3.7.2.1 Bid compliance conditions

17.3.7.2.1.1 Bid Compliance conditions for all Bids

1144. A Bid relates to a single Admitted CMU.

1145. A maximum of five Bids per Pre-Auction may be submitted for one CMU.

1146. A Bid includes:

- one single Bid Price, expressed in EUR/MW/year with a precision of 0,01 EUR/MW/year, subject to the conditions specified in §§ 1147 to 1149; and
- one single positive volume, expressed in MW with a precision of 0,01 MW, subject to the conditions specified in §§ 1150 and 1151; and

17.3.7.2.1.1.1 Bid Price

1147. The Bid Price is less than or equal to the Global Auction Price Cap of the Auction to which the Pre-Auction relates.

1148. In the event that the Capacity Provider has submitted, or intends to submit, an Intermediate Price Cap derogation, in accordance with article 22 of the Royal Decree on "Methodology", the Bid Price is less than or equal to the missing-money as indicated in the derogation application.

1149. In the event that the Capacity Provider did not submit and also does not intend to submit an Intermediate Price Cap derogation, in accordance with article 22 of the Royal Decree on "Methodology", the Bid Price is less than or equal to the Intermediate Price Cap.

17.3.7.2.1.1.2 Bid volume

1150. The volume of a Bid is greater than or equal to the minimum participation threshold in MW as determined in the Royal Decree on "Eligibility Criteria".

1151. The volume of a Bid is less than or equal to the provisional Eligible Volume of the CMU or, if a Transaction on the Primary Market or a transaction on the Secondary Market already took place previously for this CMU, the provisional Remaining Eligible Volume, as determined during the Admission Process.

17.3.7.2.1.1.3 Capacity Contract Duration

1152. The Capacity Contract Duration for a Bid that is related to an Indirect Foreign Capacity is equal to one Delivery Period.

17.3.7.2.1.2 Complementary Bid compliance conditions for Linked Bids and mutually exclusive Bids

1153. Bids that are part of a set of Linked Bids:

- do not relate to the same CMU; and
- relate to CMUs of the same Admitted CRM Candidate; and
- relate to CMUs of Linked Capacities; and

- relate to the same Pre-Auction; and
- have the same Bid Price.

1154. A Bid can only be part of one set of Linked Bids.

1155. Bids that are part of a set of mutually exclusive Bids in the same Pre-Auction must:

- relate to CMUs of the same Admitted CRM Candidate; and
- relate to the same Pre-Auction.

1156. In addition to the compliance conditions set out in § 1155, for any CMUs that are not New-Build, and in case a set of mutually exclusive Bids contains Bids that are related to two, or more, different CMUs, these CMUs must be located in the same geographical location, defined in accordance with Article 1, §2, 9° of the Royal Decree "Investment Thresholds".

17.3.7.2.2 Bid submission via CRM IT Interface

1157. The Admitted CRM Candidates use the CRM IT Interface for the submission of their Bid(s). To that end, the Admitted CRM Candidates have access to the CRM IT Interface as from May 24 at 09:00.

1158. ELIA integrates a compliance check in the CRM IT Interface as an automatic process that verifies whether Bids are compliant. A Bid is compliant when it respects all conditions listed in section 17.3.7.2.1.

17.3.7.2.2.1 Bid status

1159. In the CRM IT Interface, a Bid can have the following statuses: "saved", "submitted", "cancelled" or "selected".

17.3.7.2.2.1.1 Status "saved"

1160. An Admitted CRM Candidate can save Bids in the CRM IT Interface from May 24 09:00 until the Bid submission deadline referred to in § 1171.

1161. Bids that are saved in the CRM IT Interface get the status "saved".

1162. From the moment a Bid gets the status "saved", the Bid Price is encrypted until after the clearing of the Auction subsequent to the Pre-Auction. As an exception, a decryption key is provided to the IT processes that execute compliance checks referred to in § 1158 or that perform the clearing of the Pre-Auction as described in section 17.3.7.3 or the Auction as described in section 6.3.

1163. An Admitted CRM Candidate can initiate a compliance check as referred to in § 1158, of its Bids with the status "saved". Upon finalization of the compliance check, it will be indicated in the CRM IT Interface whether these Bids have successfully passed the compliance check. In case Bids do not pass the compliance check, the CRM Candidate is informed about the reason(s) for non-compliance via the CRM IT Interface.

17.3.7.2.2.1.2 Status "submitted"

1164. From May 24 9:00 and until the Bid submission deadline referred to in § 1171, an Admitted CRM Candidate may submit Bids in the CRM IT Interface the Bids with the status "saved". Upon submission of the Bids in the CRM IT Interface a compliance check as described in § 1158 is performed.

1165. Submitted Bids that successfully pass the compliance check get the status "submitted".

1166. Submitted Bids that don't pass the compliance check keep the status "saved". In that case, the Admitted CRM Candidate is informed about the reason(s) for non-compliance via the CRM IT Interface.
1167. Each time a Bid of an Admitted CRM Candidate gets the status "submitted" in the CRM IT Interface, ELIA provides by email an overview to this Admitted CRM Candidate of all its Bids with the status "submitted".
1168. Right before the Bid submission deadline referred to in § 1171, ELIA performs a compliance check as referred to in § 1158 of all Bids in the CRM IT Interface with the status "submitted". In case Bids don't pass the compliance check, the Bids get the status "saved", or "cancelled" in case the situation described in § 1169 applies. The Admitted CRM Candidate is informed of the reason(s) for this non-compliance via the CRM IT Interface.

17.3.7.2.2.1.3 Status "cancelled"

1169. Bids with the status "saved" or "submitted" for which ELIA notes during a compliance check conducted in application of §§ 1163, 1164 or 1168 that they relate to a CMU that has meanwhile been archived, get the status "cancelled". In that case, the Admitted CRM Candidate is informed by email.

17.3.7.2.2.1.4 Status "selected"

1170. Following the Pre-Auction clearing described in section 17.3.7.3, Bids may get the status "selected".

17.3.7.2.2.1.5 Bid submission deadline

1171. The Bid submission deadline date is set at May 25 17:00, unless the fallback procedure as described in section 15.6.1 applies.
1172. Only Bids with the status "submitted" at the Bid submission deadline as described in § 1171, are considered during the clearing of the Pre-Auction, as described in section 17.3.7.3.
1173. ELIA automatically reminds Admitted CRM Candidates about the upcoming Bid submission deadline, at the moment of the gate opening of the Bid submission timeframe.
1174. The fallback procedure described in section 15.6.1 applies in the event of unavailability of the CRM IT Interface attributable to ELIA which makes it impossible for an Admitted CRM Candidate to submit its Bid(s) within the deadline referred to in § 1171.

17.3.7.3 Pre-Auction clearing

1175. As of the Pre-Auction Bid submission deadline as described in § 1171, ELIA proceeds with the clearing of the Pre-Auction according to the methodology described in this section.

17.3.7.3.1 Grid constraints

1176. ELIA accommodates in the Pre-Auction the external grid constraints where they are notified by the Foreign TSO within the required time period following the format specified in § 1179.
1177. Foreign TSOs notify the external grid constraints as soon as possible after May 15, but at the latest by May 24 of the year where the considered Pre-Auction takes place.
1178. ELIA shall not be liable for the correctness of the content of these external grid constraints, nor for their calculation. ELIA does not bear any liability for the calculation methodology or the calculated results during the application phase. ELIA is only responsible for the correct application of the received information.

In case of external grid constraints issues, the regular fallback procedure as per section 15.6.2 is not applied.

1179. An external grid constraint shall take the form of a combination of a number of defined CMUs that would lead to an unacceptable Pre-Auction result. The table below illustrates the case, listing the non-acceptable combinations for three CMUs:

CMU 1	CMU 2	CMU 3	Reason for non-acceptability of combination
1	1	0	For example, overload of line X
1	0	1	For example, no sufficient space at substation X

Table 23: Illustration which summarizes 2 grid constraints for 3 CMUs in a table format

The grid constraints presented in this table are combined into a combination matrix with Admitted infeasible CMU combinations in the smallest set possible in order to avoid redundant information.

17.3.7.3.2 Pre-Auction clearing methodology

1180. The Pre-Auction clearing methodology consists of two phases. The optimization phase as detailed in section 17.3.7.3.2.1, is performed in any case. The tie-breaking rules as detailed in section 17.3.7.3.2.2 are applied only in case multiple equivalent combinations of Bids result from the optimization phase.

17.3.7.3.2.1 Optimization phase

1181. ELIA pursues the combination of Bids with minimal cost, for which the sum of the Bid volumes of all Bids considered in the combination does not exceed the volume of the Pre-Auction Demand Curve.

The cost is calculated as the sum of two elements:

- The first element is calculated as the Bid Volume multiplied by the Bid Price, summed over all Bids considered in the combination;
- The second element is calculated as the product of the penalty factor and the difference between the volume of the Pre-Auction Demand Curve and the Bid Volume, summed over all Bids considered in the combination. The penalty factor is equal to the Global Auction Price Cap increased with one EUR/MW/year.

1182. In case multiple combinations of Bids are equivalent in terms of cost, ELIA pursues the combination of Bids that results in the highest capacity volume calculated as the sum of the Bid volumes of all Bids retained in the combination.

17.3.7.3.2.2 Tie-Breaking rules

1183. The following tie-breaking rules apply sequentially, until one unique combination of Bids is retained. When a unique combination is found, the Pre-Auction clearing is finished and all Bids within this combination of Bids are selected.

17.3.7.3.2.2.1 Tie-breaking rule 1: Carbon dioxide emissions

1184. Preference is given to the combination of Bids that is characterized by the lowest carbon dioxide emissions (CO₂), calculated as the Bid volume weighted average of the emission factors (in gCO₂/kWh) of the CMUs to which the Bids considered in the combination relate.

17.3.7.3.2.2.2 Tie-breaking rule 2: First come, first served

1185. The "first come, first served" rule applies as follows:

- all unique Bids within all remaining combinations of Bids are sorted according to their Bid submission time;
- based on the sorted list of Bids, from the first submitted Bid to the last submitted Bid:
 - ELIA discards the combination(s) of Bids that do not include the first submitted Bid;
 - ELIA continues the process of discarding combinations of Bids with the next submitted Bids until only one combination of Bids remains.

17.3.7.4 Pre-Auction results

1186. In order to enable the CREG to effectively exercise its power of control of results of the Auction, in accordance with the Royal Decree on "Monitoring", ELIA shall send to the CREG, no later than three Working Days after the Bid submission deadline for the Pre-Auction, all information relating to the Bids submitted as referred to in § 370.

1187. Upon finalization of the Pre-Auction clearing and at the latest by May 27, ELIA submits the list of selected Bids to the CREG for information, among which all information as referred to in § 371.

18 ANNEXES

18.1 ANNEX A: PREQUALIFICATION PROCESSES

18.1.1 ANNEX A.1: METERING REQUIREMENTS

All Existing Delivery Points prequalifying through the Standard and Specific Prequalification Processes (TSO, DSO and CDS-connected Delivery Point) shall have one or several meter(s) installed that meets the following minimum requirements.

All Foreign Delivery Points that submitted an Admission File and participate in the Standard Prequalification process shall have one or several meter(s) installed that meets the minimum requirements as in section 18.1.1.3.

18.1.1.1 General metering requirements

Regardless of the Delivery Point, the meter must be an AMR (Automatic Meter Reader) that measures quarter-hourly values of active power in both directions (injection or offtake) at the concerned Delivery Point. However, it is recommended that the meter is also able to measure reactive power, to align with the metering requirements for other products operated by ELIA, such as the frequency-related Ancillary Services.

18.1.1.2 Specific metering requirements

18.1.1.2.1 TSO-connected Delivery Points:

In case of headmetering, the meter must be a Headmeter listed in the annex 4 of the Connection Contract concluded between the Grid User and ELIA, and used for the invoicing of access to the ELIA Grid.

In case of submetering, the specific requirements are described in the document "General technical requirements for submetering" available on the ELIA website³⁸.

In case a Delivery Point not subject to Daily Schedule is situated upstream of a Delivery Point subject to Daily Schedule, the metering data of the Delivery Point not subject to Daily Schedule cannot include the metering data from the Delivery Point subject to Daily Schedule. As a consequence, for the Delivery Point not subject to Daily Schedule, two options are available:

- If in the context of another frequency-related Ancillary Service, an equation based on Headmeter and Submeter(s) is used for providing the metering data: the exact same equation can be used for providing the metering data in the context of the CRM.
- In all other cases, a Submeter must be installed.

³⁸ <https://www.elia.be/en/electricity-market-and-system/system-services/technical-documentation-concerning-the-provision-of-ancillary-services>

18.1.1.2.2 DSO-connected Delivery Points:

For both headmetering and submetering, the CRM Candidate should refer to DSO-CRM Candidate Agreement. All communications and agreements regarding the metering requirements should be discussed with the applicable DSO.

18.1.1.2.3 CDS-connected Delivery Points:

When the meters associated to Delivery Points are already used for the invoicing obligations in relation to a CDS Market Access Point, these meters are also considered valid for the obligations in the context of the CRM. In all other cases, the metering installations (meter, current transformer, voltage transformer) must comply with the technology and accuracy classes as described in the "General technical requirements for submetering" document available on the ELIA website³⁹.

In all cases, the metering data shall be validated by the CDSO and communicated:

- to ELIA in case of TSO-connected CDS (as set in the CDSO cooperation agreement detailed in annex 18.1.5). Further specifications can be found in the "Metering data exchanges for CDS Operators" document available on the ELIA website⁴⁰ or;
- to the relevant DSO in case of a DSO-connected CDS (as agreed between the CDSO and the corresponding DSO in accordance with the data requirements for the operation of the CRM).

For a TSO-connected CDS, any metering data related to a Delivery Point downstream of a CDS Market Access Point must be provided with the metering data coming from the Headmeter(s) of the same CDS Market Access Point.

18.1.1.3 Foreign metering requirements

Regardless of the Delivery Point, the meter must be an AMR (Automatic Meter Reader) that measures active power in both directions according to a set time interval (injection or offtake) over a certain period of time at the concerned Delivery Point and that must be capable of communicating the measurement data to the Foreign TSO. It is recommended that the meter is also able to measure reactive power.

All detailed metering requirements should be discussed with and approved by the Foreign TSO of the control zone the Delivery Point is located.

18.1.1.3.1 French Delivery Points

Metering systems must be described in the access contract concluded between the grid user and RTE (article 8.13 on RTE's website⁴¹). The data must refer to annex 3 of the previous contract, which contains the energy calculation formula. Those formulas refer to the metering system which are located on the single line diagram of the annex 1. The metering system technical specification is available on RTE's website⁴².

⁴² https://www.services-rte.com/files/live/sites/services-rte/files/documentsLibrary/24-01-17 article 4-8 v3_fr

18.1.1.3.2 Dutch Delivery Points

Metering system must satisfy the metering requirements as stated in the "Regeling – Meetcode elektriciteit", as published on the Dutch government website⁴³. All connected capacities to the Dutch TSO grid are required to comply with these requirements.

18.1.1.3.3 German Delivery Points

Metering system must satisfy the metering requirements found in the German Grid Connection Contract or the corresponding technical requirements of the relevant German Control Zone.

⁴³ <https://wetten.overheid.nl/BWBR0037946/2023-04-01>

18.1.2 ANNEX A.2: GRID USER / CDS USER DECLARATION

In the event the CRM Actor differs from the Grid User or the CDS User (for CDS-connected Delivery Points) differs from the CRM Actor, the CRM Actor submits to ELIA a copy of the Grid User/CDS User Declaration as part of his Prequalification File. A single Grid User Declaration or CDS User Declaration can include one or more Delivery Point(s) related to the concerned Grid User or CDS User respectively.

18.1.2.1 Grid User Declaration

The Grid User Declaration contains at least the following clauses:

- the present Grid User Declaration only applies for the Delivery Point(s) listed in table A.1.
- the Grid User hereby acknowledges that all given information in this Grid User Declaration is true and accurate.
- the Grid User confirms to ELIA that his commitment to allow the Service – if any – does not breach existing contracts with third parties (with whom the Grid User has a contractual or regulated relationship, such as, but not limited to, the supplier of the Grid User).
- the Grid User hereby gives permission to the CRM Actor to offer the Service to ELIA or to participate to a Fast Track Prequalification Process, covering the Delivery Period (being from 01/11/20XX to 31/10/20YY) or the Prequalification period (15/05/20XX to 30/09/20XX) where relevant.
- the Grid User hereby acknowledges that the list of Delivery Point(s) in table A.1 will only be used by one CRM Actor at a time (the candidate being the CRM Actor concerned by this Grid User Declaration) during the period of time defined in the previous bullet point.
- the Grid User acknowledges that the present document is valid for each Delivery Point listed in table A.1 until either respective expiry date of the Grid User Declaration or the submission by another party of a new Grid User declaration, for one (or more) of the Delivery Point(s) listed in table A.1, signed and validated by the Grid User. The present Grid User Declaration remains valid until its expiry date for all Delivery Points listed in table A.1 not concerned by the aforementioned new Grid User Declaration.
- the Grid User hereby gives explicit permission to ELIA to inform the CRM Actor of the measurements of the Delivery Point(s) listed in table A.1.
- all Delivery Points listed in table A.1 shall respect the metering requirements set forth in the Functioning Rules.
- for each Delivery Point listed in table A.1 and whenever relevant, the Grid User gives the CRM Actor access to the information related to the production permit in order for the CRM Actor to be able to properly complete the Prequalification File(s) including the Delivery Point(s) listed in table A.1.
- for each Delivery Point already submitted in a Prequalification File, it is the Grid User's responsibility to provide the related Delivery Point's ID (This ID being initially communicated to the Grid User by the CRM Actor who was the first to participate to a Prequalification Process with the Delivery Point) for this Grid User Declaration.
- details of the concerned Delivery Point(s):

Delivery Point name	Delivery Point identification (EAN code if applicable)	ID of the Delivery Point (on Ademar)	Expected Nominal Reference Power (in MW)

Table A.1 – List of Delivery Points concerned by the Grid User Declaration

The Grid User signs the Grid User Declaration and ensures all given information in the Grid User Declaration is true and accurate.

18.1.2.2 CDS User Declaration

The CDS User Declaration contains at least the following clauses:

- the present CDS User Declaration only applies for the Delivery Point(s) listed in table A.2.
- the CDS User hereby acknowledges that all given information in this CDS User Declaration is true and accurate.
- the CDS User confirms to ELIA that the CRM Candidate is aware that his commitment to allow the Service may not breach existing contracts with third parties (with whom the CDS User has a contractual or regulated relationship, such as, but not limited to, the Supplier of the CDS-user or the CDSO).
- the CDS User hereby gives permission to the CRM Actor to offer the Service to ELIA from DD/MM/YYYY to DD/MM/YYYY.
- the CDS User hereby acknowledges that the list of Delivery Point(s) in table A.2 will only be used by one CRM Actor (the candidate being the CRM Actor concerned by this CDS User Declaration) during the period of time defined in the previous bullet point.
- the CDS User acknowledges that the present document is valid for each Delivery Point listed in table A.2 until either respective expiry date of the CDS User Declaration or the submission by another party of a new CDS User declaration, for one (or more) of the Delivery Point(s) listed in table A.2, signed and validated by the CDS User. The present CDS User Declaration remains valid until its expiry date for all Delivery Points listed in table A.2 not concerned by the aforementioned new CDS User Declaration.
- the CDS User hereby gives explicit permission to ELIA to inform the CRM Actor of the measurements of the Delivery Point(s) listed in table A.2.
- for each Delivery Point listed in table A.2 and whenever relevant, the CDS User gives the CRM Actor access to the information related to the production permit in order for the CRM Actor to be able to properly complete the Prequalification File(s) including the Delivery Point(s) listed in table A.2.
- for each Delivery Point already submitted in a Prequalification File, it is the CDS User's responsibility to provide the related Delivery Point's ID (this ID being initially communicated to the CDS User by the CRM Actor who was the first to participate to a Prequalification Process with the Delivery Point) for this CDS User Declaration.
- details of the concerned Delivery Point(s):

Delivery Point name	Delivery Point identification (EAN code, if applicable)	ID of the Delivery Point (on Ademar)	Maximum Nominal Reference Power allowed (in MW)

Table A.2 – List of Delivery Point(s) concerned by the CDS User Declaration

The CDS User signs the CDS User Declaration and ensures all given information in the CDS User Declaration is true and accurate

18.1.3 ANNEX A.3: CDSO DECLARATION

The CRM Candidate upload this declaration via the CRM IT Interface. The CDS-connected Delivery Point(s) is(are) can only successfully complete the Prequalification Process upon signature of this declaration.

18.1.3.1 Declaration by a CDSO for a Standard or Specific Prequalification Process

With this declaration, [company name], a company incorporated under [nationality] law, enterprise number [number], with registered office at [address], validly represented by Mr/Mrs [name] and Mr/Mrs [name], respectively in their quality of [function] and [function], identified for the purposes hereof as "the CDSO", hereby grants permission for the Delivery Point(s) identified below, which is(are) part of its CDS with power measured by CDSO meters, to participate, for the period DD/MM/YYYY to DD/MM/YYYY, to the Service organized by ELIA or to participate to a Fast Track Prequalification Process, as defined in the Functioning Rules.

In the knowledge that this(these) Delivery Point(s) correspond(s) fully or partly with the CDS Market Access Point of [company name], a company incorporated under [nationality] law, enterprise number [number], with registered office at [address], recognized as a User of the CDS that is managed by the CDSO,

And

Undertakes to conclude a cooperation agreement with ELIA in accordance with the model described in annex 18.1.5 which can be found on ELIA website or can be obtained upon request to ELIA and which describes the conditions for exchanging metering data between ELIA and the CDSO, and to do so within the timing foreseen in the Service Time Schedule.

Detail of the Delivery Point(s):

CDS User	EAN code of the Access Point	EAN code of the CDS Market Access Point	ID of the technical agreement	Delivery Point ID (EAN, if applicable) ⁴⁴	Single line diagram

Table A.3 – Overview of the Delivery Points related details

Risk of full or partial load transfer (to be described by the CDS Operator):

.....
.....
.....
.....

44 The EAN code is not mandatory for an Additional Delivery Point. In this situation, only the Delivery Point ID is required.

.....
.....

And

Confirms that it has obtained express permission from the CDS User to send to ELIA the confidential information, including metering data (quarter-hourly values of active power) for the above-identified Delivery Point and the corresponding CDS Market Access Point, since such communication is necessary for the correct invoicing of the Service with respect to the Capacity Provider, which to that end makes use of the CDS User's Delivery Point.

And

The document 'CDS Metering Technical Info Checklist' (as referred to in annex 18.1.5) is attached to this declaration. The CDS Metering Technical Info Checklist is available on the ELIA website⁴⁵.

And

Hereby acknowledges that all given information in this CDSO Declaration is true and accurate.

18.1.4 ANNEX A.4: PROJECT EXECUTION PLAN

This annex defines what a project execution plan is. This plan is sent during the Prequalification Process by a CRM Candidate who wants to participate to the Service with an Additional or a Virtual CMU. As already stated in section 5.2.3.2, a project execution plan can be linked to more than one CMU and a CMU can be linked to more than one project execution plan.

The main purpose of the project execution plan is to ensure to ELIA that the Contracted Capacity(ies) become(s) Existing Capacity(ies) before the start of the related Transaction Period(s).

The project execution plan is prepared and adapted by the CRM Candidate himself in function of his project's specificities. The information and format provided here can therefore differ from the list below, given as an example.

18.1.4.1 Content of the project execution plan

A project execution plan describes how the CRM Candidate plans to get its Contracted Capacity(ies) prequalified as "Existing Capacity(ies)" prior the start of the concerned Delivery Period(s) it is offered to in the Auction. It identifies, among other things, the potential key issues and critical activities specific to the project and lists the decisions to be taken by the CRM Candidate in subsequent phase(s). Through the project execution plan, the CRM Candidate defines and states the objectives of the project and the means used to ensure its effective realization.

There is no template for such a plan. However, and to facilitate its preparation, ELIA lists below some information the document as provided by the CRM Candidate to ELIA could contain:

- a description of the project;
- the key milestones dates (see section 18.1.4.2);
- the strategy adopted to achieve each of the identified key milestones in a timely manner (see section 18.1.4.2);
- the list of the potential key issues (risks) that could be met during the realization phase of the project and the identification of non-exhaustive "mitigation measures" taken by the CRM Candidate to cover them;
- the list of the required Infrastructure Works, DSOs and/or gas infrastructure operator identify as a pre-requisite to the CRM Candidate's project effective realization (the Infrastructure Works identified in that list may be subject to the fallback procedure described in section 8.5);
- a signed conditional offer to connect to the gas network infrastructure (for gas technology, a signed conditional offer from the gas network infrastructure is provided to ELIA by the CRM Candidate as part of the project execution plan);
- the identification of permits which are relevant for the project:
 - environmental permit;
 - construction permit (included right of way and permits);
 - governmental approval;
 - etc.

- The validity date of each permit is also to be mentioned and should cover at least the related Delivery Period(s).
- for Virtual CMUs specifically, the details on how the 75 % and 100 % targets will be respected.

Update of such information is to be provided on a regular basis, through the quarterly reports provided by the Capacity Provider to ELIA during the Pre-delivery Period(s) related to the CMU. The project execution plan is also considered as a referential framework. Therefore, any slippage or major change impacting the project execution introduced with the Prequalification File is to be detailed in one of the quarterly report, along with a mitigation plan (according to chapter 5).

18.1.4.2 List of key milestones

In the table below, ELIA proposes key milestones that might be relevant for the CRM Candidate's project. There is only one milestone (see asterisk) that the CRM Candidate has the obligation to provide in his project execution plan if it is relevant for the project. Except from this milestone, it is the CRM Candidate's responsibility to provide the milestones which he considers relevant and applicable for his project as well as to detail them as part of the project execution plan.

Key milestones	Description of the key milestones	Key milestone date
#1 Spatial plan	At this stage, the CRM Candidate indicates at which date he plans to receive the modification of the sector plan (if required for implementation of its project)	.../.../...
#2 Workforce and capacity planning	A workforce and capacity planning is a process of determining and planning the workforce to ensure that the Capacity Provider has the right mix and numbers of staff, with the right skills and knowledge, to meet demand, now and in the future. The key milestone indicates when this planning is scheduled to be written in its final form.	.../.../...
#3 Signature of the EPC contract	An EPC contract is a contract by which the supplier becomes responsible for the overall design of a project, including design, procurement from subcontractors, transportation of the various components, hiring of workers, coordination of assembly and on-site installation with the various parties involved (suppliers, service providers and contractors).	.../.../...
#4 Permitting Milestone*	This key milestone, defined in section 3.1, is reached when all necessary permits for the construction of the project have been delivered in the last administrative instance, are definitive, enforceable and cannot be disputed any more before the State Council or any other body that is authorized to take note of disputes concerning decisions that have been taken in last administrative instance for permits.	.../.../...
#5 Start of construction works	The date for this key milestone represents the moment at which the two following milestones are achieved: - whether an engineering, procurement and construction (EPC) contract (or any contract or suite of contracts having the same effect) is in full force and effect in respect of each new or refurbished production/consumption unit providing the Contracted Capacity(ies); - whether work specific to on-site construction of each actual new or refurbished production/consumption unit providing the Contracted Capacity(ies) has commenced which, for the avoidance of doubt, does not include design work, minor civil works or works to prepare the site for construction work. In the case of the construction of a CCGT, for example, it is the start of the piling activities.	.../.../...

#6 Final purchase order for the main equipment	The key milestone is reached when the last main equipment has been ordered through a purchase order (PO) and the delivery date is known by the CRM Candidate. The last main equipment is: - in respect of a new or refurbished production/consumption unit, the primary mechanism to generate electricity (whether this is via a turbine, any mechanical or electrical device or installation of any other technology, e.g. photo voltaic);	.../.../...
#7 Mechanical completion	The key milestone is achieved: - when the primary mechanism to generate electricity (whether this is via a turbine, any mechanical or electrical device or installation of any other technology, e.g. photo voltaic) is installed on-site. In the case of the construction of a CCGT, for example, it can be considered as the first firing.	.../.../...
#8 Commissioning tests	The key milestone is achieved when the required offline and online commissioning tests are finalized and successful. The online commissioning tests required by ELIA for the commissioning of a production/consumption unit are not linked to the CRM and therefore not specified here. For further information on this subject, the Capacity Provider is invited to contact his Key Account Manager within ELIA.	.../.../...
#9 Final completion	The key milestone is achieved when: - the project has achieved all the technical and performance requirements set out in the construction contract; - the contractor has transferred to the owner of the project title to all materials and equipment used in the construction of the project; - all the Additional Capacities contracted and related to that project are compliant with the metering requirements (as per annexes 18.1.1); - the Capacity Provider is able to complete his file(s) by changing his Contracted Capacity(ies) considered as Additional Capacity(ies) to Existing Capacity(ies)	.../.../...

Table A.5 - Overview of the key milestones

18.1.5 ANNEX A.5: COOPERATION AGREEMENT ELIA – CDSO ON THE EXCHANGE OF DATA REQUIRED FOR THE PROVISION OF THE SERVICE

Between:

ELIA Transmission Belgium SA/NV, a company incorporated under Belgian law with its registered office at Boulevard de l'Empereur 20, B-1000 Brussels, registered under company number 731.852.231 and represented by its duly authorized agents XXX and XXX,

hereinafter referred to as 'ELIA'

and

[●●●], a company established under [●●●] law with the company registration number [●●●], having its registered office at [●●●], validly represented in this matter by and, in their respective capacities of and,

hereinafter referred to as the 'Closed Distribution System Operator' as identified in Appendix 6 of the access contract concluded with ELIA (reference).

ELIA and/or the Closed Distribution System Operator may also be referred to individually as the 'Party' or jointly as the 'Parties'.

Whereas:

- ELIA has been appointed as grid operator at Belgian federal and regional level.
- the Closed Distribution System Operator operates a Closed Distribution System as identified in Appendix 6 of the access contract concluded with ELIA (reference, hereinafter referred to as the 'Access Contract').
- within the framework of the Capacity Remuneration Mechanism (hereinafter referred to as the 'CRM'), ELIA organizes an Auction for which a ministerial instruction has been issued pursuant to the Electricity Act. In view of the CRM, the CRM Candidate has initiated the Prequalification Process in order to make a Transaction and provide the Service pursuant to the Functioning Rules applicable to the relevant Delivery Period (hereinafter referred to as the 'Functioning Rules').
- as the Delivery Point is located within the Closed Distribution System, this cooperation agreement between ELIA and the Closed Distribution System Operator sets out the Parties' rights and obligations needed to allow the CRM Candidate to participate in the provision of the Service. This cooperation agreement outlines the operational terms and conditions governing the exchange of metering data between ELIA and the Closed Distribution System Operator concerning the energy flows specific to the supply thereof.
- this cooperation agreement is concluded between ELIA and the Closed Distribution System Operator (i.e. signed by both parties) at the latest 35 Working Days after the submission of the Prequalification File. This CRM Candidate may be the Closed Distribution System User or may take over the Closed Distribution System User's Delivery Point, possibly as part of a portfolio of Delivery Points.

The following has been agreed:

ARTICLE 1: CONNECTION TO THE ACCESS CONTRACT

The Closed Distribution System Operator must have signed Appendices 6 and 6bis of the Access Contract with ELIA prior to concluding this cooperation agreement.

This cooperation agreement outlines the Parties' rights and obligations regarding the operational terms and conditions governing the exchange of metering data between ELIA and the Closed Distribution System Operator concerning the energy flows specific to the provision of the Service as well as communication of other specific data necessary for the provision of said Service. They supplement those rights and obligations set out in the Access Contract concluded by ELIA and the Closed Distribution System Operator, particularly in Appendix 6 of said Access Contract. In case of conflict of interpretation between this cooperation agreement and one or more provisions of the Access Contract, the provisions of the Access Contract prevail.

Each Party is aware of the mutual coherence between this cooperation agreement, the Access Contract and the Capacity Contract concluded after the Transaction Validation Date of a first Transaction by the Capacity Provider and ELIA, all of which are essential for the implementation of this cooperation agreement. The Parties ensure that the proper implementation of this cooperation agreement is based on the existence and proper implementation of the necessary contracts with the third parties concerned, and that these contracts take into account, as and where necessary, the obligations imposed by this cooperation agreement.

This cooperation agreement also forms part of the Functioning Rules, which must be adhered to for the provision of the Service.

ARTICLE 2: DEFINITIONS

The various terms used in this cooperation agreement, whether capitalized or not, are to be understood within the meaning of the concepts defined in the Electricity Act, the decrees and/or ordinances relating to the organization of the electricity market, the Functioning Rules and/or the various applicable grid codes, as well as, on a secondary and subsidiary basis, the Access Contract.

ARTICLE 3: PURPOSE OF THE AGREEMENT

This cooperation agreement governs the Parties' rights and obligations to allow the CRM Candidate to provide the Service, with regard to the operational terms and conditions governing the exchange of metering data between ELIA and the Closed Distribution System Operator.

The Closed Distribution System User's/Closed Distribution System Users' Delivery Point(s) of the CRM Candidate(s) is/are located on the following Closed Distribution System:

Name of the Closed Distribution System	Access Point (EAN code)	Address of the Closed Distribution System site

The Closed Distribution System User(s) covered by this cooperation agreement is/are:

[....], a company established under [....] law with the company registration number [....], having its registered office at [....]

[....], a company established under [....] law with the company registration number [....], having its registered office at [....]

A list of the Delivery Point(s) from which the Service is provided and concerned by the exchange of metering data and the communication of other specific data necessary for the provision of this Service is provided below. Prior to the activation of the Service, the Delivery Point(s) must possess a meter that satisfies the technical requirements set out in the applicable grid code as a minimum.

annex 2.1 contains all the technical details concerning these Delivery Points, including the list of the individual meters associated with the Delivery Point(s) in question and the corresponding metering equation where applicable, for example when several meters are associated with a single Delivery Point.

At ELIA's request and when required, pursuant to Article 6 of this agreement, the Closed Distribution System Operator shall also provide the contractual information described in annex 2.2 for the specified Delivery Point(s) associated with the provision of the Service.

ARTICLE 4: GENERAL OBLIGATIONS CONCERNING THE EXCHANGE OF METERING DATA

4.1. Obligations concerning the exchange of metering data

Pursuant to Article 5 of Appendix 6 of the Access Contract concluded between ELIA and the Closed Distribution System Operator, the Closed Distribution System Operator provides ELIA with the metering data recorded by the meters associated with the Delivery Point(s) in question using the protocols and data exchange formats specified in annex 1 of this cooperation agreement.

Pursuant to Article 5 of Appendix 6 of the Access Contract concluded between ELIA and the Closed Distribution System Operator and to Article 5.3 of this cooperation agreement, the Closed Distribution System Operator shall be liable for the correct values and validation of the metering data communicated to ELIA. Such data shall comprise metering data associated with the Delivery Point(s) in question and with the corresponding CDS Market Access Point(s) as per annex 2.1.

The Closed Distribution System Operator shall be responsible for installing, managing, maintaining and inspecting the meters belonging to its closed distribution system, as well as the data management systems used to communicate and exchange with ELIA those metering data referred to in this cooperation agreement. Any and all costs associated with the collection, validation and communication of metering data under this cooperation agreement shall be borne by the Closed Distribution System Operator and/or the Closed Distribution System User, based on any agreements concluded between them.

4.2. Confidentiality and ownership of metering data concerning the User of the Closed Distribution System and of other information communicated for the purpose of the provision of the Service

The Closed Distribution System Operator declares that it has received explicit authorization from the Closed Distribution System User to send to ELIA the metering data (quarter-hourly values of active power) for its Delivery Point and the corresponding CDS Market Access Point, as well as the additional information necessary for the provision of the Service pursuant to the templates in annexes 2.1 and 2.2.

Such authorization is set down in the CDSO Declaration that the CRM Candidate submits to ELIA as part of the Prequalification File.

This specific communication takes place in line with the confidentiality obligation which the Parties are bound to observe with regard to data of the Closed Distribution System User. Furthermore, the Parties accept that the confidentiality of the data cannot be invoked between them, nor with regard to the Closed Distribution System User and/or the CRM Candidate when the latter is not the Closed Distribution System User, all of whom are involved in the implementation of this cooperation agreement.

The communication of the data of the Closed Distribution System User to ELIA shall under no circumstances entail a transfer of ownership of said data to ELIA or the Closed Distribution System Operator.

ARTICLE 5: IMPLEMENTATION OF METHODS FOR COMMUNICATING AND EXCHANGING METERING DATA

5.1. Tests for meters

The methods for communicating and exchanging data as set out in annex 1 must be authenticated, tested, implemented and functional between the Parties

- prior to the successful completion of the prequalification of the related Delivery Point(s) in the case of Existing Delivery Point(s) and
- in the process of conversion of the Additional Delivery Point(s) into (an) Existing Delivery Point(s) (see section 8.6.1 of the Functioning Rules).

The Closed Distribution System Operator and ELIA shall organize the tests needed in order to implement the methods for communicating and exchanging data prior to the end of the Prequalification Process of the Delivery Point(s) in question.

The Closed Distribution System Operator shall contact ELIA to deal with the practical organization of these tests. Each Party shall bear any costs that it incurs in relation to the communication tests.

5.2. Checking metering data and means of communication

Throughout the provision of the Service, ELIA has the right to test/inspect (or have others test/inspect), at any time and with prior justification, each of the elements involved in the transmission of metering data, including the meters listed in annex 2.1 and the metering data management/validation system of the Closed Distribution System in order to verify that they meet the criteria set out in this cooperation agreement and/or the technical documents describing the provision of the Service.

In case the test results highlight problems with the metering data, particularly with regard to the conformity of the meters or the processes for transmitting metering data, ELIA and the Closed Distribution System Operator shall consult one another to find appropriate operational solutions.

During the term of this cooperation agreement, the Parties undertake to notify one another, as quickly as possible, should one Party become aware of any event or information which said Party can reasonably assume will likely have an unfavorable impact on the other Party's fulfilment of its obligations.

5.3. Liability

As an exception to Article 1 of this cooperation agreement, the liability regime applicable between the Parties is as detailed below.

The Party responsible shall compensate the other Party for all demonstrable costs incurred by the latter and arising directly from these prejudicial situations as well as all demonstrable costs which it might be required to pay to a third party, where necessary, owing to the occurrence of these situations:

- The meters, the methods for communicating metering data or the metering data themselves, as well as the other necessary additional information as per annex 2.2, do not appear to comply with the criteria set out in this cooperation agreement and/or the technical documents describing the provision of the Service.
- One of the Parties experiences problems regarding the data or the exchange of data referred to in this cooperation agreement that would prevent the provision of the Service, the Availability Monitoring and/or the Availability Testing, including delays or errors in the transmission of the metering and/or allocation data to ELIA in relation to the criteria set out in annex 1.
- There is a delay affecting the installation of the equipment required to ensure the conformity of the meters or the transmission of the metering data, this delay being caused by a serious error on the part of the Closed Distribution System Operator or the Closed Distribution System User who provides the Service to ELIA, making it difficult or impossible to provide the Service.
- One of the Parties fails to honor the other obligations set out in this cooperation agreement, provided that the principle of damage limitation is not adhered to.

Said demonstrable costs are hereinafter referred to as 'Damage'.

The Parties are liable to one another only for Damage caused by fraud, willful misconduct or gross negligence committed by one of the Parties against the other under this cooperation agreement.

Total liability for Damage due to gross negligence is capped at €1 million per instance of Damage per year and at €5 million per year for all claims from the Parties and third parties that are based entirely or primarily on the same confirmed or suspected cause. Claims from the Parties and third parties shall, where appropriate, be settled proportionately.

This limitation of liability shall not apply to Damage caused by fraud or willful misconduct.

During the term of this cooperation agreement, the Parties shall make every effort to avoid and, where necessary, limit any Damage caused by one Party and affecting the other. In case of an incident or event giving rise to one of the Parties' liability, the Parties shall consult one another to take all appropriate measures that may reasonably be expected of them in order to limit the Damage to the other Party.

5.4. Data hierarchy

The Parties expressly acknowledge that the metering data collected by ELIA via Headmetering as specified in the Connection Contract between ELIA and the Closed Distribution System Operator shall be considered the single and universal reference for ELIA's invoicing of energy to the Closed Distribution System Operator, as per the Access Contract concluded by the Parties, and the Closed Distribution System Operator shall under no circumstances be able to challenge these data on the basis of data from the Delivery Points.

ARTICLE 6 OBLIGATION CONCERNING CONTRACTUAL INFORMATION FOR THE DELIVERY POINTS IN QUESTION

The Closed Distribution System Operator shall ensure that the Closed Distribution System User providing the Service to ELIA has a Balance Responsible Party for its Delivery Point prior to the provision of the Service pursuant to Article 5.1 of Appendix 6 of the Access Contract.

The information communicated to ELIA in accordance with the template in annex 2.2 shall only be valid for the duration of the provision of the Service. Should the Service be renewed, the Closed Distribution System Operator shall resend this information to ELIA in accordance with the template in annex 2.2, even if this information has not changed.

Furthermore, if the Delivery Point covered by this cooperation agreement is excluded from the provision of the Service pursuant to the Capacity Contract or the Functioning Rules for any reason whatsoever, ELIA shall notify the Closed Distribution System Operator as soon as possible.

ARTICLE 7 RECORDINGS

As most of the information exchanged between the Parties under this agreement may, in one way or another, influence ELIA's management of its grid, it is important to have sufficient traces of such exchanges. The Parties consequently accept that oral communication, including telecommunication, is recorded. The Parties shall inform their representatives and employees, who may communicate with the other Party through such means, that their conversations are recorded. The Parties shall take appropriate measures to keep these recordings safe and to limit access thereto to those who have a reasonable need thereof. The recordings in question shall at no time be used for any claim whatsoever against any natural person.

ARTICLE 8 INFORMATION ON THE RISK OF LOAD TRANSFER WITHIN THE CLOSED DISTRIBUTION SYSTEM

Pursuant to Article 4 of Appendix 6 of the Access Contract concluded between ELIA and the Closed Distribution System Operator, the Closed Distribution System Operator shall inform ELIA, prior to the conclusion of the contract for the provision of the Service, whether the load

of the User of the Closed Distribution System as the Capacity Provider or for the Capacity Provider based on the CDS User Declaration could be switched to another point on the Closed Distribution System when providing the Service, for Availability Monitoring or for Availability Testing . In this case, the Closed Distribution System Operator shall inform ELIA, at ELIA's request, of any switching of the load of the User of the Closed Distribution System as the Capacity Provider or for the Capacity Provider based on the CDS User Declaration, of which the Closed Distribution System Operator becomes aware when providing the Capacity Provider's Service, for Availability Monitoring or for Availability Testing.

Should the Closed Distribution System Operator fail to fulfil this obligation, it shall be liable to ELIA for any damaging consequences, pursuant to Article 5.3 of this cooperation agreement, without prejudice to any recourse by the Closed Distribution System Operator against the User of the Closed Distribution System in the event of a breach by the latter of its obligation not to transfer the load.

ARTICLE 9 AGREEMENT AMENDMENTS

ELIA may unilaterally amend this cooperation agreement in the event of changes to the Capacity Contract or the Access Contract in order to align it with these modified contracts, subject to a minimum notice period of 6 months from the first calendar day of the month following the month in which the registered letter was sent. Rejection of the amended cooperation agreement before the expiry of the notice period automatically triggers the termination of this agreement, given also that said minimum notice period is extended until the end (contractually agreed, where applicable, in advance) of the Capacity Contract. In this case, the amended conditions of this cooperation agreement shall apply for the remaining term of the Capacity Contract.

ARTICLE 10 ENTRY INTO FORCE AND TERM

This agreement shall come into force for an indefinite period of time once it has been signed by both Parties, subject to the suspensive condition that all appendices have been sent to ELIA.

A Party may terminate the agreement by means of registered letter addressed to the other Party, subject to a minimum notice period of 6 months from the first calendar day of the month following the month in which the registered letter was sent, given also that said minimum notice period is extended until the end (contractually agreed, where applicable, in advance) of the Capacity Contract. This does not affect the rights and obligations of the terminating Party during the notice period and does not automatically entitle the other Party to compensation.

Done in Brussels on [date] in duplicate, with each Party acknowledging receipt of one original copy.

APPENDIX 1 COMMUNICATION METHODS - DATA EXCHANGE FORMATS

The communication methods and formats of data exchanges between ELIA and the Closed Distribution System Operator are described in the document 'Metering data exchanges for CDS Operator' available on the ELIA website⁴⁶.

APPENDIX 2 FEATURES OF DELIVERY POINT METERING AND CONTRACTUAL INFORMATION CONCERNING THE DELIVERY POINTS IN QUESTION

2.1 Features of Delivery Point metering

The features of metering at the Delivery Points must be communicated to ELIA in the 'CDS Metering Technical Info Checklist'.

This checklist is formally communicated by the CRM Candidate to the Closed Distribution System Operator during the Prequalification Process, since the Closed Distribution System Operator must complete this document to allow the qualification of the Delivery Point for the provision of the Service⁴⁷.

The CDS Metering Technical Info Checklist is available on the ELIA website⁴⁸ :

Monitoring of the metering data:

18.1.6 ANNEX A.6: GUIDELINES FOR THE QUANTIFICATION OF CO₂ EMISSIONS FOR THE PREQUALIFICATION TO THE CAPACITY REMUNERATION MECHANISM IN BELGIUM

This document contains guidelines for the quantification of the CO₂ emissions for the pre-qualification to the Capacity Remuneration Mechanism (CRM) in Belgium, as laid down by the law of 29 April 1999 on the organisation of the electricity market, as amended by the law of 22 April 2019⁴⁹. For under article 22(4) of the Regulation (EU) 2019/934 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity⁵⁰, taking part in a Capacity Remuneration Mechanism implies observing the CO₂ emission limits.

Article 7undecies, §12, of the Electricity Act states that the functioning rules should stipulate, among other things, the CO₂ emission limits in order to ensure compliance with the limits of art 22, §4 a) and b) of the Regulation (EU) No 2019/943 and of the European Commission's Decision SA.104336 (2023/N)⁵¹ of 29 September 2023.

By virtue of the law of 15 May 2024 concerning the establishment of the social tariff premium and until modification of the law of 29 April 1999 concerning the organisation of the electricity market this provision has been removed and an authorization has been foreseen for the King in article 7undecies, §11/1 of the Electricity Act.

As a temporary measure it was foreseen in article 25, §1 of the aforementioned law of 15 May 2024 that the entry into force of the decision taken following article 7undecies, §11/1, first paragraph of the Electricity Act, the provisions concerning the thresholds for CO₂ emissions and the provisions concerning the reduction of greenhouse gas emissions apply as established in the Functioning Rules referred to in article 7undecies, §12 of the law of 29 April 1999.

These directives are mostly inspired by ACER's Opinion No 22/2019⁵², to which the Capacity Holders are requested to refer.

These guidelines are an integral part of the CRM Functioning Rules.

18.1.6.1 Prequalification conditions

In accordance with article 22(4) of the Regulation (EU) 2019/934, production capacity that started commercial production on or after 4 July 2019 shall not emit more than 550 g of CO₂ of fossil fuel origin per kWh of electricity in order to be incorporated in a Capacity Remuneration Mechanism.

In addition, the Regulation (EU) 2019/943 prescribes that from 1 July 2025 production capacity that started commercial production before 4 July 2019 shall not emit more than 550 g of CO₂ of fossil fuel origin per kWh of electricity or more than 350 kg CO₂ of fossil fuel origin on average per year per installed kWe in order to be incorporated in a Capacity Remuneration Mechanism.

⁴⁹ Belgian Official Gazette of 16 May 2019.

⁵⁰ OJ L 158 of 14 June 2019.

⁵¹ Decision SA. 104336 - Amendments to the capacity remuneration mechanism in Belgium

⁵² Opinion no 22/2019 of the European Union Agency for the Cooperation of Energy Regulators of 17 December 2019 on the calculation of the values of CO₂ emission limits referred to in the first subparagraph of Article 22(4) of Regulation (EU) 2019/943 of 5 June 2019 on the internal market for electricity (recast).

However, in view of the latest scientific knowledge available on climate change, the objectives of the Paris Agreement and the current European objectives as defined in Regulation (EU) 2021/1119, as well as to facilitate the energy transition towards a sustainable and climate-neutral energy system, the annual emissions limit is being revised downwards in Belgium.

In order to take part in the Y-4, Y-2 and Y-1 auctions in 2025 under the capacity remuneration mechanism in Belgium, the emission limits are taken over as follows:

1. units whose commercial production began on or after 04/07/2019 must not emit more than 550 g of CO₂ from fossil fuels per kWh of electricity (Equation 1)
2. units whose commercial production began before 04/07/2019 must not emit more than 550 g of CO₂ from fossil fuels per kWh of electricity (Equation 1) or more than 306 kg of CO₂ from fossil fuels on average per year and per kWe if the production unit has a specific emission of between 550 and 600 g/kWh.

As a reminder, units entitled to a long-term contract commit to becoming climate neutral by 2050 and develop a step-by-step plan to this end.

Moreover, it could be pertinent to verify in the future whether the European goals regarding climate neutrality, such as Regulation (EU) 2021/1119 of the European Parliament and of the Council of 30 June 2021 establishing the framework for achieving climate neutrality and amending Regulations (EC) No 4001/2009 and (EU) 2018/1999 evolve and what the impact thereof could be on the CRM, as well as the granting of Capacity Contracts for multiple Delivery Periods.

In the framework of the decision of state support of 29 September 2023 (SA.104336 (2023/N), §61) the Kingdom of Belgium mentioned the gradual lowering of the CO₂-emission limits in order to accelerate the energy transition. As commented by the European Commission every new threshold must be notified.

In this context the Directorate-General for Energy wishes to point out that a strategy for the lowering of the emission thresholds is being investigated with the aim of the establishment of emission threshold for auctions starting from 2028.

$$\text{Specific Emissions (CRM)} \leq 550 \frac{\text{g}}{\text{kWh}}$$

Equation 1: condition for the emission limits specifically for CO₂ of fossil fuel origin for the pre-qualification of the capacity remuneration mechanism for auction Y-4, Y-2 and Y-1 of 2025 for units of which commercial production started on or after 4 July 2019.

$$\text{Annual Emissions (CRM)} \leq 306 \frac{\text{kg}}{\text{kWe}}$$

if

$$\text{Specific Emissions (CRM)} \leq 600 \frac{\text{g}}{\text{kWh}}$$

Equation 2: conditions for the emission limits annually for CO₂ of fossil fuel origin for the pre-qualification of the CRM for auction Y-4, Y-2 and Y-1 of 2025.

This annual emission limit is subject to two conditions:

1. Compliance with a ceiling threshold for specific emissions set at 600 gCO₂/kWh
2. Commercial production of the unit has to have started before 04/07/2019

18.1.6.2 Quantification of specific emissions

The specific emissions are calculated on the basis of the design efficiency of the production unit, namely the net efficiency at nominal capacity (Equation 3).

$$\text{Specific Emissions} = \frac{0,0036 (1 - t_{CO_2}) \sum_f s_f \cdot EF_{f,CO_2}}{\eta_{des}} = \frac{[g CO_2]}{[kWh_e]}$$

Equation 3: methodology for the quantisation of the emissions for CO2 specifically

Table 1: variables of 3 for the quantisation of the emissions for CO2 specifically

Variable	Unit	Specifications	Methodology
f	-	Fossil fuel coefficient	Other fossil fuels, cf. ACER's opinion ⁵³
t_{CO_2}	%	Fraction of CO ₂ that is transferred or captured in comparison to the total CO ₂ emitted	Article 49 of the Regulation (EU) 2018/2066 ⁵⁴
s_f	%	Fuel fraction f in comparison to the fuel total	ACER's Opinion ⁵⁵
EF_{f,CO_2}	$\frac{kg}{TJ}$	Emission factor for CO ₂	"EU ETS" Methodology ⁵⁶
η_{des}	-	Design efficiency	Net efficiency at nominal capacity

18.1.6.2.1 Fuel fraction

The fractions of each fuel are determined by Equation 4 of section 7.1 of ACER's Opinion.

The hypotheses concerning the share of each fuel (sf) are to be explained by means of a description of the installations and the use of different fuels. All components of the facility are to be considered, including emergency generators.

18.1.6.2.2 Fraction of CO₂ that is captured or transferred

The determination of the transferred CO₂ factor (tCO₂) has to be based on evidence of the existence of or a plan for carbon capture and storage facilities that contain the technical specifications thereof (measures in the case of an existing facility and technical documents in the case of an installation project) pursuant to point 7.4 of ACER's opinion 22/2019.

18.1.6.2.3 Emission factor

Emission factors can:

- originate from ETS documents if it concerns an existing capacity that is subjected to this system, as determined in section 7.2.1 of ACER's Opinion;

53 Opinion no 22/2019 of the European Union Agency for the Cooperation of Energy Regulators of 17 December 2019 on the calculation of the values of CO₂ emission limits referred to in the first subparagraph of Article 22(4) of Regulation (EU) 2019/943 of 5 June 2019 on the internal market for electricity (recast).

54 Regulation (EU) 2018/2066 of the Commission of 19 December 2018 on the monitoring and reporting of greenhouse gas emissions pursuant to Directive 2003/87/EC of the European Parliament and of the Council and amending Commission Regulation (EU) No 601/2012.

55 Opinion no 22/2019 of the European Union Agency for the Cooperation of Energy Regulators of 17 December 2019 on the calculation of the values of CO₂ emission limits referred to in the first subparagraph of Article 22(4) of Regulation (EU) 2019/943 of 5 June 2019 on the internal market for electricity (recast).

56 Regulation (EU) 2018/2066 of the Commission of 19 December 2018 on the monitoring and reporting of greenhouse gas emissions pursuant to Directive 2003/87/EC of the European Parliament and of the Council and amending Commission Regulation (EU) No 601/2012.

- b) if the capacity is not subjected to the ETS system, be determined by dividing the certified CO₂ emissions by the fuel consumption that is registered by the TSO and/or the DSO or is certified by a third party, as resumed by equation 5 of the section 7.2.1 of ACER's Opinion;
- c) if the two previous options are not applicable, in particular concerning new capacity, originate from annex 1 of ACER's Opinion, resuming the standard values recommended by the IPCC.

The emission factors of the capacity that does not use fossil fuels and the emission factors linked to the energy storage fed⁵⁷ by the network is considered to be carbon neutral.

This information should be provided by the capacity holder in a declaration of honour when submitting his pre-qualification file. In this declaration, the capacity holder undertakes to guarantee that the energy storage facility is actually fed directly by the transmission grid and that no OTC contract is in force for the supply period covered by the auction.

The Directorate-General for Energy of the FPS Economy reserves the possibility to verify the veracity of the declaration at any time.

For energy storage facilities directly connected to a generation unit, the capacity holder has to provide the documents justifying that this unit complies with the emission limits.

The emission factor for the biomass fraction of multi-fuel capacity is currently considered to be zero. The biomass fraction is determined in accordance with Article 39 of Regulation EU 2018/2066. Production units using biomass must comply with Article 29 of Directive EU 2018/2001. Any changes in European legislation concerning biomass emission factors will have to be taken into account in the future.

The emission factors of the waste-to-energy capacity have to be determined on a case-by-case basis in function of the percentage and the type of biomass.

The emission factors of synthetic fuels will have to be determined on a case-by-case basis in accordance with articles 32 to 35 of the Regulation (EU) 2018/2066. Pursuant to Article 28(5) of Directive (EU) 2018/2001, European methodologies for estimating greenhouse emissions for synthetic fuels shall be adopted by 31 December.

18.1.6.2.4 Design efficiency

The design efficiency is determined pursuant to section 7.3 of ACER's Opinion, taking into account the net efficiency at nominal capacity under the ISO standards (15°C, 1 ATM and 60% HR), or is calculated on the basis of the values that are measured at the calibrated meters of the TSO and/or the DSO. In this case, the "heat and mass balance" of the capacity and a lawful document that indicates the net efficiency at nominal capacity should be provided. The correction curves are used in order to obtain the design efficiency at the ISO standards (15°C, 1 ATM and 60% HR)⁵⁸.

The design efficiency can also originate from other certified or attested technical documents, such as the results of the most recently executed performance tests.

In the case of new capacity, the design efficiency can originate from parts of the tender that indicate the anticipated performance of the capacity according to the ISO standards.

⁵⁷ Concerning the energy storage units that are directly connected to a generation unit, the capacity provider will have to provide the documents that prove the unit is in conformity with the emission limits.

⁵⁸ Concerning the pre-qualification 2021, the existing generation units that do not have a correction curve can exceptionally submit the design efficiency to the reference conditions for the site.

Concerning the cogeneration units, the design efficiency can be calculated according to the method determined in annex VII(8) of the Commission Delegated Regulation (EU) 2019/331 of 19 December 2018 determining transitional Union-wide rules for harmonised free allocation of emission allowances pursuant to Article 10a of Directive 2003/87/EC of the European Parliament and of the Council⁵⁹. For it seems logical to take into account the thermal output that originates from the same fuel consumption as the one for electricity and as such contributes to the increase in performance of the cogeneration units in the quantification of CO₂ emissions for the determination of the design efficiency of these units.

It is nevertheless important to recall the ban on cumulative aid⁶⁰ during the delivery period, as specified in the Royal Decree on "Eligibility Criteria".

18.1.6.3 Annual emissions

The annual emissions are calculated according to Equation 4 section 6.2 of the ACER advice:

$$annual\ emissions = \frac{1}{N} \sum_{y=Y-N}^{Y-1} \frac{specific\ emissions_y * electricity\ production_y}{installed\ capacity_y} = \frac{[kg\ CO_2]}{[kW_e]}$$

Equation 4: Methodology for the quantification of the annual CO₂-emissions

Table 2: Variables of Equation 5 for the quantification of the annual CO₂-emissions

Variable	Unity	Specifications
Y	-	Prequalification year of the production capacity
y	-	Delivery Period
N	-	Number of years taken into account for the calculation (three last years if possible)
Specific emissions _y	$\frac{g}{kWh}$	Emissions specifically calculated for the production capacity for the year y
Electricity production _y	GWh	Yearly production of electricity for the year y
Installed capacity _y	MW _e	Nominal capacity of the production unit for the year y

It is advised to take into account the average emissions of the last three years before the prequalification, excluding test periods.

By way of exception and until 1 July 2025, holders of production capacities that do not meet the CO₂ Emission Limits at the pre-qualification stage, can submit as an annex an action plan that includes and explains the measures envisaged to comply with the specific limits by no later than the beginning of the capacity's Delivery Period.

A capacity holder that does not have the necessary prior history to certify his CO₂ emissions within the framework of a major technical transformation of the production unit prior to the delivery period may exceptionally submit a compliance plan with his CO₂ pre-qualification file. This compliance plan must certify that his capacity will meet the specific CO₂ emission limit

⁵⁹ OJ L 59 of 27 February 2019.

⁶⁰ The green certificates as meant in article 7, §1, 1st paragraph, 1°, of the law of 29 April 1999; 2° the green certificates as meant in article 28 of the edict concerning the organisation of the electricity market in the Brussels-Capital Region; 3° the green certificates and the combined heat and power certificates as meant in articles 7.1.1 and 7.1.2. of the Flemish decree of 8 May 2009 containing general provisions on energy policy; 4° the green certificates as meant in article 37 of the Walloon decree of 12 April 2001 on the organisation of the regional electricity market; 5° all forms of operating aid of which the foreign capacity granted directly or indirectly by the concerned Member States disposes.

no later than the beginning of the delivery year. Compliance with the CO₂ emission limit has to be justified ex post by the capacity holder (see *ex post check*).

18.1.6.4 Practical arrangements

The required information has to be provided in an Excel table available on the CRM IT Interface of the transmission system operator, ELIA. This information contains:

- the values of the parameters necessary for the quantification of the CO₂ emissions;
- all documents necessary to prove the communicated values.

The CO₂ emissions will be calculated automatically in the Excel table according to the quantification methods that are described in these guidelines.

Production units below 5 MW will only have to submit a self-declaration that confirms the compliance with the CO₂ Emissions Cap. For these units, the system operator is authorized to carry out random on-the-spot checks by asking for the documents that confirm the communicated values.

As with the above-mentioned generation units of less than 5 MW, generation units that are part of low-voltage generators and whose individual unit power is less than 5 MW may submit a declaration of honour showing their compliance with the CO₂ emission limit. This declaration has to be provided when submitting the pre-qualification file on Elia's ICT platform. The Directorate-General of the FPS Economy reserves the possibility of inspecting the units comprising the low-voltage generators in case of any suspicion.

18.1.6.5 Checks

a) Ex-ante checks

The information that is provided as part of the pre-qualification will be subject to different checks, called "ex ante":

- a conformity check;
- an accuracy check;

The conformity check is intended to verify if the required information has been provided, whereas the accuracy check will be intended to ascertain that the parameter values match the values that are indicated in the items of evidence and that they are plausible.

These checks shall be performed within 20 working days following the submission of the pre-qualification file.

b) Ex-post checks

Ex-post checks will also be carried out at the end of each calendar year of the delivery period and should provide evidence of compliance with the emission limits. In the case of validation of annual emissions, the calculation will refer to each calendar year of the delivery period.

These checks will be intended to verify the compliance with the CO₂ Emissions Cap of the production units that participate in the CRM. They will be performed for the production units of or above 5 MW of installed capacity⁶¹ that are listed below:

- production units of which the emission factor is or the emission factors are variable in the course of time:
 - production units using mixed fuels;
 - waste-to-energy production units;
 - production units in which CO₂ is captured and transferred;
- the generation units that have submitted an action plan;
- the generation units of which the specific emissions are between 500 and 600 g/kWh at the moment of the pre-qualification ;
- the generation units of which the annual emissions are between 290 and 306 kg/kW/year at the moment of the pre-qualification;
- the generation units that started commercial production before 4 July 2019 that have undergone a major technical transformation and have less than one year of commercial production at the time of pre-qualification.

The ex-post validation activity will be carried out on the basis of a report, certified by an accredited third-party verifier for scope 1(a) and/or scope 1(b) of annex I of Commission Implementing Regulation (EU) 2018/2067, and submitted by the capacity holder to the competent national authority.

The annual report shall include a monthly breakdown of emissions from the units concerned.

The ex-post certificates of compliance will have to be submitted to the General Direction of Federal Public Service Economy. In the case of non-compliance with the CO₂ Emission limits will be punished.

The system operator is responsible for the treatment of the personal data as indicated in section 2.9 of the Functioning Rules:

In the context of the CRM, ELIA and the CRM Actor shall process the personal data in accordance with the Data Protection Legislation.

⁶¹ The generation units burning commercial standard fuels below 5 MW of installed capacity are exempted from this check.

18.1.7 ANNEX A.7: WAIVER DECLARATION CAPACITY RESERVATION AND ALLOCATION LINKED TO THE CMU (ADD REFERENCE)

Except for the Delivery Points that are already associated to a Capacity Contract, in which case an exemption applies, for each Delivery Point (to be or already) connected to the ELIA Grid or to a CDS connected to the ELIA Grid for a New Build CMU, the CRM Candidate, when submitting a Prequalification File in the Standard Prequalification Process, proceeds with the following formal commitments and waivers in relation to the relevant connection capacity (within the meaning of the Connection Contract) for the New Build CMU [add reference] (hereafter: CMU):

- if the relevant connection capacity is allocated to the connection applicant within the meaning of article 57 of the Code of Conduct, article 166 of the Federal Grid Code, article 109 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code, and the connection has not yet been commissioned at the time of the Prequalification File submission deadline referred to in article 7undecies, § 8, last alinea, of the Electricity Act:
 - an undertaking not to put the connection in service prior to the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;
 - a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the rights conferred on it by the allocation of the relevant connection capacity and/or the conclusion of the Connection Contract;
 - a waiver of the rights conferred on it by the allocation of the relevant connection capacity if the CMU is not selected during one of the Auctions in so far as the results of the Auction render it impossible to implement the initial technical solution set out in the EDS, as specified in the article 46, §3 of the Code of Conduct, the article 160 of the Federal Grid Code, the article 105 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code ;
- if the connection applicant has a reserved relevant connection capacity in accordance with articles 34 and 46 of the Code of Conduct, articles 153 and 160 of the Federal Grid Code or articles 98 and 99 of the Federal Grid Code or the corresponding article of the applicable Regional Grid Code without having concluded a Connection Contract:
 - an undertaking not to sign the Connection Contract before the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;
 - a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the rights conferred on it by the reservation of the relevant connection capacity;
 - a waiver of the rights conferred on it by the reservation of the relevant connection capacity if the CMU is not selected during the Auction in so far as the results of the next Auction render it impossible to implement the technical solution foreseen in the EDS, as specified in article 46 §3 of the Code of Conduct, article 160 of the Federal Grid Code, article 105 of the Federal Grid Code 2002 or the corresponding article of the applicable Regional Grid Code;
- if the connection applicant does not have allocated connection capacity or reserved connection capacity:
 - an undertaking not to sign the Connection Contract before the publication of the results of the Auctions which took place during the year of the prequalification of the CMU;

- a waiver, until the publication of the results of the Auctions which took place during the year of the prequalification of the CMU, of the reservation of the relevant connection capacity attached to an EDS, issued where applicable prior to the notification of the prequalification results;
- a waiver of the rights that would be conferred on it by any reservation of the relevant connection capacity if the CMU is not selected during the Auction and in so far as the results of the Auction render it impossible to implement the technical solution described in the EDS, as specified in the article 46 §3 of the Code of Conduct, article 160 of the Federal Grid Code or in the applicable Regional Grid Code.

The above-mentioned commitments and waivers do not become void when the Prequalification File is rejected by ELIA, nor when the CRM Candidate archives the Prequalification File or submits a full Opt-out Notification.

18.1.8 ANNEX A.8: EXAMPLE MODELS OF PREQUALIFICATION FILES

18.2 ANNEX B: PRE-DELIVERY CONTROL

18.2.1 ANNEX B.1: PRE-DELIVERY PERIOD DEFINITION AND TOTAL CONTRACTED CAPACITY DETERMINATION

This annex presents a concrete example that illustrates how a Pre-delivery Period is defined (as per section 8.2) and how ELIA determines the Total Contracted Capacity subject to the Pre-delivery control (as per section 8.3.2).

In this way, the illustration above represents a total of three Transactions on two different CMUs – two for CMU A and one CMU B.

The First Transaction (Transaction 1 of CMU A) starts at the first Delivery Period (November 2028 – October 2029) and covers three Delivery Periods. The other Transactions (Transaction 2 of CMU B and Transaction 3 of CMU A) start at the second Delivery Period (November 2029 – October 2030).

18.2.1.1 Pre-delivery Period Definition

Per definition of section 8.2, the 1st pre-delivery period (Pre-delivery Period 1) determined out of the illustration above starts from Y-4 Auction result notification (end Oct. 2024) to end with the start of the Delivery Period (2028-2029); Delivery Period DP1. It is represented by the lane in orange.

The 2nd Pre-Delivery Period starts from Y-4 Auction result notification (end Oct. 2025) to end with the start of the corresponding Delivery Period (2029 – 2030), Delivery Period DP2. It is represented by the lanes in light blue and pink.

18.2.1.2 Moments of control

Per definition of section 8.3.1, the following moments of control are determined for each pre-delivery Period:

During Pre-delivery Period 1; the first moment of control ($t_{control\ 1}$) is on August 31, 2026 while second moment of control ($t_{control\ 2}$) is the last day of the Pre-delivery Period, October 31, 2028.

During Pre-delivery Period 2, the first moment of control ($t_{control\ 1}$) is on August 31, 2027 while the second moment of control ($t_{control\ 2}$) is the last day of the pre-delivery Period, October 31, 2029.

The moments of control for each Transaction are relying on the first Delivery Period. For the Transaction of a CMU with a Multi-Year Capacity Contract, the moments of control of the first Delivery Period are applicable. In the example above, for Transaction 1, the only applicable moments of control to the CMU A are the ones for the first Delivery Period (November 2028 – October 2029).

18.2.1.3 Total Contracted Capacity determination

In application of the criteria of § 395, the Total Contracted Capacity is determined per moment of control and per corresponding Pre-delivery Period. It is equal to the sum of a CMU's Contracted Capacities, provided that it respects the following conditions:

- the corresponding Transaction Period covers partially or totally the Delivery Period; and
- the corresponding Transaction period has not started at the moment of the Pre-delivery control.

18.2.1.3.1 Moment of control on August 31, 2026

The Total Contracted Capacity is determined at CMU level. This moment of control concerns the Pre-delivery Period 1, related to the Delivery Period 1 (November 2028 to October 2029).

To determine the Total Contracted Capacity, ELIA considers – per CMU – the Contracted Capacities that fulfil the criteria reminded above in annex 18.2.1.3.

For CMU A:

- the Contracted Capacity of Transaction 1 (10 MW) respects the criteria;
- the Contracted Capacity of Transaction 3 (5 MW) does not respect the first criterion as the corresponding Transaction Period does not cover partially or totally the Delivery Period 2028-2029);

→ The Total Contracted Capacity of CMU A is then equal to 10 MW.

For CMU B:

- the Contracted Capacity of Transaction 2 (20 MW) does not respect the first criterion as the corresponding Transaction Period does not cover partially or totally the Delivery Period 2028-2029);

→ The Total Contracted Capacity of CMU B is then equal to 0 MW.

18.2.1.3.2 Moment of control on August 31, 2027

This moment of control concerns the Pre-delivery Period 2, related to the Delivery Period 2 (November 2029 to October 2030).

To determine the Total Contracted Capacity, ELIA considers – per CMU – the Contracted Capacities that fulfil the criteria above.

For CMU A:

- the Contracted Capacity of Transaction 1 (10 MW) respects the criteria;
- the Contracted Capacity of Transaction 3 (5 MW) respects the criteria;

→ The Total Contracted Capacity of CMU A is then equal to 15 MW.

For CMU B:

- the Contracted Capacity of Transaction 2 (20 MW) respects the criteria;

→ The Total Contracted Capacity of CMU B is then equal to 20 MW.

18.2.1.3.3 Moment of control on October 31, 2028

The Total Contracted Capacity is determined at CMU level. This second moment of control concerns the Pre-delivery Period 1, related to the Delivery Period 1 (November 2028 to October 2029).

To determine the Total Contracted Capacity, ELIA considers – per CMU – the Contracted Capacities that fulfil the criteria.

For CMU A:

- the Contracted Capacity of Transaction 1 (10 MW) respects the criteria;
- the Contracted Capacity of Transaction 3 (5 MW) does not respect the first criterion as the corresponding Transaction Period does not cover partially or totally the Delivery Period 2028-2029);

→ The Total Contracted Capacity of CMU A is then equal to 10 MW.

For CMU B:

- the Contracted Capacity of Transaction 2 (20 MW) does not respect the first criterion as the corresponding Transaction Period does not cover partially or totally the Delivery Period 2028-2029);

→ The Total Contracted Capacity of CMU B is then equal to 0 MW.

18.2.1.3.4 Moment of control on October 31, 2029

The Total Contracted Capacity is determined at CMU level. This moment of control concerns the Pre-delivery Period 2, related to the Delivery Period 2 (November 2029 to October 2030).

To determine the Total Contracted Capacity, ELIA considers – per CMU – the Contracted Capacities that fulfil the criteria.

For CMU A:

- the Contracted Capacity of Transaction 1 (10 MW) does not respect the second criterion as the Transaction Period has started at the moment of the Pre-delivery control;
- the Contracted Capacity of Transaction 3 (5 MW) respects the criteria;
 - ➔ The Total Contracted Capacity of CMU A is then equal to 5 MW.

For CMU B:

- the Contracted Capacity of Transaction 2 (20 MW) respects the criteria;
 - ➔ The Total Contracted Capacity of CMU B is then equal to 20 MW.

18.2.2 ANNEX B.2: IMPACT OF ADDITIONAL PRE-DELIVERY CONTROL ON CONTRACTED CAPACITIES ON ADDITIONAL CMUS

This annex illustrates the requirement of § 391 with a concrete example of CMU 1, with a Contracted Capacity of 100 MW and a Transaction Period of 3 years.

This example involves a CMU that was contracted in a Y-4 Auction. Though the timings are slightly different, the process is identical for units that are contracted in a Y-2 Auction.

In this example, the Pre-delivery Period starts with the Y-4 Auction results notification and ends with the Delivery Period 25 – 26. First moment of control is scheduled on August 31 2023; while second moment of control happens on October 31 2025.

CMU 1 is an Additional CMU. At first moment of control, ELIA applies the corresponding pre-delivery control and determines a Missing Volume of 100 MW (hence equal to the entire Contracted Capacity). This is illustrated in the 1st step on the graph above.

In consequence, ELIA applies both penalties: a financial sanction (as per section 8.4.3.1) and a reduction of the initial Transaction Period (as per section 8.4.3.3). The Initial Transaction period of three years (from start of Delivery Period 25-26 to end of Delivery Period 27-28) is reduced by one year, and now corresponds to a start in Delivery Period 26-27 and an end in Delivery Period 27-28. This action is illustrated in the step 2 of the graph above.

Consecutive to this update of the Transaction Period of CMU1, a new Pre-delivery Period must be determined. Indeed, the corresponding Delivery Period is no longer Delivery Period 25-26 but now becomes Delivery Period 26-27.

As a consequence, phase 1 and phase 2 are updated, for this new Pre-delivery Period. Updated phase 1 now ends on August 31 of Y-2 (being August 2024), with the first moment of control set on August 31, 2024. This is illustrated in steps 3 and 4 in the graph above.

At moment of control on August 31, 2024, ELIA applies the exact same pre-delivery controls. If the CMU is still an Additional CMU on that occasion, the same penalties apply once more.

18.2.3 ANNEX B.3: CONTENT OF A QUARTERLY REPORT

The following table lists the different elements that need to be included in the quarterly report. The Capacity Provider can add more elements if he wants to. Note that the requirements are different for Additional – Other CMUs compared to Additional New Build and Virtual CMUs.

	Explanation	Information to be transferred	Obligatory for Additional – Other CMU	Obligatory for Additional – New Build and Virtual CMU
<i>Delivery Period</i>	The Delivery Period(s) that is/are concerned by the quarterly report.	Delivery Period	Yes	Yes
<i>Permit Overview</i>	The Permitting Milestone, defined in section 3.1, is reached when all necessary permits for the construction of the project have been delivered in the last administrative instance, are definitive, enforceable and cannot be disputed any more before the State Council or the Council for permitting contestations (Raad voor vergunningsbetwistingen).	As per §§ 409 - 410: - If the Capacity Provider holds all required permits, he includes a copy of said permits via CRM IT Interface; - If the Capacity Provider does not hold all required permits, he indicates the permits that he does not have and includes in the mitigation plan (cfr. Infra) the steps to cope with this situation, as well as a copy of the permits that the Capacity Provider does hold.	Yes	Yes
<i>Start of Construction Work</i>	The date for this key milestone represents the moment at which the two following milestones are achieved: - whether an engineering, procurement and construction (EPC) contract (or any contract or suite of contracts having the same effect) is in full force and effect in respect of each new or refurbished production/consumption unit providing the Contracted Capacity(ies); - whether work specific to on-site construction of each actual new or refurbished production/consumption unit providing the Contracted Capacity(ies) has commenced which, for the avoidance of doubt, does not include design work, minor civil works or works to prepare the site for construction work. In the case of the construction of a CCGT, for example, it is the start of the piling activities	- In case the Construction Work has not started yet: the expected date of the start of construction work; - In case Construction Works have started: proof of the start needs to be transferred in the form of attestation by supplier that there are no more postponing or dissolving conditions that could in any way delay the delivery, attestation by the contractor that he is the contractor and that construction works have commenced, or any other document of the same legal value, potentially backed up by minutes of construction site meetings.	No	Yes
<i>Final Completion</i>	The key milestone is achieved when the required offline and online commissioning tests are finalized and successful. The online commissioning tests required by ELIA for the commissioning of a production/consumption unit are not linked to the CRM and therefore not specified here. For further information on this subject, the Capacity Provider is invited to contact his Key Account Manager within ELIA.	Date	Yes	Yes
<i>Major Risks</i>	A risk analysis includes an overview of the different risks that are perceived by the Capacity Provider	- If no risks are perceived, a brief explanation is provided why this is the case; - If one or more risks are perceived, the Capacity Provider includes both the likelihood and potential impact, as well as a brief written explanation for each risk.	Yes	Yes

<i>Delay and related Transaction</i>	A Delay is defined as per § 411	- Amount of time and Transaction, as well as a brief explanation why the Delay takes this amount of time. - In case no Delay is identified, a brief explanation why no Delays are expected.	Yes	Yes
<i>Mitigation Plan</i>	Following § 407, if the Capacity Provider identifies a Delay he includes a Mitigation Plan with steps to deal with the Delay	(only in the case of and identified Delay)	Yes	Yes
<i>Residual Delay and related missing Volume</i>	In each of his quarterly report, the Capacity Provider is invited to communicate the amount of the Missing Volume (even when it is equal to zero). In case of Missing Volume, the Capacity Provider also provides the details and the justifications of his calculations to reach the amount of this Missing Volume. This information indicates for how long there will be a Missing Volume.	(only in the case of an identified Residual Delay)	Yes	Yes

18.2.4 ANNEX B.4: TEMPLATE FOR THE PERMIT REPORT

[•] (Name of Capacity Provider)

Permit report – [•] (Project Name)

August [•] (Year)

[•] (Contact details of Capacity Provider)

Identification number: [•] (CRM User ID)

(Select one of the two paragraphs below: the first paragraph applies for a CMU for which the Capacity Provider holds all required permits for the Transaction Period(s) in Delivery Period X, the second paragraph applies when the Capacity Provider does not hold all required permits for the Transaction Period(s) in Delivery Period X)

[[•] (Name of Capacity Provider) confirms that it holds all required permits for the Transaction Period(s) in Delivery Period [•] (Delivery Period).]

OR: [[•] (Name of Capacity Provider) hereby notifies ELIA that it does not hold all required permits for the Transaction Period(s) in Delivery Period [•] (Delivery Period).]

The following is an overview of all relevant permits and their current status:

Permit	Status	Impact on Transaction Period	Mitigation Plan
[•] (Type of permit) [•] (File number)	(Select one of the following options) [Held] OR [Not Held]	[•] (if relevant: describe how lack of permit would impact the Transaction Period)	[•] (if relevant: describe how the Capacity Provider aims to resolve a lack of permit)

(The Capacity Provider can add more rows depending on the amount of required permits)

As per §§ 401 - 402, the Capacity Provider lists and adds a copy of the relevant permits or relevant documents (showing their current status of the permit request) to this Report.

18.3 ANNEX C: AVAILABILITY OBLIGATION

18.3.1 ANNEX C.1: MAPPING OF INFORMATION IN AVAILABILITY PLAN TO UNAVAILABLE CAPACITY NOTIFICATION

For CMUs with a Daily Schedule, or for CMUs without Daily Schedule that also follow the Outage Planning Process and have notified ELIA in accordance with § 527, ELIA automatically creates the notifications of Unavailable Capacity in accordance with § 519. The way ELIA converts the information present in the Availability Plan to the information required to create a notification for Unavailable Capacity is described in the table below.

The left column of the table contains the relevant data fields that are available in the Availability Plan for each Market Time Unit. The right column contains the data field in the Unavailable Capacity notification that is equivalent to the data field in the Availability Plan. The middle column describes how the values in each row of the left column are mapped to their equivalent in the right column.

Availability Plan	Mapping		Remaining Maximum Capacity notification
Status	Availability Status	Equivalent reason	Reason for unavailability
	Available but $P_{max,available} < NRP$	Planned outage	
	Unavailable	Planned outage	
	Testing	Other limitation	
	Forced Outage	Forced Outage	
Delivery Point EAN code	Each Delivery Point EAN code is uniquely linked to a Delivery Point ID, which in turn is uniquely linked to a CMU ID for the relevant Delivery Period		CMU ID
Start date and time	The start date and time are directly mapped to the Unavailable Capacity notification		Start date and time
End date and time	The end date and time are directly mapped to the Unavailable Capacity notification		End date and time
Maximum Available Power ($P_{max,available}$)	$RMC = Min(P_{max,available}; NRP)$		Remaining Maximum Capacity
/	Time of notification in the outage planning process before D-1 11:00		Register as Announced Unavailable Capacity (if enabled by the Capacity Provider)

18.3.2 ANNEX C.2: BASELINE METHODOLOGY: HIGH X OF Y

For every Delivery Point requiring a Baseline (as per the information submitted according to section 5.2.3.1.1), that did not notify to ELIA that a Baseline will be declared, in accordance with Annex 18.3.3 or to which applies the fallback procedure as described in Annex 18.3.3.3, ELIA calculates the Baseline based on historical net consumption for the considered Delivery Point. For each AMT MTU in an AMT Moment as well as the moments relevant for an Availability Test covering a period P on day A , the steps described in the remainder of this section are performed.

18.3.2.1 Selection of the reference days

ELIA determines a set of Y days that are representative for day A , which contain the metering data of the Delivery Point used for the determination of the Baseline.

The representative days are the last Y days preceding a day A that are of the same category as day A , except for days that are excluded.

The categories of representative days are:

- category 1: Working Days;
- category 2: weekend days and Belgian bank holidays (or bank holidays of the country of the Indirect or Direct Foreign Capacity).

The days that are excluded are:

- the day before day A ; and
- days during which an activation of Redispatching or frequency-related Ancillary Services upon request of ELIA (or the Foreign TSO when applicable) has been made using this Delivery Point (Group); and
- days during which any of the CMU's Declared Prices were exceeded; and
- days during which a previous Availability Test took place; and
- the day(s) excluded by the Capacity Provider as described below.

From the Y representative days, ELIA selects X reference days.

Depending on the category to which day A corresponds, X and Y for each category of representative days are defined as presented in the table below:

Category of day A	X	Y
Working Day	4	5
Weekend day / bank holiday	2	3

Table 24 – Selection of representative days

The Capacity Provider may exclude one or more representative day(s) provided that it is notified to ELIA at the latest 10 Working Days after the AMT MTU or Availability Test and that the request is reasoned and justified by the Capacity Provider by one of the following conditions:

- the Capacity Provider duly notified ELIA of Unavailable Capacity occurring on the day they wish to exclude, according to section 9.3;
- holidays, strike days or a closing period that differ from the past and that have an impact on the injection/offtake profile of the Delivery Point, unless one of those three conditions also applies to Day 'A'

For each quarter hour individually, ELIA determines the X reference days as the days with the X highest values of net offtake of the considered Delivery Point, measured at the same quarter hour over the Y representative days.

18.3.2.2 Baseline for each quarter hour

The Baseline value (without adjustment) for each quarter hour in the AMT Moment(s) or Availability Test of day A is calculated as the average of the X values of net offtake power of the considered Delivery Point, measured at the same quarter hour on the X reference days. This is represented by the following formula:

$$P_{Baseline, without adjustment}(t) = \frac{1}{N_X} \sum_{d \in X} P_{measured}(d, t)$$

Where:

- $P_{measured}(d, t)$ is the Measured Power of the concerned Delivery Point observed during quarter hour t on day d ; and
- N_X is the number of reference days X , in accordance with Table 24 above.

To calculate the final Baseline value, ELIA applies a same-day adjustment (SDA) by default. The adjusted Baseline is calculated by adding a correction value, $P_{Adjust}(t, T)$, to every unadjusted quarter hourly Baseline value. This is represented by the following formula:

$$P_{Baseline}(t) = P_{Baseline, without adjustment}(t) + P_{Adjust}(t, T)$$

Where:

- $P_{Baseline, without adjustment}(t)$ is the Baseline value for quarter hour t before adding the adjustment; and
- $P_{Adjust}(t, T)$ is the baseline adjustment value for quarter hour t , calculated in accordance with 18.3.2.3; and
- T is the start of the relevant AMT Moment.

18.3.2.3 Baseline adjustment

ELIA applies a same-day adjustment to the Baseline by default. The adjusted Baseline is calculated by adding an adjustment value, $P_{Adjust}(t, T)$, for each quarter hour to the unadjusted Baseline for that quarter hour. The Baseline adjustment value is calculated as the positive difference between the average measured net offtake of the Delivery Point during the adjustment period of day A (referred to as $P_{adjust, A}$), and the average measured net offtake of the Delivery Point during the corresponding period on the X reference days of the quarter hour (referred to as $P_{adjust, X}$). The adjustment period is defined as the period of three hours starting six hours before the start of the AMT Moment or Availability Test containing the MTU t . This is represented by the following formulas:

$$P_{Adjust}(t, T) = \text{Max}\{0; P_{Adjust,A}(T) - P_{Adjust,X}(t, T)\}$$

Where:

- $P_{Adjust,A}(t)$ is the average measured net offtake of the Delivery Point during the adjustment period, calculated in accordance with the formulas below; and
- $P_{Adjust,X}(t)$ is the average measured net offtake of the Delivery Point during the adjustment period on the X reference days, calculated in accordance with the formulas below; and
- T is the start of the relevant AMT Moment.

$$P_{Adjust,A}(T) = \frac{1}{12} \sum_{t=T-24}^{T-12} P_{measured}(A, t)$$

Where:

- $P_{measured}(A, t)$ is the Measured Power for the concerned Delivery Point observed during quarter hour t on day A ; and
- T is the start of the relevant AMT Moment.

$$P_{Adjust,X}(t, T) = \frac{1}{12 \cdot N_X} \sum_{d \in X(t)} \left(\sum_{i=T-24}^{T-12} P_{measured}(d, i) \right)$$

Where:

- $P_{measured}(d, i)$ is the Measured Power for the concerned Delivery Point observed during quarter hour i on day d ; and
- T is the start of the relevant AMT Moment; and
- $X(t)$ are the reference days for quarter hour t ; and
- N_X is the number of reference days as per annex 18.3.2.1.

18.3.3 ANNEX C.3: BASELINE METHODOLOGY: DECLARATION

For every Delivery Point requiring a Baseline (as per the information submitted according to section 5.2.3.1.1), that indicated to ELIA that a Baseline will be declared, in accordance with Annex 18.3.3.1, ELIA uses the Baseline declared by the Capacity Provider for the Delivery Point, if it respects the Baseline quality requirements. If this is not the case, a fall-back procedure applies. For each AMT MTU in an AMT Moment as well as the moments relevant for an Availability Test covering a period P on day A , the steps described in the remainder of this section are performed.

18.3.3.1 Baseline declaration modalities

Capacity Providers that want to declare a Baseline value for a Delivery Point notify ELIA at least 15 Working Days before the first Baseline declaration for the Delivery Point can take place.

The Capacity Provider declares a Baseline for all Delivery Points, for which ELIA received the abovementioned request, starting 15 Working days after the request submission and until the last MTU of the Delivery Period. The declared Baseline value for an MTU is the expected net offtake of the Delivery Point for that MTU.

Capacity Providers respect the following conditions when declaring a Baseline value to ELIA:

- A single Baseline value is declared per Delivery Point; and
- A Baseline value is declared for each MTU on the Day-Ahead Market; and
- Each declared Baseline value is a positive value in MW, with a precision of 0,01 MW; and
- Baseline values for a day D are declared to ELIA before $D-1$ 11:00.

In case any of the above conditions are not met for a certain MTU, or in case ELIA does not receive a Baseline declaration for a certain MTU, ELIA will instead apply a declared Baseline value of 0 MW for these MTUs.

18.3.3.2 Baseline quality validation

In absence of an activation of the Delivery Point in any market, the declared Baseline value for a certain Delivery Point and MTU is equal to the net consumption of this Delivery Point on that MTU. ELIA only uses the Baseline values declared by the Capacity Provider for a Delivery Point in case it respects the Baseline quality requirements set out in the remainder of this section. If the Baseline quality requirements are not met, the fallback procedure described in 18.3.3.3 applies.

The Baseline quality requirements are evaluated per Delivery Point on a monthly basis. A declared Baseline, for a certain month M , is of sufficient quality when the declared Baseline has a Baseline quality factor that exceeds 80% for this month M . This is represented by the following formula:

$$Quality\ Factor(DP, M) \geq 80\%$$

Where:

- DP is the Delivery Point (Group) for which the Baseline quality factor is calculated; and

- M is the month for which the Baseline quality factor is evaluated.

The Baseline quality factor for a month M is calculated as the average quality factor of each day D contained in month M :

$$Quality\ Factor\ (DP, M) = \frac{\sum_{D \in M} Quality\ Factor(DP, D)}{N}$$

Where:

- $Quality\ Factor(DP, D)$ is the quality factor for day D ; and
- N is the number of days contained in month M .

In turn, the quality factor for a day D is calculated as:

$$Quality\ Factor(DP, D) = 1 - \frac{RMSE(DP, D)}{\max\left\{\frac{1}{N} \sum_{t \in D} P_{Baseline, declared}(DP, t); 1\right\}}$$

Where:

- $RMSE(DP, D)$ is the root mean square error of the declared Baseline for day D ; and
- N is the number of MTUs contained in day D , considering the exclusion of certain MTUs in accordance with the provisions below; and
- $P_{Baseline, nominated}(DP, t)$ is the declared Baseline value for MTU t on day D .

Lastly, the root mean square error of the declared Baseline is defined as:

$$RMSE(DP, D) = \sqrt{\frac{1}{N} \sum_{t \in D} [P_{Baseline, declared}(DP, t) - P_{measured}(DP, t)]^2}$$

Where:

- $P_{Baseline, declared}(DP, t)$ is the declared Baseline value for the Delivery Point DP and for MTU t ; and
- $P_{measured}(DP, t)$ is the Measured Power of the concerned Delivery Point observed during MTU t ; and
- N is the number of MTUs contained in day D , considering the exclusion of certain MTUs in accordance with the provisions below.

As the declared Baseline value for a Delivery Point is only equal to the consumption of the Delivery Point in the absence of an activation in any market, the following MTUs are excluded from the calculation of the quality factor for a day D :

- All MTUs t during which at least one of the Declared Prices of the CMU (of which the Delivery Point is part of) is exceeded; and
- All MTUs t during which the Delivery Point delivered energy in any of the balancing services (aFRR, mFRR, FCR, Redispatching).

To ensure that enough data remains for an accurate calculation of the Baseline quality factor, ELIA requires that at least 60% of all MTUs occurring during month M remain for the calculation

of the Baseline quality factor for month M. Whenever this requirement is not fulfilled, the Baseline quality requirement is considered not to be met, and the fallback procedure described in section 18.3.3.3 applies.

18.3.3.3 Fallback procedure

For each month M where the declared Baseline does not respect the Baseline quality requirements as described in the section above, ELIA applies the fallback procedure described in this section.

ELIA reverts back to the High X of Y baseline methodology, as described in annex 18.3.2 for each month M and for each Delivery Point for which the Baseline quality requirements are not met.

18.3.4 ANNEX C.4: SLA MTU DETERMINATION METHODOLOGY

This annex describes the determination of the SLA MTUs that are used in the framework of the Availability Monitoring as per section 9.4.

The methodology aims to select the MTUs where the CMU showed to react the most to price signals. This happens based on the initial Active Volume, as calculated in accordance with 9.4.3.2.3.1.

18.3.4.1 Determination of SLA MTUs for CMUs with Daily Schedule

Daily schedule CMUs do not declare a Declared Day-ahead Market Price (according to section 9.4.2). The determination of SLA MTUs for CMUs with Daily Schedule occurs on the basis of:

- when, during the day, an AMT MTU occurred; and
- when, during the AMT MTUs, initial Active Volume has the highest value.

ELIA, in doing so, retains a set of MTUs that, when it imposes an activation (thereby not imposing more than one activation per day), does not exceed the number of hours N specified in the CMU's SLA. ELIA applies the following procedure to select the SLA MTUs for a given day:

- i. ELIA selects all AMT Moments (i.e. all sets of consecutive AMT MTUs, as per section 9.4.1.1) occurring on the concerning day;
- ii. If no Proven Availability was observed during any AMT MTUs occurring within the concerning day, ELIA retains all MTUs selected in step i as SLA MTUs;
- iii. If during at least one AMT MTU Proven Availability was observed, for every AMT Moment selected in step i, ELIA retains:
 - all AMT MTUs within the AMT Moment if the total duration of the set of AMT MTUs within the AMT Moment is lower than or equal to N hours; or
 - the set of consecutive AMT MTUs with a total duration of N hours within the AMT Moment with the highest average initial Active Volume if the total duration of the set of AMT MTUs within the AMT Moment exceeds N hours;
- iv. From the sets of AMT MTUs retained in step iii, ELIA selects the set with the highest average initial Active Volume. In case of equal amounts of average initial Active Volume, ELIA selects the set of AMT MTUs that contains the MTU with the highest observed Belgian Day-ahead Market Price.

18.3.4.2 Determination of SLA MTUs for CMUs without Daily Schedule

CMUs without Daily Schedule declare Declared Prices (see section 9.4.2) and potentially Partial Declared Prices. The selection of SLA MTUs occurs on the basis of:

- when, during the day, an AMT MTU occurred; and
- when initial Active Volume has the highest value; and

- the possible surpassing of at least one (Partial) Declared Price was surpassed on its respective market; and
- if no Declared Price was surpassed during any AMT MTU within the concerning day, the CMU is considered as Available with unproven availability for all AMT MTUs (according to section 9.4.2).

ELIA retains a set of MTUs that, when it imposes an activation (thereby not imposing more than one activation per day), does not exceed the number of hours N specified in the CMU's SLA. ELIA applies the following procedure to select the SLA MTUs for a given day:

- i. ELIA selects all AMT MTUs occurring on the concerning day;
- ii. If none of the CMU's (Partial) Declared Prices were surpassed during any AMT MTUs occurring within the concerning day, ELIA retains all MTUs selected in step i as SLA MTUs;
- iii. If at least one of the CMU's (Partial) Declared Prices was surpassed during at least one AMT MTU occurring within the concerning day, ELIA retains all AMT MTUs for which at least one (Partial) Declared Price was surpassed;
- iv. From each (set of) consecutive AMT MTUs selected in step iii ELIA retains:
 - all AMT MTUs if the total duration of the set of AMT MTUs is lower than or equal to N hours; or
 - the set of consecutive AMT MTUs with a total duration of N hours with the highest average initial Active Volume if the total duration of the AMT MTUs within the set exceeds N hours.
- v. From the sets of AMT MTUs retained in step iv ELIA selects the set with the highest average initial Active Power. In case of equal amounts of average initial Active Power, ELIA selects the set of AMT MTUs that contains the hour with the highest observed Belgian Day-ahead Market Price.

18.3.5 ANNEX C.5: CORRECTIONS FOR PARTICIPATION IN FREQUENCY-RELATED ANCILLARY SERVICES AND REDISPATCHING SERVICES

This annex details the corrections that are carried out in the determination of either:

- The Available Capacity for Daily Schedule CMUs in the context of Availability Monitoring (following section 9.4.3.2.2); or
- The Active Volume for Non-daily Schedule CMUs in the context of Availability Monitoring (following section 9.4.3.2.3.1); or
- The Available Capacity in Availability Testing (following section 9.5.2.2).

The correction for a CMU is calculated as the sum of the corrections for the Delivery Points that constitute it. For each individual Delivery Point, a correction is calculated for participation to frequency-related Ancillary Services and Redispatching Services. This is represented by the following formula:

$$V_{correction}(CMU, t) = \sum_{DP \in CMU} V_{correction,AS}(DP, t) + \sum_{DP \in CMU} V_{correction,RD}(DP, t)$$

Where:

- $V_{correction,AS}(DP, t)$ is the correction for participation to frequency-related Ancillary Services of Delivery Point DP on MTU t ; and
- $V_{correction,RD}(DP, t)$ is the correction for participation to Redispatching Services of Delivery Point DP on MTU t .

The correction for participation to frequency-related Ancillary Services for a Delivery Point is calculated as:

$$V_{correction,AS}(DP, t) = V_{FCR}(DP, t) + \sum_{p \in P} (Max\{0; V_{capacity,UP,p}(DP, t) - V_{energy,UP,p}(DP, t)\} + V_{energy,DOWN,p}(DP, t))$$

Where:

- $V_{capacity,UP,p}(DP, t)$ is the total upward contracted capacity volume of the Delivery Point DP for product p on MTU t , calculated in accordance with 18.3.5.1; and
- $V_{energy,UP,p}(DP, t)$ is the total upward delivered energy volume of the Delivery Point DP for product p on MTU t ; and
- $V_{energy,DOWN,p}(DP, t)$ is the total downward delivered energy volume of the Delivery Point DP for product p on MTU t ; and
- P is the set of frequency restoration reserve Capacity Providers can participate in, i.e. aFRR and mFRR; and
- $V_{FCR}(DP, t)$ is the total contracted capacity of Delivery Point DP for FCR on MTU t .

The correction for participation to Redispatching Services for a Delivery Point is calculated as:

$$V_{correction, RD}(DP, t) = V_{RD, DOWN}(DP, t)$$

Where:

- $V_{RD, DOWN}(DP, t)$ is the total amount of delivered downwards Redispatching that was delivered by a Delivery Point DP on MTU t .

18.3.5.1 Allocation of contracted capacity volumes

The total upward contracted capacity volume, $V_{capacity, UP, p}(DP, t)$, cannot be retrieved directly per Delivery Point, as balancing service providers (BSP) participate in these auctions with a portfolio of Delivery Points.

Therefore, to calculate $V_{capacity, UP, p}(DP, t)$ ELIA first takes all energy bids of the BSP that are linked to the contracted capacity bid for a certain product (i.e., aFRR or mFRR) and scales them proportionally such that the total volume of all energy bids linked to that capacity bid is equal to the volume of the capacity bid:

$$V_{energy, UP, p, scaled}(Bid, t) = V_{capacity, UP, p}(BSP, t) \cdot \frac{V_{energy, UP, p}(Bid, t)}{\sum_{b \in B} V_{energy, UP, p}(b, t)}$$

Where:

- $V_{capacity, UP, p}(BSP, t)$ is the total upward contracted capacity of the BSP on MTU t ; and
- $V_{energy, UP, p}(x, t)$ is the total upward energy volume of bid x for product p on MTU t ; and
- B is the set of all upward energy bids that are linked to the upward contracted capacity bid of the BSP for product p on MTU t ; and
- Bid is one of the upward energy bids of the BSP that is linked to the upward contracted capacity bid of the BSP; and
- BSP is the balancing service provider that has Delivery Point DP in its portfolio for product p .

In a second step, ELIA will allocate the volume of the scaled energy bid to the different Delivery Points contained in the bid based on the total delivery of energy of the Delivery Points over a period of three months. This is represented by the following formula:

$$V_{capacity, UP, p}(DP, Bid, t) = V_{energy, UP, p, scaled}(Bid, t) \cdot \frac{\sum_{t \in T} V_{energy, UP, p}(DP, t)}{\sum_{DP \in BSP} \sum_{t \in T} V_{energy, UP, p}(DP, t)}$$

Where:

- $V_{energy, UP, p, scaled}(Bid, t)$ is the scaled upward delivered energy bid volume of the energy bid linked to the capacity bid for product p on MTU t that contains the Delivery Point DP ; and
- Bid is one of the upward energy bids of the BSP that is linked to the upward contracted capacity bid of the BSP; and

- $V_{energy,UP,p}(DP, t)$ is the total upward delivered energy volume of the Delivery Point DP for product p on MTU t ; and
- T is the set of MTUs during which an energy bid, containing Delivery Point DP , for product p was activated during the last three months prior to month M ; and

Finally, the total volume of the capacity bids of the Delivery Point is the sum of the allocated volumes over all the energy bids linked to the upward contracted capacity:

$$V_{capacity,UP,p}(DP, t) = \sum_{Bids} V_{capacity,UP,p}(DP, Bid, t)$$

18.3.5.2 Corrections for Indirect Foreign Capacity

In case a different approach must be used for Indirect Foreign Capacities, these are included in the subsequent sections.

18.3.5.2.1 Corrections for Dutch CMUs

The applied methodology is identical to the one applied for Belgian CMUs without Daily Schedule.

18.3.5.2.2 Corrections for French CMUs

The applied methodology is identical to the one applied for Belgian CMUs.

18.3.5.2.3 Corrections for German CMUs

For German Daily Schedule CMUs, the correction is based on the information provided in the framework of the German implementation⁶² of the Article 40, paragraph 7 of the System Operator Guideline⁶³.

For each German Delivery Point i , the correction for each MTU t is calculated as

$$V_{correction}(i, t) = V_{PRL,UP}(i, t) + V_{SRL,UP}(i, t) + V_{MRL,UP}(i, t) + V_{RD,DOWN}(i, t)$$

Where:

- $V_{PRL,UP}(i, t)$ is the amount of upwards primary reserve (*positive Primärregelleistung*, "+PRL") that was registered for a Delivery Point i and MTU t ; and
- $V_{SRL,UP}(i, t)$ is the amount of upwards secondary reserve (*positive Sekundärregelleistung*, "+SRL") that was registered for a Delivery Point i and MTU t ; and
- $V_{MRL,UP}(i, t)$ is the amount of upwards tertiary reserve (*positive Minutenreserveleistung*, "+MRL") that was registered for a Delivery Point i and MTU t ; and
- $V_{RD,DOWN}(i, t)$ is the amount of downwards Redispatching (*negativer Redispatchabruf*, "-RDA") that was registered for a Delivery Point i and MTU t .

18.3.6 ANNEX C.6: DECLARATION MODALITIES FOR (PARTIAL) DECLARED PRICES AND ASSOCIATED VOLUMES

This annex contains the practical modalities linked to the declaration of (Partial) Declared Prices as per section 9.4.2.

The declaration modalities for Declared Prices are set out in annex 18.3.6.1.

The declaration modalities for Partial Declared Prices and Associated Volumes are set out in annex 18.3.6.2.

Finally, the modalities for the request for the termination of the application of (Partial) Declared Prices are set out in annex 18.3.6.3.

18.3.6.1 Declaration modalities for Declared Prices

The Capacity Provider includes in the notification of (an update of) Declared Prices:

- the CMU ID to which the communicated (Partial) Declared Price(s) applies; and
- for each Declared Price, the single value of the price in €/MWh with 0.01 €/MWh precision; and
- in case of a set that contains a Declared Price for each MTU in a one day of the relevant price reference, the MTU of the start and the MTU of the end time for every Declared Price in the set.

The notification can contain one or more (sets of) Declared Price(s) provided that it contains the complete information for each of these references. ELIA accepts the notification under the following conditions:

- all above required information is present in the notification; and
- The Declared Prices do not exceed the relevant price cap of the market for which the price is applicable; and
- in case of a set of prices, the number of prices listed in the notification is equal to the number of MTUs in the day on the market to which the Reference Price applies.

In case of acceptance, the Capacity Provider automatically receives a notification of acceptance.

In case of rejection, the Capacity Provider automatically receives a notification of rejection along with the reasons for rejection. ELIA does not apply the rejected values.

18.3.6.2 Declaration modalities for Partial Declared Prices and Associated Volumes

The Capacity Provider includes in the notification of (an update of) Partial Declared Prices:

- the identification of the CMU to which the communicated the Partial Declared Price(s) applies; and

- for each Partial Declared Price(s), the single value of the price in €/MWh with 0.01 €/MWh precision; and
- for each Partial Declared Price(s), the single value of the Associated Volume to this price, which represents a part of the CMU's capacity, in MW with 0.01 MW precision; and
- in case of a set that contains a Declared Price for each MTU in a single calendar day of the relevant price reference, the start and end time of the MTUs for every Declared Price in the set.

The Capacity Provider may include one or more (sets of) Partial Declared Price(s) in the notification provided that it contains the complete information for each of these prices. ELIA accepts the notification under the following conditions:

- every stated Partial Declared Price has a stated Associated Volume; and
- none of the stated Associated Volumes exceed the Nominal Reference Power of the CMU; and
- for any Partial Declared Price, the Capacity Provider has notified, prior to or along with the concerned notification, a Declared Price for the CMU and for the corresponding reference price; and
- for the same reference, the stated Partial Declared Price is not greater than or equal to its Declared Price for that reference price; and
- for the same reference, two stated Partial Declared Prices do not have the same Associated Volume; and
- for the same reference price, two stated Partial Declared Prices are not equal; and
- for the same reference price, one stated Partial Declared Price can only be greater than another previously notified Partial Declared Price if the Associated Volume is higher than the previous Associated Volume; and
- for any Partial Declared Intraday or Balancing Price, the CMU has a stated or previously notified Partial Declared Day-Ahead Price with the same Associated Volume; and
- for every stated set of Partial Declared Prices, there are n values stated in the set, where n corresponds to the amount of market segments (DA/ID/BAL, as applicable) for that reference price included in one day.
- for every stated set of n prices, each price within the set corresponds to a single Associated Volume.

The Associated Volume always refers to the total capacity of the CMU the Capacity Provider is prepared to dispatch. It is not an incremental volume in relation to a different Partial Declared Price and Associated Volume.

In case of acceptance, the Capacity Provider automatically receives a notification of acceptance.

In case of rejection, the Capacity Provider automatically receives a notification of rejection along with the reasons for rejection. ELIA does not apply the rejected values.

At any moment, the Capacity Provider may request ELIA to terminate the application of any of the above Partial Declared Prices. By exception, for (sets of) Partial Declared Day-ahead Prices that still have a (set of) Partial Intraday or Partial Declared Balancing Price(s) for the

same Associated Volume, the Capacity Provider terminates the latter prices jointly with or after the termination of the (set of) Partial Declared Day-ahead Price(s).

18.3.6.3 Modalities for the termination of application of (Partial) Declared Prices

In case the Capacity Provider wishes to terminate the application of (sets of) Partial Declared Day-Ahead Prices that still have a (set of) Partial Declared Intraday or Balancing Price(s) for the same Associated Volume, such request is only accepted when the Capacity Provider also terminates the latter prices jointly with or after the termination of the (set of) Partial Declared Day-Ahead Price(s).

18.3.7 ANNEX C.7: COMMUNICATION BETWEEN ELIA AND OTHER SYSTEM OPERATORS

This Annex describes the transfer of data and other information between ELIA and other system operators (DSOs, Foreign TSOs, etc.) in the context of the Availability Obligation as described in chapter 9.

ELIA communicates to the DSO and to the Foreign TSO at the latest on the third Working Day of month $M + 1$ the Delivery Points for which data is required. In case of Secondary Market Transactions notified after the third Working Day of month $M + 1$, ELIA promptly notifies the DSO or Foreign TSO of additional Delivery Points for which data is required.

For DSO-connected Delivery Points or CDS-connected Delivery Points when the CDS is connected to the DSO Grid (excluding low-voltage Delivery Points), the DSO provides ELIA with the Measured Power data for every MTU of month M at the latest on the 11th Working Day of month $M + 1$.

For DSO-connected low voltage Delivery Points or CDS-connected low voltage Delivery Points when the CDS is connected to the DSO Grid, the DSO provides ELIA with the Measured Power data for every MTU of month M that is aggregated per Low Voltage Delivery Point Group and per direction at the latest on the 21st Working Day of month $M + 1$.

For Indirect Foreign Capacities the Foreign TSO provides ELIA with the following information for every MTU of the month M at the latest on the 11th Working Day of month $M + 1$:

- The Measured Power data as well as the last values from the Daily Schedules for Delivery Points with a Daily Schedule; and
- The data that allows ELIA to calculate the corrections for participation in frequency-related Ancillary Services as per annex 18.3.5.

18.4 ANNEX D: SECONDARY MARKET PROCESS

18.4.1 ANNEX D.1: SECONDARY MARKET EXCHANGE MANDATE FORM

Prequalified CRM Candidate / Capacity Provider:

[[•]](mandatory field)

Prequalified CRM Candidate ID, as specified in the CRM IT Interface during the Prequalification Process / Capacity Provider ID, as specified in his Capacity Contract annex A, and as specified in the CRM IT Interface:

[[•]](mandatory field)

Address:

[[•]](mandatory field)

Represented by:

[[•]](mandatory field)

Function:

[[•]](mandatory field)

Hereafter the "Prequalified CRM Candidate / Capacity Provider"

And,

Exchange:

[[•]](mandatory field)

Address:

[[•]](mandatory field)

Represented by:

[[•]](mandatory field)

Function:

[[•]](mandatory field)

Hereafter the "**Exchange**".

Please select the appropriate option:

Option A. Secondary Market Exchange Mandate granting: The **Prequalified CRM Candidate / Capacity Provider** gives a Secondary Market Exchange Mandate to the **Exchange** in order to notify Secondary Market transactions in the CRM as of **[[•](mandatory field)]**. The Exchange commits to inform ELIA on its compliance with the Exchange definition of the CRM, including as a result of any modification of the legislation referred to in the definition of Exchange in Chapter 3. In case the Exchange cannot demonstrate such compliance, ELIA will revoke the affected Exchange’s mandate with immediate effect 5 Working Days after the notification of that decision to the affected Exchange.

Or,

Option B. Secondary Market Exchange Mandate revocation:

Option B.1: The **Prequalified CRM Candidate / Capacity Provider** revokes unilaterally the ongoing Secondary Market Exchange Mandate given to the **Exchange**.

For the Prequalified CRM Candidate / Capacity Provider, Read and approved, Name: Function: Place : Date : Signature :

Option B.2: The **Prequalified CRM Candidate / Capacity Provider and the Exchange** terminate by mutual agreement the ongoing Secondary Market Exchange Mandate given to the **Exchange**.

18.5 ANNEX E: FINANCIAL SECURITIES

18.5.1 ANNEX E.1: STANDARD BANK GUARANTEE FORM ASSOCIATED WITH THE FUNCTIONING RULES [●]

Bank guarantee at first request issued by [●] in favour of: [●] (**ELIA Transmission Belgium NV/SA**), hereafter called the Beneficiary, in the context of the Capacity Remuneration Mechanism introduced by article 7undecies of the Belgian Act of 29 April 1999 on the organization of the electricity market (hereafter called the Electricity Act).

Our payment guarantee references: [●] (**to be filled in by the financial institution**) (to be mentioned in all correspondence).

[Our client [●] (**name of the CRM Actor**) informs us that it has submitted/will submit (a) Prequalification File(s) to ELIA Transmission Belgium NV/SA for the CMU(s) with identification number(s) [●] (**identification number(s) of the Capacity Market Unit(s)**) in relation to the Functioning Rules⁶⁴ referred to in article 7undecies of the Electricity Act, with which it intends to participate to the Primary Market and/or the Secondary Market.]

The terms of the Functioning Rules provide for the issue of an irrevocable bank guarantee payable at first demand for the amount of [●] (**Euro and amount in figures and words**) in order to secure the requested and punctual fulfilment by our client of its obligations in respect of the pre-delivery control processes (including the signature of a Capacity Contract) with respect to the CMU [or, as the case may be, (a) future CMU(s) of our client to which the obligations of a Virtual CMU are transferred] (**to be added for a Virtual CMU**).

Accordingly we, [●] (**to be filled in by the financial institution**), hereby irrevocably and unconditionally undertake to pay, in one or more payments, the amount of which corresponds to the penalty applied to the non-fulfilment of a pre-delivery obligation (including the non-signature of a Capacity Contract), up to a maximum amount of [●] (**Euro and amount in figures and words**) upon a simple request on the Beneficiary's part and being unable to dispute the grounds for such payment.

This guarantee shall enter into force as of today.

This guarantee can only be invoked by the Beneficiary as of the date of the publication of the Auction results (validated by CREG) confirming the selection of (part of) the CMU in the Auction, or the date of the notification by the Beneficiary to our client of the validation of a transaction for (part of) its CMU in the Secondary Market, whichever date applies first. (**Note to CRM actors:** In the event of a single financial guarantee for both Primary and/or Secondary Market Transactions, the guarantee will be invokable as soon as either the Auction results are validated by the CREG or a transaction in the Secondary Market is validated.) We are aware that the pre-delivery obligations of our client are monitored in an undivided way on the level of a CMU and that our obligation under this guarantee is proportionately limited to the part that the capacity covered by this guarantee takes in that CMU, as the case may be.

To be valid, any invoking of this guarantee respects the following modalities:

- must reach us by [●] (expiry date of the guarantee) and

⁶⁴ Terms in this template starting with a capital letter, if not already defined in this template, are defined terms under the Functioning Rules.

- be accompanied by the publication of the Auction results (validated by CREG) confirming the selection of its CMU in the auction and/or the notification(s) by the Beneficiary to our client of the validation of (a) transaction(s) in the Secondary Market; and
- be accompanied by the Beneficiary's written statement to the effect that our client has not fulfilled its pre-delivery obligations under the Functioning Rules, as further specified, as the case may be, in a Capacity Contract with respect to the CMU, [or, as the case may be, (a) future Capacity Market Unit(s) of our client to which the obligations of a Virtual CMU are transferred] **(to be added for a Virtual CMU)** and has not made the payment(s) concerned on the due date; and
- be accompanied by a copy of the credit note (or invoice) related to the unpaid due penalties and a copy of the Beneficiary's letter of default.

If the guarantee is not invoked in accordance with the conditions stated above or unless an extension is granted as approved by us, this guarantee automatically becomes null and void on the first calendar day after **[•] (expiry date of the guarantee)**.

This guarantee is governed by and interpreted in accordance with Belgian law and only the Belgian tribunals and courts shall be competent to resolve any disputes with regard to this guarantee.

18.5.2 ANNEX E.2: STANDARD AFFILIATE GUARANTEE FORM ASSOCIATED WITH THE FUNCTIONING RULES [●]

Guarantee at first request issued by [●] in favour of: [●] (**ELIA Transmission Belgium NV/SA**), hereafter called the Beneficiary, in the context of the Capacity Remuneration Mechanism introduced by article 7undecies of the Belgian Act of 29 April 1999 on the organization of the electricity market (hereafter called the Electricity Act).

Our payment guarantee references: [●] (**to be filled in by the guarantor**) (to be mentioned in all correspondence).

[Our client [●] (**name of the CRM Actor**) informs us that it has submitted/will submit a Prequalification File to ELIA Transmission Belgium NV/SA for the CMU(s) with identification number(s) [●] (**identification number(s) of the CMU(s)**) in relation to the Functioning Rules⁶⁵ referred to in article 7undecies of the Electricity Act, with which it intends to participate to the Primary Market and/or the Secondary Market.]

The terms of the Functioning Rules provide, as an alternative to an irrevocable bank guarantee payable at first demand, for the issue of an irrevocable affiliate guarantee payable at first demand for the amount of [●] (**Euro and amount in figures and letters**) in order to secure the requested and punctual fulfilment by our affiliate of its obligations in respect of the pre-delivery control processes (including the signature of a Capacity Contract) with respect to the CMU [or, as the case may be, (a) future Capacity Market Unit(s) of our affiliate to which the obligations of a Virtual CMU are transferred] (**to be added for a Virtual CMU**).

Accordingly we, [●] (**to be filled in by the guarantor**), hereby irrevocably and unconditionally undertake to pay, in one or more payments, the amount of which corresponds to the penalty applied to the non-fulfilment of a pre-delivery obligation (including the non-signature of a Capacity Contract), up to a maximum amount of [●] (Euro and amount in both figures, and words) upon a written request on Beneficiary's part and being unable to dispute the grounds for such payment. A legal opinion provided by an internationally recognized law firm should confirm that the guarantee is legal, valid, binding and enforceable under the applicable law.

This guarantee shall enter into force as of today.

This guarantee can only be invoked by the Beneficiary as of the date of the publication of the Auction results (validated by CREG) confirming the selection of (part of) its CMUs in the Auction, or the date of the notification by the Beneficiary to our subsidiary of the validation of a transaction for (part of) its CMU in the Secondary Market, whichever date applies first. (**Note to CRM actors:** In the event of a single financial guarantee for both Primary and/or Secondary Market Transactions, the guarantee will be invokable as soon as either the Auction results are validated by the CREG or a transaction in the Secondary Market is validated.) We are aware that the pre-delivery obligations of our subsidiary are monitored in an undivided way on the level of a CMU and that our obligation under this guarantee is proportionately limited to the part that the capacity covered by this guarantee takes in that CMU, as the case may be.

To be valid, any invoking of this guarantee respects the following modalities:

⁶⁵ Terms in this template starting with a capital letter, if not already defined in this template, are defined terms under the Functioning Rules.

- must reach us by [●] (expiry date of the guarantee); and
- be accompanied by the publication of the Auction results (validated by CREG) confirming the selection of its CMU in the Auction and/or the notification(s) by the Beneficiary to our subsidiary of the validation of (a) transaction(s) in the Secondary Market; and
- be accompanied by the Beneficiary's written statement to the effect that our subsidiary has not fulfilled its pre-delivery obligations under the Functioning Rules, as further specified, as the case may be, in a Capacity Contract with respect to a CMU [or, as the case may be, future Capacity Market Unit(s) of our subsidiary to which the obligations of the Virtual CMU are transferred] **(to be added for a Virtual CMU)** and has not made the payment(s) concerned on the due date; and
- be accompanied by a copy of the credit note (or invoice) related to the unpaid due penalties and a copy of the Beneficiary's letter of default.

If the guarantee is not invoked in accordance with the conditions stated above or unless an extension is granted as approved by us, this guarantee automatically becomes null and void on the first calendar day after **[●] (expiry date of the guarantee)**.

This guarantee is governed by and interpreted in accordance with Belgian law and only the Belgian tribunals and courts shall be competent to resolve any disputes with regard to this guarantee.

18.5.3 ANNEX E.3: STANDARD BANK GUARANTEE AMENDMENT FORM ASSOCIATED WITH THE FUNCTIONING RULES [●]

Reference number

[reference number of the original bank guarantee]

Topic

Bank guarantee – amendment

The signee, [●] (**issuer of the bank guarantee**) confirms that he has changed the bank guarantee with number [●] (**reference number of the original bank guarantee**) with regard to [●] (**name of the CRM Actor**) for CMU(s) with identification number(s) [●] (**identification number(s) of the Capacity Market Unit(s)**) as follows.

(Select as appropriate)

[The amount of the bank guarantee has changed from EUR [●] (**initial amount of the bank guarantee before the amendment request**) to EUR [●] (**initial amount for the request to amend the bank guarantee**). The total commitment of the signee under this guarantee has therefore been brought and now amounts to EUR [●] (**increased amount of the bank guarantee**).]

AND/OR:

[The expiry date from the bank guarantee is changed from [●] (**initial expiry date from the bank guarantee**) to [●] (**new expiry date of the bank guarantee**). The commitment of the signee under this guarantee has thus been extended and now runs until [●] (**new expiry date of the bank guarantee**).]

AND/OR:

[The CMU(s) with identification number(s) for which the bank guarantee is to be considered is changed from [●] (**initial identification number(s) of the Capacity Market Unit(s)**) to [●] (**new identification number(s) of the Capacity Market Unit(s)**).]

This amendment shall enter into force as of the date of the signature of the amendment.

This amendment can only be invoked by the Beneficiary as of the date of the publication of the Auction results (validated by CREG) confirming the selection of (part of) the CMU(s) referred above in the Auction, or the date of the notification by the Beneficiary to our subsidiary of the validation of a transaction for (part of) the CMU(s) referred above in the Secondary Market, whichever date applies first. (**Note to CRM actors:** In the event of a single financial guarantee for both Primary and/or Secondary Market Transactions, the guarantee will be invocable as soon as either the Auction results are validated by the CREG or a transaction in the Secondary Market is validated.)

All other conditions of the original affiliate guarantee remain unchanged and apply mutatis mutandis.

18.7 ANNEX G: DISPUTES

Rules of Procedure for the CRM Disputes Committee

1. General principles

1.1. Mission

1. The mission of the CRM Disputes Committee is to handle CRM-related disputes with a view to offering a rapid and effective solution for resolving disputes as well as avoiding, as far as possible, any significant delay in the operation of the CRM.
2. The CRM Disputes Committee helps the parties to resolve their disputes by adopting a Recommendation and/or a Binding Decision.

1.2. Remit

3. The CRM Disputes Committee is authorised to rule on any dispute arising in connection with the CRM that is brought before it by a CRM Actor or by ELIA.
4. The dispute is examined in accordance and in compliance with regulation (EU) 2019/943 on the internal market for electricity, the Electricity Act of 29 April 1999, the ensuing Royal Decrees, the Functioning Rules and, where applicable, the Capacity Contract and any other applicable legislation or regulation.

2. Composition and organisation

2.1. Organisation of the CRM Disputes Committee

5. The CRM Disputes Committee comprises three members and is assisted by a Secretariat.

2.2. Secretariat

6. The Secretariat of the CRM Disputes Committee is responsible for receiving and managing dispute resolution applications of which it is notified ("Notifications"), checking that the Notification contains all the information required and that the object of the dispute falls *prima facie* within the remit of the CRM Disputes Committee, and for sending any procedure-related information to the parties.

2.3. Members of the CRM Disputes Committee

7. The CRM Disputes Committee comprises three members: the chairman and two *ad hoc* members appointed by the parties..

The Chairman is, depending on the case, the person appointed by CREG in accordance with paragraph 13 (the "Chairman of the CRM Disputes Committee"), or an *ad hoc* chairman appointed by the parties (the "*ad hoc* Chairman"). The term "Chairman" below refers, depending on the case, to the Chairman of the CRM Disputes Committee or the *ad hoc* Chairman.

The Chairman of the CRM Disputes Committee holds a permanent position.

The *ad hoc* Chairman and the *ad hoc* members hold their position only in connection with the dispute for which they have been appointed.

2.4. Criteria for appointing the members of the CRM Disputes Committee

8. All of the members of the CRM Disputes Committee are natural persons.
9. In accepting his mission, a member of the CRM Disputes Committee undertakes to carry out said mission until its completion, in accordance with the provisions of the present Functioning Rules.
10. The Chairman must have legal training with proven experience in energy law and/or disputes.
11. The two other members must have legal training and/or technical training relevant to the CRM context.
12. All members must have a good command of French and Dutch, as well as a passive knowledge of English.
-
13. The members of the CRM Disputes Committee shall be impartial in the exercise of their functions.

The Chairman of the CRM Disputes Committee shall be completely independent, particularly from all CRM Actors, ELIA, the DSOs and the Foreign TSOs.

The *ad hoc* members of the CRM Disputes Committee and, where applicable, the *ad hoc* Chairman, may not under, any circumstances, be in a dependent or authority-based relationship in respect of the party/parties that appoint them.

2.5. Appointment procedure

2.5.1. Procedure for appointing the Chairman

14. The Chairman of the CRM Disputes Committee is appointed by CREG pursuant to a public tender.

However, if a Party submitting a request to the CRM Disputes Committee deems it preferable to appoint an *ad hoc* Chairman, it shall propose such an appointment in its Notification and communicate the identity of the person that it is proposing to appoint.

- Within five (5) Working Days of receipt of the Notification from the Secretariat, the other party shall communicate a notice of response ("Notice of Response") to the Secretariat in which it indicates its position regarding the proposal to appoint an *ad hoc* Chairman, as well as the identity of the person proposed. Within three (3) Working Days of receipt of the Notice of Response, and if they agree on the appointment of a specific *ad hoc* Chairman, the parties shall submit the identity of the *ad hoc* Chairman that they are requesting to appoint to the Secretariat.
-
- In the event of disagreement between the parties, or in the event of failure to respect the prescribed deadline, the Chairman of the CRM Disputes Committee shall proceed on his or her own initiative to appoint an *ad hoc* Chairman.

15. The Chairman of the CRM Disputes Committee is responsible for organising the CRM Disputes Committee and the Secretariat for the duration of his term of office. His appointment is published on the CREG website.

2.5.2. Procedure for appointing ad hoc members

16. The two other members of the CRM Disputes Committee are appointed by the parties to the dispute. One is appointed by the plaintiff (cf. the Notifying Party) and the other by the defendant (cf. the Notified Party).
17. If there are multiple plaintiffs and/or defendants, one member is chosen by the plaintiffs jointly and the other member by the defendants jointly.
18. The Interested Party appoints, in its Notification, an *ad hoc* member. Within five (5) Working Days of receipt of the Notification from the Secretariat, the other party, in turn, communicates to the Secretariat, in its Notice of Response, the identity of the *ad hoc* member that it is appointing. This time period of five (5) Working Days is increased to fifteen (15) Working Days in case of multiple defendants to the main claim.
19. If a party does not appoint a member of the CRM Disputes Committee within the required time period, the Chairman of the CRM Disputes Committee automatically appoints a member.
-
20. When all members of the Disputes Committee are appointed, the Secretariat confirms the composition of the CRM Disputes Committee to the parties.

2.6. Disqualification of a member of the CRM Disputes Committee

21. The parties may not disqualify the Chairman of the CRM Disputes Committee.

An *ad hoc* member of the CRM Disputes Committee or an *ad hoc* Chairman may be disqualified by one or both parties if it/they deem(s) that the *ad hoc* member or *ad hoc* Chairman is clearly not fulfilling the requirements and conditions to take part in the dispute resolution.

22. Any request to disqualify an *ad hoc* member of the CRM Disputes Committee or the *ad hoc* Chairman, must be sent to the Secretariat in writing. The request must clearly state the facts and circumstances justifying any such disqualification.
23. A disqualification request must be submitted within three (3) Working Days following the receipt by the party requesting the disqualification of identity of the *ad hoc* member or *ad hoc* Chairman, or within three (3) Working Days following the day on which the party requesting the disqualification became aware of the reason for the disqualification, if this date is later than the receipt of the aforementioned communication.
24. The Secretariat will submit the request to the Chairman of the CRM Disputes Committee and will inform the *ad hoc* members, where necessary, the *ad hoc* Chairman and the other party(ies).
25. The Chairman of the CRM Disputes Committee will rule on the eligibility and substance of the request after inviting the member in question, or the *ad hoc* Chairman, and the other party(ies) and, where applicable, the other member, to submit any observations in writing within a specified time period. These observations will be communicated to the parties and to the other member of the CRM Disputes Committee.

26. The party whose member has been disqualified will appoint a new member within five (5) Working Days as of the disqualification decision of the Chairman of the CRM Disputes Committee. If another member is not appointed within that period, the Chairman of the CRM Disputes Committee will appoint the member himself.

In the event that the ad hoc Chairman is disqualified, the Chairman of the CRM Disputes Committee shall appoint, in consultation with the parties, a new ad hoc Chairman within five (5) Working Days of its disqualification decision.

2.7. Replacement of the *ad hoc* members of the CRM Disputes Committee and the *ad hoc* Chairman

27. If an *ad hoc* member of the CRM Disputes Committee or the *ad hoc* Chairman must be replaced during the proceedings, he will be replaced within five (5) Working Days following the event that necessitated his replacement.
28. In the event of the replacement or disqualification of an *ad hoc* member, or the *ad hoc* Chairman, the Secretariat shall notify the parties, within two (2) Working Days of the date of the appointment of the new *ad hoc* member, or the new *ad hoc* Chairman, of the modified composition of the CRM Disputes Committee. The proceedings will resume at the stage where the replaced or disqualified member or *ad hoc* Chairman ceased exercising his functions, unless decided otherwise by the Chairman of the CRM Disputes Committee or agreed by the parties.

3. Characteristics

3.1. Location and communication

29. The CRM Disputes Committee is headquartered on the premises of CREG. Unless opposed by the parties, the CRM Disputes Committee may meet at any location it deems appropriate for its deliberations, including for hearings.
30. The Committee's meetings may also take place via any means of communication deemed appropriate.

3.2. Language

31. The languages of the proceedings will be either French or Dutch. Unless otherwise decided by the Chairman, the parties may, by mutual agreement, decide to choose English as the language of the proceedings. The party that submits the dispute to the CRM Disputes Committee will state the language for the proceedings in its Notification.
32. If documents submitted in a language other than the language of the proceedings, they shall be translated by the party submitting them, unless indicated otherwise by the CRM Disputes Committee and/or the other party to the dispute.

3.3. Assistance and representation

33. The parties may be assisted or represented by a lawyer and/or by a duly mandated person.
34. A form of proxy must be appended to any representation, save when a party is represented by a lawyer.

3.4. Experts

35. If the dispute submitted to the CRM Disputes Committee pertains to a complex technical, economic or financial matter, the CRM Disputes Committee may call on the services of one or more independent experts to give an opinion on the matter within a timeframe determined by it.
36. A copy of the expert's mandate will be communicated to the parties.
37. Within the time period ordered by the CRM Disputes Committee, the parties must inform the CRM Disputes Committee if they have objections regarding the expert's qualifications, impartiality or independence. The CRM Disputes Committee will immediately decide on the merits of the objections raised and the measures to take, where applicable.
38. The parties must provide the expert with all relevant information the expert deems useful for his analysis. Any dispute between a party and an expert regarding the relevance of requested information will be submitted to the CRM Disputes Committee, which will decide after having heard the expert and the parties.

39. Upon receipt of the expert's report, the CRM Disputes Committee will send a copy of the report to the parties, who have the option of expressing, in writing, their observations on the report. At the request of one party, the expert may be heard at a hearing during which the parties may ask him or her questions.

3.5. Communications

40. The Secretariat is, in principle, responsible for communication between the CRM Disputes Committee and the parties. Nevertheless, when the parties have appointed an *ad hoc* Chairman, such person shall ensure the follow-up of communications with the *ad hoc* members and with the parties within the context of the dispute. These communications and the case documents are stored in a centralised IT tool made available by the Secretariat.

41. Unless a party expressly requests that communications be sent to the postal address mentioned in the Notification, communications will be validly sent to the parties' respective e-mail addresses.

42. Communication sent to a party's counsel, or to any other authorised representative, is deemed to have been sent to the party itself.

43. The parties must communicate any change of address. Any communication sent to the last address communicated to the CRM Disputes Committee is valid.

3.6. Schedule

44. Any time period provided by these Rules of Procedure shall start on the following day. The expiry date is included in the time period. If the last day is a public holiday or a weekend, the period will expire the next Working Day.

45. The Chairman may, either on his own initiative or at the justified request of a party, shorten or extend time periods. In such cases, the parties will immediately be consulted prior to the decision.

46. The Chairman may, under unusual circumstances, on his or her own initiative or pursuant to a justified request from a party suspend proceedings underway for a specified period of time.

47. If the parties wish to oppose the schedule, they may send their observations to the CRM Disputes Committee, which will take a decision that takes into account the viewpoints expressed.

3.7. Costs

48. The costs for bringing a matter before the CRM Disputes Committee ("dispute resolution fees") include the costs, including fees, for the Chairman of the CRM Disputes Committee or, where applicable, the *ad hoc* Chairman and the *ad hoc* members, and the administrative costs.

49. The dispute resolution fees are determined in advance and as accurately as possible by the Chairman of the CRM Disputes Committee, in consultation with the Secretariat, taking into account the importance, urgency and complexity of the dispute and the resolution requested. The decision on dispute resolution fees will be communicated by the Secretariat to the parties to the dispute within five (5) Working Days as of the acknowledgement of receipt of the Notification.

- When an *ad hoc* Chairman has been appointed by the parties, or designated by the Chairman of the CRM Disputes Committee, the decision on the dispute resolution fees is reviewed and, where necessary, adapted in consultation with the *ad hoc* Chairman, within two (2) Working Days of his or her appointment/designation.

- During the proceedings, and after having heard the parties, the Chairman of the CRM Disputes Committee may decide to adjust the amount of the dispute resolution fees when the circumstances of the case, or the submission of additional claims, show that the level of complexity or scope of the dispute is different to that initially noted. However, any such adaptation may only be authorised after the Chairman of the CRM Disputes Committee has solicited the views of the parties to the dispute and, where necessary, the *ad hoc* Chairman.

- In the event of the joinder of several cases, the CRM Disputes Committee shall revise the dispute resolution fees in consultation with the parties.

50. When he has decided on the fees, the Chairman of the CRM Disputes Committee undertakes to comply, insofar as possible, with the following minimum and maximum amounts:
- Recommendation procedure: minimum of €4,500 and maximum of €15,000;
 - Binding Decision procedure: minimum of €4,500 and maximum of €75,000;
 - Additional costs incurred for urgency proceedings: minimum of €7,500 and maximum of €45,000.

The overall amounts are divided between the members of the CRM Disputes Committee.

For proceedings seeking compensation for damage suffered in connection with the CRM, the Chairman of the CRM Disputes Committee may depart from the above-mentioned amounts and must give his reasons for doing so.

- In all other cases, the Chairman of the CRM Disputes Committee may only depart from the aforementioned amounts where doing so is justified by objective information relating to the amount of the dispute, the complexity of the matter or the time needed to manage the case by the members of the CRM Disputes. However, such derogation can only be authorised after the Chairman of the CRM Disputes Committee has solicited the views of the parties to the dispute.
-
- All members of the CRM Disputes Committee must maintain a detailed sheet containing a description of tasks carried out and the time devoted thereto.

51. Each party will bear its own costs.

52. In principle, the dispute resolution fees as well as the experts' fees will be borne by the party(ies) incurring them. However, the CRM Disputes Committee may allocate these fees between the parties if it deems that such allocation is reasonable in light of the circumstances of the particular case.

53. The Chairman of the CRM Disputes Committee may ask the parties to pay, as a provision, an amount corresponding to part or all of the dispute resolution fees pertaining to the appointment of experts. He or she may suspend the proceeding until payment of this provision.

- The Chairman of the CRM Disputes Committee may, during the proceedings and following his or her decision to adapt the amount of the dispute resolution fees, adapt the amount of the provision to be paid by the parties.
-

At their request, and in consultation with the members of the CRM Disputes Committee, the Secretariat may, subject to a reasoned request and the sending of supporting documentation, pay an advance on their costs and fees to the president and the *ad hoc* members.

3.8. Evidence

54. Each party is responsible for proving the facts evoked in support of its complaint or defence.

55. The CRM Disputes Committee will determine the eligibility, relevance, materiality and importance of the evidence provided.

3.9. Confidentiality

56. The members of the CRM Disputes Committee, as well as the experts, are bound by a confidentiality obligation.

57. The Chairman may not inform the other members of the CRM Disputes Committee, or the experts, of confidential information of which he becomes cognizant during the recommendation procedure.

-

58. Information divulged by the parties during the recommendation procedure are confidential, unless indicated otherwise.

-
59. Information exchanged between the parties during the binding decision procedure are confidential with regard to third parties, unless indicated otherwise.
-

60. If the parties deem that certain information divulged to the CRM Disputes Committee or to the expert appointed by the CRM Disputes Committee is confidential in respect of one or more third parties, they must expressly indicate which information they consider confidential, the reasons justifying the confidential nature of such data, and the party in respect of whom confidentiality is requested. In the event of an objection, the Chairman of the CRM Disputes Committee shall decide on the confidential nature of the information or document concerned.
-

61. The CRM Disputes Committee will take all necessary measures to ensure the confidential processing of information deemed confidential by a party during the procedure, and whose confidential nature has been confirmed, taking care to adequately protect trade secrets and commercially sensitive or personal information.
-

3.10. Rules governing proceedings before the CRM Disputes Committee

62. Proceedings before the CRM Disputes Committee are governed by these Rules of Procedure and, if not mentioned in the Rules of Procedure, by any other rule which the parties or, in the absence thereof, the CRM Disputes Committee can agree on in consultation with the parties.

If the specific circumstances of the dispute require that certain changes be made to the applicable rules of procedure, the CRM Disputes Committee may, in consultation with the parties, determine by reasoned decision countersigned by the parties, which alternative rules of procedure shall apply. In the absence of agreement, the present Rules of Procedure shall apply.

4. Proceedings

4.1. Notification

63. The party that initiates the proceedings must send the Notification to the Secretariat.
64. The Notification must contain the following information:
-
- a) Name, address, telephone number, e-mail address, BCE registration number;
 - b) Type of procedure and decision requested (recommendation procedure and/or Binding Decision procedure, with or without the status of an arbitral award);
 - c) The identity of the *ad hoc* member he or she is appointing (in case of a procedure for a Binding Decision);
 - d) If applicable, a proposal to appoint an *ad hoc* Chairman and his or her identity;
 - e) Summary of the grievances and subject of the requests;
 - f) Where applicable, the urgent nature of the request that can justify the application of the emergency procedure or the granting of provisional measures;
 - g) Choice of language for the proceedings (French, Dutch or English);
 - h) Any document relevant to the dispute;
 - i) Where applicable, a copy of the Capacity Contract.
65. Within three (3) Working Days following the receipt of the Notification, the Secretariat will acknowledge receipt of the Notification to the party initiating the procedure and will communicate the Notification to the other party/to the other parties.

Within five (5) Working Days of receipt of the Notification from the Secretariat, the other party(ies) shall communicate its/their Notice of Response to the Secretariat. In the event of multiple defendants, this time period is increased to fifteen (15) days. The Notice of Response must contain the following information:

- a) Agreement or refusal to bring their dispute before the CRM Disputes Committee;
 - b) Its/their position regarding the choice of type of procedure and decision and, where applicable, regarding the appropriateness of initiating emergency proceedings;
 - c) Where applicable, position regarding giving the Binding Decision the status of an arbitral award;
 - d) The identity of the *ad hoc* member that it(they) is(are) appointing;
 - e) Where applicable, its/their position regarding the appropriateness of appointing the *ad hoc* Chairman and his or her identity;
 - f) If it(they) wish(es), purely for information purposes, a short response to the other information included by the applicant in its Notification.
66. Even if a recommendation procedure has been requested, the *ad hoc* members must already be appointed in order to take part, where applicable, in any binding decision procedure.

4.2. Verification of the Notification

67. The Secretariat verifies whether the Notification contains all the relevant information, or whether additional information needs to be provided. It also verifies whether the dispute falls *prima facie* within the remit of the CRM Disputes Committee and notifies the Chairman of the CRM Disputes Committee.
- The Chairman of the CRM Disputes Committee may, if he or she deems it appropriate before deciding, invite the parties to submit their observations on the issue of the competence of the CRM Disputes Committee, within a time period it determines.
 -
 - The Chairman of the CRM Disputes Committee may, where necessary, give additional time to enable a party to complete its observations.
 -

Within five (5) Working Days of acknowledging receipt of the Notification, the Secretariat notifies the parties, if applicable, of the decision of the Chairman of the CRM Disputes Committee:

- To give more time to the applicant to provide additional and/or missing information;
- To invite the parties to submit their observations, within a time period that it determines, on the issue of the competence of the CRM Disputes Committee.

The granting of additional time shall have the effect of suspending the proceedings.

68. The CRM Disputes Committee may decide, of its own accord or at the request of the parties, to combine disputes which are closely linked or which, for reasons of economy of procedure, must be examined together.

The CRM Disputes Committee may, in consultation with the Secretariat, examine on a preliminary basis, after receipt of the Notification, the appropriateness of joining the case with other cases that have been referred to it. If it deems it appropriate, it may question the parties in the different cases, making sure not to reveal any confidential information.

Joinder is possible both for the recommendation procedure and for the binding decision procedure, after soliciting the views of the parties.

In order to join the disputes, the CRM Disputes Committee adopts a decision of joinder.

Except in case of non-divisibility, and if it contributes to more efficient handling of the case, the CRM Disputes Committee may decide *ex officio*, or at the request of the parties, and after having heard the parties, to split a dispute into two or more cases, each dealing with one part of the dispute.

The parties may decide by mutual agreement to split their dispute and to only submit a part thereof to the CRM Disputes Committee. Where the dispute cannot be divided, and after having heard the parties, the CRM Disputes Committee shall declare that it lacks competence to split the dispute.

4.3. Recommendation procedure

69. The recommendation procedure applies when the parties ask the CRM Disputes Committee for informal assistance with their dispute.
70. The recommendation procedure is handled by the Chairman acting as an intermediary to reconcile the parties.
71. The Chairman begins the informal discussions to this end, or if necessary, meetings with the parties. He may also request additional information, if necessary.
72. Pursuant to discussions and after no more than thirty (30) Working Days (as of the acknowledgement of receipt of the Notification), the Chairman will issue a written recommendation to the parties in order to enable them to reach an agreement.
73. If an amicable solution is found within ten (10) Working Days as of the issuance of the Recommendation, a period which may be extended via the written agreement of each party, the conditions for said solution will be formalised, by the parties, in a written agreement. These conditions must comply strictly with the applicable legislation and regulations.

4.4. Value of the Recommendation

74. The Recommendation issued by the Chairman contains a written proposed resolution to the dispute that complies with the applicable legislation and regulations. The Recommendation does not imply any decision regarding the arguments or requests issued by the parties.
75. The Recommendation is not binding.

4.5. Failure of the recommendation procedure

76. If no amicable solution is found following the recommendation procedure, the first party to act may either ask the CRM Disputes Committee to issue a Binding Decision, or may bring the matter before the relevant tribunal or court.
77. If the first party to act decides to request a Binding Decision, it must send a new notification to the Secretariat ("Additional Notification"). The Additional Notification must comply with the same requirements as those set out in section 4.1 of these Rules of Procedure. The Secretariat will send an acknowledgement of receipt of the Additional Notification to each party.
78. Upon receipt of the acknowledgement of receipt of the Additional Notification, the parties will inform the Secretariat of the names of the *ad hoc* members that they are appointing in accordance with section 2.5.2 of these Rules of Procedure.

4.6. Binding decision procedure

79. If a binding decision procedure is initiated, the parties shall agree on a calendar for the exchange of arguments.
80. The CRM Disputes Committee may organise a hearing during which each party may present its point of view within a specified period of time. The parties will be informed in good time in advance of the date, time and place of the hearing.
81. The CRM Disputes Committee may also ask the parties to produce any information or additional document(s) that it deems necessary in order to resolve the dispute.
82. The CRM Disputes Committee will issue a Binding Decision within a period not exceeding three (3) months as of the acknowledgement of receipt of the Notification by the Secretariat, or within a period not exceeding two (2) months as of the acknowledgement of receipt of the Additional Notification.

-

The CRM Disputes Committee may, with the agreement of the parties, extend this period in order to issue a Binding Decision.

4.7. Intervention by a third party

83. Any party demonstrating a sufficient interest may intervene voluntarily in a binding decision procedure. To that end, it must submit a reasoned request to the Secretariat.

The CRM Disputes Committee will decide on the eligibility of the intervention request after consulting with the parties. If the request is eligible, the intervening party may submit a document explaining its position on the object of the dispute.

A party may also ask another party to intervene in the procedure by virtue of a contractual or legal provision.

84. A third party may only intervene in proceedings after having accepted, in writing, the present Rules of Procedure and on condition that its intervention has been deemed admissible by the CRM Disputes Committee. In this case, the intervening party may, within a time period determined by the CRM Disputes Committee, submit a statement document in which it presents its observations relating to the dispute.
85. Intervention by a third party has no impact on the composition of the CRM Disputes Committee.
86. CREG may not intervene or be forced to intervene as a third party in a procedure before the CRM Disputes Committee.

4.8. Emergency procedure

87. If the dispute is of an urgent nature, the interested party may request in the Notification (or in the Additional Notification) to use the emergency procedure making it possible to issue a Binding Decision within a shorter period of time.
88. Within five (5) Working Days of receipt of the (Additional) Notification from the Secretariat, the other party shall take a position, in its Notice of Response, on the question of urgency. The Chairman of the CRM Disputes Committee will decide on the appropriateness of the emergency procedure, taking into account the points of view expressed by the parties. He or she shall inform the parties of his or her decision on whether or not to initiate an emergency procedure.
89. If an emergency procedure is initiated, the Chairman of the CRM Disputes Committee will itself determine a schedule for the exchange of statement documents and will issue a Binding Decision within a minimum of fifteen (15) and a maximum of twenty-five (25) Working Days as of the acknowledgement of receipt of the Notification or Additional Notification by the Secretariat.
90. Each of the parties may ask the Chairman of the CRM Disputes Committee to adopt provisional measures. A provisional measure is a temporary measure whereby, at any time prior to the adoption of the Binding Decision, the Chairman of the CRM Disputes Committee may order a party, for example, to:
- maintain or re-establish the *status quo* pending the resolution of the dispute;
 - take measures which prevent, or refrain from taking measures likely to cause, (i) immediate or imminent harm or (ii) harm to the process itself;
 - save the items of evidence which can be relevant and important for the resolution of the dispute.
91. The party which requests a provisional measure may be held liable for the costs and damage caused by the requested measure if the Chairman of the CRM Disputes Committee subsequently finds that the measure should not have been granted. The Chairman of the CRM Disputes Committee may grant remedy for said costs and damage at any time during the procedure.

4.9. Binding Decision

4.9.1. Form and content of the Binding Decision

92. The CRM Disputes Committee will take its decision in compliance with the applicable legislation and regulations.
93. The Binding Decision will be adopted by the majority of the members of the CRM Disputes Committee, except within the context of an emergency procedure or a procedure requesting provisional measures, in which the Chairman of the CRM Disputes Committee decides alone.

Prior to its adoption, the Secretariat verifies that the Binding Decision complies with the formal and substantive requirements of the present Rules of Procedure.

94. In addition to the reasons justifying the decision, the Binding Decision will contain the following information:
- a) the names of the members of the CRM Disputes Committee;
 - b) the names and addresses of the parties;
 - c) the object of the dispute;
 - d) the order to pay the dispute resolution fees and, where applicable, the experts' fees;
 - e) the date of the decision;
 - f) the location of the seat of the CRM Disputes Committee;
 - g) the signatures of the members of the CRM Disputes Committee.
95. When the Binding Decision has the status of a binding third-party decision, it is final. The parties undertake to execute it without delay.

When the parties have chosen the arbitration procedure, in accordance with § 945 of the Functioning Rules, the decision of the Disputes Committee has the status of an arbitral award, within the meaning of articles 1676 *et seq.* of the Judicial Code.

4.9.2. Notification of the decision to the parties and publication of the decision

96. The Secretariat will inform the parties of the Binding Decision signed by the members of the CRM Disputes Committee.
97. The Binding Decision will be published in full on the CREG website, unless one party asks that specifically identified information in the Binding Decision be treated confidentially. Said request must be justified and submitted within five (5) Working Days following the communication of the Binding Decision by the Secretariat. In the event of doubt regarding the confidentiality of the publication, the Chairman of the CRM Disputes Committee may submit the question to the CREG for an opinion.

4.9.3. Interpretation of the Binding Decision

98. Within thirty (30) Working Days following the receipt of the Binding Decision, a party may, after a written Notification sent to the other parties, ask the CRM Disputes Committee to provide an interpretation of its Binding Decision or to correct its Binding Decision if it contains a calculation error, a typographical error or any other error or omission of that nature. If the CRM Disputes Committee deems that the request is justified, it will issue the interpretation or correction within thirty (30) Working Days following receipt of the request.

5. Limitation of liability

99. The members of the CRM Disputes Committee will not be liable for any act or omission related to their activity, save in the event of fraud, gross negligence or wilful misconduct.

18.8 ANNEX H: APPLICATION OF PROVISIONS OF FUNCTIONING RULES TO CAPACITY CONTRACTS ALREADY CONCLUDED

This annex is a follow-up to § 11 of the Functioning Rules. It lists the provisions of the present Functioning Rules that do not apply to the Transactions already concluded and, at the same time, the provisions of the previous versions of the Functioning Rules that remain applicable.

An asterisk denotes that none of the provisions of the previous Functioning Rules at the Transaction Date apply.

In this annex reference is made to:

- “2026 Functioning Rules” means the present Functioning Rules;
- “Previous versions of the Functioning Rules” means the previous version of the Functioning Rules established by the CREG before the establishment of the 2025 Functioning Rules, namely:
 - a. “2021 Functioning Rules (FR 2021)” established by the CREG via decision (B)2227 of 14 May 2021 and approved by the Royal Decree of 30 May 2021;
 - b. “2024 Functioning Rules (FR 2024)” established by the CREG via decision (B)2773 of 14 May 2024 and approved by the Royal Decree of 3 June 2024 and modified by decision (B)2773/2 of 13 September 2024 and approved by the Royal Decree of 17 September 2024;
 - c. “2025 Functioning Rules (FR 2025)” established by the CREG via decision (B)2981 of 15 May 2025 and approved by the Royal Decree of 4 June 2025.

This annex is structured such that for every Primary Transaction following an Auction the provisions are listed for newer Functioning Rules which do not apply retro-actively.

18.8.1 Primary market Transactions concluded following the 2021 Auction

For an Annex A concluded following a Transaction related to the Auction organized in 2021, the provisions listed in the middle column do not apply retroactively. Any reference to a paragraph or section refers to version of the Functioning Rules applicable:

Topic	Provisions of “the 2026 Functioning Rules” not applicable to Capacity Contracts concluded following the 2021 Auctions	Provisions of “the previous versions of the Functioning Rules” applicable to Primary Market Transactions following the 2021 Auctions
Prequalification Requirements	Section 5.2 and corresponding annexes	Section 5.2 and corresponding annexes (FR 2021)
Permitting Report	Section 8.3.3	*
Penalties linked to the quarterly report	§§ 417, 418, 420	*

Permitting Report	§§ 427, 428	*
Quarterly Report	§ 440	*
Penalties linked to the pre-delivery report	§§ 448, 449	§ 346 (FR 2021)
Exemption from the Payback Obligation for DSR	§ 847	*
No obligation of the Availability Obligation in case of Scheduled Maintenance	Section 9.3.2	*
Exemption from the Payback Obligation for BESS	§ 847	*
Removal of the Declared Market Prices for capacities without Daily Schedule	Section 12.3	Section 12.3.1.2.4 (FR 2024)

18.8.2 Primary market Transactions concluded following the 2023 Auction

For an Annex A concluded following a Transaction related to the Auction organized in 2023, the provisions listed in the middle column do not apply retroactively. Any reference to a paragraph or section refers to version of the Functioning Rules applicable:

Topic	Provisions of “the 2026 Functioning Rules” not applicable to Capacity Contracts concluded following the 2023 Auctions	Provisions of “the previous versions of the Functioning Rules” applicable to Primary Market Transactions following the 2023 Auctions
Exemption from the Payback Obligation for DSR	§ 847	*
Partial Exemption of Payback Obligation for capacities without Daily Schedule in the framework of a partial activation (Activation Ratio)	NA	*
No obligation of the Availability Obligation in case of Scheduled Maintenance	Section 9.3.2	*
Exemption from the Payback Obligation for BESS	§ 847	*
Removal of the Declared Market Prices for capacities without Daily Schedule	Section 12.3	Section 12.3.1.2.4 (FR 2024)

18.8.3 Primary market Transactions concluded following the 2024 Auctions

For an Annex A concluded following a Transaction related to the Auctions organized in 2024, the provisions listed in the middle column do not apply retroactively. Any reference to a paragraph or section refers to version of the Functioning Rules applicable:

Topic	Provisions of “the 2026 Functioning Rules” not applicable to Capacity Contracts concluded Primary Market Transactions following the 2024 Auctions	Provisions of “the previous Functioning Rules” applicable to Primary Market Transactions following the 2024 Auctions
